Mr. TOWNER. One to connect a port on the open sea with the interior, and that certainly would not be within the purview of this act, and the other is to reach a coal field. Those are the only two objects. Now, the gentleman says he would like a road from Valdez to the copper mines, which is not included within any language, that I can see.

Mr. WICKERSHAM. I think it is. It is in the interior, and

it is for the development of the interior.

Mr. TOWNER. Oh, no; the interior, as the gentleman has told us a dozen times, means the valleys of the Yukon and its tributaries and the valleys of the Koskokwim and its tributaries. That is the interior of Alaska.

Mr. WICKERSHAM. Yes; that is one interior, and I may

have talked more of that than of the other; but I think the lan-

guage is broad enough to cover both.

Mr. TOWNER. When I refer to the interior of Alaska I mean those valleys that contain the copper fields.

Mr. WICKERSHAM. Well, it may be necessary to make an

amendment if the gentleman is correct.

Mr. TOWNER. I am sure there would have to be an amend-

ment. Mr. WICKERSHAM. Now, I want to call attention to this map of the great circle sailing route made by the Hydrographic Office. I call attention to the fact that it is so constructed that a straight line drawn on the map is the shortest line between two points, and I make that Irish statement because the rotundity of the earth would render it untrue on a Mercator's map. A. line drawn from Seattle to Yokohama passes through the Aleutian Islands. A line drawn from San Francisco to Yokohama and then to Hongkong, Shanghai, or Manila passes a little south but substantially near it. The navy yard and naval base at Hawaii are 1,500 miles off the line. In other words, all naval vessels going from Puget Sound should go by the Aleutian They should take the great northern route which was used by the Spaniards in the early days when they sent their ships from Manila to Acapulco, Mexico, and sought to escape the freebooters which infested the more southern routes. It is the old northern route, the great circle sailing route.

Now, in these great harbors in Alaska we have the finest naval base in the world. We have the navy coal back of the harbors, and this Government railroad, if built from one of the harbors back to the coal, would supply the naval base.

Mr. McGUIRE of Oklahoma. Will the gentleman yield?

Mr. WICKERSHAM. Yes.

Mr. McGUIRE of Oklahoma. In that connectica, I understood that the Secretary of the Navy had recently said that this coal is not of a quality that can be used for naval purposes on board ships. Does the gentleman know whether that is

Mr. WICKERSHAM. Yes; there was some coal taken out of the Bering River coal fields-taken out in a very inefficient way, filled with rubbish and rock. It was sent down and put on the dock at San Francisco or Puget Sound, and they under-took to clean and use it. It was not mined by miners; it was not mined by coal men, and I believe the report on that coal

was against it. It came from the Bering River coal fields and has nothing to do with the Matanuska fields.

Mr. DAVENPORT. Will the gentleman yield?

Mr. WICKERSHAM. Yes.

Mr. DAVENPORT. Was not this test made at Annapolis,

where the most scientific tests can be made for the properties

Mr. WICKERSHAM. I suppose it was. If the gentleman

says so, I have no reason to dispute it.

Mr. DAVENPORT. I will ask the gentleman if the same authority that he relied upon a while ago-Dr. Brooks-did not say, in his testimony before the Senate committee, that the Bering River coal fields were better than the Matanuska fields for steam purposes?

Mr. WICKERSHAM. He might have said that, and he might

have been right about it.

Mr. MADDEN. I want to ask the gentleman if the fact that the coal was not mined by miners had anything to do with the quality of the coal?

Mr. WICKERSHAM. Yes; it might be clean or dirty coal. Mr. MADDEN. In making the test for coal you do not test

the dirt.

Mr. WICKERSHAM. Yes; they tested the dirt.

Mr. MADDEN. Well, I do not know about that.
Mr. WICKERSHAM. I do not know that I do, either.
[Laughter.] But I am informed they did.

Mr. DAVENPORT. Mr. Chairman, I desire to ask if it is not a fact that the Secretary of the Navy stated that they used the washing, screening, and evaporating test at Annapolis in order to test this coal?

Mr. WICKERSHAM. I do not know; but it may be.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. Certainly.

Mr. TOWNER. Is it not true that this coal that was taken out was merely surface coal? Mr. WICKERSHAM. Yes.

Mr. TOWNER. And was taken out by the Geological Survey men, or under their supervision at least?
Mr. WICKERSHAM. It was surface coal.

Mr. TOWNER. It was not mined at all; and is there not a ery large difference between surface coal and coal taken from the interior of the mine?

Mr. WICKERSHAM. I do not know. I am not a coal miner, and know very little about it, but I know it was surface coal.

I want to say to this House on this subject that you have not coal enough on the Pacific coast to last your Navy for 60 days in case of war. If to-morrow we had a war with a foreign nation on the Pacific coast, within 60 days your Navy would have to go into a harbor and get behind the fortifications. I want to say another thing. It costs you \$9 a ton to ship your coal around from Virginia and Baltimore for the use of the Pacific Navy, and you ship it in foreign bottoms manned by foreign seamen. You do not get the advantage of it at all in America. You are paying \$9 a ton for shipping coal around in that way which you could get in an independent naval-base harbor in Alaska for about \$2.50 a ton. You are not only paying \$9 a ton freight, but you are paying \$3 a ton for the coal on board of the collier at Norfolk or Baltimore, making \$11 to \$12 a ton for what coal you do get around there. You are getting about 250,000 tons per annum, according to the statement of Secretary Meyer. He also testified that in case of war you would need 2,400,000 tons in a year on the Pacific coast, and 2,400,000 tons, at \$9 per ton, would be \$21,600,000 that we pay for freight. We would almost pay for the railroad in one year under those circumstances, and, besides, you would have security for your country and a naval base that could not be at-

tacked halfway between our ports and the Orient. [Applause.]
That is another reason why you ought to build a railroad in
Alaska. It is for the benefit of your country. You could save almost enough out of that railroad in one year, certainly in 10 years, in your naval coal to pay for the railroad, and as we people in the interior of Alaska would save a million and a quarter dollars in freight per annum, you will see what an advantage it would be to the people of the United States, even if the road did not pay a profit on its running.

Mr. BRYAN. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. Yes.

Mr. BRYAN. The gentleman said awhile ago that the Guggenheims had gotten the copper. Why did they not get the coal?
Mr. WICKERSHAM. They did not get the coal, because President Roosevelt stopped them.
Mr. BRYAN. When?

Mr. WICKERSHAM. In 1906, just as they had it in their hands and the price was practically paid and the deed delivered.

Mr. BRYAN. Then, if Roosevelt had not stopped them from getting the coal, Woodrow Wilson would not have been very much interested in establishing a naval base out there?

Mr. WICKERSHAM. I am not criticising Mr. Roosevelt, for he did right and saved the situation in the first instance; but Mr. Wilson is the first influential force since that day to give any aid to open up the Territory of Alaska or develop it, and now we have sympathy and assistance not only from the administration, but from both sides of this House.
Mr. FESS. That is right.

Mr. WICKERSHAM. On page 292 he said:

Secretary MEYER. The Navy now consumes 160,000 tons a year on the Pacific coast. If the entire fleet were operating there at times after the canal is opened the amount will be about 300,000 tons. In time of war a fleet operating in the Pacific would require 200,000 tons a month. The analysis made of the sample recently obtained by the experts of the Bureau of Mines while in Alaska show that the Matanuska and Bering River coals are exceptionally low in ash and sulphur and very high in heating value, the British thermal units in some cases running as high as 15,400, while the eastern coals average a little under 14,800.

Mr. BUTLER. What is the freight from Newport News to the Pacific coast?

Secretary MEYER. From \$5 to \$8.

Even if you did not use any more on the Pacific than now, even if it is confined to what is used to-day, you can save a million and a quarter dollars per year by building this road to these coal fields, and in case of war it might save the fate of the Nation. The people of the interior would save a million and a quarter on freight per annum. I think it is time for the patriotic men of this House to get together and lay aside this talk about watermelons in Alaska and build this road and develop the coun-It is a storehouse of great wealth and belongs to the people. If you will take up and understand the situation, in-stead of talking about watermelons and fighting about Government ownership, we will get something done in Alaska, and the people will thank you for it. [Applause.] Mr. MADDEN. What is the total tonnage hauled over the

railroads there now per year?

Mr. WICKERSHAM. The Guggenheims hauled about four million dollars' worth of copper last year and about three and a half to four million this year.

Mr. MADDEN. How many tons?
Mr. WICKERSHAM. I can not give you any idea, but it is the richest copper mine in the world.
Mr. MADDEN. The gentleman does not know what the total tonnage hauled over the railroads is?
Mr. WICKERSHAM. It is not a long railroad; it is only a

short road of 196 miles.

Mr. MADDEN. They have five railroads? Mr. WICKERSHAM. About 500 miles in Alaska, and some only about 10 miles long.

Mr. MADDEN. Does anybody know the tonnage hauled on those railroads?

Mr. WICKERSHAM. They are not hauling anything now. Mr. MADDEN. Then they are not running successfully?

Mr. WICKERSHAM. No.

Mr. MADDEN. Is there any evidence this road would run successfully if operated?

Yes. Mr. WICKERSHAM. Mr. MADDEN. Why?

Mr. WICKERSHAM. Because it would run into a great rich, new country, and would not be under the control and domination of the Alaska Syndicate like these are.

Mr. MADDEN. Are there any laws now on the statute books of the United States that authorize the settlement of this country on an equitable basis?

Mr. WICKERSHAM. Yes. Mr. MADDEN. What are they? Mr. WICKERSHAM. The homestead laws.

Mr. MADDEN. Under what conditions are men allowed to homestead there?

Mr. WICKERSHAM. You are allowed to take 320 acres and

prove up after three years, as they do in the States.

Mr. MADDEN. What do you have to do before you are entitled to the land?

Mr. WICKERSHAM. You have to live on your land and improve it, and other work has to be done, of course.

From this testimony it appears that when the Panama Canal is finished and the entire Pacific Fleet is operating there it will need 300,000 tons of coal per annum, and it will cost substantially \$8 a ton freight around the Horn or perhaps \$4 a ton through the Panama Canal. At the lowest price there is a direct loss of \$1,200,000 per annum on freight, upon coal for the Pacific Fleet, if brought from the Atlantic coast; but, the Secretary said, in time of war the fleet operating on the Pacific would require 200,000 tons per month, or 2,400,000 tons per annum. Upon this basis, the freight rate alone on coal from

the Atlantic coast through the Panama Canal would be \$9,600,-000 per annum. Certainly these facts will make it the duty of Congress to provide transportation, so that if there is naval coal in the Territory of Alaska which can be obtained for the Pacific Fleet and delivered at a good naval base near the fleet it may be done. Not only that, but this House now has before it the statement of the officers of the Navy that there is not to exceed 90 days' supply of coal for the Pacific Fleet on the Pacific coast. If to-morrow a war should occur, which God forbid, between this country and any other country in Pacific waters, our fleet would have no more coal than is necessary to enable it to get safely into a harbor behind fortifications for protection. All our naval coal is carried to the Pacific Fleet in foreign bottoms, manned by foreign sailors. Coal is contraband of war, and it could not be obtained from a neutral or by neutral transportation in time of war, and we would have to depend upon our own resources to secure a sufficient supply in case of war.

This is the situation on the Pacific and must continue unless an Alaska railway is built to the naval coal fields in Alaska, for it is the only naval coal on the Pacific coast. Without coal a fleet is an expensive luxury in time of peace and impotent in time of war. We maintain our Navy now at an enormous expense for fuel, and for the want of a large and ready supply of fuel, in case of war, we might as well have no fleet.

For these reasons there is an immediate necessity to create naval base in Alaska, and the railroad provided for in this bill is the first unit in that great establishment for the defense of our Pacific frontier. This railroad should be built, maintained, and operated by the Government rather than by the Guggenheims or any other corporate influence so that it may be as readily used for national protection in case of need, as the fleet itself.

Your attention is called to this official map entitled "Great Circle Sailing Chart of the North Pacific Ocean." scientifically arranged that the shortest distance between any two points on the rotund earth represented by it is a straight line drawn between those two points on this map.

Your attention is called to the fact that a line drawn from the great navy yard at Bremerton, on Puget Sound, to Yokohama, Shanghai, Hongkong, or Manila, runs through the Aleutian Islands. It is a fact that vessels sailing between San Francisco or Seattle and the Orient go and come by the "northern route," as it is called, rather than by the southern route, via the Hawaiian Islands. The reason for taking the northern route is that it is much shorter in a straight line via the Aleutian Islands. From the Puget Sound Navy Yard to Yokohama it is only 4,280 miles, while it is more than 1,500 miles farther if the vessel sails via Hawaii. There is no coaling station on the short northern route and no place where a naval vessel can be repaired, victualed, or take on water or other supplies. Consequently in case of war there would be no resting place. However, the Government is establishing a base of supplies for just such an emergency on the Hawaiian Islands at Pearl Harbor, near Honolulu, where millions of dollars are being spent in building dry docks, wharves, and other structures, and in establishing a coal yard for the Navy. But it is 3,000 miles from the Bremerton Navy Yard to Pearl Harbor, and 3,450 miles from Pearl Harbor to Yokohama, making 6,450 miles by that route to the Orient as against 4,280 miles by way of the northern route, or more than 2,000 miles greater distance to be traveled. The purpose of the Government now is to save that 2,000 miles of extra travel, for which extra coal must be carried, and go by the northern route, and to do that a naval base must be established in Alaska.

Secretary Meyer's attention was called to this, and he was

Mr. Butler. How far is the travel out of the beaten track to obtain this coal in Alaska?

Secretary Meyer. One hundred and eighty-four miles.

Mr. Butler. How far would the ships have to travel?

Secretary Meyer. The coal would have to come to the ships. It is cheaper for us to have the colliers bring it down than for the vessels to run up to Alaska.

Mr. Butler. What is the freight from Newport News to the Pacific coast?
Secretary Meyer. From \$5 to \$8.
The CHAIRMAN. Some one was asking about the distance awhile ago. This says that Resurrection Bay is 1,236 miles from Seattle, 1,750 miles from San Francisco, 3,000 miles from Japan, and 390 miles north of the great-circle route.

Briefly, then, in the establishment of this needed Alaskan naval base the first act to be done is to build the railroad provided for in this act. The Matanuska and Bering River coal mines will yield the best of their naval coal, which can be delivered at the naval base behind the islands fronting upon and protecting the great outer harbor of Prince William Sound.

Such other structures will be erected as dockyards, dry docks, buildings, and so forth, as may be necessary upon one of those great natural naval harbors, and with a railroad connecting the naval base with the naval coal fields and with the river systems in the interior the Navy can be certain of fuel supplies and protection in case of war. This naval base will be the outpost between the coast of the United States and the Orient, so that in case of war with any Asiatic power we will have an impregnable depot more than 1,200 miles away from our coast in the direction of the coast of Asia. Conceding that coal may be carried to the Hawaiian Islands and that a naval base should be established there, it is much more necessary that one be established in Alaska where there are so many great natural advantages to justify it.

Under the Constitution of the United States it is the duty of this House to establish a naval base on the Pacific for the protection of our country, with a railroad to the naval coal field. It is not "Government ownership" in the sense in which its opponents object to that principle, but a wise and constitutional exercise of the power with which Congress is invested, to protect the United States in time of war and to pass laws for the development of trade and commerce in its Territories.

Now, I hope the gentleman from Oklahoma will give me his undivided attention for a few moments, as I am going to talk to him about Government ownership.

OKLAHOMA DENOUNCING GOVERNMENT OWNERSHIP.

The minority report, signed by two members of the Committee on the Territories from the great State of Oklahoma, makes the formal objection to this bill that it is the establishment of Government ownership of railroads in Alaska. In the thirteenth "view" they say: view" they say:

The bill stripped of its dreams means Government ownership and operation, to be followed by Government leasing and operation of resources and utilities.

And in "view" No. 2 they say:

The construction of the railroad will in no sense solve this problem, because we think we have the right to assume that the Federal Government is not going to launch into agriculture in Alaska, launch in coal mining in Alaska, launch in logging in Alaska, and we are opposed to the Federal Government being committed to any such scheme or propaganda.

Of course there is nothing in the bill which justifies this flaming denunciation of Government ownership in Alaska. Upon the face of the bill and upon the face of all the hearings before the committees it was perfectly apparent that this bill was an effort to give Government aid to the building of a railroad in Alaska upon the same principle and as nearly as possible in the same way that it was given to other States and Territories in the West and South. But it is surprising to hear such a vigorous denunciation of Government ownership from the Representatives of the State of Oklahoma. That great State adopted a constitution in 1907 containing a bill of rights and constitutional provisions of the most progressive type. The right of initiative and referendum was reserved to the people and complete control over corporations, and especially over public utilities, and the constitutional right is reserved to construct and operate them. But its most interesting reservation to the people, in view of the fierce assault made upon Government ownership contained in the minority report, which is signed by the two Representatives from that progressive State, is the reservation contained in article 2 of the constitution, being section 31 of the bill of rights. It reads as follows:

SEC. 31. The rights of the State to engage in any occupation or business for public purposes shall not be denied or prohibited, except that it shall not engage in agriculture for any other than educational and scientific purposes and for the support of its penal, charitable, and educational institutions.

Here, then, in the bill of rights, in the constitution prepared by the people of Oklahoma, is a reservation to the State as one of the "sisterhood" of the right of "Government ownership." The right is reserved to the State to engage in any occupation or business for public purposes. The State of Oklahoma may "locate, construct, and operate" a railroad in aid of her development. The State may "launch into agriculture in Oklahoma; launch in coal mining in Oklahoma; launch in coal mining in Oklahoma; launch in coal mining in Oklahoma; launch in gold mining in Oklahoma; launch in logging in Oklahoma." If the principle of Government ownership is thought to be vital to the prosperity and welfare of the people of Oklahoma, why is it declared to be "monstrous" several times in one letter to Members of the House? The people of Oklahoma prefer "Government ownership" to Guggenheim ownership. Why do gentlemen from Oklahoma try to force Guggenheim ownership on Alaska when President Wilson and Alaska ask for Government ownership?

The gentlemen who signed the minority report declare "we are opposed to the Federal Government being committed to any such scheme or propaganda." What is the difference between such "a scheme or propaganda" in Oklahoma and in Alaska?

Mr. DAVENPORT. Will the gentleman yield The CHAIRMAN. Does the gentleman yield? Will the gentleman yield?

Mr. WICKERSHAM. No. The people of Oklahoma prefer Government ownership to Guggenheim ownership. [Applause.]

Mr. DAVENPORT. Mr. Chairman—
The CHAIRMAN. Does the gentleman yield?
Mr. WICKERSHAM. No; I do not.
Mr. DAVENPORT. I think the gentleman ought to do so when he asks that kind of a question.
Mr. WICKERSHAM. All right, I will yield for a question,

but not for a statement.

Mr. DAVENPORT. The gentleman knows, as he is a member of the committee, that from the time this bill was introduced up to this day not one single representative of the Gugenheims ever raised their voice against the bill, but the representatives before the Committee on Territories sat silently by and acquiesced in its report.

Mr. WICKERSHAM. That is another question. Mr. WICKERSHAM. That is another question. We are talking about Government ownership, not Guggenheim lobbyists.

Mr. DAVENPORT. I am asking the gentleman a question, and that question is, Why is he preferring Guggenheim ownership to Government ownership? I myself am opposed to it in everything where there is nothing to haul and nothing to produce

Mr. WICKERSHAM. What is the difference between such a

scheme in Alaska and in Oklahoma?

Mr. DAVENPORT. Oklahoma has not undertaken to build any railroads there.

Mr. WICKERSHAM. But she has reserved the constitu-

tional right to do it.

Mr. DAVENPORT. That may be; but it does not bind all the people and guarantee that they will advocate it when it comes up. I am not going to pledge myself to a scheme of this kind until there is something to be brought out of Alaska and until steamships can be arranged for from the bays down to our ports.

Mr. WICKERSHAM. The gentleman from Oklahoma does not seem to understand what resources we have in Alaska, but I assure the gentleman that the Guggenheims are not as ignorant of them as the gentleman is. They know what is up there.

Mr. DAVENPORT. I want to say to the gentlemen this that when he speaks of the Guggenheims he has perhaps at some time in his career represented the Guggenheims and has known them.

Mr. WICKERSHAM. Oh, the gentleman is mistaken about that.

Mr. DAVENPORT. Well, the gentleman has met them. The CHAIRMAN. Gentlemen should rise and address the Chair before interrupting a Member on the floor.

Mr. WICKERSHAM. I have met some of their employees

Mr. WICKERSHAM. I have met some of their employees out on the coast. But when the gentleman has seen men here lobbying against this bill he has seen Guggenheim lobbyists.

Mr. DAVENPORT. I would like to know what Guggenheim representatives the gentleman has reference to. If there are any in Washington, the gentleman from Alaska should state their names, so that the Members of the House can be apprised of it.

Mr. WICKERSHAM. I will tell you who they are in such a way that no mistake can be made about it. If the gentleman will get the Senate hearings and the House hearings, taken before the Committees on Territories, and will hunt up the fel-'lows there who appeared fighting this bill, he will have them, and every one of them is a Guggenheim lobbyist.

Mr. DAVENPORT. I did not know it before. Mr. WICKERSHAM. You know it now. [Laughter.]

Mr. DAVENPORT. I want to ask the gentleman whether he means Members of Congress who are fighting the bill, or whether he means other parties who testified?

Mr. WICKERSHAM. Oh, no; only those who testified.

have no reference to the gentleman at all; not at all.

WILL PRIVATE CAPITAL BUILD A FREE ROAD IN ALASKA?

As a final blow to the bill its opponents declare that if Congress will refuse to pass the bill private capital will build the railroads needed to develop the Territory.

This blow is struck in the minority report in the twelfth

paragraph, which reads as follows:

The testimony of the hearings before the committee on this bill show that private parties were ready and willing, and had provided the funds to construct and operate railways to the coal mines, and had it not been for the withdrawal of the coal from entry there would have been no necessity of the contemplated action of the United States Government, as stated in the bill before the House.

It is said that somebody has already offered to build these roads at once if this bill can only be defeated. No such proposal has ever been made except possibly as a final argument by

some of the impecunious lobbyists before the committee. gentlemen have not two dollars among them to rattle one against the other, and could not obtain money for the building of a railroad in Alaska except from or with the consent of the Guggenheims.

Mr. DAVENPORT. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman yield? Mr. WICKERSHAM. Yes.

Mr. DAVENPORT. I will ask the gentleman if there is anything in the hearings where these parties stated that they had the funds to build a railroad, and later it was shown that they were impecunious really and do not have the necessary funds?

Mr. WICKERSHAM. Yes; and if the gentleman from Oklahoma had attended the meetings he would have known those things.

Mr. DAVENPORT. I will say to the gentleman that I attended the meetings as much as I could, but the meetings were finished so quickly that I could not attend them; but I have read the hearings, and I have them here before me now, and I challenge the gentleman to show where any man proposed to build a railroad and it was shown that he did not have the money and could not raise it.

Mr. CURRY. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman yield?

Mr. WICKERSHAM. Yes.
Mr. CURRY. Does the gentleman remember that during the hearings I asked each and every representative of every proposed railroad that was before the committee who were behind them?

Mr. WICKERSHAM. Yes.

Mr. CURRY. And where they had their money? Mr. WICKERSHAM. Yes.

Mr. CURRY. And each and every one of them said they were under pledge of secrecy and could not tell us, and said that if they could be relieved and released from that condition that existed between the attorney and the employer they would But they have not told up to this time?

Mr. WICKERSHAM. They have not,

Mr. CURRY. And the gentleman will remember that I asked each one, if he was not in a position to tell the committee, to give that information confidentially to the chairman, and that none of them has thus far stated to the chairman who was behind them and where the money is.

Mr. WICKERSHAM. I remember that distinctly, and if they had told you, and told you the truth, they would have carried it right to the Alaska Syndicate in each instance. I know them. I have watched the same fellows here for almost 10 years, lobbying and logrolling for the Guggenheims. There has never been an effort to do anything for the Territory of Alaska that that same bunch of pirates has not shown up here as lobbyists against it, not one. [Applause.]

against it, not one. [Applause.]
Mr. Ballaine in his testimony, at page 36 of the Senate hearings on the Alaska railway bill, testified that in 1909 Mr. George W. Perkins, then a partner in the Morgan branch of the Alaska Syndicate, came to Seward to examine the Alaska Northern's 71 miles of railroad and see if it might be resuscitated. Mr. Ballaine testified about this conversation with Mr. Perkins, as

He agreed with me that he should recommend favorably their taking up this plan, not alone on account of its merits, but because the firm of J. P. Morgan & Co., and their friends held one-third of the stock in the Sovereign Bank of Canada, which at that time was going through liquidation.

The Sovereign Bank had advanced the money for the building of

includation.

The Sovereign Bank had advanced the money for the building of the Alaska Northern and owned the bonds, and therefore the road. Later in the winter, or possibly in the spring, Mr. Perkins told me that the Guggenheim brothers had refused to give their consent to the plan for Morgan & Co. to take over the financing of this project as a narrow-gauge railroad from Seward, through the Susitna Valley, to the Tanana, on the ground that they regarded the Tanana Valley as their field. Mr. Perkins told me at the same time that Morgan & Co. were not prepared to encourage any railroad building in Alaska until the Government issued patents to coal calmas then pending. I asked Mr. Perkins: "Do I understand from this that if I or any other individual, or any company, should go to some other bank or banker to raise money for building a railroad from Seward through the Susitna Valley to the Tanana I should meet with the opposition of the owners of the Alaska Syndicate?" He replied: "We could not allow a railroad to be built through the Susitna Valley into the Tanana. There will be no more railroad building in Alaska until the coal fields are opened."

That is not denied. Copies of that testimony were sent to

That is not denied. Copies of that testimony were sent to George W. Perkins from the Senate committee officially, and he was given an opportunity to deny that and did not do it. There is no question about the truth of it.

This statement is not denied by Mr. Perkins or by any other member of the Alaska Syndicate, and undoubtedly states the determination of the Alaska Syndicate with respect to railroad building from the coast to the interior of Alaska, at least in what they are pleased to call "our territory." But there is

some basis for the statement made in the minority report and quoted above. There was a proposition made to extend the Alaska Northern Railway from Seward, and to that I now invite your attention.

At page 403 of the Senate hearings upon this bill will be found a letter from the Alaska Northern Railway Co. by its attorney, directed to the Secretary of the Navy, and dated March 30, 1912, in which such a proposal is made. That letter reads as follows:

WASHINGTON, D. C., March 30, 1912.

The Secretary of the Navy, Washington, D. C.

Washington, D. C.

Sia: Referring to various interviews we have had with officials of your department, with the object of devising means whereby the department may be able to obtain at an early date, for the use of the Navy in the Pacific regular supplies of high-grade Alaska coal at a large saving in cost, we now have the honor to state that, as soon as the department will be in control of coal lands in the Matanuska district containing coal suitable for the Navy's use, the Alaska Northern Railway Co. will be prepared to enter into either of the following contracts, at the option of the department:

A. A 10-year contract to deliver each year at the department's depot on Resurrection Bay 400,000 tons of bituminous coal, taken from seams to be designated by your department, at actual cost plus 10 per cent, the maximum total cost to the department not to exceed \$5.50 per ton, delivery to begin, under penalty, on or before December 31, 1913.

B. A 10-year contract to deliver each year at the department's depot on Resurrection Bay 400,000 tons of bituminous coal, taken from seams to be designated by your department, at actual cost plus 10 per cent, the maximum total cost to the department not to exceed \$4.50 per ton, delivery to begin, under penalty, on or before December 31, 1913,

CONTRACT B.

Contract B to be conditioned upon the passage, at this session of Congress, of an act guaranteeing principal and interest of 50-year 3 per cent bonds of the railway company to the extent of \$7,000,000, such bonds to be a first lien on the main line of the railway company from Resurrection Bay to the coal fields, with branches, spurs, equipment, etc., all representing an approximate cost value of at least \$11,000,000. In the mortgage securing these bonds the Government would be given full protection, both for its liability under the guaranty and for the due fulfillment by the company of its contract with the department; and out of any moneys due to the company under its contract, the department would be entitled to pay each year, direct to the trustees for the bondholders, a sum sufficient contribution to a sinking fund to provide for the payment in full of the bonds at maturity. Our only reason for any reference here to a guaranty of bonds is that with such guaranty the company would be put in position to furnish coal to the department at \$1 per ton less than would otherwise be the case; and unless we are able to obtain such guaranty from Congress it would not be possible to enter into a contract at a lower rate.

COMPARISON OF CONTRACTS A AND B.

COMPARISON OF CONTRACTS A AND B

Under contract A the department would save approximately \$1,000,000 per annum, as compared with the present cost of taking 400,000 tons of coal from the Atlantic coast. Under contract B this saving would be increased by \$400,000 per annum, or \$120,000 more than the total annual liability for both interest and sinking-fund payments on the company's bonds, the total saving to the department being about \$1,400,000 per annum, while the present annual coal appropriation is \$4,000,000 for the entire Navy.

ADVANTAGE TO THE GOVERNMENT.

The saving as shown above would result in time of peace; in the event of war, in which the fleet in the Pacific should play an active part and the coal consumption be correspondingly increased, the financial saving would be several times as great. In addition to any saving in money, the Navy would be in a position to obtain, both in peace and in war, uninterrupted supplies of the highest grade steaming coal, delivered by land in an impregnable harbor, occupying an ideal strategic position in the north Pacific. Having regard to the efficiency of the fleet in the Pacific and the safety of the country, the value of such a position can not be measured in money.

POLICY OF GOVERNMENT OWNERSHIP.

The Secretary of the Interior has publicly advocated the purchase of the property of the Alaska Northern Railway Co. by the Government, and has asked us on what basis we can meet his views. We have stated to him that we are willing to sell at what, having regard to all the circumstances and considerations, may be considered a fair and equitable price. At present, however, the Government has no legal authority to carry out such a policy, and it is uncertain if and when Congress will give such authority. Having regard to interest charges, deterioration of property, etc., the company can not resign itself to inaction until the question of Government ownership as opposed to private ownership is determined, and it desires to proceed at once with construction. If, however, the Government should within a reasonable time be able to carry out the policy enunciated by the Secretary of the Interior, the company will still be willing to sell on the understanding set out above, making no addition to whatever price might be payable now beyond the actual cost of further construction with interest; and in consideration of the coal contract with your department the company would now enter into a binding agreement to make such sale to the Government. In this way any construction now undertaken by the company will be of great assistance to the policy of the Secretary of the Interior, inasmuch as access to coal for the Navy, as well as the beginning of the general development of the interior of Alaska, will be possible at a much earlier date than would otherwise be the case.

LEGAL POINTS.

LEGAL POINTS.

We inclose a memorandum dealing with the law points involved. ADDITIONAL INFORMATION.

We shall be glad at any time to meet you or any of the officials of the department to discuss any point on which you desire information, and in the meantime we submit these proposals for your valuable con-

sideration and such action as you may deem appropriate in furtherance of their object.

Very respectfully,

ALASKA NORTHEEN RAILWAY CO., By GEO. H. PATRICK, Its Attorney.

The attention of the House is directed to the fact that here is a proposition by this company to extend the Alaska Northern Railroad to the Matanuska coal fields, and no farther. This extension is to be based upon a monopoly contract to be given by the Government of the United States to that company for mining and transporting 400,000 tons of coal from the Matanuska field to the Government bunkers in Seward at \$5.50 per As an option, the second contract proposed was for the mining and delivery of 400,000 tons of coal at \$4.50 per ton, but this contract was to be conditional upon Congress passing an act guaranteeing the principal and interest on 50-year 3 per cent bonds of the company to the extent of \$7,000,000, such lien to be a first lien upon the main line of the railroad going from Resurrection Bay to the coal fields. The proposition then sets out in glowing terms how it would be possible, at either of these rates, for the Government, without assuming any great liability, to save enormous sums in the delivery of naval coal to it- bunkers on Resurrection Bay.

Let the House note that this proposition, which seems to meet with the definite approval of the minority report, was to give this Alaska Syndicate Corporation a monopoly for 10 years upon mining and carrying the coal for the Government for naval purposes to the port of Seward at an enormous price.

Now, that was the only proposition ever made by anybody Now, that was the only proposition ever made by anybody who had any money behind them to build a railroad into the interior of Alaska, and that was the proposition that was approved by the minority of this committee in the language I have read. It is the only proposition anywhere in the record, and it is an infamous proposition on its face. [Applause.]

I wish I had the opportunity to tell you more about it, but I have exceeded the patience of the House and I must hasten on. When they heard that sort of a proposition offered to create a monopoly in the Guzgenheims again, the Secretary of the Navy

monopoly in the Guggenheims again, the Secretary of the Navy and the Secretary of the Interior both turned it down cold and it never got any further. And that is the effort, and the only effort, that was every offered to open the interior of Alaska by the building of a railroad by private parties. It was simply another bright scheme on the part of the Alaska Syndicate to get its Alaska Northern Railway resuscitated by the United States, its losses returned, and a monopoly of Matanuska coal on a ten-year plan. It was, of course, refused consideration by Secretary Fisher.

Paymaster John S. Higgins, of the United States Navy, was before the Senate Committee on Territories, and his testimony will be found in full in the Senate hearings beginning at page 569. In his testimony he testified that the naval coal delivered at either Norfolk or Baltimore from the Virginia fields cost about \$1.40 per ton for transportation, and that the coal was delivered upon the colliers at Norfolk at \$3 per ton, including the price of mining and transportation. The distance is about the same as that from the Matanuska fields to Seward. The price demanded by the Alaska Syndicate Railroad from the Matanuska field is 50 per cent higher than the Virginia rate, for the lowest price, and almost 100 per cent higher for the higher rate. The lower price demanded by the Alaska Syndicate in its proposal to the Secretary of the Navy depended upon the guaranty of \$7,000,000 of Alaska Northern Railway bonds, while the higher price of \$5.50 is \$2 per ton more than the Virginia price.

There is more to this proposition of the Alaska Northern Railway. It is proposed to sell its railroad to the Government, and there are pages following this interesting letter devoted to persuading the Secretary of the Navy and the chairman of the Naval Committee of this House that it would be a great scheme for the Government of the United States to purchase the Alaska Northern Railway and complete it to the coal fields. On page 411 of the Senate hearings is a long argument upon this proposition addressed to the chairman of the House Naval Committee.

The proposal by which this syndicate railroad in disguise was to secure \$7,000,000 worth of Government guaranty was declined by the Secretary of the Navy and the Secretary of the Interior. Thereupon the officers of the Alaska Northern became violently opposed to Government ownership, and they have been most active lobbyists, both before the committees of both branches of Congress and around the corridors in the effort to defeat the bill now before the House. If Government ownership was honest when they proposed in their letter to sell their railroad to the Government, it is honest now, as a principle. Of course, their effort to procure Congress to give them monopoly of traffic, the control of the naval coal fields, and immense profits in the way of a Government guaranty upon the Morgan-Sovereign Bank Railway can not be defended upon any honest

ground.

This is the proposal, and the only one ever made by anyone speaking definitely or in a businesslike way, to build a privately owned railway for the development of Alaska, and it is the proposal which the minority report approves as justifying the Government to surrender its Matanuska naval coal field to the Alaska Syndicate monopoly. But notice that this proposal did not offer to build beyond the Matanuska coal fields. The reason for that was disclosed by George W. Perkins in his conversation with Ballaine. The Tanana Valley is claimed by the Alaska Syndicate as the territory of the Copper River & Northwestern Railway, and it did not intend and does not now intend to let any other railroad be built from Seward through the great Susitna Valley to the Tanana by private capital or otherwise. It is an invasion of their territory

The Guggenheim branch of the Alaska Syndicate, which has control under its contract with the Morgans of the exploitation of Alaska, refused, and always has refused, to permit any rail-road to be built to the Tanana country which does not connect with their line at Chitina. They have prevented the construction of every railroad attempted to be built from the coast near their territory to the interior, and they intend to continue to do so without it is constructed as an extension of their Copper River & Northwestern Road. They would agree, of course, to the building of a coal road from Seward to the Matanuska coal fields, as proposed by the Alaska Northern in its letter to the Secretary of the Navy, first, because it gave them a monopoly of Matanuska coal mining and transportation; second, it gave them a monopoly contract with the Government of the United States for 10 years for furnishing naval coal from this field; and, third, it gave them assurance doubly sure that there would be no road from Seward to the Tanana Valley into what they call their territory.

But the minority report is wrong when it asserts that there ever was any offer from responsible financial interests with ability to construct an independent line of railroad for the development of the Tanana Valley from Seward or Valdez or from any other harbor. All the evidence is against them on that proposition. If the two gentlemen who signed that report had attended the meetings of the Senate and the House Committee on Territories and had heard and understood the evidence, they would not have made such an unwarranted statement in their "minority views."

OKLAHOMA V. ALASKA-A SELFISH OBJECTION.

The fourth objection made by the minority report is a selfish one. The minority report declares they are opposed to the passage of the bill under consideration because there are but 35,000 white people in Alaska and because the appropriation and bond issue provided for in the bill is more than \$1,000 for each and every white person living there. They declare this sum to be out of proportion to the Federal aid granted to other sections of the United States for waterways, docks, good roads, rural routes, parcel post, and other internal improvements.

Of course, Alaska has more than 35,000 white inhabitants; but let us assume that number. The bill proposes to appropriate \$35,000,000 for the building of a railroad in Alaska. It is not to be assumed, however, that that is to be the end of population in Alaska. The Panama Canal has cost nearly \$400,000,-000, and there were but 6,500 white people in the Canal Zone at the time it was begun; but the canal was not built for the few people who then resided there, but for the benefit of commerce and trade and the welfare and protection of the whole United States. And so it is in Alaska. It is also true with respect to this Alaskan population that since the purchase of Alaska in 1867 they have produced more than \$525,000,000 out of Alaskan

fisheries and mines, and the end is not yet. In 1912 Alaska produced \$40,354,178 in gold, copper, fish, and furs. or more than \$1,000 for each white man, woman, and child in the Territory. The trade and commerce that year was \$72,741,060, or more than \$1,130 for each of the 64,356 population, including Indians and Eskimo, and more than \$2,258 for each white person residing there. A population which produces \$2,258 per annum in actual wealth per capita each and every year as a beginning may well ask the Government to make an appropriation of \$1,000 per capita once in a century, especially when the Government retains the ownership of the investment and is merely aiding in the general purposes for which government is organized.

The minority report complains that such an appropriation for Alaska is unfair to the "sisterhood of States," and declares that Alaska is getting more than her share. Let us see how this

argument would apply to Oklahoma. In 1863 Congress passed an act making a grant of public lands in Kansas to the Leavenworth, Lawrence & Galveston Railway Co. (12 Stat. L., 772) and for the southern branch of the Union Pacific, which became the Missouri, Kansas & Texas. In 1866 Congress passed an act making a land grant for the Atlantic & Pacific Railway Co. (14 Stat. L., 292).

These grants applied in Kansas, Missouri, and New Mexico, and under these grants the Missouri, Kansas & Texas Railway, the Atchison, Topeka & Santa Fe, and the St. Louis & San Francisco trunk lines of railway were built through what is now Oklahoma. Upon an inspection of the census for 1870 one is surprised to find that neither Oklahoma nor Indian Territory are mentioned officially. There was no population officially acknowledged in what is now Oklahoma at that time, but in a footnote we discover that there were 2,409 white persons somewhere within its area. In short, when Congress passed these landgrant acts under which Oklahoma secured three trunk-line railways to be built across her territory she had no white popula-tion—not even 35,000, as "dinky" as that may seem to them now. Not only that, but Oklahoma got these first trunk-line Government railroads at the expense of her neighbors—at the expense of that "sisterhood" whose rights are now so jealously guarded by her Representatives. The Oklahoma railroads were built out of land grants given out of the lands of the surrounding States Kansas, Missouri, Arkansas, and New Mexico gave their lands to the building not only of the roads within their own territory, but to build the connecting lines across Oklahoma. Oklahoma never lost a foot of her land in aid of the development of her own railroads. Her neighbors built her early trunk-line railroads for her, and now she objects to her more distant neighbors building their own road out of their own resources. these early roads were thus provided for by the United States aid and public lands Oklahoma had no white population, not even one-twentieth part of what Alaska has before it secures even first aid.

When the Northern Pacific Railroad land grant was made July 2, 1864, there was a very small population in all the great territory along its route. In 1870, six years after Congress created the grant, Dakota had only 14,181 population, Montana created the grant, Dakota had only 14,181 population, Montana 20,945, Idaho 14,999, and the Territory of Washington 23,955, making a total of only 73,730, against a total population in Alaska in 1910 of 64,356. The Atlantic and Pacific land grant was made by Congress on July 27, 1866. By the census of 1870, four years later, the population of Arizona was 9,658, and all Indian Territory and the present State of Oklahoma had but 2,409. What argument there is in this matter of population is greatly in favor of the Territory of Alaska, and Oklahema's Representatives ought to be ashamed to advance it in opposition

to the development of Alaska.

The minority report also complains that the "sisterhood of States" is going to be cruelly treated if a railroad is built in Alaska. Not only were all the early railroads built across the State of Oklahoma at the expense of her neighboring "sisters," but no State in the Union has been so richly endowed out of the public funds and public lands as the State of Oklahoma. Under her organic act she has been given sections 13, 16, 33, and 36 in every township, or one-ninth of her whole area, for the maintenance of her schools and other public institutions. For certain of those lands lost to them by Indian settlements she was given \$5,000,000 out of the United States Treasury by the organic act creating the State. eral and oil lands were granted to her. Aside from these specific sections of land, the organic act creating the State of Oklahoma gave to the State more than a million acres of public land for the support of her universities and normal schools. A recent Oklahoma publication declared that the lands given to Oklahoma by the United States for the support of her State institutions are of the value of \$50,000,000, and I hope they are. Oklahoma is a great State; she has a great and progressive people, but they ought not to forget so quickly what the "sisterhood" did for them in their efforts to secure early railroad aid and later development from the public funds. They ought—and would if consulted—to do as they were so generously done by. Nothing can be more unfair to the "sisterhood of States," which the minority report seems so anxious to protect, than an objection which prevents the people of Alaska from having relief from Guggenheim domination.

The bill before the House does not assume to locate any route for the railroad authorized to be built; that matter is left entirely to the President of the United States. No restraint is put upon the President in this respect by the bill, and any location made under the bill must be made in the name of the President and by his authority. This bill was prepared with a view of placing the responsibility entirely with the President,

First judi

so that might be assurance of the highest integrity in the location and construction of the railroad if the bill shall pass.

There is another small matter which is not a very serious one, and yet it seems to have appealed strongly to some gentlemen. It is that Alaska has only 64,884 people, and that there are only 35,000 white people in the Territory—that here is a proposition to appropriate \$35,000,000—\$1,000 for every white man, woman, and child in the Territory in the way of building a railroad there. Well, what of it? Suppose there are only 35,000 white people in that Territory and an appropriation is made of \$35,000,000. It is for the building of a great railroad, for developing one of the greatest unde-veloped territories in the world, a Territory 99 per cent of which belongs to Congress as the trustee of the people. It is Government land, it is public domain, and it is under your control, and it is for you to develop it. It is now being monopolized by the Guggenheims, and I am appealing to you to take it away from them and develop it for the people. It does not make any difference whether we have 35,000 people or only 3,500 people. [Applause.] There were only 6,500 people in the Panama Canal Zone when we began spending \$400,000,000 to build a canal there, but nobody thought of objecting to it on that ground, because the canal was being built for the benefit of the whole people. This railroad ought to be built for the benefit of the whole people of the country. [Applause.]

Mr. HARDY. How many people were there in Alaska when

Mr. HARDY. How ma we paid \$7,200,000 for it?

Mr. WICKERSHAM. When we purchased Alaska and gave \$7,200,000 for it there were not 10 of our people there, and only perhaps 1,000 Russians. I do not think that objection is a serious matter, but if it is let us stand Oklahoma up again as a standard. [Laughter.] In 1862 this House passed a bill giving a land grent for a railroad across what is now Oklahoma, then called the Indian Territory. Between that date and 1866 two more bills were passed for building railroads across the Indian Territory, that part which is now Oklahoma. For information I examined the census of 1870 and could not find any report on the Indian Territory, or Oklahoma, either. I learned subsequently that it was because there were no white people in the country, but only Indians not taxed. So that in 1870, after three land-grant bills had passed Congress which resulted in the building up of that great progressive State, there were less than 2,400 people in that region, and they were cattle rustlers from Kansas, Arkansas, and Texas. [Laughter.]

So if there is anything in this 35,000 proposition there ought never to have been any railroad grants made for roads in Oklahoma. Not only that—that is only half the Oklahoma story. Here is an efficial map showing the locations and areas of land grants made by Congress for western and southern roads. You may search the records and you will not find that Oklahoma ever gave up a foot of her land for building railronds across her area. Look at this map and the location of the land grants and you will see they run to the Oklahoma line and there they stop. Oklahoma got all of her railroads in those early days without giving up any of her land. The railroad land grants in Kansas, Missouri, Arkansas, and New Mexico built the first railroads across Oklahoma, and she never gave up a foot of her land. And yet you stand here and object to us having the benefit of our lands in Alaska that we want to mortgage and which we are willing to put up to build our own roads.

Mr. DAVENPORT. Will the gentleman yield? Mr. WICKERSHAM. Yes.

Mr. DAVENPORT. I want to say that that part of the Indian Territory new embraced in Oklahoma was an Indian country.

Mr. DAVENPORT. And they could not give land grants to

rallroads anywhere in the United States.

Mr. WICKERSHAM. Certainly; but Alaska is not Indian country and has 35,000 white settlers. When the Northern Pacific land grant was made in 1864 no consideration was given to the question of population. If population had been considered there would have been no land grant and no Northern Pacific. Its grant was not based on a population scheme as now suggested. the contrary, the grants for the building of the Northern Pacific and the early roads across Oklahoma were given to help build up the waste places. The grants were made to assist in an undeveloped country, and the Congress did not wait until the people had done all the work before it assisted. And it is assistance of that kind that we want in Alaska. We want help to build up the country and to protect it from monopoly. Gentlemen talk about a "prairie schooner" and a "cowboy existence" in Alaska, as if somebody could go to Alaska in a "prairie schooner" and be a "cowboy." [Laughter.] The gentleman from Oklahoma

did not go to Oklahoma in a prairie schooner; he went in a Pullman palace car, upon a railroad built at the expense of the surrounding States. [Laughter.]

Mr. DAVENPORT. I want to say to the gentleman that I went to Oklahoma as a farm laborer. [Applause.] I rode in a railroad train in the smoker, as my friend did to Alaska, and the reason why was we were both broke. [Laughter.]

Mr. WICKERSHAM. There are those who know the value of the undeveloped resources of Alaska, though few of them are in Congress. Congress is the trustee for this tremendous storehouse and ought to have the most intimate knowledge of its A trustee of an express constitutional trust ought not to permit the trust estate to be wasted, squandered, or acquired by any other interest to the great loss of those whom he represents. It is quite possible that if an individual gave as little attention to his guardianship of a trust estate he would be compelled to pay the loss out of his private fortune.

Population is of value to a territory. Herewith is a statement of the population of Alaska according to the last census, after which follows a table showing the percentage of increase in the

white population in Alaska from 1880 to 1910:

Population of Ataska by judicial districts, 1910.	
leial district dicial district	15, 210 12, 351 20, 078
HCBH GISUBCL	20, 07

Third judicial district Fourth judicial district	20, 078 16, 711

Per cent white	6.5	19.1	48	56.5

Congress will notice that the population of Alaska is small and is not increasing rapidly. The want of resources in the Territory of Alaska has nothing to do with this small population or its slow increase. The whole difficulty in the way of a large increase in the population is due to transportation. The western Provinces of Canada—Alberta, Saskatchawan, Manitoba—have taken thousands of hardy immigrants of the United States because they have railroads to carry these peo-ple, their household goods, and live stock to farms in those northern regions. Given the same transportation facilities in Alaska, and the population of the Susitna and Tanana Valleys will increase very rapidly.

THE PRIZE-ALASKA'S VALUE.

A copy of the last report of the collector of customs of Alaska, dated January 31, 1913, will be found in full at pages 576-578 in the Senate hearings on this bill. The report begins:

576-578 in the Senate hearings on this bill. The report begins:

Although there was no material increase in the population of Alaska during the calendar year 1912, the commerce of the Territory broke all former records in almost every particular. The total trade, valued at \$72,741,060, is 27 per cent higher than that for any previous year. The balance of trade in favor of Alaska is the largest on record, amounting to almost \$20,000,000. Gold, which until recent years has constituted the bulk of the Territory's export, though greater than for the two previous years, was 50 per cent less in value than the total of the other Alaskan produce shipped to the United States and was exceeded by the single item of salmon, canned and otherwise preserved.

For the first time both the shipments of merchandise from the United States and from Alaska to the United States passed the \$20,000,000 mark. The shipments to southeastern Alaska show an enormous increase and are more than double those of any one of the other three divisions. This increase was principally due to the establishment of 20 new salmon canneries throughout the division and the extensive development of mining properties in the Juneau district.

This report shows that for the year 1912 the people of

This report shows that for the year 1912 the people of Alaska purchased from the merchants of the United States nearly \$22,000,000 worth of merchandise and sent to the United States nearly \$25,000,000 worth of merchandise and more than \$16,000,000 in Alaskan gold.

THE PRODUCTION OF FISHERIES AND MINING IN ALASKA.

The production of the fisheries and mining of Alaska for the year 1912 amounted to \$40,354,178. To those who hesitate to give assistance to Alaska because she can not raise watermelons I suggest that \$40,000,000 worth of fish and gold is as good a crop as any State can raise.

The Tanana interior of Alaska is criticized because of its supposed want of value, yet the customs report shows that \$8,117,459 worth of gold was produced in that division during 1912, being more than one-half of the total output of gold for the Territory. When we shall get a railroad to the Tanana the Territory. When we shall get a railroad to the Tanana country it will be one of the greatest gold-producing territories in America. There are immense areas of low-grade ground which can not now be worked, but which will then employ a large force of men and machinery.

The customs report shows that in 1912, 22,712 persons came into Alaska, but it also shows that 21,877 departed from the

Territory. I mention this fact to show that there is a very large movement of population in Alaska, and that as soon as there is a transportation route to the interior much of this

movement will use it.

Of the \$21,992,761 worth of merchandise purchased from merchants of the United States in 1912, \$3,732,914 went into the Tanana country, or about one-fifth of the whole imports. This freight paid on an average \$125 per ton. If the rate had been reasonable, the merchants of the United States would have sold more than double that amount of merchandise to the

I think Oklahoma is a grand and a great State, but I do beg her Representatives to give us a fair deal in Alaska and let us get out from under the domination of the Guggenheims.

Mr. DAVENPORT. I will say to the gentleman that I will

vote with him-

Mr. WICKERSHAM. Thank you. [Laughter.]
Mr. DAVENPORT. Wait a moment—for the purpose of giving to the Territory of Alaska any reasonable help for its institutions, educational and otherwise, that he may think is proper and right. I am not standing in the way of the Guggenheims. Let the gentleman present the facts and not refer to the Guggenheims and we will get through with this discussion.

Mr. WICKERSHAM. I expect it irritates the gentleman somewhat, but I have been relating the facts. [Laughter.]

Mr. DAVENPORT. Not at all. I never represented them,

and I never tried to represent them.

Mr. WICKERSHAM. And I surely am not representing

Mr. DAVENPORT. I know the gentleman is not. Mr. WICKERSHAM. All that gentlemen need to do is to get the report of the collector of customs for 1912 and see what the commerce of Alaska amounts to. The United States maintains a fleet and a large force on the Pacific to keep an open door with China, and yet the trade in Alaska is within a million dollars of the total trade with China. The trade with Alaska is greater than the trade the United States has with 20 or 30 of the great countries in the world. People are not acquainted with the great resources of Alaska and the immense amount of merchandise that your merchants sell to it in the way of machinery, dry goods, and other merchandise. You are not acquainted with the fact that you get \$20,000,000 of gold out of the country every year and from seventeen to twenty millions of dollars' worth of fish. We ship fish from Alaska now to Boston. We compete with the Banks, and we ship better fish into Boston than they ever got from the Banks. Alaska is one of the richest regions in the world. And the Guggenheims are not ignorant; they know it; and they are getting control of its resources because they are lying around loose and they are valu-

Mr. STAFFORD. Will the gentleman explain to the committee how the gold and fish are dispatched from the interior of

Alaska to the United States?

Mr. WICKERSHAM. The gold is dispatched from the in-terior of Alaska over this line from Fairbanks and over the Copper River road to the States. The fish is canned on the coast and not in the interior. We pay so much greater prices for meat in the interior than you have to pay here that you would be amazed if you knew what the situation is, and yet we can not get the fresh fish from the coast, which we could get very cheap if we had a railroad.

I shall put into the RECORD a balance sheet showing on the debit side the production in Alaska of gold, silver, copper, gypsum, marble, tin, and coal, and its fur and fishery products, and also a statement showing the total amount of cash receipts that we have paid to the Government of the United States, and

you will be surprised when you learn that since 1867 the production of Alaska amounts to \$525,685,327.

Mr. MADDEN. But that has not gone into the Treasury of the United States.

Mr. WICKERSHAM. No; but it went into the pockets of the people of the United States, which is a great deal better place for it.

Herewith is a balance sheet of the production of Alaska upon one side and the total cash disbursements of the United States upon the other:

Balance sheet-United States in account with Alaska, 1867 to 1913, inclusive.

Dr.			CI.
Production.	Dollars.	Total cash disbursement.	Dollars.
Minerals: Gold. Silver. Copper. Gypsum. Marble. Tin. Coal. Sea and fur products: Fur-seal skins. Aquatic furs, except seal. Furs of land animals. Walrus products. Whalebone. Fishery products. Total eash receipts.	228, 512, 471, 00 2, 037, 280, 00 16, 074, 625, 00 647, 345, 00 555, 443, 00 88, 662, 00 340, 189, 00 52, 042, 528, 00 12, 616, 937, 00 9, 537, 081, 00 9, 537, 081, 00 1, 707, 410, 00 182, 569, 625, 00 18, 588, 278, 72	Purchase price	7, 200, 000. 00 27, 795, 525, 92 6, 564, 642, 90 41, 560, 168, 82 484, 125, 158, 90
	525, 685, 327. 72		525, 685, 327. 72

On the debit side of this balance sheet is a complete statement of the total amount of gold, copper, sea and fur products, and all the production of the Territory of Alaska from 1867 to 1913, inclusive; there is also an item showing the total cash received by the United States from the Territory of Alaska in the way of customs duty, payment for lands, taxes upon seal skins, etc., and items of receipts by the Government from Alaskan resources. On the other side is the amount which we paid Russia for the purchase price of this Territory, together with the appropriations expended through the Treasury and Post Office in maintaining government there from 1867 to 1913. The total expenditures of the United States in Alaska to the end of 1913 are only \$41,560,168.82, while the Government has received from Alaska \$18,588,278.72, leaving a balance against Alaska, including its purchase price, of about \$23,000,-000. But this small balance against Alaska is overwhelmed by the production of the Territory, which gives a total balance due to Alaska of \$484,125,158.90. This shows the immense value of the Territory, because it is an actual demonstration of the amount of its production to date. We have not begun to develop the latent resources of this great Territory, although it has returned almost \$10,000,000 per annum profit since the purchase in 1867. Congress is not aware how valuable this great estate is, but the Guggenheims are well informed. The Alaska Syndicate has not expended \$20,000,000 in building a railroad in Alaska, more millions in purchasing steamboat lines, other millions in other developments, and other large sums in the accumulation of information about every little detail known of its natural resources without a purpose. The Alaska Syndicate knows that its resources are unprotected and that these immense values lie there to be taken by him who has the courage, the money, and the power to take them. It has already secured tremendous values of this undeveloped wealth of the sective tremendous varies of this indeveloped weath of the people, and is securing a monopoly upon the remainder. It is not ignorant; it is not a pessimist; it knows; it acts upon knowledge acquired after the most patient research. The Alaska Syndicate knows that the strong bond of control is transportation. It realizes that with a monopoly of the transportation under its control, it will control all other resources.

With the transportation in their hands, the Alaska syndicate has no fear of any law which Congress is likely to pass. prize in this great warfare is the wealth of Alaska, and it is to be acquired through monopoly and transportation. It is the duty of Congress to prevent monopoly and to secure the welfare of the people in that Territory through an independent line of

transportation.

It is easy to get exact statistics of the value of the productions of Alaska, but it is not so easy to give the House a definite understanding of the value of the undeveloped resources of the Territory. One of the greatest of these is coal. I now exhibit to the House a large photograph of the Nenana coal measures as they actually appear in a state of nature near the mouth of

Lignite Creek, a branch of the Nenana River, some 50 miles southwest from the city of Fairbanks. This immense lignite bed is a valuable coal supply for the interior of Alaska, though we have not been able to touch a pound of it for many years.

On the opposite side of this picture of this Nenana coal measure is a map prepared by Dr. Brooks, of the Geological Survey. It shows the known area of coal-bearing measures in the Territory of Alaska. About one-fifth of this territory has been surveyed, according to the geological plan. On the same map is a map of Pennsylvania, drawn to the same scale as that of Alaska. The Pennsylvania map shows the location of the coal fields of that State on exactly the same scale. Compare the area of the Pennsylvania field with the present known area of the coal measures of one-fifth of Alaska and discover how much greater the one-fifth area in Alaska is than the whole of the Pennsylvania measures.

I quote from the official report of the United States Geological Survey, "The Mineral Resources of Alaska, 1909," prepared by Alfred H. Brooks, Bulletin No. 442, at page 49, where he

About one-half of the known tonnage of Alaska coal is lignite, a little over one-fifth is anthracite and high-grade bituminous coal, the rest falls into the bituminous and subbituminous classes. It is fair to assume that these ratios will hold for the coals of the areas on which no tonnage estimates are possible.

The anthracite of the Bering River and Matanuska fields is but little below that of Pennsylvania in composition. * * * The coals classed as semianthracite are of about the same composition as the Loyalsock or Bernice Basin coals of Pennsylvania. The higher grade bituminous (semibituminous) coals of the Bering River and Matanuska fields are comparable in composition and heating power with the Georges Creek, New River, and Pocahontas coals of the East. * * * The lower grade Alaska bituminous coals compare favorably in composition with the coals of Japan, Vancouver Island, Washington, and Australia. This is an important point, as these are the fuels with which the Alaskan coal must come into competition.

On page 50 Mr. Brooks says:

On page 50 Mr. Brooks says:

As only about one-fifth of Alaska has been surveyed geologically, it is evident that any estimate of the area of the coal fields serves only as a measure of the minimum area. With these limitations on the accuracy of the figures the total known coal fields included an area of about 12,667 square miles. It is not impossible that future surveys may prove that the coal fields embrace many times this area.

On page 68 Mr. Brooks further says:

On page 68 Mr. Brooks further says:

On the other hand, the Bering River and Matanuska fields furnish the only known source of high-grade fuels near either the eastern or the western shore of the Pacific Occan, unless such fuels may be had from the inland coal fields of China. They have, therefore, a great importance to industries of the Pacific coast. From them must come the high-grade steaming and coking coals and anthracite needed by the growing population of the Pacific seaboard States. Unless they are utilized the manufacturing and smelting industries and the Navy must depend largely on foreign fuels, except as coal may be brought around Cape Horn or until after the completion of the Panama Canal. Alaska's own need for high-grade coal can be supplied only from these two fields, unless it is furnished by such foreign fuel as is transported for a thousand miles or more.

Railway construction is necessary before the Bering River and Matanuska coals can be brought to tidewater. (See pp. 73-76.) The lack of railways is one of the causes which has delayed the development of these coals, as a large investment of capital is necessary before any returns can be expected. Moreover, it increases the cost of the product and places the coal at a corresponding disadvantage with that of such fields as those of Vancouver Island, New South Wales, and some of China and Japan.

No part of the immense coal deposits of Alaska have yet been

No part of the immense coal deposits of Alaska have yet been mined; nor is there any means of transporting it if it was mined; nor is there any chance to secure the building of railroads for the development of these coal fields unless the Government will substantially give the builders of the railroad a monopoly of the coal as well as of transportation. The only proposition made to the Government—to which I have called your attention in these remarks-was based upon a proposed monopoly of transportation and mining. It fairly discloses the desire of the Alaska Syndicate in its dealings with transportation and coal matters. There is but one means of securing the development of Alaska and of these valuable resources of Alaska, and that is for the Government to build the railroad fror the southern harbor to the Matanuska coal fields and thence into the interior. Not only must the Government build this trunk line, but it must take hold of the question of rates in the Territory of Alaska.

CONTROL OF FREIGHT RATES ON RAILBOAD AND WATER.

Since the Interstate Commerce Commission was mandamused into jurisdiction in Alaska transportation the White Pass Railroad, the Copper River & Northwestern Railroad, and the Alaska Northern Railroad each filed its tariff rates with the commission, which approved them. I have quoted from the official figures given me by the commission to show what excessive rates the Alaska Syndicate railroad, the Copper River & Northwestern, can still charge under the control of the Government. These rates must be reduced to fair and reasonable

Railroad rates, however, as the situation stands in Alaska to-day, are not the rates which do the greatest harm to the

development of the Territory. The rates which rob the Territory of any chance of growth and development are those charged by the steamship companies carrying the freight by ocean to Alaska and the river steamers which carry the freight up the rivers to the interior points.

Now, these steamship and steamboat companies are not under interstate-commerce control, unless they undertake to transport through freight received from some railroad or to be delivered to some railroad in Alaska for continuous carriage. They take care not to do that. They do not receive freight for continuous carriage, except the Copper River & Northwestern receives the copper mined by its Kennecott ing Co. twin and carries it to Tacoma under a through rate with its parent. But that is merely taking money out of one pocket and putting it into another, or rather it is bookkeeping. But if you attempt to get the Alaska Syndicate Steamship Co. to carry through freight for you it declines. It will carry your freight from the wharf in Seattle to the wharf in Cordova, but no farther. At the wharf in Cordova, after paying \$1.60 wharfage on each ton, you can still employ the railway com-pany to carry your freight to Chitina or any other point on the road. If from Chitina you wish it conveyed into the interior you are obliged to do business with the third carrier, although it may belong, as the other two do, to the Alaska Syndicate. The point I am making is that water-transportation rates in Alaska are not covered by the interstate-commerce law, and the Interstate Commerce Commission has substantially no jurisdiction over such rates. So far as its jurisdiction could be extended it is met by the refusal of the steamship and steamboat companies to carry through freight in connection with the rail-road. Ninety per cent of all the freight carried in Alaska is not under the control of the Interstate Commerce Commission. Ninety per cent of all freight carried in Alaska is carried upon rates fixed by the Alaska Syndicate without any control on the part of the Government. Ninety per cent of all the freight charged shippers in Alaska is carried by the Alaska Syndicate or its allied companies, upon rates fixed by themselves as high as their interests dictates. What Alaska needs is, first, a Government built, owned, and controlled railroad from one of the southern harbors to the interior waterways, and, second, complete Government control over transportation by water as well as by railroad. Until the Government shall take charge of and control rates from ports in the United States to ports in Alaska, and upon the interior waters of Alaska, that Territory will be restrained in its development by excessive and unconscionable rates

Alaska has more coal than Pennsylvania, Ohio, West Virginia, and Virginia, and as good coal. It has more copper than Michigan, Montana, and Arizona; it has more gold than California and Colorado; it has more agricultural lands than Norway, Sweden, and Finland; it has more fish than all the balance of American waters together. This is the prize for which the Alaska Syndicate is seeking to control and to secure, as far as it can be secured, by corporate greed and monopoly.

INTERIOR TONNAGE.

The minority report admits very reluctantly that there is production and wealth in the coastal region of Alaska, but declares that there is nothing in the interior which will produce outcoming tonnage. It admits that there will be an inbound tonnage equal to the amount of merchandise purchased by the people of interior Alaska from the merchants of the United States, but insists that there is no chance for the creation of any tonnage coming out of the interior over the road. This statement is entirely assumed and is based upon a misunderstanding of the situation. When the Union and Central Pacific bills were before Congress a Senator with very much the same pessimistic turn of mind declared that while there might be westbound tonnage over this line equal to the amount of merchandise which the people near the Pacific terminus would buy from the manufacturers of the East there never would be any eastbound freight over the road. Very earnestly the Senator declared that there was nothing on the Pacific coast which could be utilized as tonnage toward the Atlantic, and he facetiously insisted that the only freight which might be transported eastward over this road would be "silks and opium" from Asia. The gentlemen who drew the minority report seem to have been afflicted with this "silk and opium" idea,

In the first place, I think it is altogether unimportant. If the road carries sufficient tonnage to the interior to pay maintenance and a profit, it would be a good investment even if not a dollar's worth of freight came out. Let us see what the facts show in respect to the ingoing tonnage alone. In his report on the mineral resources of Alaska for 1909, Mr. Brooks says:

No exact figures are available in regard to the amount of freight annually shipped to the Alaskan portion of the Yukon Basin, but it is

probably safe to say that this amounts to 30,000 tons and that it costs over \$2,500,000 to land it at the end of steamboat navigation.

The mining freight must then be hauled by wagon or sied, except at Fairbanks, where there is a railroad. It is estimated that this haulage from steamer to mines for the Alaska Yukon costs from \$2,000,000 to \$2,500,000 a year. The total annual cost of freight for the Yukon Basin is, therefore, probably between \$4,500,000 and \$5,000,000, or nearly 50 per cent of the value of the entire gold output.

Assuming this extract as my text, let us see what it leads to. A little further on in his statement Mr. Brooks declares that a trunk railway into the Yukon," with a freight rate, for example, of 10 cents a ton-mile, would make a saving of at least 50 per cent in the cost of transportation of supplies and equip-

ment to the Yukon camp.

Here would be a saving instantly to the people of the interior of Alaska of \$2.500,000 per annum. If the railroad is being constructed for the benefit of the people, here is a single item which would pay 7 per cent upon the investment of \$35,000,000. A 7 per cent dividend to the people would pay the entire cost of this road in 15 years, and the Government would have the road left. But, it may be said, the Government is to be considered rather than the people-that the saving of money to the people of the interior is not the important consideration for the building of the road. While I do not admit this, let us assume it for a further examination of the situation.

Leaving the question of the people's interest aside for the moment, let us see what the result would be to the enterprise itself. If it cost \$2,500,000 to land 30,000 tons of supplies in the interior at the end of steamboat navigation, it ought to be worth one-half that sum over the railroad, or \$1.250,000. expense of carrying the mails to the interior would be reduced at least \$200,000 if they were carried over this road, while the Army freight bill would be substantially saved in the same way, amounting to \$75,000 per year. Thirty thousand tons of freight at a cost of \$2,500,000 is equal to \$83.33 per ton at the steamboat landing in the interior. Reduce that one-half to \$41.66 per ton, and the road would then have an income of \$1,250,000 for present freight demand for the interior.

The people of the interior now pay double what Mr. Brooks assumes as the interior freight rate. Instead of \$83.33 the freight rate will more nearly average \$160 per ton, but reduce it one-half from Mr. Brooks's statement and make it \$41.66; the freight rate then to the interior would bring the Government railroad \$1,250,000. Add the \$275,000 saved on mail and Government supplies and you have about \$1,500,000 income for the road. That is \$125,000 per month, and will much more than pay operating expenses if only the present amount of freight be carried; but if you add the passenger traffic it will be much more. We now pay \$152.50 to ride on the stage and the railroad from Fairbanks to the coast. Cut that to 10 cents a mile, or make the passenger rate \$40. At least 2,000 persons travel in and out per annum, which would make \$80,000 additional for passenger Assuming that a branch is run to the Matanuska coal fields and the Government shall haul coal for naval use and for sale to the coast towns—to Washington, Oregon, and California—that would add a very large traffic. The coal traffic would be largely outbound and not inbound.

Altogether it is safe to assume an income based upon present conditions of \$2,000,000 per annum. That is more than 6 per cent upon the amount required to build the road, and would save the people of the interior of Alaska substantially \$4,000,000 per annum on freight. Even if it is insisted that this road must be made to pay the usual percentage upon the investment, it is safe to say that it will do it when you consider the present freight rates to the interior of Alaska and the immense reduction which can be made from these rates. If you can save the people of the interior of Alaska \$2,500,000 per annum upon their freight bill and then secure a return to the road for freight in and out of \$2,000,000 per annum, it is a paying investment both to the people and to the Government. That appears to be the situation, based upon the amount of the present freight tonnage carried to the interior. But add the outgoing coal freight from the Matanuska coal fields and the saving on mail and it is without question a good investment both to the Government and to the people.

We have assumed that it will pay both the people and the Government to build this road, though there may be no increase in the development of the mineral or agricultural resources in the interior. But the building of this road will bring our mining machinery and our hardware and merchandise in for one-quarter of what we now pay for it, and will thereby enable the miners to extend their placer mining to an indefinite area of ground which is now too low grade to pay at the present excessive transportation rates. The quartz mining in the Fairbanks country is increasing very rapidly, and the lower transporta-tion rate for machinery and supplies would enable the miners to

in value. The argument that there is no outcoming freight is entirely wrong. The Matanuska coal field would furnish sufficient freight of itself to pay one-half of the running expenses of the road.

Assuming that the road is built either from Seward or Portage Bay through the great Susitna Valley, over Broad Pass, via the Matanuska and Nenana coal fields to Fairbanks, it passes through a wonderfully rich country every foot of the From the moment it leaves Seward or Portage Bay it is in a highly mineralized region until it reaches the Susitna Val-This great valley is an agricultural country, though the high land all around it is highly mineralized and contains some of the best mining prospects in the Territory of Alaska. Over every foot of the route of this 400 miles of road there are resources sufficient to maintain a large population, and it is the richest portion of the Territory of Alaska. The opportunity for return tonnage is far greater over this short line of road than it was over the long Union and Central Pacific. great road has furnished immense eastward tonnage, and by the same token the trunk line into the interior of Alaska will furnish a large southbound tonnage as well.

Mr. MADDEN. How much of that \$1,250,000 would be ab-

sorbed in the management of the road?

Mr. WICKERSHAM. Of that \$1,250,000 I speak about it might take it all, but I am not a railroad authority.

Mr. MADDEN. It would not take twice as much?

Mr. WICKERSHAM. I should not think so. take into account the needs of the Navy for naval coal and the Matanuska coal coming out. If that coal is what Mr. Brooks and other men who have examined it say it is, you would have a large tonnage from the Matanuska to the sea. If that coal is in demand for naval use and on the Pacific coast for mercantile uses, you would have another million and a quarter in carrying that coal out. There is no coal in California substantially, there is very little coal in Oregon-no valuable coal. There is a little more coal in the State of Washington, but it is not a high-grade coal. All of the high-grade coal we have on the Pacific coast is in Alaska, and the people want that highgrade coal and you can not get it outside of Alaska.

Mr. MADDEN. What does the gentleman think the royalty on that coal would be worth on the ground?

Mr. WICKERSHAM. That is a matter I could not tell you

Mr. MADDEN. The Government would be interested in that in the manner of the expenditure of the \$30,000,000.

Mr. WICKERSHAM. That would be in addition to what the Government would make on the road.

Mr. MADDEN. You can not get over 5 cents a ton at the

Mr. WICKERSHAM. Let me suggest to the gentleman, if you have ever read the Cunningham-Guggenheim contract you will know the Guggenheims—the greatest mining concern in the United States—agreed to pay the Cunninghams 50 cents a ton royalty for that coal. That is in the Cunningham con-It is in this record.

Mr. MADDEN. Mines all over the United States are being

operated on the basis of not to exceed 8 cents.

Mr. WICKERSHAM. The gentleman is mistaken about that. If you will look at the record contained in the geological reports you will see it goes all the way from 5 cents up to a

I am talking from experience. Mr. MADDEN.

Mr. WICKERSHAM. The gentleman may have some experience. In Illinois, where your country is underlaid with coal, of course the rate is cheap; but in Alaska where nature has given that Territory a monopoly the rate may be higher than in Illinois.

Mr. MADDEN. Miners all over the United States in bituminous coal think they are getting a good price if they get a dollar a ton for coal on the car.

Mr. MONDELL. Will the gentleman yield?

LOBBYISTS.

Mr. WICKERSHAM. I must decline to yield. Now, I am going to talk about lobbyists for a moment and then I am going to quit. In his speech, and again upon the floor of this House, the gentleman from Oklahoma [Mr. Davenport] has referred very feelingly to lobbyists, and has pointed the finger of scorn at this bill, based upon the assumption that some lobbyist sat in the committee rooms and did not say anything. But the gentleman is mistaken. A lobbyist was in the committee rooms, and

Mr. DAVENPORT. The gentleman is mistaken. I did not say "lobbyist." I said "the attorneys for the Guggenheims," develop large mines which are now worthless because too low or one of them; and if the gentleman has any doubt about it,

and if he will get the city directory and get the firm with which

Mr. Law is connected, he will find him.

Mr. WICKERSHAM. I have the gentleman's language here. He said:

This proposed road, if constructed from Chitina to Fairbanks, will connect with the Guggenheim road that runs from Cordova to the Bonanza mine, and, as I said awhile ago, during the hearings, notwithstanding the fact that Mr. Law, one of their firm, sat in the committee room, he never once opened his mouth in objection to it. That means that just as quickly as this appropriation is made they would try to get their road taken over.

Now, the gentleman was a member of that committee, although he did not attend its meetings; yet if he knew there was any scheme that looked like unfair dealing on the part of those people, he ought to have told his brothers on that committee. He never did that, and never did come to the committee and complain of anybody, and he never did anything else.

Mr. DAVENPORT. If the gentleman will permit me, I have not said that there was a scheme with the committee. not said that yet. I stated the parties that represented them, and I said then and say now that let the Government start to build this road and you will see if they do not try to get the road taken over at Chitina, where the road stopped that was to run from Fairbanks, 313 miles.

Mr. WICKERSHAM. Well, I will say to the gentleman that have confidence in President Woodrow Wilson. [Applause.]
Mr. DAVENPORT. But he will not go up there and see to it.

Mr. WICKERSHAM. No; but his secretary will, and Frank-lin K. Lane is just as honest a man as Woodrow Wilson is.

Mr. DAVENPORT. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman yield?

Mr. WICKERSHAM. I decline to yield further. Quotation is also made from Senator Nelson's conference with Senator Guggenheim to show that if this bill passes the money appropriated by it will be misapplied by the purchase of the An assumption of this character is without Guggenheim road. any foundation either in the bill or in any of the hearings. It assumes a connivance of the President with the big interests for the purpose of taking over their bad investment, if it is bad, and thereby misappropriating the fund from the building of a trunk line of railroad for the development of Alaska into one of relief of the Guggenheims. It is amazing that such a statement should be made upon the floor of this House. tainly the purchase of the Guggenheim railroad for ten millions or twenty millions of dollars or any other sum would be a misapplication of the fund. It is not the purpose for which the appropriation is made. The people of Alaska and the West—the people of the United States—would be shocked if any such disposition should be made of this appropriation, and nobody expects any such action on the part of the President. It is an amazing argument, without foundation in fact, to prevent the passage of the appropriation, and its proper application to the building of a railroad in Alaska for the relief of that great territory from the monopoly of the Guggenheims.
The reference to lobbyists, however, is interesting.

Mr. Law should have been mentioned by the speaker is not apparent in his statement. Certainly lobbyists have surrounded the committee rooms during the hearings and arguments upon this bill. Had the gentleman from Oklahoma when he made this reference to lobbyists turned his gaze to the right and looked into the gallery just behind him he would have noticed three men sitting together, waiting with bated breath for the arguments as they fell from his lips in opposition to a people's road in Alaska. One of them, the president of the dummy Controller Railway & Navigation Co., who since the disappearance of the late Col. Mulhall is the dean of the Washington lobby, has been present at every hearing on these Alaska railway bills, always fighting in the opposition. His alliance with the Gug-genheims is so intimately established in the hearings that there can be no doubt about it. Next to him sat the general counsel for the White Pass & Yukon route, whose owners are partners in the Alaska Syndicate. This general counsel represents the president of the White Pass & Yukon road, who had also appeared before the committee in opposition to this bill. At his right hand sat a banker from Alaska, who has long been the Alaska representative of the Guggenheims in the Territory of He is one of their business associates, engaged in the closest interlocking alliance with them in their financial matters in that Territory.

Had the gentleman from Oklahoma turned to the left and looked into the gallery he would have discovered another small group of gentlemen greatly enjoying his opposition to the Alaska railway bill. The principal one of this group was the general manager of the Northern Commercial Co., the maker of rates and tariffs of the Northern Navigation Co., and the personal representative of the Alaska Packers' Association, all of which companies are so intimately interlocked with the Guggenheim

corporations in that Territory, in the maintenance of rates and in the exclusion of the interstate-commerce control, as to be substantially a part thereof.

If the gentleman from Oklahoma had attended the meetings of the Senate and House Committees on Territories and noted the combination of these lobbyists which appeared in opposition to this bill, he would have known, as other members of the committees did, that they were Guggenheim lobbyists.

There are lobbyists and then there are lobbyists, but the most venal and corrupt lobbyist is the literary lobbyist who sells his talents to monopoly to inflict wrong upon his countrymen. The Alaska Syndicate has long maintained a literary bureau for the purpose of minimizing the resources of Alaska, throwing obstacles in the way of others who wish to do business there, and thereby enable its members to secure more easily its undeveloped resources. Under this guise they are frequently enabled to get misleading articles published in magazines of the highest character and sometimes even in public documents. Such an article was published by one of their paid agents in the Saturday Evening Post, in February, 1910. And on February 25, 1910, the Senator from Colorado arose and asked that aty 20, 1910, the Senator from Colorado arose and asked that it be printed at length in the Record, where it will be found at page 3386 of February 25, 1910. That article was prepared in the interest of the Alaska Syndicate by one—or two—of their literary lobbyists in an effort to "bear" the resources of Alaska at a time like this, when it was to their interest to "bear." A careful reading of that article might induce a miserably suspicious person to accuse its author—or authors—of plagiarism in borrowing ideas from the minority report in opposition to the bill now before the House. And the gentleman from Oklahoma has been imposed upon in very much the same He asked leave to extend his remarks in the RECORD by printing two statements prepared by literary lobbyists, one hailing from Chicago and the other from New York.

The attention of the House is called to the advertisement at the head of the first of these literary curiosities. It is, "Our Colonies. Article No. 45. By W. D. Boyce, organizer and leader of the Saturday Blade's South American expedition, African balloonograph expedition, and old Mexican research. This is the seventh article of Mr. Boyce's series on Alaska."

I repeat, the gentleman from Oklahoma [Mr. DAVENPORT] in his speech here permitted these people and those literary

lobbyists to impose on him.

Mr. DAVENPORT. They did not impose upon me at all, and I challenge the gentleman to deny the truth of Mr. Boyce's article and show that the conditions in Alaska are not as Mr. Boyce says they are.

Mr. WICKERSHAM. Well, Mr. Boyce went on the trip to Alaska in the past summer with 114 representatives of the business interests and the press of the United States. hundred and thirteen of them came back and went enthusiastically to work in aid of the development of Alaska in support of this railroad, and Mr. Boyce himself is the single exception.

Mr. DAVENPORT. The gentlemen stated that I placed in

the RECORD what is not true. I deny it.

Mr. WICKERSHAM. After this flamboyant announcement we are prepared for the balloonatic declaration that during the few hours he spent in Alaska he saw a shaft 2,000 feet in depth and frozen from the bottom up. Of course, he saw nothing of that kind in Alaska. It is possible that during the 24 hours which he remained in the great Tanana Valley he saw some mining shaft out on the north hillside in the placer mining district near Fairbanks 200 feet deep and frozen. But what kind of entertainment my friends up there gave him to make him be-lieve that it was 2,000 feet deep and frozen from the bottom up I do not know

I have read his article with some amusement, but more disgust. He certainly discovered more things that are not true than any other literary lobbyist who ever spent so brief a time in Alaska

Mr. BRYAN. That statement was used by the gentleman from Michigan [Mr. FORDNEY].

Mr. WICKERSHAM. Yes.

Mr. PAYNE. That was a clincher. [Laughter.]

Mr. WICKERSHAM. Yes; that was a clincher. One hundred and fourteen representatives of the press of the country went through Alaska on the same excursion with him. One hundred and thirteen came back enthusiastically supporting every effort to develop Alaska, and especially this railroad bill, and he is the single one in opposition. However, he seems to reside very near to the White Pass & Yukon offices in the city of Chicago, and for some reason assumes to make their lobby fight. Of the other literary lobbyist quoted by the gentleman from Oklahoma little need be said. He is apparently the successor to the Alaska Syndicate's old literary bureau in New York, and does the best he can under the circumstances. Neither of these men has any knowledge of Alaska which entitles him to speak with credit, and they are both discredited by the character of the lobby stuff they send to every Member of Congress. It is perfectly apparent that they have some special interest in defeating this bill. The gentleman from Oklahoma is right when he declares that there is a strong lobby at work on this bill. Any Member of this House who will examine the Senate and House hearings will soon discover that the lobby is maintained here by the Alaska Syndicate for the purpose of defeating this bill and protecting the strangle hold which they now have on Alaska, its natural resources, and transportation.

Mr. Boyce is the single exception among those who went on that trip. He went up there to secure a statement and firsthand information by which he might assist the White Pass route in its opposition to this bill.

Now, with respect to this loobyist in New York. The Alaska Syndicate has long maintained this New York lobby and the literary lobbyists. They got a fine article published in the Outlook some two years ago, and another published in the Saturday Evening Post, which is copied in the Senate hearings. impose them on the people.

They lay a cuckoo's egg of that kind in a nest every once in while, and they even get some of them into the House.

[Laughter.]

PESSIMISTIC ECHOES.

If Alaska is as utterly worthless as it is declared to be in "Minority views" in opposition to this bill and in the very interesting speech in opposition made by the gentleman from Oklahoma, then there is little need for legislation in aid of its development.

It is strange that the Guggenheims have not discovered how worthless it is. It is singular that the Alaska Syndicate was formed by the Morgans and the Guggenheims, and the wealth at their command expended in securing properties there and the control of its alleged resources. It is singular that those gentlemen, who are generally so discreet and well advised, should not have discovered what my friend from Oklahoma saw at a glance. They have had scores of agents throughout Alaska for years critically examining its fisheries, its mining resources, its transportation routes, its agricultural resources, and all of its undeveloped wealth, and they seem to have completely failed to discover how lacking in value it is. The Alaska Syndicate has invested \$20,000,000 in a railroad from Cordova to what it thinks is the most valuable copper deposit in America, probably as many more millions in steamship lines, and large sums in the exploitation of the region; but it has been reserved for a gentleman who never saw the Territory and who knows nothing about it from personal observation to balance accounts with it and place all its supposed wealth in the debit column. Like the poor, the pessimists are always with us, and other pessimists have occupied seats in Congress. Senator Benton, in a speech in 1825, said of the great West, with which he was subsequently acquainted:

The ridge of the Rocky Mountains may be named as the convenient, natural, and everlasting boundary. Along this ridge the western limits of the Republic should be drawn and the statue of the fabled god Terminus should be erected on its highest peak, never to be thrown down.

The Oregon controversy from 1825 to 1846 brought out a new crop of congenital unbelievers. Senator Dickerson, of New Jersey, was thus afflicted, as all Oregonians will agree. He said of Oregon in the period when national legislators knew as little of that region as some of them now do of Alaska:

Oregon can never be one of the United States. If we extend our laws to it we must consider it as a colony. 101 * .

But is this Territory of Oregon ever to become a State, a member of this Union? Never. The Union is already too extensive and we must make two or three new States from the Territories already formed. * * Yet a young able-bodied Senator might travel from Oregon to Washington and back once a year, but he could do nothing else. It would be more expeditious, however, to come by water around Cape Horn or to pass through Berings Straits, around the north coast of this continent to Baffins Bay, thence through Davis Strait to the Atlantic and on to Washington. It is true, this passage has not yet been discovered, except upon our maps, but it will be as soon as Oregon shall be a State.

There are gentlemen from Oregon here who know whether the Senator's statement is correct or not. [Laughter.]

Pessimism never dies, and even some great men are of this mournful type. Daniel Webster was a great man, but listen to

What do we want with the vast, worthless area, this region of savages and whirlwinds of dust, of cactus, and prairie dogs? To what use could we ever hope to put these great deserts, or these endless mountain ranges, impenetrable, and covered to their base with eternal snow? What can we ever hope to do with the western coast, a coast of 3,000 miles, rock-bound, cheerless, and uninviting and not a harbor

on it? Mr. President, I will never vote one cent from the Public Treasury to place the Pacific coast one inch nearer to Boston than it is now.

[Laughter.]

And that from Boston, too! Just think of it! And at that time that coast which he said was rock-bound and did not have a harbor on it, had the most beautiful harbor in the world-Puget Sound.

Daniel was here speaking of what is now known as Oregon, Washington, and Idaho, and of a coast which has many good

Another Senator was equally as doubtful as the Senator from

Massachusetts or my friend from Oklahoma.

Senator McDuffie, of South Carolina, characterized the Oregon country in the following way, and incidentally damns the agricultural resources of the States between the Mississippi and the Rocky Mountains with faint praise:

The Rocky Mountains with faint praise:

What is the character of this country? As I understand it, there are 700 miles this side of the Rocky Mountains which is uninhabitable, where the rain never falls, mountains wholly impassable except through gaps and depressions to be reached only by going hundreds of miles out of the direct course. Well, what are you going to do in such a case? How are you going to apply steam? Have you made an estimate of the cost of a railroad to the mouth of the Columbia? Why, the wealth of the Indies would be insufficient. Of what use would it be for agricultural purposes? I would not, for that purpose, give a pinch of snuff for the whole territory. I wish the Rocky Mountains were an impassable barrier. If there was an embankment 5 feet high to be removed, I would not consent to spend \$5 to remove it and enable our population to go there.

And on another occasion, when his digestion must have been worse than usual, the same Senator declared:

And if there ever was a country upon the face of the earth in which I should consider it a great misfortune for the poorest man to settle—
if there be any country in the world which has been blasted by God,
which is utterly destitute of all conceivable attraction, in so much as to
be scarcely capable of sustaining the life of human beings, it is this very
Territory of Oregon."

And Senator Dayton, of New Jersey, declared:

That with the exception of land along the Willamette and strips along other water courses the whole country is as irreclaimable and barren a waste as the desert of Sahara; nor is that the worst, the climate is so unfriendly to human life that the native population is dwindling away under the ravages of malaria.

This region was alleged to be utterly worthless only when it was as unknown to the Members of this House as Alaska seems to be now.

And then, in answer to the nugacious opinion so freely announced by my friend from Oklahoma, that Alaska is not and can never become an agricultural country, permit me to make a further quotation from Senator Dickerson, by way of giving his then generally accepted opinion of the value of the Great American Desert, and particularly of that part of it which is now occupied by the truly agricultural State of Oklahoma, for the purpose of demonstrating what such opinions are worth:

pied by the truly agricultural State of Okishoma, for the purpose of demonstrating what such opinions are worth:

From the meridian of Council Bluffs there is an immense region, extending to the Rocky Mountains, containing about 160,000 square miles, which from the sterility of the soil, the want of wood and water, can never be cultivated and, of course, never admit of civilized population. An accurate description of this region may be found in Maj. Long's Expedition (vol. 2, p. 350). After describing this country, he says, on page 361:

In regard to this extensive section of country I do not hesitate in giving the opinion that it is almost wholly unfit for cultivation and, of course, uninhabitable by a people depending upon agriculture for subsistence. Although tracts of fertile land considerably extensive are occasionally to be met with, yet the scarcity of wood and water almost uniformly prevalent will prove an insuperable obstacle in the way of settling the country. This objection rests not only against the immediate section under consideration, but applies with equal propriety to a much larger portion of the country. Agreeably to the best intelligence that can be had concerning the country both northward and southward of the section, and especially to the inferences deducible from the account given by Lewis and Clarke of the country situated between the Missouri and the Rocky Mountains above the River Platte, the vast region commencing near the sources of the Sabine, Trinity, Brazos, and Colorado and extending northwardly to the forty-ninth degree of north latitude, by which the United States territory is limited in that direction, is throughout of a similar character. The whole of this region seems peculiarly adapted as a range for buffalces, wild goats, and other wild game, incalculable multitudes of which find ample pasturage and subsistence upon it.

[Laughter.]

When the gentleman from Oklahoma described my beloved Territory in language of mournful pessimistic minimization the other day I was grieved, but since it is officially admitted that a member of the United States Senate once declared the region of Oklahoma to be unfit for any other agricultural purpose than to serve as a pasture for wild goats, the score is settled. I forgive him. [Laughter.]

The Great American Desert, and especially the region described as so utterly worthless by the Senator from New Jersey, is now occupied by the agricultural States of Nebraska, Colorado, Kansas, Oklahoma, and Texas. This region was alleged to be utterly worthless only when it was as little known as Alaska is in Congress to-day. To those of us who know Alaska and the States of the Great American Desert it is clear that those States do not have the great natural resources now possessed by the Territory of Alaska and which will in due time compel the formation there of four or five great States in the Union, each equal to any one of those mentioned.

The minority report in opposition to this bill, with its excessive depreciation of the natural resources of Alaska and its mournful prognostications with respect to its future development, brings to mind another minority report of a similar kind.

In 1868, when the bill for the payment of the purchase price of \$7,200,000 to Russia for Alaska was before the House, it was referred to the Committee on Foreign Affairs. That committee made a favorable report, supported by all the members but two, and those two, as now, made a minority report. That minority report is an interesting document. There is much in common between the two reports besides the fact that both were minority reports and both were signed by but two members of the committee. Both are depreciatory in the extreme. That of 1868, however, can now be examined in the light of history and development. It denounced the Territory, alleging that it had neither fisheries nor mines, nor agriculture, nor any other known resource of value. Concerning its fisheries that report said:

The report of Prof. Davidson in the main seems candid and truthful, but when he, with seeming honesty, tells us that salmon are so plenty that the bears come down in numbers to feed upon them, their delicate appetites selecting the heads only; that the bays south of Alaska are so crowded with that fish as to impede the passage of boats and that the beaches are sometimes strewn with stranded salmon 2 or 3 feet thick, and that the fish sell for 8 cents per pound, the minority of the committee may be pardoned if they manifest some incredulity. The story is a good one and would have done no discredit to Capt. Lemuel Balliver or Baron Munchausen.

This was considered "a clincher" in the effort of the minority to laugh the fishing resources of the Territory of Alaska out of court, yet since that time the people of the United States have taken from those same waters nearly \$200,000,000 worth of salmon.

The minority report of 1868 declared there was no coal in the Territory of Alaska, but to-day we know that Alaska has more coal than Pennsylvania, Ohio, and West Virginia.

They declared that there was no gold or other mineral in the Territory of Alaska, oct since the date of that report the miners in Alaska have extracted more than \$200,000,000 from its gravels and are now beginning work upon the greatest quartz mines ever discovered in the world. And so it usually is with pessimistic statements by men who do not know what they are talking about. The Territory of Alaska has yielded more than \$500, 000,000 in actual production since those two minority members in 1868 sought to minimize its wealth and to prevent its pur-To those who now know Alaska the pessimistic statements contained in the minority report seem as humorous as these early declarations about regions of which the speakers were as little acquainted as the opponents of this bill are with Alaska.

THE REMEDY.

The remedy which the two minority members propose in their report to cure the ills of Alaska is hardly in keeping with their pessimistic statements touching the value of the resources of the Territory. In paragraph 2 of their "minority views" they say:

Alaska needs more than anything else clear-headed, patriotic attention looking to the early revision of her land and mineral laws.

And so forth.

Why should there be any clear-headed, patriotic revision of the land and mineral laws if there is no land fit for agriculture, nor mineral lands worth developing? If Wyoming has more coal than is needed "to supply this sisterhood of States for a thousand years," and there is no naval coal in Alaska, why should a "clear-hended, patriotic" statesman waste his time in revising the land and mineral laws that "the sturdy pioneer may go there and develop Alaska in an honorable, straightforward manner"? Did it ever occur to you that a revision of the land and mineral laws which would compel "the sturdy Alaska Syndicate to go there and develop Alaska in an honorable, straightforward manner, free from graft and free from would be a wise effort? Would it not be just as clear-headed and patriotic to erect a barrier against the further monopoly of the resources and the transportation of Alaska as to "raise the embargo" and let the syndicate acquire the coal and other resources? But if there is no coal of value there, and no agricultural lands, and nothing to justify Government aid in building a trunk line of railroad, why not go to sleep again and let the burglar help himself? If all the statements made in the minority report and in the speech of the gentleman from Oklahoma are correct, nothing ought to be done with Alaska except to forget it.

The minority report opposes the bill under consideration and declares the only thing needed to secure free development in Alaska is to raise the embargo and let the coal and other lands go free to whoever will take them. In short, it means to return to the conditions which existed in December, 1906, when President Roosevelt blocked the most gigantic monopoly of our public coal lands ever undertaken by the Alaska Syndicate. means to invite the Alaska Syndicate to take up this original plan and carry it to the conclusion which they thought they had attained at that moment. It means to give to the transportation monopoly which now exists in Alaska the approval of It means to open wide the door to all the efforts Congress. which the Guggenheims made and which they now wish to continue to further monopolize, the resources of Alaska by entries of the land which contains her mineral resources. It means to take away from the people of Alaska all hope of any assistance from the United States in developing the Territory. It is an invitation to the Alaska Syndicate to come back to Alaska and do it again. It is reactionary and an abandonment of those progressive pledges which the Democrtic Party made to the people of the United States upon which they elected President Wilson. It is the adoption of a plan which the Alaska Syndicate wishes adopted. It is the adoption of a plan which the Alaska Transportation Trust, represented by the Alaska Syndicate, wishes adopted. It is a violation of the pledge made by the Democratic Party in its Baltimore platform when it declared that-

Immediate action should be taken by Congress to make available the vast and valuable coal deposits of Alaska under conditions that will be a perfect guaranty against their falling into the hands of monopolizing corporations, associations, or interests.

It is in violation of every principle of true Democracy, for it means the surrender of the rights of the people in Alaska and of its resources to a single monopolizing interest which now almost controls both. It is a remedy which meets the immediate approval of the Alaska Syndicate, the Alaska copper trust, the Alaska fish trust, the Alaska transportation trust, and all of the subsidiary trusts which gather under the wing of the Alaska Syndicate. It is a refusal to do for Alaska, out of her own resources, what Congress has done for every other Western State and Territory, in giving aid to the building of railroads for the development of Alaska.

If Congress will pass this bill and support President Wilson in his efforts to settle these Alaskan problems he will be successful. We people in the great Northwest have long waited for sympathetic assistance from Congress and the administra-

We have confidence that President Wilson intends to stand by the pledges in the Baltimore platform and see that Alaska is developed without monopoly, and the people in Alaska intend to give him hearty support and cooperation. We believe that the day of development and prosperity is soon to dawn in that great Territory. We have confidence in the plan which the President announced in his message to secure that result. It is a progressive plan and ought to have the support of every progressive legislator, whether he is called Democrat, Republican, or Progressive.

Give Alaska an opportunity to mortgage her own land and secure the building of a trunk line of railroad from some of her southern harbors to our interior waterways that she may be freed from burdens which now oppress her. Pass this bill and give her freedom from the robber barons of 165 Broadway. We have wealth of every variety in that great Territory. We have more coal than Pennsylvania, Ohio, and West Virginia; more copper than Michigan, Arizona, and Montana; more gold than California and Colorado; more agricultural land than Norway, Sweden, and Finland; and more fish than all the balance of American waters together.

What we need is a clear understanding by Congress of the true value of Alaska and a proper appreciation of its duty as the trustee of the people there. Give us some attention and your sympathy. Get information and learn something of the great wealth of the resources of that Territory. Pass this bill and let the President build a railroad for its development, and Alaska will then offer homes to 10,000,000 people who will live happily within its borders. What we need is wisdom, knowledge, and wise action on the part of Congress, and immediately population will fill Alaska's thousand valleys, open her mines, build roads, churches, schools, and homes, and establish there the last and best American State. For the Americans now there, your brothers and sisters from New England, from the North and the South—from Massachusetts, Virginia, and Texas—from the Mississippi Valley, the plains and far coasts of the West, I beg you to vote for the bill now before the House and give them aid in nation building. [Prolonged applause.]

The CHAIRMAN. The gentleman from Kansas [Mr. Mur-

DOCK] is recognized for 15 minutes.

Mr. STAFFORD. Before the gentleman from Kansas proceeds I should like to inquire whether the gentleman from Tennessee [Mr. Houston], chairman of this committee, intends to ask the committee to proceed after the gentleman from Kansas concludes his remarks?

Mr. HOUSTON. That will depend upon how much time is

occupied by the gentleman from Kansas.

Mr. MURDOCK. I expect to occupy 15 minutes.

Mr. HOUSTON. One or two other gentlemen have asked for the opportunity to speak 5 or 10 minutes.

Mr. STAFFORD. Will there be any business transacted tonight after that?

Mr. HOUSTON. I presume not.

Mr. STAFFORD. Can the gentleman give any assurances

on that point?

Mr. CLARK of Missouri. The Speaker will give the assurance that as soon as the committee rises the House will adjourn.

Mr. MURDOCK. Mr. Chairman, to my mind the most remarkable part of the remarkable speech which we have just heard, carrying the abundant information it did, was this: That until now it has not been possible for any man to give as much information about Alaska as the gentleman who has preceded me [Mr. Wickersham] gave us—for new wonders about this vast and interesting Territory have opened before us almost daily since the gold discoveries—and I think all will agree with me when I say there is no one on earth who could have given that information with the completeness that marked the address of the gentleman from Alaska. [Applause.]

And while I am loaded up with flowers, I should like to drive around to the front door of the gentleman from Tennessee [Mr. Housron], the chairman of this committee, and leave a bouquet for him, for the expedition, the dispatch with which he has brought this measure before the House. [Applause.] That activity is just as commendable in him as has been the splendid initiative in this matter shown by President Woodrow Wilson. [Applause.] We have no time to lose in this matter of protecting and developing Alaska. I favor the measure, and my advocacy of it is touched peculiarly with an element of personal observation. I, as boy and man, saw one new country develop. I came into consciousness in this world in a little collection of yellow, unpainted houses, out on a floor-flat, tree-

less, unbroken prairie.

I saw this collection of crude stores and homes grow into a city. For the men who settled there built up a great city, reared a magnificent mart, a milling, jobbing, packing center, Wichita, now a prosperous metropolis, surrounded by a populous territory. That process of building was made more diffi-cult because of the early practices of those who controlled privately owned railroads. It is a common thing among rail-road men to say that the development of the great prairie West was due primarily to the railroads. It was not due primarily to the railroads; it was due to the settlers. And the chief instrument in his hand was not the railroad; it was the small unit of 160 acres as a homestead. Originally greeted with enthusiasm by the settlers and with gratuities, the railroads came to be regarded with distrust and bitterness by the I saw my community and communities like it struggling with increasing intensity against extortions and discriminations and abuses by these corporations. This was true not only in small matters but in great ones. Economic alliance in my part of Kansas is not naturally with the eastern seaboard. We are at one economically with the territory south-Oklahoma and Texas--our ports are naturally the ports of Houston and Galveston. Much of the heavy shipments from my city, which is a grain center, should go to Galveston and Houston.

The haul is short, the grades easy, and yet for over a quarter of a century those who controlled the privately owned railroads forced by artificial means the traffic to the east and in other ways took an extortionate toll from the people who were getting the product from the ground in the sweat of their brow. Therefore I was pained to find that the only report in protest against this new proposition of aiding Alaska by a Governmentowned railroad came from two Representatives from Oklahoma. These gentlemen from Oklahoma can not have forgotten the arrogance of the corporations which their own State has witnessed. They can not have forgotten the experience of the cities in the Cherokee Strip, which were designated as town sites by the Government. For instance, under the administra-tion of Grover Cleveland the Government designated as a The railroad established another town a few town site Enid. miles north, and called it North Enid. Then the officials of the railroad shot their train through Enid and stopped them only

at North Enid, to break the Government town and build up the railroad town.

I remember of hearing in my youth a story to this effect: The commissioners of my county had in their possession some of the securities of the Santa Fe Railroad, and at that time there was a conflict between two factions of financiers for the control of that system. One of the factions came to the county commissioners and asked them to surrender this block of securities. The three commissioners, honest men, who wanted to serve the community and not the corporation, decided to ask the market price for their securities, and the faction which purchased them had to give the market price. But thereafter, for 20 years, because of that transaction, because three men served the people who elected them and not the corporations, our town was penalized by the system. For in the development of the new country, railroads discriminated not only between men but between towns. They had their favorites and their victims, and most of the development which came in my country came through the hardest sort of hard work and against evil practice and injustice; not half the story of the struggle has ever been told or ever will be.

Here is Alaska, a new proposition. It will not be an easy Territory to develop; it will prove a difficult one. Because of physical peculiarities, it is absolutely necessary that the Government take hold of this Territory to save it and the people's right to it. Men have heard here to-day that not all Alaska is cold, that there are portions that are mild, that there are parts of it very fertile, that it has magnificent valleys, broad streams, untold deposits of wealth, and rich fisheries. Now, how can we develop it? Best of all by taking off from the shoulders of the people of Alaska the embargo of privately owned railroads and by giving them the assistance in development that will come through Government-owned railroads. There are 50,000 people only in Alaska, the bulk of which is above 60°. Yet there are north of 60° in Europe—in Norway, Sweden, Finland, and the Russian Provinces—11,000,000 people supported by agriculture, and they are among the sturdiest people on the face

of the earth.

The political authority given by the chairman of this committee, the gentleman from Tennessee [Mr. Houston], for this bill is a plank from the last Democratic national platform. I read it with great interest, because I could not find precisely the specific authority for the bill, much as I favor the measure and glad as I am that it has been advanced so far. He quotes the national Democratic platform adopted at Baltimore as follows:

Conservation. Immediate action should be taken by Congress to make available the vast and valuable coal deposits of Alaska under conditions that will be a perfect guaranty against their falling into the hands of monopolizing corporations, associations, or interests.

The proposition of a Government-owned railroad, so far as that text is concerned, is only inferential. But the chairman of the committee is fair enough to quote the Progressive national platform upon this subject, and, like all of that platform, this plank means precisely what it says:

Alaska. We demand also that extortion or monopoly in transportation shall be prevented by the prompt acquisition, construction, or improvement by the Government of such railroads, harbor, and other facilities for transportation as the welfare of the people may demand.

Mr. Chairman, this is specific; this is definite; it is unmistakable. The Progressive Party made this, the only real Alaskan pledge. The Democratic leaders came to the Progressive platform for the suggestion of a real reform, and I congratulate them upon it.

Mr. WINGO rose.

Mr. MURDOCK. Oh, I have only a few moments, and I want to show the origin of this legislation.

Mr. WINGO. Can the gentleman give me the origin of that plank and who wrote it?

Mr. MURDOCK. It is a mighty fine plank, and I am not concerned about its origin.

Mr. PAYNE. Will the gentleman please tell us what the

Socialist Party said about that?

Mr. MURDOCK. I do not know; but I have looked carefully through the Republican platform, and, as usual on vital questions, it said nothing. [Laughter.]

Mr. PAYNE. It says nothing that comes from the Socialist

platform, as this does.

Mr. MURDOCK. Mr. Chairman, what is the origin of this proposition? During the administration of the lest Republican President, Mr. Taft, it developed that the administration of the Department of the Interior was giving Alaska over to the Guggenheims. An investigation resulted, and the commission appointed to investigate this matter reported. All of the Republicans upon that committee save one upheld the Taft-

Ballinger-Guggenheim policy in Alaska. One Republican, Mr. Madison of Kansas, held against the Guggenheim policy, and with him were all of the Democrats. I do not know what the attitude of the Republican leaders upon this subject is to-day. I do not know what their attitude will be upon this bill. not know whether they are still standing for the Taft-Ballinger-Guggenheim policy. I suspect they are, and I base my suspicion upon the fact that they still indorse the action of their national committee in perpetuating a system which perpetrated in 1912 the Chicago convention outrage. I do not think it is possible for them to change; I do not think they will; they never learn; but so far as I am concerned, and I think I speak for every Progressive on this floor, I am glad, with all my heart and soul, that the Democratic leader, President Wilson-and he is in this a leader-took this thing up at once; that he found perfect accord in the gentleman from Tennessee [Mr. Hous-TON]; that they brought this matter out of committee quickly; that they got it on the calendar speedily; that they took posses sion of Calendar Wednesday; and that they are occupying that day until they shall write this measure into law. The Nation wants it, Alaska needs it, and I, speaking for all the Progressives here, I think, without exception, rejoice at the good work. For in this House and in the country a Progressive is always for a meritorious measure no matter what its origin. [Applause.]

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. SHACKLEFORD having taken the chair as Speaker pro tempore, a message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had, on December 23, 1913, approved and signed bills of the following titles:

H. R. 7837. An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish more effective supervision of banking in the United States, and for other

H. R. 11003. An act to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea.

RAILROADS IN ALASKA.

The committee resumed its session.

Mr. PAYNE. Mr. Chairman, I would like to ask the gentleman from Tennessee if he is going to rise to-night, because he will have to have a quorum here in order to prolong this session very much longer.

Mr. HOUSTON. Mr. Chairman, I would ask the indulgence

of the gentleman for 5 or 10 minutes longer.

Mr. DAVENPORT. Mr. Chairman, I think at the conclusion of the remarks of the gentleman from Ohio [Mr. BATHRICK], who speaks next, the committee will rise.

Mr. HOUSTON. Mr. Chairman, I yield five minutes to the

gentleman from Ohio [Mr. BATHRICK].

Mr. BATHRICK. Mr. Chairman, I intend to support this bill for the very essential reason, as I look upon it, that it is a proper expression of government; that it does something for the people that is material and important; that it does not go to the people and hand to them a disquisition upon government philosophy in the place of material help. The time has come in this country, and some of us have noted it fully, that we must perform the functions of government in a manner that will give satisfaction to the people and make them believe that government really means something for them. The time has gone when we can throw a bare philosophical government out into the hands of the people and say to them, "Now, help yourselves." What has been the result of doing this heretofore? Private profit, a strong element of monopoly, a system of money control, a system of industrial control has operated to put the privileges of the people in the hands of the few so that the many have been totally unable to help themselves. And so we come to this Alaska proposition, which is essentially a matter of Government aid to a depressed portion of the people of this country, a governmental aid for a very worthy object, Government aid extended to the people of the Territory of Alaska which, if it works out as I hope it will and as it appears it will, will give us an example for Government aid for other directions in this country. I trust that after this bill has been passed and this railroad is in operation that the people of this country will discover there an example of what their Government can do for them aside from merely saying, "We will give you the right to work out your own salvation." That is why I am standing here, gentlemen, and telling you that I am in favor of this bill. I know that later on in this session other matters of Govern-

ment aid will be brought to our attention, but here is a glowing example of the extension of Government credit to the people in order to assist them to help themselves. It will serve as a start toward accomplishing actual help instead of forever feeding the people upon theory.

Mr. HOUSTON. Mr. Chairman, I move that the committee

The motion was agreed to; accordingly the committee rose, and the Speaker having resumed the chair, Mr. HARRISON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 1739, and had directed him to report that it had come to no resolution thereon.

PANAMA RAILROAD CO. (S. DOC. NO. 362).

The SPEAKER laid before the House the following message from the President of the United States.

The Clerk read as follows:

To the Senate and House of Representatives:

I transmit herewith, for the information of the Congress, the Sixty-fourth Annual Report of the Board of Directors of the Panama Railroad Co., for the fiscal year ended June 30, 1913.

WOODROW WILSON.

THE WHITE HOUSE, January 14, 1914.

The SPEAKER. The message is ordered to be printed and referred to the Committee on Interstate and Foreign Commerce, but the accompanying documents are not ordered to be printed yet.

ADJOURNMENT.

Mr. HOUSTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 6 minutes p. m.) the House adjourned to meet to-morrow, Thursday, January 15, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of War, transmitting draft of proposed legislation authorizing the Secretary of War to prescribe regulations under which licenses may be granted to persons qualified to act as guides to the Gettysburg Battle Field (H. Doc. No. 591); to the Committee on Military Affairs and ordered to be printed.

2. A letter from the Attorney General, transmitting a copy of a letter from the presiding judge of the United States Commerce Court, inviting attention to a typographical error in the statement of expenditures (H. Doc. No. 451, pt. 2); to the Committee on Expenditures in the Department of Justice and ordered to be

SENATE.

THURSDAY, January 15, 1914.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. TRAVEL OF EMPLOYEES OF INTERIOR DEPARTMENT (H. DOC. NO. 592).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, statements giving the names of officers of the various bureaus and offices in the Interior Department who have traveled on official business, together with the date and destina-tion of travel, nature of official business, and total expense incurred by each, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate communications from the assistant clerk of the Court of Claims transmitting certified copies of the findings of fact and conclusions filed by the court in the following causes:

In the cause of Mary Ann Jackson v. The United States (S. Doc. No. 363);

In the cause of Henry Comeaux v. The United States (S. Doc. No. 364); and

In the cause of A. A. Goodwin, jr., administrator of succession of Emile Rost, deceased, v. The United States (S. Doc. No.

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed. CHESAPEAKE & POTOMAC TELEPHONE CO. (H. DOC. NO. 597)

The VICE PRESIDENT laid before the Senate the annual report of the Chesapeake & Potomac Telephone Co. for the year 1913, which was referred to the Committee on the District of Columbia and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented memorials of George Washington Branch, American Continental League, of Brooklyn, N. Y.; of Local Division, No. 17, Ancient Order of Hibernians, of Wilmerding, Pa.; and the Wolfe Tone Society, of Pittsburgh, Pa., remonstrating against any appropriation by Congress for the proposed celebration of the so-called "100 years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

Mr. MARTINE of New Jersey. I received a telegram this morning that I wish to lay before the Senate.

The VICE PRESIDENT. Does the Senator desire to have it

Mr. MARTINE of New Jersey. Let it go in the RECORD. There being no objection, the telegram was ordered to be printed in the RECORD as follows:

[Telegram.] CHICAGO, January 13, 1914.

Hon. James E. Martine,
United States Senate, Washington, D. C.:
The national executive committee of the Socialist Party commissioned
Victor L. Berger, Charles Edward Russell, and Seymour Stedman to

investigate the Michigan strike. They report claims of men just; also report companies guilty of peonage and importation of 1,600 gunmen from outside. Leaders of miners maltreated and deported. General reign of terror on part of gunmen. The strikers firm and law abiding. On grounds of above report and on behalf of Socialist Party, we demand congressional investigation of this situation.

VICTOR L. BERGER,
ADOLPH GERMER.
GEORGE H. GOEBBEL.
JAMES H. MAURER,
J. STITT WILSON.

Mr. NELSON presented the petition of E. D. Titus, of Minneapolis, Minn., relative to the effect of the insecticide law of 1910 and the so-called Sherley amendment to the pure-food law, which was referred to the Committee on Agriculture and For-

He also presented resolutions of Local Lodge No. 274, Inter-No. 186, Brotherhood of Painters, Decorators, and Paperhangers, of Minneapolis; and of Local Lodge No. 232, International Molders' Union, of St. Paul, all in the State of Minnesota, favoring the constraint of Local Lodge No. 232, International Molders' Union, of St. Paul, all in the State of Minnesota, favoring the constraint of Local Lodge No. 232, International Molders' Union, of St. Paul, all in the State of Minnesota, favoring the constraint of Local Lodge No. 244, International No. 250, International Molders' Union, of St. Paul, all in the State of Minnesota, favoring the constraint of Local Lodge No. 244, International No. 186, Brotherhood of Painters, Decorators, and Paperhangers, of Minnesota, favoring the constraint of Local Lodge No. 252, International No. 186, Brotherhood of Painters, Decorators, and Paperhangers, of Minnesota, favoring the Constraint of Local Lodge No. 232, International No. 252, International No. 25 voring the enactment of legislation to make lawful certain agreements between employers and laborers and persons enagreements between employers and laborers and persons engaged in agriculture or horticulture and to limit the issuing of injunctions in certain cases, and for other purposes, which were referred to the Committee on the Judiciary.

Mr. LIPPITT presented a petition of sundry citizens of

Rhode Island, praying that an appropriation be made for the construction of two new battleships, which was referred to the

Committee on Naval Affairs.

Mr. KERN. I present a petition, signed by the governor and a large number of citizens of Indianapolis, Ind., praying that relief be granted members of the United States Military Telegraph Corps who served in the Civil War. I move that the petition be referred to the Committee on Pensions.

The motion was agreed to.

Mr. TOWNSEND presented a memorial of sundry citizens of Battle Creek, Mich., and a memorial of sundry citizens of Urbandale, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Com-mittee on the District of Columbia.

Mr. CLARK of Wyoming presented a petition of Local Union

No. 2616, United Mine Workers of America, of Superior, Wyo., praying for the enactment of legislation to make lawful certain agreements between employers and laborers and persons engaged in agriculture or horticulture and to limit the issuing of infunctions in certain cases, and for other purposes, which was referred to the Committee on the Judiciary.

CONDITIONS IN MINING DISTRICTS IN MICHIGAN.

Mr. TOWNSEND. Mr. President, I have received several communications from the copper country of Michigan, one from a business committee, which I desire to have read, and the others to be published in the RECORD.

The VICE PRESIDENT. Is there objection to reading the communication? The Chair hears none, and the Secretary

will read it.

The Secretary read as follows, the part read and subsequently withdrawn being indicated by asterisks:

[Telegram.]

CALUMET, MICH., January 14, 1914.

Hon. CHARLES E. TOWNSEND, Washington, D. C .:

Washington, D. C.:

Washington, D. C.:

The undersigned are a committee representing some 20,000 citizens of the copper country of Michigan. It is reported that Congressman MacDonald has stated that there is no constitutional law in this district. We most emphatically wish to say that in so speaking MacDonald does not represent the great bulk of the people here, but on the contrary deliberately misrepresents conditions. The copper country is at peace. There is no disorder, no rioting, no violation. A grand jury is in daily session taking testimony bearing on the past disorders. The circuit court for this circuit is in peaceful session in Baraga County trying strike cases. Over 26 cases have already been tried, resulting in a large number of convictions, some acquittals, and some disagreements. The last of the State troops have left the district, and yesterday the supervisors decided to reduce materially the sheriff's forces. There have been no arrests for violence for several weeks. All this proves that the law is now and will continue to be enforced. The people of the copper country are trying to resume their former peaceful and friendly relations with each other and to eliminate the bitter feeling engendered by the strike, and resent most bitterly the attitude of MacDonald. * * We ask you to give the true sentiments of our people as herein expressed as much publicity as was given to MacDonald it responsible and utterly uncalled for statement.

Mr. HUGHES. Mr. President, I make a point of order

Mr. HUGHES, Mr. President, I make a point of order against the further reading of that paper. It is quite evident that it is an attack upon a Member of the other House,

Mr. TOWNSEND. If it could be construed as an attack by me, I certainly would not wish to present it. The fact is that day before yesterday, on the 13th, the following language was

used by the Senator from Arizona [Mr. ASHURST] on the Senate floor:

Before I take my seat, however, I should say that I have not introduced this resolution with precipitation. Indeed, I deliberated two months before I concluded to introduce the same, After a conference with the Representative in Congress [Mr. MacDonalo] from the district in Michigan in which these troubles now exist. I am at liberty to quote him and to say that he has told me that his district—the twelfth district of Michigan—is a part of the United States where constitutional government no longer exists; that the rights of citizens under our Constitution and our laws are overthrown, and the laws and Constitution defied.

When a Representative of a sovereign State in Congress says that in his district the Constitution and laws are overthrown, surely it does not misbecome a Senator to ask for an investigation, which is particular of a

The request of the signers of this telegram in the nature of a petition is that this charge be denied and that the denial be given the same publicity that was given to the original statement. I do not present this matter with any idea of making an attack upon Mr. MacDonald. I simply have presented it as a statement of the citizens of that district who feel that the utterance was entirely unwarranted and untrue.

Mr. HUGHES. I have no quarrel with the Senator from Michigan and I have no objection to his people making any respectful statement in relation to any alleged statement made by Congressman MacDonald. I simply make the point of order that the telegram is couched in language which makes it subject to a point of order. It contains matter which is an attack upon the integrity of a Member of Congress, and in my judgment it should not be printed in the Congressional Record. If they desire to make a protest, they should couch it in proper lan-

Mr. TOWNSEND. If it shall be construed by the Chair as an attack by a Senator upon the integrity of Mr. MacDonald, I certainly do not wish to have it presented and I am perfectly willing to withdraw it. I should like to have the Chair look it over and see if in his judgment he believes it to be an attack upon the character of this man under all the circumstances

surrounding it.
The VICE PRESIDENT. The Chair assumes that a point of order has been made with reference to the rules of the Senate. There is no regularly adopted rule of the Senate of the United States which prevents any Senator from criticizing the conduct of a Member of the House of Representatives. There is a common rule in parliamentary assemblies, however, laid down by Jefferson in his manual, to the effect that it is improper for any Senator to criticize the conduct or language or demeanor of a Member of the House of Representatives. However, in investigating the precedents of the Senate it will be found that upon one occasion when a point of order of this kind was made the Senate gave a Senator permission to freely express his opinion of the conduct of a Member of the House of Representatives.

This matter must be left, in the opinion of the Chair, entirely to the Senator from Michigan. The Chair understands that the Senator from Michigan is not presenting it as a criticism of Representative MacDonald, but in response to a statement contained in the RECORD, made by the Senator from Ari-The Chair refuses to decide the question as to whether the well-known principle of the common law of parliamentary practice shall be enforced in this case, leaving it to the Senate to determine whether this is a breach of that comity which exists between the Senate and the House of Representatives.

Mr. TOWNSEND. Mr. President, the President of the Senate has well stated my position. I am not presenting this as a criticism of Congressman MacDonald, and I wish to withdraw it now if the Senator from New Jersey or any other Senator believes that it can be honestly construed as an attack upon

Mr. MACDONALD.

Mr. HUGHES. I will say to the Senator that I believe it to be an attack upon him. In terms it is an attack upon him. says that instead of taking the action he has taken or making the statement he has made in his capacity as a Representative in Congress and in accordance with his oath of office, he does it for the purpose of seeking notoriety and deliberately misrepresenting the people whom he ought to represent. If that does not constitute an attack upon a Member of Congress it is hard for me to perceive what would constitute an attack upon him. I leave that for the Senator from Michigan to determine. I ask him, if a telegram couched in that identical language does not constitute an attack, what does?

Mr. TOWNSEND. The Senator does not assume or presume

that the Senator from Michigan presents this as an attack on

MACDONALD.

Mr. HUGHES. Certainly not. I never intended that I should be understood as making that charge. I am objecting to the telegram itself. Perhaps it was the Senator's duty to lay it before the Senate and have it read. I think I myself would hesitate about laying a telegram couched in that language before this body. Citizens are entitled to petition if their peti-

tions are couched in respectful language.

Mr. GALLINGER. Mr. President, I was not in the Chamber when the telegram which is under discussion was read, but I would like to have the provision in Jefferson's Manual relating to the relations between the two Houses read to the I think it has been stated more broadly than it actually is.

Mr. TOWNSEND. While the Chair is looking for that-I beg pardon of the Senator from New Hampshire

Mr. GALLINGER. Certainly.

The VICE PRESIDENT. The Chair was only stating it

from memory, and not accurately.

Mr. TOWNSEND. My understanding of the rule has been that no Senator has a right to criticize or attack a Member of the other body. I certainly do not wish to do that or have anything I may say construed as attempting to do that. I had never supposed, however, that the citizens of any community were denied the right to express their views on a matter which affects them as directly as the matter which was presented by the Senator from Arizona, and quoting from the Congressman from the twelfth district of Michigan, does affect the citizens of the twelfth congressional district of Michigan.

Mr. CUMMINS. Mr. President-

Mr. GALLINGER. I would ask that the paragraph in Jefferson's Manual be read. I think it is important that it should be accurately stated.

The VICE PRESIDENT. The Chair is looking fo. it now.

Mr. CUMMINS. Whatever rule there may be limiting the right of a Senator to speak of a brother Senator or whatever parliamentary rule there may be restricting the right of a Senator to speak of a Member of the House of Representatives, it certainly can not be true that a citizen of the United States, who is not a member of either of these bodies, is denied the right of petition or memorial in which he may criticize not only the act of one Senator or one Member, but the act of all Members of both bodies.

Mr. HUGHES. Will the Senator yield to me?

Mr. CUMMINS. I yield to the Senator. Mr. HUGHES. Of course I agree fully with the Senator from Iowa upon that proposition, but does he think that an individual has a right to address a libelous telegram to a Senator and have it given publicity under the protection of the privilege of petition? That is all there is in this case. statements made in the telegram, if the Senator has heard them read or will read them, are plainly libelous, and I doubt if any one of these gentlemen would dare to make them without

the protection of the privilege of petition.

Mr. CUMMINS. I am not applying what I say to this particular case; I did not hear the telegram read; but I could not allow the impression to prevail, with my consent, at any rate, that the people of this country have not the privilege of addressing a communication or communications to the Senate and House of Representatives in which they criticize or condemn the act either of the Congress as a whole or the act of any Member of Congress. I am sure that we must preserve intact and in full vigor the right of the people of the country to express their views in the form of petitions to the Congress of the United States.

Mr. TOWNSEND. Mr. President, I desire to say, in answer to the statement of the Senator from New Jersey [Mr. Hughes], that this is not a petition or a statement by an individual, but

by many individuals,

I also wish to state that there is one sentence in this telegram which I had overlooked, which I think is proper if the petitioners wished to express it, but it does not add to the force of their protest, and inasmuch as it seems offensive to a Senator I will assume to strike it from the communication. I think the objectionable words are these:

whose only purpose for so deliberately and flagrantly misrepresenting conditions here at the present time must be to attain personal

Mr. HUGHES. That is the objectionable phrase. know what power the Senate has to amend a petition or to amend a telegram sent here by other men, but my object is simply to keep scandalous and libelous matter out of the RECORD

Mr. TOWNSEND. And with that I agree. I am very much opposed to anything that may look like misrepresentation or scandalous matter coming into Congress. But are we sure that the scandalous matter was not published on Tuesday? I have presented this telegram because I thought things had been said

here which ought not to have been said; but having been said, the people interested must have the right and privilege to deny Therefore, Mr. President, I will assume to eliminate the objectionable words.

Mr. GALLINGER. Mr. President, before proceeding further, I think I have a right to have read the paragraph from Jefferson's Manual relating to comity between the two Houses. do not think it affects this matter at all.

The VICE PRESIDENT. This is all the Chair finds in Jef-

ferson's Manual-

Mr. GALLINGER. On page 96, I think it will be found. The VICE PRESIDENT. There is, on page 93 of Jefferson's Manual, also

Mr. GALLINGER. And on page 93, likewise.

The VICE PRESIDENT. The language there used is:

No person is to use indecent language against the proceedings of the House; no prior determination of which is to be reflected on by any Member, unless he means to conclude with a motion to rescind it.

Then, on page 96, is found this language:

Then, on page 96, is found this language:

It is a breach of order in debate to notice what has been said on the same subject in the other House, or the particular votes or majorities on it there, because the opinion of each House should be left to its own independency, not to be influenced by the proceedings of the other, and the quoting them might beget reflections leading to a misunderstanding between the two Houses. (8 Grey, 22.)

Neither House can exercise any authority over a Member or officer of the other, but should complain to the House of which he is, and leave the punishment to them. Where the complaint is of words disrespectfully spoken by a Member of another House, it is difficult to obtain punishment, because of the rules supposed necessary to be observed (as to the immediate noting down of words) for the security of Members. Therefore it is the duty of the House, and more particularly of the Speaker, to interfere immediately and not to permit expressions to go unnoticed which may give a ground of complaint to the other House and introduce proceedings and mutual accusations between the two Houses which can hardly be terminated without difficulty and disorder. (3 Hats., 51.)

That is all the Chair finds in Jefferson's Manual on the sub-

That is all the Chair finds in Jefferson's Manual on the subject; but the Chair remembers that in 1867-

ject; but the Chair remembers that in 1867—

The Senate proceeded to consider the resolution of the House of Representatives, communicating for the information of the Senate certain testimony taken before one of its committees, "which apparently affects one or more Members of the Senate"; and

That portion of the testimony contained in the examination of D. A. Hull, a witness before the Committee on Public Expenditures of the House of Representatives, having been read,

Mr. Doolittle, while addressing the Chair, was called to order by the President pro tempore for indulging in language disrespectful to the House of Representatives, and impugning the motives of the members of one of its committees.

Mr. Doolittle having taken his seat,
On motion by Mr. Johnson, it was

Ordered, That Mr. Doolittle have leave to proceed with his remarks in his own way.

That is the ground of the ruling of the Chair in submitting

That is the ground of the ruling of the Chair in submitting the question to the Senate.

Mr. BRISTOW. Mr. President, I was detained from the Senate by a committee meeting, and did not arrive in the Chamber in time to hear the telegram under consideration read, but, as I understand, it is in the nature of a petition or memorial from citizens of Michigan in regard to some matter. I do not think the Senate has any right to amend or change or alter it, and I certainly shall object to any change being made. If it is a proper petition, according to the judgment of the Senator from Michigan [Mr. Townsend], to whom it was sent, to file here for the information of Congress, it is his privilege to file it, as the citizens sending it have a right to have it filed; but we have no business to change or to amend it before it is filed.

Mr. BACON. I do not understand that the Senate is undertaking to change what has been presented, but the Senator from Michigan [Mr. Townseno] himself practically with-draws—that is what it amounts to—that much of it. That is what it is. The Senator from Michigan withdraws that much of the petition, and does not ask that it be presented to the

Senate

Mr. TOWNSEND. That is the exact situation that I desire

to be placed in with reference to the matter.

Mr. GALLINGER. Mr. President, I only wish to say this much: I trust this difficulty may be amicably adjusted. The fact is, very serious accusations were made on the authority, as stated by the Senator from Arizona [Mr. ASHURST], of a Member of the House of Representatives against the citizens of an entire district in Michigan. Those citizens, through a committee, I judge-at least there are more than 50 names attached to this telegram—repudiate the allegation that was made against those people, and they say that they represent 20,000 citizens. In that telegram they take exceptions to the statement that the Senator from Arizona made on the authority of a Member of the House of Representatives. Whether their statement that in their opinion the Member of the House of Representatives was seeking notoriety is in good taste or not, of course we

must leave to each individual Senator to determine; but the controversy is really between Mr. MacDonald, a Member of the House of Representatives, and the 20,000 citizens of that district, and I do not see that we have very much to do about it.

If the Senator from Michigan [Mr. Townsend] wishes to present the telegram in an abbreviated form, of course I agree with the Senator from Georgia [Mr. Bacon] that that may well be his privilege; but I do not think that we ought to pay very serious attention to this matter, because it is, after all, in the nature of a protest by citizens against allegations that have been made against the district which they represent and in which they live. They surely had a right to make such an allegation and repudiation of the serious charge that was made against them.

Mr. President, I think the Senator from Michigan might well present the petition, as I have stated, in an abbreviated form if he chooses to do so; and, then, that the matter might well pass

from the consideration of the Senate.

The VICE PRESIDENT. Does the Senator from New Jersey desire the opinion of the Senate on the petition as amended?
Mr. HUGHES. I am satisfied with the disposition suggested by the Senator from Michigan. I have not had an opportunity to examine the telegram, and my ear only caught one highly

objectionable phrase in it.
Mr. GALLINGER. I would add, Mr. President, that the provision of Jefferson's Manual relates to comity between the two

Houses; and this is not a case of that kind.

Mr. HUGHES. I will say to the Senator that I did not cite any rule, for I do not know of any rule that governs this matter, except the inherent right which must exist in every body to protect its own record. I think any Senator can well object to a scurrilous, slanderous, and libelous statement being read into the Record here, directed against a Representative in the coordinate body.

Mr. GALLINGER. I agree to that; and yet I do not think this is a slanderous, libelous, and scurrilous statement.

Mr. HUGHES. I do not think that this was, but I am op-Mr. GALLINGER.

posing a statement of that kind being submitted here and being read into the RECORD affecting a Member of the other House. I think it is within our power to exercise our discretion in such a matter.

Mr. MARTINE of New Jersey. Mr. President, I was quite content with the disposition of the telegram I offered in the

first instance, namely, that it be—
The VICE PRESIDENT. The Chair was proposing to submit the question to the Senate if the Senator from New Jersey [Mr. Hughes] further objected. The Senator from New Jersey said he did not object to the portion of the telegram referred to being stricken out, and the telegram goes in the Record.

Mr. TOWNSEND. I now ask that the other telegrams submitted by me may be printed in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

[Telegram.]

HOUGHTON, MICH., January 14, 1914.

Hon. Charles E. Townsend, United States Senate, Washington, D. C.:

United States Senste, Washington, D. C.:

Am informed Congressman MacDonald, of this district, says there is no constitutional government in this district and the rights of citizens are not protected here. Mr. MacDonald was here about the first of the year and ought to know that this statement is misleading and untrue. There are no unusual violations of the peace laws, and very few of the arrests made since January 1 are due to the strike situation. Last Saturday the last of the State troops were withdrawn from the district, being those stationed in Keweenaw County, adjoining the county. Yesterday the number of deputies on my pay roll was reduced from 184 to 60. Men formerly on strike are returning to work voluntarily at all the mines. Over 10,000 are now at work out of about 14,000 when the strike was called. There is a better feeling throughout the county than I have noticed for some time. Protest against any insinuations from Mr. MacDonald, or anyone else, that the laws in my county are not now enforced. Last summer, when the district was overrun with socialists and anarchistic preachers and teachers of violence and criminal acts of every nature, it was difficult to preserve order. That situation has been entirely corrected and law and order have been for the last six weeks, and will continue to be, enforced.

Sheriff Houghton County, Mich.

[Telegram.]

[Telegram.]

HOUGHTON, MICH., January 14, 1914.

Hon. CHARLES E. TOWNSEND, United States Senate, Washington.

Dear Str: Senator Ashurst's assertion that constitutional government no longer exists in the copper country is absolutely unfounded. Civil authorities have full control of situation, and so free is district from disorder that only 60 deputies now are retained by sheriff to protect a region 40 miles long and 20 wide. All of the State troops have been withdrawn. Moyer and other foreign agitators have left the district. More strikers are returning to work each day, and there is no possible cause for alarm. No disturbances have occurred here for more than a month and the situation is improving daily.

COPPER COUNTRY COMMERCIAL CLUB, G. L. Paice, Secretary.

Mr. GALLINGER. Regular order!

Mr. MARTINE of New Jersey. I desire to say, Mr. President, with reference to the telegram I offered in the first instance, that I was quite content with the disposition suggested, namely, that it might go in the Record without reading, but immediately afterwards the Senator from Michigan [Mr. Townsend] submitted a telegram much longer and taking absolutely a counter position from that taken by the parties who telegraphed me. I feel that, in justice to them, the telegram presented by me should be read before the Senate. I did acquiesco that it go into the Record without reading, but I think it would be quite as well that it be read, for those who signed the telegram are gentlemen of high standing and intelligence in society, and their position is an utter contradiction of the telegram that has been presented by the Senator from Michigan [Mr. Townsend] and read to the Senate. So I respectfully ask

that the telegram offered by me may be read.

There being no objection, the telegram was read and referred

to the Committee on Education and Labor, as follows:

CHICAGO, January 13, 1914.

JAMES E. MARTINE, United States Senate, Washington, D. C.:

The national executive committee of the Socialist Party commissioned Victor L. Berger, Charles Edward Russell, and Seymour Stedman to investigate the Michigan strike. They report claims of men just. Also report companies guilty of peonage and importation of 1,600 gunmen from outside. Leaders of miners maltreated and deported. General reign of terror on part of gunmen. The strikers firm and law-abiding. On grounds of above report and on behalf of Socialist Party, we demand congressional investigation of this situation.

VICTOR L. BERGER.
ADOLPH GERMER.
GEORGE H. GOEBEL.
JAMES H. MAURER.
J. STITT WILSON.

REPORTS OF COMMITTEE ON PUBLIC LANDS.

Mr. SMOOT, from the Committee on Public Lands, to which were referred the following bills, reported them each with amendments and submitted reports thereon:

A bill (S. 1214) to amend sections 2380 and 2381, Revised Statutes of the United States (Rept. No. 152); and

A bill (S. 1087) authorizing the exchange of certain lands within the Fishlake National Forest, Utah (Rept. No. 153).

Mr. CHAMBERLAIN, from the Committee on Public Lands, to which was referred the bill (S. 2903) for the relief of Judd McKelvey, reported it without amendment and submitted a report (No. 151) thereon.

WATER SUPPLY OF BAKER, OREG.

Mr. CHAMBERLAIN. I am directed by the Committee on Public Lands, to which was referred the bill (S. 3206) for the protection of the water supply of the city of Daker, a municipal corporation of the State of Oregon, to report it with an amendment, and I submit a report (No. 150) thereon. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill, as follows:

Be it enacted, etc., That the public lands within the Whitman National Forest situated in the county of Baker, State of Oregon, hereinafter described, are hereby reserved from all forms of location or entry and set aside as a municipal water-supply reserve for the benefit of the city of Baker, a municipal corporation of the State of Oregon, to wit: South half of northeast quarter and north half of southeast quarter section 4, township 9 south, range 38 east of the Willamette merdian meridian.

meridian.

SEC. 2. That to accomplish the purpose of this act as defined in section 1 hereof, said city of Baker shall have the right, subject to approval by the Secretary of Agriculture, to the use of any and all parts of the land above described for the storage and conveying of water and the construction and maintenance thereon of reservoirs, pipes, pipe lines, mains, conduits, and other like or any improvements or means for the storage, diversion, or transmission of water.

SEC. 3. That this act shall be subject to the vested rights of any municipality, person, or persons in or to the above-described premises or any part thereof or the water thereof.

SEC. 4. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The VICE PRESIDENT. The Senator from Oregon asks unanimous consent for the present consideration of the bill.

Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment reported by the Committee on Public Lands was, in section 1, page 1, line 10, after the words "Willamette meridian," to insert a colon and the following proviso:

Provided, That if the said city of Baker shall at any time coase to use said land for said reservoir purpose, then, and in that event, the title to said land shall revert to and vest in the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows

By Mr. BURTON:

A bill (S. 3998) granting a pension to Peter L. Miles; and A bill (S. 3999) granting a pension to Victoria A. Davis (with accompanying papers); to the Committee on Pensions. By Mr. ROBINSON:

bill (S. 4000) for the relief of the heirs of Wesley W.

Wallace; to the Committee on Claims. By Mr. THOMPSON:

A bill (S. 4001) for the purchase of a site and the erection thereon of a public building at Oswego, Kans.; to the Committee on Public Buildings and Grounds.

A bill (S. 4002) for the relief of Frank Hodges; to the Com-

mittee on Claims.

A bill (S. 4003) granting an increase of pension to Carey G. Colburn (with accompanying papers); to the Committee on Pensions.

By Mr. PERKINS:

A bill (S. 4004) for the relief of the claimants to the Coppinger grant, in the county of San Mateo, State of California, and all other persons claiming title to portions of said grant by mesne conveyances from Juan Coppinger; to the Committee on Public Lands.

By Mr. BRADY: A bill (S. 4005) for the relief of John J. Muchleisen (with accompanying papers); to the Committee on Military Affairs. By Mr. BURLEIGH:

A bill (S. 4006) granting a pension to Charles E. Williams;

to the Committee on Pensions.

By Mr. TILLMAN:

A bill (S. 4007) to authorize the Secretary of the Navy to enter into contract for use by the Government of dry docks at Hunters Point, San Francisco, Cal.; to the Committee on Naval

AMENDMENT TO THE DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. SWANSON submitted an amendment providing that all nonresident pupils shall be admitted and taught free of charge in the public schools of the District of Columbia, etc., intended to be proposed by him to the District of Columbia appropriation bill (H. R. 10523), which was referred to the Committee on Appropriations and ordered to be printed.

WORKMEN'S COMPENSATION.

Mr. SMITH of Georgia. Mr. President, I wish to present to the Senate a letter from the vice president and representative of the Brotherhood of Railroad Trainmen and also from the vice president and legislative representative of the Brotherhood of Locomotive Firemen and Enginemen, which has reference to the workmen's compensation bill now before the Judiciary Committee of the Senate, and which contains the official action of both of these organizations with reference to that bill. I ask that the letter may be printed in the RECORD and referred to the

Committee on the Judiciary.

There being no objection, the letter was referred to the Committee on the Judiciary and ordered to be printed in the RECORD,

as follows:

WASHINGTON, D. C., January 14, 1914.

Hon. Hoke Smith, United States Senate, Washington, D. C.

Hon. Hoke Smith,

United States Senate, Washington, D. C.

Hondrakle Sir: In connection with S. 959, "A bill to provide an exclusive remedy of compensation for accidental injuries, resulting in death or disability, to employees of common carriers engaged in interstate or foreign commerce, or in the District of Columbia, and for other purposes"; also H. R. 2944, which is similar in purpose, we wish to advise that the twenty-sixth convention of the Brotherhood of Locomotive Firemen and Enginemen, consisting of 826 delegates, representing the subordinate lodges located in various places throughout the United States, such delegates being elected by the membership of the subordinate lodges, and the said delegates representing 100,000 members of the said brotherhood, did, on Friday, June 27, 1913, take the following action regarding workmen's compensation:

"Resolved, That this, the twenty-sixth convention of the Brotherhood of Locomotive Firemen and Enginemen, is opposed to the enactment of an exclusive Federal workmen's compensation law or of any workmen's Federal compensation law that will in the slightest interfere with, impair, or obstruct the operation of the Federal employers' liability law or of any State employers' liability law.

"Resolved further, That we believe that it is to the best interests of railroad employees that no workmen's compensation legislation be attempted by the United States Congress, but that that body direct its efforts along that line to strengthening and improving the present Federal employers' liability law in the interests of railroad employees. "Resolved further, That it is our belief that it is to the best interests of railroad employees injured in the performance of such duties, that it should be optional with such persons to accept the compensation provided by their respective State workmen's compensation law or to sue under the Federal employers' liability law.

"Resolved further, That we heartily commend the course pursued by our worthy president. W. S. Carter, relative to the

United States Congress, and that we realize that but for his action in the premises and for the wide publicity given the said Sutherland bill in the columns of our magazine, this measure would have become enacted into law to the very detriment of the Interests of injured railroad employees and the heirs of those killed in railroad service."

The eleventh blannual convention of the Brotherhood of Railroad Trainmen, held in San Francisco, Cal., May 19 to June 4, 1913, consisting of 800 delegates representing subordinate lodges located in various places throughout the United States, such delegates being elected by the membership of the subordinate lodges, the said delegates representing 234,000 members, took the following action regarding workmen's compensation:

Session of Tuesday, May 27:

"Motion that the convention go on record as opposed to any form of Federal workmen's compensation law affecting the Brotherhood of Railroad Trainmen. Carried."

"Motion that the president be instructed to notify the President of the United States, President of the Senate, and the Speaker of the House of Representatives of the action taken by the convention regarding workmen's compensation. Carried."

Session of Monday, June 2:

"In view of the fact that this convention has gone on record by a most decisive vote in opposition to any Federal workmen's compensation act, and in view of the fact that bills almost identical with the so-called Brantley bill have been introduced in the National Senate and House of Representatives, we strongly recommend that the efforts of this Brotherhood and its officers be directed to the defeat of these or any similar bills. We further recommend that in States wherein liability laws have not been enacted every effort be used to procure the adoption of laws which are in conformity with the Federal liability law and to supplement it."

The foregoing shows conclusively that the representatives of 234,000 members of these organizations are opposed to the pending workmen's compensation bills, because th

Year.	Train	men.	Other employees.		
	Killed.	Injured.	Killed.	Injured.	
1911	1,708 1,663	41,008 43,975	1,451 1,257	5, 794 5, 145	

We believe that we can say fully 75 per cent of the casualties accrue to men filling positions of firemen, conductors, flagmen, brakemen, and switchmen, therefore a workmen's compensation would be more applicable to them and affect those most vitally interested.

After due and careful consideration of the subject the Brotherhood of Locomotive Firemen and Enginemen and the Brotherhood of Railroad Trainmen, representing 234,000 members, are absolutely opposed to workmen's compensation, and in their behalf we earnestly request that the bills shall not be passed.

Yours, truly,

Vice President and Representative B. of R. T.

ris, truly.

Vice President and Representative B. of R. T.

J. McNamara.

Vice President and Legislative Representative B. of L. F. & E.

PRISON REFORM.

Mr. ASHURST. Mr. President, I have here a memorial to the Congress of the United States, prepared by Hon. J. J. Sanders, parole clerk of the Arizona State prison. As I said in the Senate once before, Mr. Sanders is preeminently a leader in the work of reforming our prisons. The memorial contains some valuable data, is instructive and interesting. I have a letter from a gentleman at Cambridge, Mass., asking for 25 copies of the memorial, and I have received a letter only this morning from a Mr. H. N. Stokes, of this city, who wishes 12 copies. I have but three copies, hence am unable to supply the demand. Therefore I present the memorial and ask that it be printed as a public document.

The VICE PRESIDENT. The memorial will be referred to

the Committee on Printing for action.

PRESIDENTIAL PRIMARIES.

Mr. CUMMINS. Mr. President, while we are on this order of business I should like to make an inquiry of the chairman of the Committee on Privileges and Elections. More than 18 months ago I introduced a bill establishing a national primary election for the nomination of candidates for President and Vice President of the United States. Very early in the days of the first session of the present Congress I again introduced that bill, and it has been before the Committee on Privileges and Elections, I think, since some time in March or April last. I am very anxious that the bill shall find its way to the floor of the Senate, for I regard it as covering a very important subject.

I should like to know from the committee, or the chairman of the committee, what the probabilities are for a report on the bill, either favorably or adversely. Of course I am not asking what the report probably will be, but I am asking when I may reasonably expect that there will be a report upon the bill.

Mr. KERN. Mr. President, since the recent meeting of the Senate after the holidays the Committee on Privileges and Elections has been engaged in considering two election cases—the one from Maryland and the one from Alabama—which are

pending before the committee. These cases probably will be disposed of by the committee within the next few days, immediately after which the bill referred to by the Senator from Iowa will be taken up and will be disposed of at as early a date as possible. The Senator from Iowa understands the situation prior to the holidays, when the time of the Senate was taken up constantly by the consideration of the banking and currency bill, which is the reason why these other matters were not disposed of. I assure the Senator from Iowa that there is no disposition on the part of the committee to delay the consideration of his bill.

Mr. CUMMINS. Very well. I am glad to know that we are shortly to get it before the Senate in some form.

The VICE PRESIDENT. Morning business is closed. The calendar under Rule VIII is in order.

RAILROADS IN ALASKA.

Mr. CHAMBERLAIN. Mr. President, I trust the Senate will proceed with the consideration of the unfinished business. I wish to say, however, that the Senator from Montana [Mr. Walsh |, who desires to resume the discussion entered upon by him on yesterday, did not expect that the morning business would be finished so soon, and he has to come from his office before we can take the bill up. I have just requested that he be sent for:

The VICE PRESIDENT. The Chair will state to the Senator from Oregon that the bill has not yet been read. If by unani-

mous consent it is laid before the Senate, the bill can be read.

Mr. CHAMBERLAIN. I request that the bill be laid before the Senate.

TEXTILE INDUSTRY IN MANCHESTER, N. H.

Mr. GALLINGER. If the Senator from Oregon will permit me, for the purpose of consuming a few minutes of time, and not for the purpose of exciting discussion in any way, I ask unanimous consent to have read a brief article from the Manchester Union, an independent newspaper, concerning the tex-

tile industry in the city of Manchester.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[From the Manchester Union.]

THE PROPER SPIRIT SHOWN BY MILLS NOT REDUCING WAGES UNDER SHORT-TIME LAWS.

The spirit which has prompted New Hampshire manufacturers—notably the Amoskeag and Stark mills and the Felton Brush Factory, of Manchester, and the cotton mills at Suncook and others—to maintain wages under the new 55-hour law at precisely the same figures which obtained under the 58-hour system, is altogether proper and commendable. It means, of course, that the employees will now receive for 55 hours' work the same pay for which they formerly worked 58 hours. It means more than that, for since time is money, it is one way of allowing the employees an increased share of the profits. There is reason to hope that the workers will appreciate it, and that the effort will be apparent in increased loyalty, if possible, on their part toward the employing corporations; in renewed ambition to produce the best possible results, and in an even better understanding between the employers and their employees. There will be no sacrifice of efficiency. The workers will see to that. Indeed, it is quite possible that at the end of a year the records will show that the production at 58 hours a week has been equal to, if not in excess of, the old production at 58 hours a week.

end of a year the records will show that the production at 55 hours a week has been equal to, if not in excess of, the old production at 58 hours a week.

New Hampshire mills and factories have acted, in this case, with characteristic wisdom. There are as few labor troubles in this State as in any important manufacturing State in the Union. Manchester, as a typical textile and shoe city, has been especially free from such troubles. It is in no disposition of braggadocio, no spirit of exultation over sister cities in other States, that attention is called to the uninterrupted industry here while other manufacturing centers have been subjected to annoyance, to great financial losses, and even to bloodshed in disputes between manufacturers and their operatives. A difference in methods of treatment seems to be a powerful factor in the situation. Whereas, for instance an attempt was made in Massachusetts not long ago to cut the wages in proportion to the reduction of the old wages, New Hampshire corporations have incidentally avoided any occasion for dispute by voluntarily announcing a fair and praiseworthy course of action. It is to be hoped and expected that this course, so happily introduced by Manchester concerns, will be quite generally adopted throughout the State.

RAILROADS IN ALASKA.

The VICE PRESIDENT. The Senator from Oregon [Mr. CHAMBERLAIN] asks unanimous consent that Senate bill 48 be laid before the Senate. Is there any objection? The Chair

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. WALSH. Mr. President, before resuming the thread of my discourse, rather than speech, at the point at which we had arrived when it was broken off by the adjournment on yesterday, I desire to advert to some features of the question before us and then pursue the line of argument I was following.

I regret that the Senator from Iowa [Mr. CUMMINS] is not here this morning, because I have refreshed my recollection from the report of the Alaska Railroad Commission, and I am able this morning to confirm the statement I made to him on yesterday to the effect that the routes proposed and recommended by the commission do not include at all the acquisition of either one of the existing railways which would comprise a part of the system to the seacoast, but contemplate simply effecting some traffic arrangement with either the one or the other, as the one or the other route shall be adopted, leaving the question of the acquisition of those roads by purchase or condemnation, if it shall be found impossible to effect a proper traffic arrangement either by agreement or under compulsion by the Interstate Commerce Commission, for determination at some future time.

I did not, however, state-and that is the matter to which I desire particularly to refer-that the estimate of \$35,000,000 includes about \$6,000,000, the cost of construction of the line, to which I referred, running from Valdez across the Thompson Pass to the Copper River, that line being suggested and advised in case a traffic arrangement should not be made with the Cop-River & Northwestern Railroad; that is to say, the \$35,-000,000 includes the cost of that line, and it is not contemplated that that would be constructed if a satisfactory arrangement could be made.

Mr. SMOOT. Mr. President, do I understand, then, that the Senator's position is that it is best for the Government to make these traffic arrangements; or, in other words, is he opposed to the Government purchasing one of the two roads or building another road entirely separate from the roads already built?

Mr. WALSH. I am not. I was simply giving the report and ecommendations of the commission. The commission exrecommendations of the commission. pressed no view at all in relation to the advisability of acquiring those lines, or either of them, because they said they thought that was outside of the scope of the inquiry which was intrusted to them, their inquiry being confined simply to the matter of roads which would, with such as are there now, permit entry into the interior.

Mr. SMOOT. Then if traffic arrangements are not made with one of the two roads already there it will take more than \$35,000,000 to build a through line from tidewater to Fairbanks?

Mr. WALSH. No; it will not, Mr. President. That is just exactly what I am endeavoring to make entirely clear. \$35,000,000 will be sufficient to construct a line from Valdez across the Thompson Pass to the Copper River, up the Copper River to the divide, and then down the Tanana to Fairbanks, and likewise to build from the present terminus of the Alaska Northern up the Susitna Valley, with a branch to the Matanuska coal fields to the east and a branch to the Kuskokwim on the west; but if a traffic arrangement can be made, and is made, the commission estimates that the cost will be some \$6,000,000 less than the \$35,000,000.

Likewise, the distinguished Senator from Utah [Mr. Smoot], on yesterday or the day before, I do not now recall which, declared-and I recognized the devotion to the public interest with which he did so, and his entire sincerity of purpose-that it was his intention to propose an amendment which would take away from the President the selection of the particular the conroute or routes to be pursued and provide for struction of one railroad, the one route to be defined, as I understood him, by the bill, or at least that the bill should provide for the construction of one line of railroad only. I trust, very sincerely indeed, that idea will not prevail. I know the Senator has given careful consideration to the matter; but let me show you, now, why it ought not to prevail.

I have already pointed out that there are two routes, and only two routes, that seem to be feasible by which to get into the interior; that is, the route up the Copper River-because there is one break in the great chain of mountains-and the route through the Kenai Peninsula and up the Susitna Valley. Either the one or the other of those must be chosen. In the one case the terminus will be at Cordova, on Orca Bay, or at Valdez, near by; in the other case the ter inus will be at Seward, on Resurrection Bay, or possibly, as I suggested yester-day, at some harbor on Prince William Sound, the connection being made across here [indicating on the map] by a tunnel of considerable length through the mountains.

I have given what I think is some careful study to this problem, and I must confess myself to-day entirely unequal to the task of saying which one of these routes ought to be chosen. If I were going to choose upon the basis of what I feel is the insufficient and inadequate information I have about the matter, I should unhesitatingly choose the Alaska Northern route, and then I should construct a short line of railroad from Controller Bay into the Bering field, so as to

make available the two great coal deposits. But that idea, Mr. President, is combated in this report by men who, I feel, know so much more about this subject than I do, and who have been upon the ground and studied the conditions, that I do not feel justified in interposing my judgment upon a proposition of that character against the judgment of these men.

If I were at the head of a private corporation that contemplated entering upon this enterprise, I should, as a matter of course, send my engineers there and have them determine the matter after studying it out carefully, and I should hesitate a long time before I would interpose my judgment in relation to

the selection of a route as against theirs.

Mr. GALLINGER. Mr. President—— The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from New Hampshire?

Mr. WALSH. I yield.

Mr. GALLINGER. Will the Senator state definitely the estimated cost per mile of this railroad? The Senator has done so?
Mr. WALSH. I stated that yesterday. The commission gives

Mr. GALLINGER. I have heard it stated as low as \$35,000. was just looking at the report of the commission, and I see that they put it at \$48,000. Then, I will ask the Senator this added question: If the Government builds a railroad in Alaska, will the Government be expected to equip that railroad?

Mr. WALSH. Two plans are proposed. As a matter of course, if the Government operates, it will be obliged to equip. If it lenses, it will depend upon the terms of the lease. Canada leases simply the completed road. The Grand Trunk & Pacific is leased to that company. Canada built the eastern 1,800 miles and leased it to the Grand Trunk & Pacific, which equipped and That would be a matter of arrangement of the terms of the lease.

Mr. GALLINGER. I assume there is no definite figure given as to the cost of equipping this line of road.

Mr. WALSH. Yes, sir; the commission's report gives that. It gives likewise its estimate as to the cost of operation.

Mr. NORRIS. Mr. President-

Mr. WALSH. I yield to the Senator from Nebraska.

I presume the Senator has given considerable attention to it, and I should like to get the Senator's idea on that very proposition, as to whether, assuming that we are going to build these roads, it would be better to equip them and operate them, or whether it would be better to lease them after they were built.

Mr. WALSH. Mr. President, I have already given my exact frame of mind with respect to that matter. I did not at this time believe that I ought to devote any particular time to the investigation of that subject, it not being necessary, as it seems to me, to be determined at present. So I have no definite con-

viction about the matter.

Mr. NORRIS. If the Senator will permit me, it seems to me that this is a very important matter, and that if we can get the information we ought to determine in this bill whether we are going to just build a railroad or whether we are going to oper-

ate one when it is built.

Mr. WALSH. Mr. President, I will say with respect to that that I scarcely think so. It would seem to me that if you arrange by the bill that the President must lease, we will be at a decided disadvantage in contracting with respect to a lease. The President having the power to lease or operate as he sees fit can bargain with anyone who may desire to lease, saying to them, "If you do not come to these terms, we will just simply equip the road and operate it ourselves." But if you take away from him that power, then he would be at a disadvantage in bargaining. Likewise, if you command that he shall operate the road and take away from him the right to lease, it might be that some one would come forward who would offer favorable terms and conditions for the equipment of the property upon some such plan as that which prevails in connection with the Grand Trunk & Pacific, and we would tie our hands and deny ourselves the opportunity to enjoy the benefits of a lease without any risk to ourselves at all in connection with the operation of the road.

Mr. NORRIS. The question still remains undetermined if we adopt that course whether the National Legislature is in favor of Government operation of a railroad. It seems to me that it is only second in importance to the building of the railroad I do not believe that we ought to put that responsibility on the President. It seems to me that that ought to be determined in the law. The same argument, perhaps not to as full an extent, but at least to a great extent, it strikes me, applies to the operation of a road that applies to the construction of the road to begin with. If in any sense this might be con-

sidered as a Government experiment, then we ought to go, it seems, the length of operating the road as well as building it.

Mr. WALSH. I desire to say with respect to that simply this much: My esteemed friend the Senator from Mississippi [Mr. WILLIAMS] said on yesterday that when he arrived at a state of mind that he was prepared to vote in favor of Government ownership and operation of railroads he would vote for the acquisition and the operation of a railroad from the interior down to the Gulf of Mexico, through a densely populated section of the country. Of course, if the Government built such a road as that it would not lease it. It would build a road like that only, or acquire a road like that only, because the people had arrived at the conclusion that the private management and operation of roads had failed to meet the public demands. Whenever that conclusion is arrived at I fully agree that if we build any railroads not primarily for the development of the country at all, because it is already developed, but primarily for the purpose of engaging in the carrying trade, we are not going to build any railroads and operate them under a lease. If we build them at all, the Government is going to operate them.

But I invite the Senator's attention to the fact that the primary purpose and idea at the foundation of this bill is not that the Government ought to acquire and operate railroads because the transportation facilities have not been handled successfully and to the satisfaction of the people already. It is because they are not there at all. That is the primary idea of this bill, and it does not by any means follow under those circumstances that when the Government builds the railroad there it may not wisely lease it out where it would be free

from any risk of loss in the operation of the plant.

Mr. DU PONT and Mr. CUMMINS addressed the Chair. The VICE PRESIDENT. Does the Senator from Montana yield and to whom?

Mr. WALSH. I yield first to the Senator from Delaware. Mr. DU PONT. I should like to ask the Senator if he remembers how much will be the cost of equipment per mile, as given in the report.

Mr. WALSH. As distinguished from the construction, I

o not. Now, I yield to the Senator from Iowa.

Mr. CUMMINS. Mr. President, there is a great deal of force in the answer just made by the Senator from Montana to the questions propounded by the Senator from Nebraska, but he does not reach the point that perplexes me. We are about to authorize the President to locate a road wherever he pleases, to build as much as he pleases, at such expense as he pleases. That is a very great power, greater than was ever before vested in any officer of the Government of the United States.

I think it is true, as the Senator from Montana says, that there may come a time when it will be wise to lease the road so to be built rather than to operate, but is it not also wise to reserve that power for future exercise? That is, we build the road now and authorize its operation. If in the future Congress shall come to the conclusion that we have a property that it is not necessary the Government shall manage, we then authorize the President to lease it. Is it prudent now to say to the President of the United States or any other officer of the Government that we having built the road, then you can either operate it or lease it? My view is that we ought to authorize the building of a railroad, and until the further action of the Congress it ought to be operated as Government property.

I have not any more doubt of the skill and competency of Government employees to operate the road than I have with regard to their skill and competency in building the road, and I am not willing to repose such vast power in any one man. He can exercise that hereafter just as well, if it shall be

deemed wise to confer it upon him.

Mr. WALSH. Mr. President, my own view about the matter is that for the purpose of bargaining more successfully if it should be deemed advisable to lease, the power to operate ought to be reposed, and likewise I think that the power to lease ought to be granted now so that if an inviting offer to lease should be made it might be accepted.

Mr. JONES and Mr. NORRIS addressed the Chair.

Mr. WALSH. I yield first to the Senator from Washington. Mr. JONES. If the question the Senator from Nebraska desires to ask is in this same connection, I will not interrupt

Mr. WALSH. I yield to the Senator from Nebraska. Mr. NORRIS. Will we not meet with the same problems in Alaska that we have here? The question of regulation, which will immediately arise in case we lease, will present problems more difficult of solution than the questions that arise in this country, where they are closer at hand; and will there not be danger of the manipulation of the road and the charging of rates that would have a tendency, perhaps, to prevent development? As I understand it, one of the objects is to develop the country in agricultural lines as well as in others.

Mr. WALSH. That is the primary object.
Mr. NORRIS. The question of rates will immediately become one of prime importance. If the Government itself is operating the road, it seems to me that that question would be e' minated, because I can hardly conceive but that the Govern-ment in the operation of the road, not looking to profit like an in dividual, would bear in mind always the desirability of the development of the Territory rather than the immediate acquisition of money.

Mr. WALSH. I do not desire to be led at this time into a discussion as to the relative merits of the leasing system as against the operating system, because I do not conceive that it is vital to the bill that the question should be resolved in advance, though I recognize the force of much that has been said by the Senator from Nebraska. I might add, however, a suggestion, the force of which I am sure will appeal to him, coming from the part of the country that he does. It is that these acute questions of rates very rarely arise in connection with a pioneer railroad. For instance, the Copper River & Northwestern Railroad now charges 18 cents a mile for passengers. That is my recollection of it. Perhaps the Alaska Northern charges about the same rate. Of course, if the people there get their rates reduced to 6 cents a mile, the amount which it is contemplated will be charged under the Government-constructed road, it will be a long time before they make any very violent complaint about excessive rates.

And so with reference to freight rates. It is figured that if the road is built from Cordova or from Valdez to Fairbanks the average freight rate will be something like \$26.70. show a little later on, it now costs approximately \$150 a ton to get mining machinery and that kind of thing in there. When a reduction to that extent is made you can readily understand that nobody will be complaining about high transportation rates for some considerable time in the future. If in time substantial grounds for complaint should arise, and it should be found impossible to regulate the rates in the hands of the lessee, we could still have recourse to the power of the Government to operate the roads.

Mr. JONES. It was brought out a moment ago that the average cost of construction would be \$48,000 a mile. I thought possibly there might be a misunderstanding as to what that included. I suppose it is understood that that includes not only the construction but also the equipment of the road, covering

Mr. WALSH. I think so.
Mr. SMOOT. No.
Mr. DU PONT. I do not think so.
Mr. JONES. That is correct. The estimate is found on page 108 of the commission's report. It includes equipment as well as construction charges.

Mr. STERLING. I should like to ask the Senator from Montana if the fact that the Government is a party to the lease and may impose terms and conditions in the lease itself will not be some protection as against any abuse or extortion on the part of the lessee?

Mr. WALSH. Undoubtedly. It can fix maximum rates in the lease.

Mr. STERLING. And might it not provide in the lease that the rates shall be subject to the supervision of the Interstate Commerce Commission?

Mr. WALSH. Undoubtedly so. I think those matters can be taken care of.

THE CHUGACH FOREST RESERVE.

Mr. President, it was not my purpose to devote any attention to a subject of which I shall now speak, but the matter was mooted in some discussion here the other day, and I now feel that perhaps this is an appropriate time and place to dwell a little upon it. There are a large number of reservations in Alaska. As indicated the other day, they are for various purposes and chiefly along the coast. There are naval reserves, there are reserves for docks, there are reserves for various purposes. They are not great in extent, and, so far as my information goes, they are very wisely made. I do not mean to say that that is the case with all of them, but, generally speaking, I commend the making of those reservations. 'The one great reservation, however, concerning which I have yet to hear a word of justification is the Chugach Forest Reserve. It extends from Cook's Inlet on the west through the Prince William Sound country here [indicating on the map], and reaches clear across the Bering River country that has been spoken of. It comprises an area of 11,500,000 acres. It takes in the summits of these high mountains [indicating], whose sides are covered with the everlasting glaciers that are so interesting to the traveler along the

coast. Of course, nobody cares whether this ground that is so covered with glaciers is in a forest reserve or out of a forest reserve. Nobody is particularly concerned whether the summits of these high mountains, that are entirely bare away beyond the timber line, are within a forest reserve or without a

But, Mr. President, the forest reserve includes a large portion of the Kenai Peninsula. The entire western half of that peninsula, I might say, as you see indicated upon the map here [pointing to map], is an agricultural region, and mining and prospecting is carried on throughout the entire section. law under which forest reserves are created reads as follows:

No public forest reservation shall be established except to include and protect the forest within the reservation, or for the purpose of securing favorable conditions of water, and to furnish a continuous supply of timber for the use and necessities of citizens of the United States, but it is not the purpose or intent of these provisions, or of the act providing for such reservation, to authorize the inclusion therein of lands more valuable for the minerals therein or for agricultural purposes than for forestry.

Bear in mind there are three purposes: First, to include and protect the forest within the reservation; second, for the purpose of securing favorable conditions of water; and, third, to furnish a continuous supply of timber; but it is not the purpose, as declared in the law, to include within a forest reserve land more valuable for the mineral therein contained than for the timber.

At a meeting of the American mining congress at Chicago, in the month of October, 1911, Mr. George E. Baldwin, of Valdez, said, concerning this Chugach Forest Reservation, as follows:

said, concerning this Chugach Forest Reservation, as follows:

One of Alaska's needs is the immediate abolition of forest reserves. The recent and present governors of the Territory have in their reports condemned them. I wish to speak for a moment upon the Chugach Reserve, in which I live. This reserve covers thousands of square miles along the southern coast, more than 90 per cent of which is utterly destitute of timber, being barren slopes, glacters, and mountains above timber line. Less than 10 per cent is covered with a scattering growth of spruce, hemlock, and cottonwood of inferior quality, practically all mature and supermature. Not a foot of this timber will ever be exported. In fact, a large part of the lumber used within the limits of this reserve is shipped from Puget Sound. It is only useful for local needs, and should be used by our people without undue restriction. Forest reserves are supposed to be created to provide timber for future generations, to attract rainfalls, to regulate stream flow, to prevent forest fires, and provide Government revenue. Let us take up these propositions in turn.

First, What is the use of preserving timber that is falling down and rotting of old age for future generations?

Second As to rainfall—

Now, bear in mind, Senators, that this forest reserve is on the

Now, bear in mind, Senators, that this forest reserve is on the eastern and southern slope of these mountains.

eastern and southern slope of these mountains.

Second. As to rainfall, the area embraced within the limits of this forest reserve receives a rainfall of from 70 to 120 inches per annum. As over 90 per cent of this reserve is destitute of timber and the treeless Aleutian Islands to the west of us receive more rains than we do, the idea that the cutting of the timber needed by our people will have an effect upon rainfall is utterly absurd.

Third. As to stream flow, our streams largely have their sources in the everlasting glaciers, and would flow bank full for centuries without a drop of precipitation.

Fourth. As to forest fires, there never has been a forest fire in this reserve, and never will be—soaked with rain in summer and covered with snow all winter.

Fifth. As to Government revenue, it has cost the Government two dollars for every one it has collected so far, besides imposing a cost of thousands of dollars upon our citizens in obtaining permits.

And he continues:

And he continues:

We defy the Forest Service to show one single benefit it has conferred upon the people living in this reserve, upon the people who will live in it in the future, or upon the people of the United States generally.

No one has ever accepted that challenge. Why, Mr. President, last year it cost the Government to administer that Chugach Forest Reserve something like \$13,500, and all they got out of the timber that was sold on it was \$2,600. We are at an expense of upward of \$11,000 a year for maintaining that reserve, and no man lives who can assign any valid reason why it should exist or any sound objection to its abolition.

You will understand, Mr. President, that no man can go within a forest reserve and take up a homestead. If he does so, he is a trespasser. He may put in his petition to have a particular tract which he seeks to locate as a homestead set aside and taken out of the forest reserve, and, if he is successful in his application, it will be set aside, and then he may enter it. Suppose a man-and you will bear in mind that the Russians have little settlements all along Cook's Inlet here [indicating on the map], and have been there for a hundred years cultivating their farms and gardens—suppose a man goes in there and finds a piece of ground that he believes he can culti-vate and on it makes a home for himself and for his family. What must he do? Let me just read the course that he must go through. I read from the testimony of Mr. Greeley, an officer of the Forest Service, who was called before the committee as a witness. Mr. WICKERSHAM asked:

Mr. Wickersham. Suppose I went up there and found a piece of land that was sufficiently good in character to make a homestead and wanted

to take up a homestead. What would I have to do under your rules and regulations?

Mr. Greeley. You would submit an application for the land, describing the claim you wished The land would be examined as soon as possible, and if found to be agricultural land and valuable chiefly for agriculture, it would be listed with the Secretary of the Interior and opened to homestead entry, and you would then have a preference right of 60 days in which to file.

Mr. Wickersham. You realize, of course, that takes a long time?

Mr. Greeley. Yes.

and opened to homested to dile.

Mr. Wickersham. You realize, of course, that takes a long time?

Mr. Greeley. Yes.

Mr. Wickersham. A man has to go out first and find the land.

Mr. Greeley. Yes.

Mr. Wickersham. A man has to make a formal application to whom?

Mr. Greeley. To the local officer there.

Mr. Wickersham. Then what happens after he makes that application to the local officer? Where does it go?

Mr. Greeley. If his application is made to the ranger it would go to the supervisor at Ketchikan.

Mr. Wickersham. Eight or nine hundred miles away?

Mr. Greeley. Who would then have the land examined.

Mr. Wickersham. And the supervisor would send some man back there to examine the land?

Mr. Greeley. Yes, or have the local ranger examine it.

Mr. Wickersham. Then where would it go?

Mr. Greeley. Then it goes, with this recommendation, to the district office at Portland.

Mr. Wickersham. Then what happens to it?

Mr. Greeley. Then it comes here.

That is to Washington.

That is to Washington.

Mr. Wickersham. Then what do you do with it?

Mr. Greeley. Here we act, approve or disapprove the recommendation; and if the land is recommended for listing, it is sent to the Department of the Interior for action.

Mr. Wickersham. Then what do they do in the Department of the

Mr. Wickersham. Then what do they do in the Department of the Interior?

Mr. Greeley. In the Department of the Interior they notify the local land office to advertise the land.

Mr. Wickersham. At Juneau?

Mr. Greeley. I think for a period of 30 days.

Mr. Wickersham. To advertise it, to describe it?

Mr. Greeley. To advertise that such and such described tracts of land are open for entry.

Mr. Wickersham. How will you describe it?

Mr. Greeley. Do you mean if it is unsurveyed land?

Mr. Wickersham. Yes.

Mr. Greeley. It is described by metes and bounds and surveyor's plat.

Mr. Wickersham. Yes.
Mr. Greeley. It is described by metes and bounds and surveyor's plat.
Mr. Wickersham. Do you have to have a survey?
Mr. Greeley. We survey it.
Mr. Wickersham. How long does that take?
Mr. Greeley. That is made at the time of the examination.
Senator Jones. At whose expense do you make the survey?
Mr. Greeley. At our expense. You may know, sir, if the applicant wishes to begin residence on that land immediately he may do so under permit from the supervisor. If the supervisor regards it as agricultural land, he may issue a permit immediately to occupy it.
Mr. Wickersham. You can not even occupy it until that permit is issued, can you?
Mr. Wickersham. So all this immense area in southern Alaska is reserved under such conditions that settlers are excluded until they get that permit. Is not that true?
Mr. Greeley. Yes; from occupancy.
Mr. Wickersham. Yes; but they can not settle on it.
Mr. Greeley. There is no difficulty in settling on it.
Mr. Wickersham. Can they go there and lawfully build a home on it until they get that permit?
Mr. Greeley. No, sir.
Mr. Greeley. No, sir.
Mr. Wickersham. Is it not true you have not issued five permits on that reserve?
Mr. Greeley. The Churach?

Mr. Greeley. No. Sr.
Mr. Wickersham. Is it not true you have not issued five permits on that reserve?
Mr. Greeley. The Chugach?
Mr. Wickersham. Yes.
Mr. Wickersham. Is it not true you have not issued 20 in all these reservations in Alaska?
Mr. Greeley. I do not know. Do you know how many applications we had for permits?
Mr. Wickersham. No. I do not imagine you would have many.
Mr. Greeley. Your two questions should go together. Your question should be how many applications we refused or declined.
Mr. Wickersham. Well, how many?
Mr. Greeley. I do not know.
Mr. Wickersham. But it all rests in the hollow of the hand of the supervisor, who can allow the homesteader to go on that land or keep him off, does it not?
Mr. Greeley. The supervisor's action, however, is subject to review by superior officers.

by superior officers.

Air. Wickersham. But now that means litigation in the Land Office

Air. Wickersham. But now that means litigation in the Land Office for years.

Air. Greeley. Not in national forest homesteads. His recommendation, whether it be adverse or favorable, and particularly the adverse recommendations, are reviewed by the district office at Portland in this instance, and by the forester, and, if need be, by the Secretary, and appeal may be made to any of those officers against an adverse finding.

That is the process through which the poor fellow has to go if he desires to take up a homestead in Alaska, and it was shown that a man could not go through these formalities in view of conditions in Alaska; he could not get his application to Washington and get it back in a single year. If perchance there was some error of some kind or other in the application that might be discovered by some eagle-eyed clerk in the office in Washington, it would go back for correction, and the applicant could not get the land within two years.

Mr. SMITH of Arizona. Mr. President, the Cenator's last

statement pretty well covers what I intended to ask himwhether in practical operation it does not result that in any step taken by a proposed homesteader immediate objection

from any one of the list of officers referred to virtually prevents him from making a home there?

Mr. WALSH. Mr. President, exactly the same condition exists with reference to the town-site act. For many years it has been the law that individuals desiring to engage in business in a particular locality could go upon the public domain and thereafter make an application to the Department of the Interior for a patent for a town site; which being issued to a trustee the Government sold at a low cost to each occupant a limited tract of land within such town site. Thus the cities upon the public domain were started and built up. Now, how is it here?

Why, a man goes up one of these creeks emptying into Cook's Inlet here, for instance [indicating on the map], a distance of 20 miles and finds a rich gold property. Immediately a rush, a stampede, occurs, and a great number of people go into that country. Some keen business man reaches the conclusion that at the mouth of that creek on tidewater he can establish a little store for the purpose of supplying prospectors and miners thus attracted. Others assemble about engaging in various industries. The forest ranger is obliged to go there and tell them to get off. If they want to establish a town site there, they must go through the procedure that the prospective homesteader is required to follow. The apparent uselessness of a forest reserve in that locality obtruded itself so strongly on the members of the committee that its secretary was instructed to communicate with the Forestry Service and direct that some representative be sent who could explain why that forest reserve existed, and Mr. Greeley, from whose testimony I have read, is the man who came. These facts being disclosed, Mr. WICKER-

Mr. Wickersham. As the representative of Alaska, I say to the committee that the people in those forest reservations in Alaska have long since learned that it is a question of years to secure any result in the way of action on applications for homesteads, with the probability that they will be refused; it has resulted in keeping many people away from these great forest reservations, and has practically depopulated that part of the country, except in the towns. And as to this particular reservation, the Chugach Forest Reservation, I want to say to this committee and to Mr. Greeley, as the representative of the Forest Service, that it is a shame that such a reservation should be maintained there. It is a fraud upon the people and a fraud upon the forestry reservation, for there is not anything there that is worthy the forestry reservation maintaining it as a forest reservation, and it lowers the Forest Service in the opinion of the people, who really favor proper forest conservation.

Notwithstanding his prayer, the Chugach Forest Reserve re-I addressed a communication to the Forest Service asking what had been done in reference to the matter, and was answered to the effect that they proposed to exclude from the reserve all of that region that is covered by the great glaciers and the tops of the mountains. That is the concession which they are willing to make in the premises!

Mr. SMOOT. Where no human beings live. Mr. WALSH. Where, as I have said, no one cares whether it

is within a forest reserve or without it.

Mr. SMITH of Arizona. They ask for land, and they are given ice.

TRANSPORTATION PROBLEMS-CONTINUED.

Mr. WALSH. Now, Mr. President, I resume the discussion at the point where I discontinued on yesterday. I was en-deavoring to impress the Members of the Senate with some sort of realization of the tremendous power in every department of life in Alaska exercised by the Alaska Syndicate. They own, as I have indicated to you, the Alaska Steamship Co., which dominates, if it does not control, the ocean transportation from Seattle to Alaska ports. They maintain the most intimate kind of relationship with the Northern Navigation Co., which practically controls the river navigation upon the Yukon and its tributaries. They own the Northern Commercial Co., which transacts the great mercantile business at all of the chief stations along the river; they own the Copper River Railroad; they own the Kennicott Mines, and, as I have told you, they have recently acquired the Beatson and Ellamar mines on Prince William Sound. They own the Northern Fisheries, which is the principal company engaged in fisheries in Alaska. They operate dredges in the neighborhood of Dawson.

Let me tell you their general line of activities as they are recited by Mr. WICKERSHAM. He says:

recited by Mr. Wickersham. He says:

Mr. Wickersham, There is another large transportation interest in Alaska which is interlocked with this Morgan syndicate that controls another of the gateways into Alaska, the Yukon River. The Yukon River is just as much the property of the Northern Navigation Co. as your pocketknife is yours under present conditions. The Alaska Commercial Co. was the first of those companies. It was organized about 1870 and took over the fur-seal fisheries on the Pribilof Islands, having the first lease for 20 years. At the time it took over those seals there were about 4,000,000 seals. When it let loose, after 20 years, the herd had dwindled down to a small number in comparison with its original numbers. Out of this Alaska Commercial Co., which is still alive and doing business in Alaska, has been organized other subsidiary companies. The

Northern Navigation Co. does business on the Yukon and controls the transportation on that river. The Northern Commercial Co. does most of the commercial business on the Yukon River, and having its alliance with the Alaska Commercial Co., located in San Francisco, and acting with its other subsidiary, the Northern Navigation Co., in control of the steamers on the Yukon, and owning many large stores, it does practically all the mercantile end of things in the interior of Alaska as well as adding in the control of river transportation. The Alaska Packers' Association is the Fish Trust of the Pacific coast. That also is the Alaska Commercial Co. The Sloss family, Leibes, Fortman, and a few others are members of the Alaska packers' syndicate, as it may be called. They take out of Alaska about one-half of all the fish that are canned in that region. They control transportation on the Yukon River from St. Michael up here to Dawson. Mr. Dickeson, of the White Pass, admitted another fact on the witness stand here the other day on examination which had never been admitted before. He admitted the combination between the White Pass and the Northern Navigation Co. to divide the excessive rate from Skagway to Fairbanks, the common point being Dawson. We have known it for 15 years, but we were unable to prove it, but now it is admitted. Mr. Dickeson admitted that his railroad, the White Pass & Yukon, crossing the mountains from Skagway to White Horse, and thence carrying freight and passengers to Dawson, where they connected with the Northern Commercial Co., or, as it is now known, the Northern Navigation Co., had a contract which he did not put in the record for the division of excessive freight and passenger fares from there down into interior Alaska, and admitted that they had had that contract in force for about 15 years.

Freight can be gotten into the Tanana Valley and the Yukon Valley by two routes. You can either go across to the upper Yukon through the White Pass from Skagway to Lake Bennett and then down the Yukon or you can transport it by ocean to St. Michaels, which is here [indicating on the map], some distance from the mouth of the Yukon. From there it is transshipped from the ocean-going vessels to the river steamers and is carried up the Yukon in that way.

A combination, it was shown, has existed for years between the Yukon & White Pass road, which controls the steamers on the upper courses of the Yukon, and the Alaska Steamship Co. and the Northern Navigation Co., which operates on the other route; so that between the two they are able to fix just such rates as they see fit in that locality. In justice, however, I ought to say that during the past season the harmony that is so expensive to the people of that country has been disturbed, and some considerable competition is said to exist at the present

Now I want to show you what the relation is between this great syndicate and the railroads in Alaska. At the present time they own absolutely, as indicated to you, the Copper River Railroad. How they acquired that will be of the most profound interest to you. That road was started by the Close Bros., of London. The Close Bros. were the principal owners and builders of the White Pass & Yukon Railroad, running from Skagway to Lake Bennett, across here [indicating]. They started to build a road up the Copper River, and, having engaged in that work, they learned that the Alaska Syndicate was running a line of survey paralleling their road, and recognizing at once that they had encountered the danger-ous opposition of those powerful financial interests, they immediately got into camp and sold out to them, taking \$500,000 worth of stock in the Alaska Syndicate, thus pooling their interests. The story is told by Mr. Dickeson, the president of the White Pass & Yukon Railroad. I am sure it would be of interest to those of you who do me the honor to listen to my desultory remarks.

Senator McLean. Have you any interest in common with the Gug-

Senator McLean. Have you any interest in common with the Guggenheims?

Mr. DICKESON. Yes, sir; we have. Frankly, I might say here that, in this talk that I have made against the extension of that line, I am talking against a part of our interests. The interest comes about in this way: The firm of Close Bros. & Co. and a man by the name of M. J. Heney, who built the White Pass & Yukon Road, entered into the original scheme of building the Copper River & Northwestern Railroad. We went down in our pockets and each of us put up 50 per cent of the money to start that project. We got to the 20 mile point and we found that some one was building over the Valdez route—I think it is the Valdez route—and we found that this man was one John Rosene, who is now projecting the Haines route, and we also found that this man was backed by the Morgan-Guggenheim syndicate, and that being true, and our making efforts to raise money in New York to complete the extension of this plan, we did not feel that we were likely to be very successful, and we therefore thought the only other thing to do was to go to England to get the money.

Understand, they immediately reached the conclusion that it was utterly impossible to raise the money in the city of New York to build a line that would be operated in competition with the line which was being constructed by the Alaska Syndicate.

Mr. WICKERSHAM. Why could you not raise the money in New York,

Mr. Wickersham. Why could you not raise the money in New York, in opposition to them?

Mr. Dickeson. I was not with the road then, Mr. Wickersham. We thought the only thing to do—
Senator Jones. If you had been, do you think you could?

Mr. Dickeson. No, sir; I do not believe I could. We thought the only other thing to do was to go to England, and in going to England, the English people, who had or could have raised the money to put up for a railroad project, said that the White Pass & Yukon route had not paid anything, and they said, "Why ask us for money to build another railroad?" So we could not raise the money there. We had considerable difficulty, so we dropped the whole scheme and sold out to

the Morgan-Guggenheim syndicate, which is known as the Alaska Syndicate, and accepted paper for our interests. We sold for the paper.

Mr. Wickersham. Did you not accept an interest rather than paper?
Mr. Dickeson. No; we accepted an interest in the property, which was paper, not a money consideration.

The Chairman. That is stock, is it not?
Mr. Dickeson. Yes, sir. We have recently asked as to the probability of that investment paying anything. To illustrate the point that I am making.—

Senator Jones. How much did you invest in that?

Mr. Dickeson. Around a half million dollars. I am not sure.

Senator Jones. What paper did you get?
Mr. Dickeson. We got shares.

Senator Jones. How much do those shares represent?

Mr. Dickeson. A half million dollars in what is commonly known as the Alaska Syndicate.

So you will see that the owners of the White Pass & Yukon

So you will see that the owners of the White Pass & Yukon Railroad are likewise the owners of \$500,000 of stock in the Alaska Syndicate. That, of course, explains exactly why it is that the White Pass & Yukon, controlling navigation upon the upper courses of the Yukon, is able to enter into a nice, convenient agreement with the Alaska Steamship Co. and the Northern Commercial Co., engaged in supplying the country by means of the other route.

Next comes the Alaska Northern Railroad. Let us see how

they are fixed with respect to that.

The Alaska Northern Railroad was projected and the first 20 miles built by a man by the name of Mr. Ballaine. He built those 20 miles, and, as I told the other day in the course of a colloquy with the Senator from Mississippi [Mr. Wil-LIAMS], declared that his books will show that those 20 miles were constructed at a cost of \$18,000 per mile. I pause, however, to say that undoubtedly it was the least expensive portion of the construction. Having built that distance, and being unable to raise the money necessary to carry on the project further, they sold out to the firm of Frost & Osberne.

Frost & Osborne borrowed large sums of money for continuing the construction of this road and carrying on other railroad enterprises in which they were interested-among others, a trolley line from the city of Chicago to the city of Mil-waukee—from the Sovereign Bank of Canada and pledged with it, among other things, securities of this road, stocks, and bonds. The Sovereign Bank of Canada is known in the country in which it operated as the Morgan Bank. J. P. Morgan & Co. own one-sixth of the stock of the bank. It was on the point of failing, and a receiver for the Alaska Northern was appointed. Under this receiver the road was extended to its present terminus at Kern Creek, a distance of 71 miles from Seward.

The Sovereign Bank of Canada being about to fail, a combination was made among 11 banks of Canada for the purpose of protecting it. They assumed its obligations and took over all of its assets, and those trustees or directors now hold these securities. Of course, as soon as the obligations are paid off the securities will go back to the Sovereign Bank of Canada, of which J. P. Morgan & Co. are, as stated, the owners of an undivided one-sixth interest. You will observe, therefore, that both of these lines are within the control of the Alaska Syndicate or associated interests.

Now, as to the third route:

There is no line from Controller Bay to the Bering coal fields, but there is a projected line, the Controller Bay Railroad. the chief factor in which is Mr. Richard S. Ryan. It is suggested to us, and on evidence which, to say the least, is of a suspicious character, that that is likewise backed and financed by the Morgan-Guggenheim combination, the Alaska Syndicate. It is a matter of no consequence at the present time whether it is or is not, simply because that line does not reach the interior of Alaska. The point I am endeavoring to impress upon you is that in the case of both of these lines by which, when extended, it is possible to reach the interior we find Morgan & Co. and the Guggenheims in the background, if not actually the owners

I desire now to read the story told to us by Mr. Ballaine concerning an effort made by him to extend the Alaska Northern Railroad to the Tanana Valley, to transform it, so far as it had been constructed, from a standard-gauge road into a narrowgauge road and to extend it as a narrow-gauge line, as indicated

on the map here. He says:

on the map here. He says:

After the Canadian owners of the reorganized Alaska Central had taken over the property, I entered into negotiations with J. P. Morgan & Co. to ascertain whether they would back me in a project to build a narrow-gauge railroad, taking over the railroad from Seward, changing it into a narrow gauge, and extending it as a narrow gauge on into the Tanana Valley. I had my negotiations directly with G. W. Perkins. I offered to put up as a basis of security all of my property in Alaska, and all of the stock and bonds in the contemplated company, with a bond issue limited to \$20,000 per mile, they to have a voting trusteeship of all the stock until after the railroad should be completed to the Tanana River, when the bonds might be marketable and I could pay them back. Mr. Perkins agreed to enter into negotiations with the Canadian owners to take over the Alaska Northern with bonds in the proposed new company. Whether he ever did so or not I am not qualified to say. But it was agreed by

Mr. Perkins, in the course of our negotiations, that Morgan & Co. should send out an expert to ascertain the amount of resources along the route from Seward to the Tanana River.

In the summer of 1909 they sent A. N. Grey, the traffic and tonnage expert for Morgan & Co., to make that investigation. In July of that year Mr. Perkins himself went up to Alaska, I met him by appointment at Seward. He was at Seward for several days on the first trip. He then went to the westward, and on his return a week later he was in Seward several days longer. Mr. Grey's investigation and Mr. Perkins's investigations, according to Mr. Perkins's statement to me, resulted in their finding resources along the route from Seward through the Susitna Valley to Tanana River better and more varied than they had expected. Mr. Perkins told me in Seward, and later in Seattle, that he would favor the financing the road on the plans that I had proposed, in the event that he could get the consent of the Guggenheim Bros. to do so, and could make satisfactory arrangements with the Canadian owners for a conversion of their securities into securities of the proposed new company. He explained to me that the Alaskan Syndicate at that time was owned by Morgan & Co., and by the Guggenheim Bros., and that they had an agreement by which the firm of J. P. Morgan & Co. should not engage in any other Alaskan railroad enterprise or mining enterprise without the consent of the Guggenheim Bros. He agreed with me that he should recommend favorably their taking up this plan, not alone on account of its merits, but because the firm of J. P. Morgan & Co. and their friends held one-third of the stock in the Sovereign Bank of Canada, which at that time was going through liquidation.

I think that is a mistake. It should be one-sixth.

I think that is a mistake. It should be one-sixth.

The Sovereign Bank had failed in consequence of the failure of Frost & Osborne. It held nearly all of the bonds of the Alaskan Central Raliroad and nearly all of the stock. It was Mr. Perkins's opinion, as he expressed it to me, that through that arrangement they might be enabled to come out whole in their investments in the Sovereign Bank.

By appointment I met Mr. Perkins in New York about the 20th day of November. 1909, when I expected to close negotiations. He informed me then that the Canadian owners were having difficulty in getting their bondholders to agree to the proposed exchange.

Mr. CHAMBERLAIN. Mr. President-

The PRESIDING OFFICER (Mr. THOMAS in the chair). Does the Senator from Montana yield to the Senator from

Mr. WALSH. Certainly. Mr. CHAMBERLAIN. Just in passing, I desire to say that I am advised by Delegate Wickersham that it was a third instead of a sixth of the stock that the Morgans owned in the Sovereign Bank of Canada.

WALSH. That may be correct. I had assumed from

the testimony that it was one-sixth.

Mr. WALSH. That may be correct. I had assumed from the testimony that it was one-sixth.

Later in the winter, or possibly in the spring, Mr. Perkins told me that the Guggenheim Bros. had refused to give their consent to the plan for Morgan & Co. to take over the financing of this project as a narrow-gauge railroad from Seward through the Sustina Valley to the Tanana on the ground that they regarded the Tanana Valley as their field. Mr. Perkins told me at the same time that Morgan & Co. were not prepared to encourage any railroad building in Alaska until the Government issued patents to coal claims then pending.

I asked Mr. Perkins, "Do I understand from this that if I or any other individual, or any company, should go to some other bank or banker to raise money for building a railroad from Seward through the Susitna Valley to the Tanana I should meet with the opposition of the owners of the Alaskan Syndicate?"

He replied, "We could not allow a railroad to be built through the Susitna Valley into the Tanana. There will be no more railroad building in Alaska until the coal fields are opened."

The ACTING CHARMAN. They might stop us if we tried.

Mr. BALLAINE. I made this same statement within 30 days after that interview with Mr. Perkins to the Senate Committee on Territories, when Senator Beveridge was chairman. Senator Beveridge, Senator Kean, of New Jersey, and Senator Dick, of Ohlo, were present, I asked permission to have my statement taken down officially, so that it might be an official statement, because legislation was then proposed for the guaranty of interest on the bonds of 1,000 miles of railroad which the Alaskan Syndicate was favoring. The committee refused to allow my statement to be taken by a stenographer and published in the official records. Senator Beveridge called Mr. Perkins by phone in New York, I am informed, and told him the substance of my statement. I understand that Mr. Perkins denied to senator Beveridge that he had ever had any negotiations of any kind with me, or even had known m

Mr. Perkins did not attend, although Mr. Ballaine took the precaution to communicate to him the substance of the testimony he had given.

Mr. BORAH. Mr. President-

Mr. WALSH. I yield to the Senator from Idaho.

Mr. BORAH. What reply did Mr. Perkins make to the communication?

Mr. WALSH. He has made none.

Mr. BORAH.

or not. It does disclose that a copy of the testimony thus given by Mr. Ballaine, with the proceedings, was sent by registered mail by Mr. Ballaine himself to Mr. Perkins.

Mr. BORAH. Does the Senator say the record discloses the

fact that a copy of the testimony was sent to Mr. Perkins by

registered mail?

Mr. WALSH. I will turn to the record. Mr. BORAH. The Senator's word is perfectly satisfactory to me.

Mr. WALSH. That is my recollection about it.
Mr. LIPPITT. Yes; that is right.
Mr. BORAH. What was the date on which that was sent?

Can the Senator advise me?

Mr. WALSH. It was shortly after we arrived. I should say it was about the 1st day of May.

Mr. LANE. Of what year?

Mr. WALSH. Of 1913. Mr. BORAH. Has there never been any denial of that statement, upon the part of Mr. Perkins, before the committee?

Mr. WALSH. None so far as I have been advised. There was no denial before the committee; no.

Mr. BORAH. Did the committee seek to subpœna Mr. Perkins?

Mr. WALSH. No further steps were taken.

Now that we have some kind of accurate idea of the matter,

let us see what this means for Alaska.

The distinguished Senator from Oregon [Mr. CHAMBERLAIN] the other day canvassed with you at some considerable length the apparently extortionate rates that are exacted for getting freight into the valleys of the Tanana and the Yukon, either by the St. Michael route, the Alaska Steamship Co., and the Northern Navigation Co., or by the White Pass and Yukon route, the rates being, for the interior points, practically the

Mr. BORAH. Before the Senator leaves the subject he has just been discussing and takes up this other subject I should like to ask him a question. In listening to the reading of the testimony given before the committee it is a little difficult to catch its full import. I should like to ask the Senator what were the effect, the scope, and the jurisdiction of that combination concerning which he has just been reading the testimony, and what did it effectuate with reference to stopping the de-

velopment of that Territory?

Mr. WALSH. This is what it did, Mr. President: Morgan & Co. and the Guggenheims absolutely refused to enter into any agreement which contemplated the financing of the road. They already had their arrangement through the Alaska Syndicate, by which they had this field through either means of entry—the Yukon and White Pass or the St. Michaels route. They were satisfied with that arrangement. They id not want to build another line of transportation into the same territory; and if it was to be constructed at all I assume they desired that it should be constructed in connection with their Copper River & Northwestern Railroad.

Mr. BORAH. It seems that it was an active living, thriving monopoly, trying to get hold of all the resources.

Mr. WALSH. That is the natural supposition.

Mr. LIPPITT. Mr. President—

Mr. WALSH. Pardon me for a moment, and then I will yield to the Senator. Of course their action in this matter is to be considered in connection, you will understand, with the fact that at that very time they were endeavoring to get control of the Bering coal fields through the Cunningham claims and were endeavoring to get control of the Matanuska field through the Frost & Osborne claim.

Now I yield to the Senator from Rhode Island.

Mr. LIPPITT. The inference the Senator from Idaho [Mr. BORAH] drew, although I have not listened to the whole of this controversy, seems to me somewhat far-fetched. As I understand it, I think it would have been almost against public policy for the same people who were building one approach to Fairbanks to also engage in paralleling their own line by the only other feasible route that there was through Alaska. I understand the present state of the public mind on such questions, it is not considered proper for the same people to parallel themselves as to both avenues of approach, especially when those two avenues of approach are the only avenues of ap-

Mr. BORAH. I did not understand that Morgan & Co. and Guggenheim & Co. consulted the public interest. My under-

standing was that they consulted one another.

Mr. BORAH. Did he get it?

Mr. WALSH. The record does not disclose whether the secretary of the committee communicated with Mr. Perkins might not have been in; but it would seem to me like a rather

strong assumption that because a group of gentlemen do not care to go ahead and parallel their own line therefore they are attempting to throttle all the business of a great territory. I only say that in fairness to the situation as it appeals to me.

Mr. BORAH. I think, Mr. President, there is no danger of saying anything here that is unfair to that situation if the facts are as disclosed by the record. The English language would fail, perhaps, in that particular. But it appears that those two combines consulted one another solely with reference to their interests, as to whether or not they should do thus and so; that they had to see each other and act together; and that when one concluded it was against the interest of the other they did not act; that they were not consulting the public intests; that they were not consulting the development of Alaska Territory, but they were saying, "This shall not be done until we have accomplished certain things with reference to our present condition," to wit, the gathering up of the coal fields of

Mr. LIPPITT. I do not read the record in that way. I listened to the testimony all along and I have read it all over carefully since. All I can see in it is that a group of gentlemen had undertaken to develop certain property in Alaska and build a railroad up to a certain point, and they naturally made an agreement with each other, as any two people going into a partnership to undertake a specific thing would, that they would act in common. I think if the Senator and I went to work to build a railroad anywhere we would probably agree with each other that we would not-

Mr. BORAH. I would be sure to agree with the Senator,

because he would have the money.

Mr. LIPPITT. I do not know about that. I might start with it.

Mr. CHAMBERLAIN and Mr. CUMMINS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Montana yield, and to whom?

Mr. LIPPITT. If I may be allowed to finish my statement, as long as I have gotten into this affair—
The PRESIDING OFFICER. There are four Senators now

claiming recognition.

Mr. WALSH. I ask that the Senator from Rhode Island

may be permitted to continue his statement. The PRESIDING OFFICER. The Senator from Rhode Island will proceed.

Mr. LIPPITT. The Senator from Montana is kind enough to yield to me for just a minute. I simply want to finish what I was saying. In hearing that testimony and in listening to it again now all that impresses me about it is that people entering into a partnership with each other to do a certain piece of work had made a mutual agreement with each other that they would not do anything in conflict with the interest of one another without consultation. I should think it was a most common and ordinary and necessary arrangement. Certainly, if I were entering into a partnership to go into the development of a new country with a man, I would want to know that he was not going to cut my throat the next minute by building a competing line. That is all I see in this record. It may be exaggerated into some extraordinary attempt to throttle the interests of Alaska; there may be something behind this that has not come to my notice; but all there is in this record, so far as I can see it, is that these gentlemen were almost the only men who have gone into Alaska and really spent money and accomplished something there, and they are being found fault with because they have not built railroads all over Alaska.

Mr. CUMMINS. I desire to ask the Senator from Rhode

Island a question.

Mr. WALSH. Before the Senator from Rhode Island quits the floor, I desire to remark that I fear he has overlooked the very gravest portion of this testimony. It is not that they did not desire that one of the partners should parallel the line owned by the association; it is that they proposed to see that no one else did so, the testimony being

Mr. LIPPITT. Now

Mr. WALSH. Excuse me. The testimony of Mr. Ballaine,

on page 37, being as follows:

I asked Mr. Perkins: "Do I understand from this that if I or any other individual, or any company, should go to some other bank or banker to raise money for building a railroad from Seward through the Susitna Valley to the Tanana I should meet with the opposition of the owners of the Alaskan Syndicate?"

He replied: "We could not allow a railroad to be built through the Susitna Valley into the Tanana. There will be no more railroad building in Alaska until the coal fields are opened,"

Now, I yield to the Senator.

Mr. LIPPITT. I noticed that language, too; and I expect if we had the testimony of the other side perhaps that language would be very strongly modified.

Mr. WALSH. I dare say. Mr. LIPPITT. In the first place, Mr. Morgan, great as was his power, does not own, and never did, all the resources of United States. It also appears in that testimony that the gentlemen who now own that line have testified-Mr. Jemmett testified, Mr. Patrick testified—that they were ready to build the line; that they could finance the line, and would have built that line if the coal fields had not been shut up.

Mr. WALSH. I am just passing to that.

Mr. LIPPITT. I simply wanted to bring that in so as to show in contradiction that whatever Mr. Perkins may have said, it was not within his power to have prevented the construction of that line, so far as the simple reason of finance

Mr. WALSH. Now, I yield to the Senator from Idaho. Mr. BORAH. Does the Senator from Rhode Island think that anyone who had gone in there, separate and independent from the Guggenheim interest and the Morgan interest, would have been able to raise any considerable amount of money in New York to build that line?

Mr. LIPPITT. It would depend entirely upon their credibility, their capacity, and the confidence they inspired. I think there would have been plenty of people to have gone into Alaska and helped the development there long ago if it had not been for what seems to me like the utterly indefensible action of the Government in shutting up the resources of Alaska. To answer that question definitely I will say, yes; I believe that if people of proper responsibility, of proper character, such as would have inspired confidence anywhere, had wanted to go and build a line of railroads from Seward or some other place they would have been very apt to find capital in New York. and if not in New York in other places. As a matter of fact, some of this capital was subscribed from English sources.

I am not one of those who believe that Mr. Morgan controls the entire finances of the world, and I do not believe he ties up all the resources of America, or ever did. I can not see the propriety of attempting to influence the construction of railroads by the Government in Alaska on the argument that nobody else can do it, because there is plenty of testimony right in the very volume from which the Senator from Montana has been reading which shows that there are several independent groups of people who are ready to construct railroads in Alaska at any moment after the shackles are broken that prevent the development of her resources. I was only bringing this up because I did not like that view to be incorporated in this dis-

Mr. BORAH. I will take the time of the Senator from Montana for only a moment to say that those of us who live in the West have regretted perhaps as much as anyone the tying up of the resources of Alaska and tying up the resources of the West, but such records as this disclose why it was done. It was the least of two evils. They had either to be tied up or turned over to some one, and if that record is to be believed we have the proof that it was going on as far as Alaska was concerned.

Mr. LIPPITT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Montana yield further to the Senator from Rhode Island?

Mr. WALSH. I yield. Mr. LIPPITT. Mr. President, I think I will not go ahead. The Senator from Montana is making his own speech.

Mr. WALSH. Mr. President, I am not going to take much

time of the Senate in going over the matter of the apparently extortionate rates that are thus exacted by this combination that controls the transportation facilities of Alaska as they exist to-day. I am more particularly concerned in inviting your attention, however, to the freight rates upon heavy machinery, such as mining machinery, that is so much needed in the Fairbanks country. I avowed some time ago that the hope of that country, the hope of its future development, lies in the development of the quartz lodes and the introduction of placer mining by means of dredges. Both those methods of operation contemplate the use of very ponderous machinery.

The Senator from Oregon [Mr. Chamberlain] called your

attention to the rates from Seattle to Fairbanks, as shown in the schedule on file with the Interstate Commerce Commission. The general rate from Seattle or Tacoma or from San Francisco by direct sailing to Fairbanks is \$60 per ton. In addition, however, to that \$60 per ton single pieces or packages of

machinery, boilers, or other freight-

Weighing 2,000 pounds and under 4,000 pounds to flat rate

Weighing 4,000 pounds and under 6,000 pounds to flat rate add \$9 per ton.

Weighing 6,000 pounds and under 8,000 pounds to flat rate add \$13.50 per ton.

Weighing 8,000 pounds and under 10,000 pounds to flat rate add \$18 per ton.

Weighing 10,000 pounds and under 12,000 pounds to flat rate

add \$22.50 per ton.
Weighing 12,000 pounds and under 14,000 pounds to flat rate

add \$27 per ton.
Weighing 14,000 pounds and under 16,000 pounds to flat rate add \$31.50 per ton.

Single pieces or packages of machinery, boilers, or other freight

Weighing 10,000 pounds and under 18,000 pounds to flat rate add \$36 per ton.

Weighing 18,000 pounds and under 20,000 pounds to flat rate add \$40.50 per ton.

Weighing 20,000 pounds and under 22,000 pounds to flat rate add \$45 per ton.

Weighing 22,000 pounds and under 24,000 pounds to flat rate add \$49.50 per ton.

Weighing 24,000 pounds and under 26,000 pounds to flat rate and \$54 per ton.

Weighing 26,000 pounds and under 28,000 pounds to flat rate add \$58.50 per ton.

Weighing 28,000 pounds and under 30,000 pounds to flat rate add \$63 per ton.

Weighing 30,000 pounds— Mr. LIPPITT. Will the Senator state from whose testimony he is reading now?

Mr. WALSH. I am reading from the testimony of Judge WICKERSHAM, the item of evidence being a copy of the schedule of rates filed with the Interstate Commerce Commission.

Weighing 30,000 pounds and under 32,000 pounds to flat rate ndd \$67.50 per ton.

Weighing 32,000 pounds and under 34,000 pounds to flat rate add \$72 per ton.

Weighing 34,000 pounds and under 36,000 pounds to flat rate

add \$76.50 per ton.
Weighing 36,000 pounds and under 38,000 pounds to flat rate add \$81 per ton.

Weighing 38,000 pounds and under 40,000 pounds to flat rate add \$85.50 per ton. Add \$60 to that and you have \$145.50 a ton on freight of this ponderous character from Seattle to Fairbanks.

Let me add, before I pass, that Dr. Brooks testifies that after a careful investigation he has become satisfied that one-third of the value of all the gold which comes out of the Seward Peninsula goes to pay for transportation, and that practically one-half of the value of everything that is produced in the Tanana Valley is consumed in the cost of transportation. So if that great, rich country is producing \$10,000,000 in gold per year, it costs one-half of that, \$5,000,000, in order to get into that country the freight that is necessary to enable its people to sustain life and to carry on their enterprises

Some efforts have been made to break this monopoly. Humboldt Steamship Co. is an independent steamship company that plies up and down the coast. It was very anxious to get the advantage of the through freight rates which are made by the Yukon & White Pass Bailroad to the Alaska Steamship Co.
Through rates are made from Seattle by the Alaska Steamship Co. It enjoys advantages at the wharf at Skagway through a company which apparently controls the wharves.

The Humboldt Steamship Co. wanted to get the advantage of exactly the same rates, the through rates, and they were refused. The Yukon & White Pass would make to them or to shippers routing freight by the steamers of that company only local rates from Skagway. They instituted proceedings before the Interstate Commerce Commission, which held that it had no jurisdiction. The Court of Commerce affirmed this decision, and an appeal was then taken to the Supreme Court of the United States, which reversed it, holding that the Interstate Commerce Commission had the power to establish through rates that would be available to the Humboldt Co., as well as to the favored lines. But before that result was reached an indictment was found against these various interests. charging them with having entered into a combination in restraint of trade in violation of the Sherman antitrust law.

then afterwards as given in a letter from the United States attorney. The Supreme Court in its opinion says:

The charges of the indictment may be even further concentrated and attention directed to these elements.

I may say that for some reason or other a demurrer to the indictment was sustained and the case came before the Supreme Court of the United States in that way.

The case is the United States of America, plaintiff in error, v. Pacific & Arctic Railway & Navigation Co., Pacific Coast Steamship Co., Alaska Steamship Co., Canadian Pacific Railway Co., et al. The Pacific & Arctic Co. mentioned is the Canadian extension of the White Pass & Yukon, represented by Close Bros., of London. The Alaska Steamship Co. is the Alaska Syndicate steamship company connected with the Copper River Railroad-

The defendant steamship lines and the Humboldt and independent lines from the United States to Skagway, the wharf at Skagway, and the railroad from Skagway to the Yukon River points. The only possibility of competition is in the water part of this router

That is to say, there is water competition in this other way That is to say, there is water competition in this other way—
This controlled, the entire transportation is controlled; and to this
control the action of the defendants was directed, the means of control
being an agreement between the defendants to throw all the trade into
the hands of the defendant steamship companies by the railroad company establishing through route and joint rates with them and refusing
to do so with the Humboldt Co. or any of the independent companies.
The Wharves Co. gave its assent by its wharfage charges, and all
evasion was prevented by so fixing the local rates that their combination was greater than the through rate agreed on. It is manifest that
the scheme was effective and cut out the Humboldt Line and the independent lines as factors in the routes of transportation between the
United States and the Yukon River Points. Is the scheme illegal?

The court held that it was

The court held that it was.

Before those who sought redress had arrived at that point, however, the United States attorney charged with the enforcement of the Federal laws in that locality addressed a letter to the Attorney General, from which I shall read. Referring to the fact that the demurrer to the indictments had been sustained, and that it would be necessary to go to the Supreme Court, he says:

fact that the demurrer to the indictments had been sustained, and that it would be necessary to go to the Supreme Court, he Says:

From a cursory examination of the subject I am of the impression that an action would lie, and the existence of the corporation, as far as Alaska is concerned, could be forfeited by decree of court. As there is no statute covering the subject as to what, in case of forfeitere of a local franchise, would become of the property of the corporation, I would assume that the rule of the common law would obtain, I. e., the real property would revert to the grantors or donors thereof, which in this case would be the Government, and its personal property escheat to the Crown, which in this case would also be the Government, modified. however, by the more recent decisions that the property is subject to the indebtedness of the corporation. This remedy, if applicable, may seem a harsh one, but in the case of the railroad and the North Pacific Wharves & Trading Co. it seems to me to be well earned. They have for years defied the public and challenged the anthorities.

It will be recalled that as to the charges set out in littons had run against the offense, but even at this date it would not be difficult to prove all the material allegations both of No. \$35–B and No. \$37–B.

Not only has the railroad formed and exercised a trust and completely monopolized transportation between Lynn Canal and the Yukon, but if has acted in a most scandalous manner toward those who have undertaken to dispute its absolute dominion in the territory tributary to it. Continuously, until four years ago, it carried on a rebate system which made and unmade merchants in the interior of Alaska and Yukon district, and—at Skagway at least—boycotts were declared by this company upon independent business men who presumed to question the supreme authority of the railroad, either in politics or in business, and employees of the road were ordered not to patronize such boycotted merchants or other business men under proporation

want to read the facts on that phase of the controversy as they are recited in the opinion of the Supreme Court first, and fluence eyen in these sacred precincts here in Washington. I

want to read in this connection a little testimony given by Mr. Wickersham, Delegate from Alaska. He says, on page 633:

Mr. Wickersham, Delegate from Alaska. He says, on page 633:

Mr. Wickersham, I come now to the Alaska Northern Railway from
Seward. There is very little I can say about that, except this: Mr.
Stephen Birch was on the witness stand in this committee room on the
18th day of February, 1910. He was asked about the Alaska Northern
Railroad, and I want to call your attention to his answer. He was
asked the question by Mr. Steele, the attorney for Mr. Guggenheim—
Mr. Steele representing Mr. Guggenheim on one side of the table and
Mr. Birch representing Mr. Guggenheim on the other side of the table—
and when I asked permission to cross-examine them I was denied the
right to do it. So they told whatever they pleased and got away with
it. I think this committee is not continuing that system. In that
examination, after some letters had gone in, Mr. Steele was reminded
of something and said:
"Oh, yes; I quite forgot that, Has the Alaska Syndicate any interest of any kind in the Alaska Central Railway or in the road known
as the White Pass route?
"Mr. Birch. None whatever."

And that statement has stood from that time until Mr. Jemmett
stood before this committee and told the truth about it. I knew what
the truth was all the time, and so did many other people, but, we
could not prove it, just as we can not prove many things which we
do not dare assert here; but when Mr. Birch sat there and said "None
whatever" he knew the firm of J. P. Morgan & Co. owned one-sixth of
the Sovereign Bank of Canada, which owned the whole of this Alaska
Northern estate. The truth about this Alaska
Central is that the
J. P. Morgan bank in Canada, which owned the whole of this Alaska
Northern estate. The truth about this Alaska
Central is that the
J. P. Morgan bank in Canada, the only J. P. Morgan bank in Canada,
put up this money, and the J. P. Morgan bank to day owns the whole
of the Alaska Northern.

Senator Jones, You stated on that point you were not permitted to

Senator Jones. You stated on that point you were not permitted to cross-examine these people before the committee. There have been a good many changes, of course from the Territorial Committee. Who was the chalrman of the committee at that time?

Mr. WICKERSHAM. Senator Beveridge.

The CHAIRMAN Have you a reference to the proceedings?

Mr. WICKERSHAM. Yes, sir.

Senator Nelson. My recollection is, Judge WICKERSHAM, I was not present at that hearing. I have no recollection of it. No; I was not present.

Senator Nelson, My recollection is, Judge Wickersham, I was not present at that hearing. I have no recollection of it. No; I was not present.

Senator Walsh, I should like to have you put it in here fully. I was under the impression you were sent down here for that purpose. Mr. Wickersham, I now quote from page 152 of the statements before the Committee on Territories of the United States Senate on the bill (S. 5436) to create a legislative council in the District of Alaska, etc., as follows.

The Chairman, What year was that?

Mr. Wickersham. That was in 1910. [Reading:]

"The committee (at 1.15 o'clock p. m.) went into executive session to consider the request of Delegate Wickersham, of Alaska, to cross-examine Mr. Birch and Mr. Steele. At the conclusion of the executive session Mr. Wickersham was informed that the committee had decided to limit cross-examination of the witnesses to members of the committee, but that if Mr. Wickersham desired to submit any questions in writing to the committee the committee would recall the witnesses and the questions would be put by the committee."

Senator Walsh. Who was present at that hearing?

Mr. Wickersham. I do not remember.

Senator Walsh. Does the record show?

Mr. Wickersham. Senator Beveridge was present.

Senator Walsh. Does the record show?

Mr. Wickersham. It probably does; but they were coming and going so all the time, and my recollection of that matter is, Senator, that nobody was present in that office when this information was conveyed to me except Senator Beveridge and me. That is my remembrance of it, although I made application when a larger number of members were present.

Senator Chamberlain. I do not think that rule was ever invoked since I have been a member of the committee.

Mr. Wickersham That was the rule which was invoked against me there. I was roasted from stem to stern and had to sit there and hear Guggenheim attorneys on one side examine Guggenheim attorneys on the other side about matters I was delegated to look after, and I was not permit

was not permitted to open my mouth.

Senator Citamberlans. I want to say I was not a member of the committee when Senator Deveriges was chairman.

Mr. Wickersham. No; I understand that.

Senator Nelson. I want to say I was a member of the committee, but I was not present on those occasions.

Mr. President, this Alaska Syndicate, as suggested by the esteemed Senator from Rhode Island [Mr. Lipptit], will be very glad to build this railroad into the Tanana Valley. There is not the slightest doubt in the world about it. We have the testimony here in the record that they are perfectly willing to do so; that is to say, that their associates, the Close Bros. In the story of the structure of the Stephenson of the Sovereign Bank, and is himself of the structure of the Stephenson of the Sovereign Bank, and is himself on the structure of the Stephenson of the Sovereign Bank, and is himself on the structure of the Stephenson of the Sovereign Bank, and is himself on the structure of the Stephenson of the Sovereign Bank, and is himself on the structure of the Stephenson of the Sovereign Bank, and is himself on the structure of the Stephenson of the Stephenson of the Sovereign Bank, and is himself on the structure of the Stephenson of the Stephenson

knows a lot about your line and I think he would like to know some more about it. Have you any objection to my giving him some information?" I said, "No; none whatever." I had met Mr. Close. I had shaken hands with him once in a committee meeting. That is ali I knew of him except I knew he and his friends owned that line.

Now, bear in mind Mr. Close is the owner of \$500,000 of stock of the Alaska Syndicate.

I think it was probably a month afterwards I was asked to come to the city and meet Mr. Close. His partner, and also Mr. Dickeson, were there present at that interview. I said there was no use attempting to build at present in Alaska, that there was no coal, that we could not get any coal in Alaska, and that nobody was building in Alaska until there was coal. Then we got on to the Navy question. I said: "The President can, by a stroke of a pen, create a Navy reserve in the Matanuska coal field."

Mr. President, I pause here to remark that it has always been known that the Bering River coal field is very much more broken up than the Matanuska coal field, and the expectation has always been that the naval supply would come from the Matanuska field, which has not yet been tested for Navy pur-

Matanuska field, which has not yet been tested for Navy purposes.

I sald: "The President can, by a stroke of a pen, create a Navy reserve in the Matanuska coal field. Now, I have reason to believe the Navy wants that coal, and they are as anxlous as we are to get that railroad in there in order to get that coal delivered to them for use. I think it might be possible to get action on that point." That interested Mr. Close, and we went on talking. Finally Close Bros. came to the conclusion that it would be perfectly feasible, in advance of general opening of coal, to build from mile 72 into Matanuska—that we would build here, mile 72, up to Matanuska, and also from mile 146 over to the Susitna River, which I estimated was about another 53 miles; that that could be profitably and economically done, with no basis at present, except the hauling of the Navy coal and the allowing us to use coal from the Navy land to run our own locomotives. If we could have got that, they said we had a perfectly good proposition, even if the rest of the coal in Alaska stayed closed up. We had a talk about it then, and later they wrote me a letter, merely saying that if some satisfactory arrangement could be made with the Navy they were quite clear the money could be found to build to Matanuska and to Susitna. The money can be raised now on that alone. If the Government opens up those Navy reserves, if they decide that Matanuska coal is the coal they want, and they take it in Resurrection Bay, then, if that is done, as far as Matanuska and Susitna are concerned, we can build there anyway, and you can keep the rest of the coal in Alaska locked up.

Mr. Dickeson was in the discussion once, and I think we had one or two additional talks. We did not get down to figures, but we discussed it a good deal at length. Never at any time during that discussion did the question come up that we were not going to Fairbanks.

Senator Jones. Did you discuss how this Navy coal would be gotten out; how it would be mined?

Mr. Jemmerr. It would be mined

Mr. Wickersham. You had some considerable talk and correspondence with them, did you?

Mr. Jemmett. I saw the Secretary of the Navy two or three times, and I talked with Mr. Padgett chairman House Naval Committee. We went into that pretty thoroughly.

Senator Jones. As I understand you, you think now that if your people could make a contract with the naval authorities under which you could take out over your road 300,000 or 400,000 tons of coal a year at Matanuska, that you would at once build into the Matanuska field, and possibly on to the Susitian?

Mr. Jemmett. We would at once build to Matanuska and most certainly on to Susitina River, provided we could be accorded the right to use coal for our own use.

Senator Jones. That is, ou would like that right free, or would you pay?

Alaska pretty well. He has been interested up there for a good many years. I do not think that he would really make the argument seriously which Mr. Dickeson made to you here a day or two ago, that because they have 18 or 20 miles here somewhere running through American territory, which they had to use as the first link in a chain which gives Dawson and the Yukon territory communication, and then, incidentally, goes on beyond Dawson and delivers freight in Fairbanks. His argument, apparently, is, because he is giving Fairbanks a traffic of sorts—

Mr. Wickersham. Because he intends to do it. He has not yet

11

Mr. Wickersham. Because he intends to do it. He has not yet done it.

Mr. Jemmett. Because he intends, this summer, to give Fairbanks a traffic of sorts, therefore the Government is not directly or indirectly to help anybody else. Mr. Close would not come here and give you that argument. I think they have something which can be said. If they get their boats in this summer they will be giving Fairbanks this competitive route for three months a year. They have a little consideration to be shown them on that account. They are welcome in Fairbanks. Even Judge Wickersham will not say they will not be glad to have them in Fairbanks.

Mr. Wickersham. No; I did all I could to get them there.

Mr. Jemmett. That would be better than nothing; but to say that, because of that, you gentlemen are not to help build railroads to Fairbanks would be absurd, and there is nothing more to be said about it. And, furthermore, in the discussion I had with Mr. Close, it was perfectly clear that, no matter to what extent they might become financially interested, the control of the railway would remain with us. There was no suggestion, even on their part, that the control should be given to them. In view of what Mr. Dickeson said, I do not think it is likely we shall ever do anything with them, but if we do, be perfectly certain we will control that railroad, so they can not say it shall not go into Fairbanks. But at no time during the discussion did they ever say we would not go into Fairbanks. That was never taken into consideration. Senator Jones I suppose you have your idea, now, as to where you can get the money to build into the Matanuska and Susitna districts if you could make the arrangement with the Naval Department?

Mr. Jemmett. Yes, sir.

Senator Jones Are those sources independent of the Close people?

Mr. Jemmett. Oh, yes; I have not the least doubt we can get it elsewhere. But, as I say, the interview with them was not of my seeking.

elsewhere. seeking.

seeking.

Senator Jones. But you have in mind now other sources you think you could get the money from?

Mr. Jemmett. Oh, yes; and I should like to say right here that if we can not do it somebody else will. It is not a question of our being able to do it. There is \$5,000,000 worth of railroad already constructed. It has got to build into Maianuska and has got to build up to Sustina, and, having that \$5,000,000 worth of completed railroad, if some one can not find the money to finish it then it should never be finished by the Government or by anybody else.

Mr. Precident I confess that I do not look with any decree.

Mr. President, I confess that I do not look with any degree of satisfaction, or even with complacency, upon the construc-tion of a railroad into the interior of Alaska that shall be controlled by this great interest that now exercises such an overwhelmingly powerful influence in every department of life in Alaska. We have been making a somewhat heroic struggle in the State of Montana to free our political life from the influence of a gigantic financial organization which, like that which faces us at every turn in Alaska, has its center in the

city of New York.

Mr. President, suppose a private individual were the owner of Alaska, that it was his private property, that he owned all of its great wealth of agricultural and mineral resources, all the gold, the copper, and the coal that is there, do you imagine he would feel delighted at the prospect of the Alaska Syndicate building a road into the interior if he was desirous of making a disposition of his vast estate in such a way as would best subserve the interests of humanity? I should say not. If he could command the means to do it, Mr. President, he would want to build that road himself; he would want to keep it under his

CONCLUSION.

The railroad commission believes that the road they recommend to run from Cordova to Fairbanks can be operated without loss. It is not to be operated primarily for profit. The benefit accruing to the United States will not lie in the revenues which it may derive from the operation of any railroad which it may construct. It is reasonable to expect that it will be advantaged in having increased revenues derived from added customs duties and from internal-revenue taxes that will be paid by the people who shall be attracted to that region when it has adequate transportation facilities. But the great and chief value, the great inducement to the construction of this great work, is that it will open new markets for our wares markets, Mr. President, that will absorb limitless quantities of our manufactures, because they will supply a people who, in view of the great natural wealth of the country they are developing, will be amply able to buy.

Mr. President, I listened with a great deal of interest during the tariff debate to a distinguished Senator who dilated upon the decline of agriculture in the Eastern and Middle States consequent upon the opening to tillage of the great, rich, fertile regions of the West. But was the opening of the West in the nature of a misfortune to the East or to the older States? By It enriched them beyond the dreams of avarice; it absorbed their manufactures with such an insistent and ever increasing demand that their people abandoned their farms and took up their residence in the city, where they sought employ-

ment in the mills and factories. It afforded to them a remunerative field for their surplus capital; it poured into the channels of trade gold and silver; and it made copper, lead, zinc, so useful in the arts, common commodities. Mr. President, Alaska will likewise repay with equal bounty, with equal liberality, any sum that we may spend now in the construction of great trunk lines for the purpose of developing her territory. We can afford to lose for a series of years on the investment and still be gainers.

Mr. President, consider our neighbor upon the north, Canada. With a population of scarcely 8,000,000, what has she done? She has granted 56,000,000 acres of land for the construction of railroads within her territory; she has subsidized them to the extent of \$205,000,000, and guaranteed bonds to the extent of \$250,000,000 more. There is just being completed through that vast territory the third great transcontinental line, with its western terminus at Prince Rupert on the Pacific and its eastern end reaching the Bay of Fundy. The entire eastern half of that road, 1,800 miles, has been constructed by the Dominion of Canada. It leases that road, as was said some time ago, to the Grand Trunk Pacific, which pays nothing at all to the Government for a period of seven years, and after that simply pays the interest upon the bonds that were issued to provide the money for the construction of the road, it furnishing the equipment.

Mr. President, there is not a pioneer country in the world that has not been developed and that is not now being developed by railroads constructed by the government. All the African roads are government constructed. England adheres religiously at home to the principle of private ownership of railroad corporations, but in her territories and colonies, which she is seeking to develop, she does not hesitate, as witness the great Cape-to-Cairo Railroad, herself to engage in the construc-

tion of railroads.

So, Mr. President, all our own great pioneer transcontinental roads were aided by the Government; all of them got land grants. In addition to that we gave a subsidy in the shape of a loan to the Union Pacific and to the Central Pacific roads amounting to \$55,000,000. Many people thought at the time that it would never be paid back, but every dollar of it was returned. It would have been infinitely wiser, Mr. President, if the Government had loaned its credit to those roads instead of making to them these grants of land. The system of extending aid by grants of land never ought to have been resorted to and never will be returned to. It may have been more advisable at the time to loan the money to the Union Pacific than for the Government to have undertaken to construct the road, but under conditions which exist to-day with the facilities at the command of the Government and the men at the command of the Government, and considering the conditions which exist in Alaska, the policy of loaning the credit of the Government or guaranteeing the bonds of a private corporation for the purpose of constructing railroads there would be intolerable and indefensible and ought not to be resorted to. The only alternative is for the Nation to go ahead and construct the necessary lines of railroad.

APPENDIX.

APPENDIX.

Col. Goethals's reports of his Panama Canal work contain facts and figures the Interstate Commerce Commission might well bring to the attention and consideration of the railroad presidents of the United States who have said that if not allowed the increase of freight rates they consider necessary, the Government will have to take over and operate at least some of the railroads. In 1910, Louis D. Brandels, representing the commercial organizations of the Atlantic seaboard, convinced the Interstate Commerce Commission that no increase of freight rates was necessary, because the railroads could save nearly a million dollars a day by introducing scientific management into many lines of work pertaining to maintenance and operation. To-day, when the railroads are again asking for an increase of freight rates and opposition is made to any Government ownership of railroads in Alaska, the Interstate Commerce Commission may put before the railroads of the country Col. Goethals's reports showing that the War Department through the Canal Commission has been operating the hundreds of standard American locomotives and the thousands of cars necessary for Panama Canal construction purposes at maintenance and operation charges that not only compare most favorably with the lowest costs for similar service on the most efficiently operated railroads in the United States but which, in some details of these costs, are so below the amounts expended for similar purposes by railroads in the United States as to make the train service of the Panama Canal a practical proof what economies railroads can accomplish. These figures in the Commerce Commission reports will be of the more value to the Interstate Commerce Commission reports will be of the more value to the Interstate Commerce Commission reports will be of the more value to the Interstate Commerce Commission figures showing that while some railroads maintain their locomotives at an annual average charge of \$3,832, and others at

\$2,709, the Pittsburgh & Lake Erie accomplished the maintenance of its locomotives, that were heavy power, for something like \$1,500. This figure was stated to the Interstate Commerce Commission to be "one of the lowest records in the United States." During 1910 the total cost of annual upkeep of the canal locomotives was about \$2,400. "One reason for this difference"—above the cost in the United States, Col. Goethals's 1910 report explains—"is the fact that the average wages of good American mechanics on the Isthmus are over 50 per cent greater than the pay of mechanics in the United States."

Although this report of Col. Goethals for 1910 makes no mention of it, attention may well be given to the fact the Canal Commission locomotives had to be maintained in shops that were most temporary as compared with shops in the United States, and that three-fourths of the daily service of these locomotives was performed upon construction tracks, lightly ballasted. Keeping these details in mind, the official explanation how the canal locomotives were maintained at the annual cost so comparatively little above the low cost record of the Pittsburgh & Lake Erie, as it appears in Col. Goethals's Report for 1910, page 230, reads more like quotations from the testimony of the experts in sclentific management, when telling the Interstate Commerce Commission what the rallroads could do, than like statements of accomplished fact in a Government document.

"In line with this policy (reducing the cost of locomotive mainte-

explanation how the canal lecomotives were maintained at the annual cost as comparatively little above the low cost record of the Pirisburgh reads more like quotations from the testimony of the experts in scientific management, when telling the Interstate Commerce Commission what the railroads could do, than like statements of accomplished fact "In line with this pulcy (reducing the cost of lecomotive maintenance and operation) two traveling engineers were appointed to instruct engineers, furemen, and hostlers in all divisions in regard to the proper operation of locomotives and economy in the use of fuel and the proper operation of locomotives and economy in the use of fuel and economy in the constitution of the proper operation of locomotives and economy in the use of fuel and economy in the constitution of the proper operation there is not all the proper operation to the proper operation the constitution of the proper operation operation

is on a daily allowance, and comparative sheets are compiled monthly and posted in every office, engine house, and yard office. The cost per service day for lubricating Canal Commission locomotives during the year was 8.3 cents. as compared with 11 cents, during the previous year, showing a reduction of about 25 per cent."

In the matter of economising in the repair of freight cars, it was shown before the Interstate Commerce Commission in 1910 that the actual average railroad costs run from \$45 on some roads to ever \$100 on others. During 1910 the total cost of repairs to cars of all classes in Col. Goethals's train service for the first six months was an average of \$1.03 per car per working day. During the fiscal year 1911 the repair costs for all classes of the Government canal cars was reduced to \$6 cents per car per working day. While it may be said that these figures do not seem to afford any comparison either as to cost or class of cars, but a little consideration will show that even with the higher cost the canal repair car costs show equal if not greater economical management. "Loading and unloading cars containing less than carload lots," Mr. Brandels, speaking for the eastern shippers, told the Interstate Commerce Commission. "presents perhaps the most burdensome expense of rairoading. Nearly everywhere on American railroads the methods of loading and unloading pursued are substantially the same as those used in the days of the Pharaobs."—all hand labor. The great majority of the cars in the Phanama Canal service are loaded by powerful steam shovels, whose engineers are more than glad to such the same showled the substantial of the previous set for unloading the variation of two inches to tear away the whole side of a car and, inevitably, frequently do.

When these powerful mechanical means for loading and unloading the variation of two inches to tear away the whole side of a car and, inevitably, frequently do.

When these powerful mechanical means for loading and unloading the variation of two inche

"Departments and divisions reported 6 cases of unsatisfactory work and 16 cases of slow delivery on the part of the mechanical division during the year. One of the six complaints covered defective work done prior to the establishing of the inspection system. This record requires no comment."

prior to the establishing of the inspection system. This record requires no comment."

The Government management of the Panama Railroad has been many times criticized and condemned because of what are high freight and passenger rates and expensive construction work on the newly relocated roadbed for the railroad around Gatun Lake and between there and Pedro Miguel. While there is doubtless some plausible pretext for statements to be made on these subjects, it would seem more fair to judge the measure of credit to be given to the railroad service under Col. Goethal's direction and control by consideration of the results achieved by the whole train service on the Canal Zone rather than by the operations of the Panama Railroad, which is only, as it were, a small part of this service. The Official Hailway Guide of the United States in its issue of June, 1913, shows that of the 1,270 railway systems on the North American Continent, 998, or 78 per cent of the total, have less than 130 miles of track. On the Canal Zone, in addition to the 50 miles of the Panama Railroad, there are over 200 miles of railroad tracks. These have been in daily service for the last seven years by the 200 or more heavy standard American locomotives and thousands of cars necessary for the transportation of earth and rock from the Culebra Cut and the canal. Eminent civil engineers and railroad men are unanimous in the opinion that the excavation of the Panama Canal and the transportation of the

a great railroad transportation problem. This was the task of the train service operated by Col. Goethals.

In the present application for an increase of freight rates the railroads are making much of the great increase in the amount of business offered, compelling vast expenditures for new equipment. The contention is undoubtedly true, but more scientific operations for loading and unloading cars would enable each car to be used more frequently. When the original railroad equipment was ordered for the canal construction service, it was estimated that there would be about 90,000,000 cubic yards of earth and rock to be transported by train service. That would mean about 162,000,000 tons. At the close of the fiscal year 1913 the total quantity of earth and rock carried by the Government-owned canal train service from the central division amounted to about 205,411,200 tons. When it is remembered that, notwithstanding this increased tonnage, the original equipment not only did the work but accomplished it with a very appreciable decrease of car-repair costs, it is believed that the Interstate Commerce Commission is now not only justified but warranted in ignoring the railroads' threats of Government ownership and, with the records of Col. Goethals's train service before it, calling upon the railroads to prove what corresponding economies they have effected.

Hamilton Foley.

HAMILTON FOLEY.

Mr. BORAH. Mr. President, I do not propose to enter upon an extended discussion as to the feasibility or advisability of building the proposed railroad in Alaska. I should feel that I was trespassing upon the time of the Senate to do so after the thorough presentation of the matter by the Senator from Oregon [Mr. CHAMBERLAIN] and the Senator from Montana [Mr. They have covered the subject so fully and with such minuteness of detail as to information, backed up with most ample logic as to the necessity of action, that I should not venture to review the ground, even if I had prepared myself to do so, which I have not. I rise for another purpose, and shall only most briefly refer to Alaska.

Mr. President, there is, as we find the situation now, but one way by which to open up the resources of the Alaskan Territory to the use of the people generally; and that way, in my judgment, is for the Government itself to enter upon the field of exploitation—not only, in my mind, to build the railroad, but the Government will have to go further before its work shall have been finished and develop and operate the coal mines. This may seem a radical assertion, but assuming that our ultimate object is to get cheaper coal out of that region, that is

what we will have to do.

Alaska has been tied up for a number of years through Executive orders, as has a great portion of other sections of the West, and the reason why it has been thus tied up has been very vividly presented to us this afternoon. I have been one of those who have felt that we have been unduly slow in relieving the situation from those "tie-ups," if I may so call them, but there seems to be no doubt about the necessity of having acted along that line in the beginning. So thoroughly have the resources of Alaska been locked up, however, that capital has ceased to be interested in the development of the Territory, and it would be many years, even if the situation were relieved in that respect, before capital would go there to develop the country along lines upon which we could afford to have it go there and develop it. The only alternative is that the railroads be constructed by the Government itself. It is not material as to what we think about railroad building by the Government in general. Whether we favor that policy and feel that we are approaching it more nearly year by year, or whether we are opposed to it, we have here a condition and not a theory; and, to my mind, it can only be met by the Government acting in this particular in this way. The fact that it may or may not become a precedent is not worth while at this time to discuss.

As I have said, we will in the end, Mr. President, have to go further, because we have no business in Alaska as a Government exploiter unless, as the result of our being there, the resources of that great region are brought to the people in a more beneficial way and at a lower cost to them, as they are to enjoy them from time to time. If it be oil or if it be coal, there must be some recompense in the lowering of the price in order to justify us going there at all. If, in other words, the construction of this railroad will mean no more than a greater advantage to those who will go in to exploit the Territory, under lease or otherwise, and will not mean a lower price for coal and a more convenient use of and lower price for other articles, there is no justification for our going there at all.

To my mind the construction of the railroad, while a most important step, is only one step which we must take before we shall have done our full duty in the development of that region. I do not want a railroad which connects up with the coal fields and the seaport alone, but I want a railroad which connects up in a beneficial way with the coal bins of the inhabitants of the Pacific coast. I want to bring the results home directly to the people of that portion of our country and indirectly to all, or I can find no justification for the Government going there

in the capacity of a railroad builder.

Here I pause long enough to say, Mr. President, that I shall take the first opportunity I have to vote for an amendment to this measure which shall strike out the clause with reference to the privilege of leasing the road. I will do so, in the first place, because I do not favor a provision which establishes a prece dent with reference to leasing. I am quite aware that I differ with many of my friends from the West with reference to the virtue of the leasing policy; but my convictions are such that I at least entertain no doubt as to what the result of that system would be.

It is clear to my mind that if we lease the proposed road, assuming that there must be some compensation flowing to the Government from the lessee and some compensation flowing to the lessee from the shippers, by the time the benefits have reached the consumer there will be no advantage in the way of lowering the price or in the use of these natural resources

at all. The lessees must make something; they must have a compensation; they must realize; the lessor must realize; and the entire amount, whatever the realization is to one or to the other and to both combined, must finally be visited upon those who shall pay the price for the use of the coal and the other natural resources of that Territory. If we are going to secure anything in the way of relief in the price of coal to the consumers of coal upon the Pacific seaboard and the adjoining and adjacent territory, we shall have to take another step, so far as the Government is concerned, and ourselves exploit and develop the coal fields. It would be, Mr. President, very little advantage to have a Government railroad in Alaska hauling out coal the price of which was controlled by the same syndicates that originally undertook to control, as disclosed by the evidence presented this afternoon, although there might be leases instead of titles. There are not so many virtues accompanying the leasing system as its advocates seem to suppose.

It is said that the leasing system will enable us to do away with monopoly or the controlling of prices, and that through the leasing system we can enforce competition. Well, Mr. President, if we do that, if we succeed in that, we will be the first people who ever succeeded under the leasing system in accomplishing that thing. I may be wanting in my information, but I have undertaken to acquaint myself with the experience of other countries under the leasing systems of those several coun-While the leasing system has been made to work successfully in a limited degree as a mere business proposition between the Government and the lessee, while the Government has been able to realize a revenue, and as a revenue-producing proposition it has been a success, yet as to lowering the price to the consumer, I have my first information to acquire as to where that ever has been accomplished. The ultimate consumer has received no benefit under the leasing system of any country the statistics of which it has been my privilege to examine; and, as I have already said, if the benefit is not to go to the ultimate consumer, there is no reason why the Territory should be exploited by the Government. I would just as soon pay \$8.50 a ton for coal to Mr. Guggenheim as to pay \$8.50 a ton for coal to some one else. If it does not reach me for a lower price, I am not particularly concerned whether he is operating under a lease or whether he owns the ground. I only throw this out, however, Mr. President, as a suggestion, because, of course, that is a step for the future. It is not provided in this bill, and it it not expected that it shall be provided in this bill, and it is no argument against the bill that it does not provide for it, because, as I have said, this is a step in the right direction, and, while an important one, we should not delude ourselves with the idea that it is the final one. I do not stop, therefore, to discuss at length the leasing system, its tendency to foster corruption, favoritism, the gutting and wasting of the mines, and its utter failure to bring relief to the consumer.

I want to call attention, Mr. President, to the views of a gentleman who formerly resided in my State, Hon. Joseph H. Hutchinson, who is very familiar with the Territory of Alaska. He has operated mines in Idaho, Nevada, California, and Alaska. and, I have no doubt, is as familiar with the natural resources of Alaska and its possibilities as anyone whose views we could have before us. I read first a paragraph, rather historic but interesting. In this statement he says:

In Volunteer Park, at Seattle, facing to the west, is found a monu-ent to William Henry Seward. At the top of the base are these

words:

"Let us make the treaty to-night."—William Henry Seward,
"Patriot and statesman; as governor of New York, United States
Senator, and Secretary of State, gave to the people of this country a
long and useful life, culminating in his purchase for them of the Territory of Alaska on March 30, 1867, in commemoration of which the
citizens of Seattle have set up this monument, in the year of our Lord

citizens of Seattle have set up this monument, in the year of our Lord 1909."

And history tells us that Edward De Stoeckl and William Henry Seward were playing whist that night, and that they broke up this \$500,000,000 whist game when Seward said, "Baron, let us make the treaty to-night."

The first paragraph of the treaty concerning the cession of Russia's possession of North America reads: "The United States of America and His Majesty the Emperor of All the Russias, being desirous of strengthening, if possible, the good understanding which exists between them, have for that purpose appointed as their plenipotentiaries the President of the United States; William H. Seward, Secretary of State; and His Majesty the Emperor of All the Russias; the privy counselor, Edward De Stoeckl, his envoy extraordinary and minister plenipotentiary to the United States. Concluded March 30, 1867."

Ratified by the United States May 28, 1867. Ratifications exchanged June 20, 1867. Proclaimed by the United States June 20, 1867. The organic act creating the Territory of Alaska approved August 24, 1812.

The year "1812" is evidently a misprint. As is well known, Mr. Seward was severely criticized for concluding this treaty,

Mr. Seward was severely criticized for concluding this treaty, and was even charged with corruption, with having received a large sum of money for foisting upon the Government of the United States an unexplored and unknown and uninviting Territory. We have been tardy in recognition of the worth of Alaska, but we are coming to its recognition.

Under the head of "Profits to date from Seward's whist

game," Mr. Hutchinson makes the following statement:

The following statistics are from official Senate Document No. 882, wealth produced in Alaska from 1867 to 1911, since which time, 1914, the wealth is easily over \$500,000,000: Production :

Minerals—	
Gold	\$195, 916, 520
Silver	1, 500, 441
Copper	8, 237, 594
Gypsam	547, 345
Marble	185, 443
Tin	88, 062
Coal	338, 189
Sea and fur products—	
Fur-seal skins	51, 835, 143
Aquatic furs, except seals	12, 496, 063
Furs of land animals	8, 350, 290
Walrus products	368, 053
Whalebone	1, 707, 410
Fishery products	147, 953, 077
Total	429, 523, 630

Reading further from the statement of Mr. Hutchinson it is

said:

If the increased output of gold is responsible for high cost of living, the prices are going higher and wages higher, because the gold output from low-grade quartz mines in Alaska is going to increase. This gold output is going to be greater than the placer output of gold from Dawson to Nome. We will not burden this article with the evidences of mineral conditions in central Alaska or the interior of Alaska, nor the wealth referred to in President Wilson's message as Alaska's storehouse. But for one illustration only, referring to the low-grade proposition at tidewater of one town, at Juneau; what Butte was to copper, Juneau will probably be to gold. One company there has just about completed a plant costing \$5,000,000 before turning a wheel. Students who read this story can take an imaginary mountain 2,500 feet high, run a 2½-mile tunnel through it, upraise in the center to the surface and cross-cut from the center, each way from the bore of the tunnel, 250 feet. Reduce this to cubic feet and then to tons. Then inagine that a company had tested for many years the product. Then go to the mouth of the Sheep Creek Tunnel, below Silver Bow Basin, Alaska. See the slate ores coming out that look like waste, and sample them and you will see that it will yield over \$2 per ton in gold, and that science is going to extract this gold for a cost of \$1 per ton, mining and milling.

I read this with some degree of confidence, for the reason,

I read this with some degree of confidence, for the reason, as I have stated, of the very extended experience of the writer

In this field of activity:

In Utah the genius of two American citizens are removing 50 per cent as much ground daily as the Panama Canal, and within five years three companies in Gastineux Channel, Alaska, will be handling, exclusive of the Treadwell and Mexican, over 50,000 tons per day, producing \$1 per ton profit.

Mr. F. W. Bradley, one of the most conservative and best mining engineers in the West, in an article in Mining and Scientific Press, December 1, 1913, says that the Alaska Juneau mine alone, with 4 mill units, will have a capacity of 12,000 tons per day, and that it is expected that the operations will continue for 100 years. This being true, then there must be 400,000,000 tons of ore blocked out in this one mine. Now, then, with the United States Government opening a railroad to the fields in central Alaska, the people can look for interest in gold mines greater than that since the discovery of gold in South Africa.

Mr. President these are not the feed of the second of the second of the second of the second of the discovery of gold in South Africa.

Mr. President, those are not the imaginary statements of uninformed men who might be interested in inducing people to go They are the statements of such men as Mr. into Alaska. Hutchinson and Mr. Bradley, both of them recognized authorities in the mining world, and men of high character, and they have disclosed facts, with reference to one proposition in that field of immeasurable wealth, sufficient to justify the Government in the enterprise which we are now discussing. Forty millions or fifty millions or one hundred millions upon the part of the Government, if it shall reap the benefits which we believe it will, and inure to the benefit of the people as we believe it will, would be but a small expenditure compared with the wealth of this small piece of territory within the vast field of wealth which we now term the Territory of Alaska.

Mr. Hutchinson goes on to state why Alaska wants Government railroads. I shall not read that portion of it, but ask to have it inserted in the RECORD without reading.

The PRESIDING OFFICER (Mr. PITTMAN in the chair). Without objection, it will be inserted in the RECORD.

The matter referred to is as follows:

WHY ALASKA WANTS GOVERNMENT RAILROADS,

WHY ALASKA WANTS GOVERNMENT RAILROADS,

The Government roads will give you coal to smelt the tin; give you coke; give you reasonable rates for your machinery into the mine and for your product out. Can you ship your coal out with a private-owned railroad? This question can best be answered by asking another one. Supposing the reader of this story had a coal mine to-day right on the railroad between Omaha and Ogden; what would you do with it? Compete with the coal from the railroad-owned mines of Rock Springs and Kemerer coal mines? Every well-posted person knows that there is not an individual coal producer to-day capable of doing it. And not only the people of Alaska, but we believe that the Representatives in both Houses of Congress at Washington representing the people of the United States believe that if Alexander III on March I7, 1891, could by imperial rescript appropriate \$400,000,000 to build 4,000 miles of railroad to the Pacific, that this Government, now that the Panama Canal is completed, can and will appropriate \$40,000,000

to open up the wealth of Alaska to its people, and will appropriate the money before many months.

Mr. BORAH. Mr. President, as I said, I did not rise to discuss the Alaskan proposition primarily. I only wanted to say this in justification of the vote I intend to cast. This is a conservation measure. It is for the purpose of opening up and developing the wealth of the western country. To my mind, anything which is calculated to develop the resources of the

West generally is germane to the question we have before us.
Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator for a moment?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. BORAH. I yield.

Mr. CHAMBERLAIN. If the United States in times past had pursued with reference to railroad construction the policy that is now suggested with reference to Alaska, does not the Senator think it would have been very much more beneficial to the people of the country and would have developed the country as rapidly as it has been developed under the past land-grant

Mr. BORAH. I should be inclined to agree with the inference the Senator suggests by his question. Of course, it is very difficult to look forward 50 years and judge what it is to do according to the conditions which that 50 years shall develop. Yet I do not hesitate to say that as we look around and see the realization of what we now know to be true, with reference to this country, if the Government had been able to construct a transcontinental line from the Atlantic to the Pacific it would have been a successful proposition upon the part of the Government.

I am going to offer an amendment to this bill which I hope will be accepted. I ask that the amendment may be read.

The VICE PRESIDENT. Is there any objection? Chair hears none, and the Secretary will read as requested.

The Secretary. On page 13, after line 12, it is proposed to

The Secretary. On page 13, after line 12, it is proposed to insert:

That to enable the Secretary of the Interior to initiate, construct, and complete Government reclamation projects the Secretary of the Treasury is authorized, upon request of the Secretary of the Interior, to transfer from time to time to the credit of the reclamation fund created by an act entitled "An act appropriating; the receipts from the sale and disposal of public lands in certain States and Territories to the construction of irrigation works for the reclamation of arid lands," aproved June 17, 1902, such sum or sums, not exceeding in the aggregate (in addition to the amount provided for in the act passed and approved June 17, 1902, such sum or sums, not exceeding in the aggregate (in addition to the amount provided for in the act passed and approved June 17, 1902, such sum or sums, not exceeding in the aggregate (in addition to the amount provided for in the act passed and approved June 17, 1902, such sum or sums, not exceeding in the aggregate (in addition to the amount provided for in the act passed and approved June 17, 1902, such such extensions thereof as he may deem proper and necessary to initiate, construct, and complete the said reclamation projects, and such extensions thereof as he may deem proper and necessary to the successful and profitable operation and maintenance thereof or to protect water rights pertaining thereto claimed by the United States, and such sum or sums as may be required to comply with the foregoing authority are hereby appropriated, out of any money in the Treasury not otherwise appropriated; Provided, That the sums hereby authorized to be transferred to the reclamation fund shall be so transferred only as such sums shall be actually needed to meet payments for work performed under existing law: And provided further, That all sums so transferred shall be reimbursed to the Treasury with funds for such additional advances to the reclamation fund, the Secretary of the United States, in such form as he may p

appropriated, to pay the expense of preparing, advertising, the same.

SEC, 3. That, beginning five years after the date of the first advance to the reclamation fund under this act, 10 per cent of the annual receipts of the reclamation fund shall be paid into the general fund of the Treasury of the United States until payment so made shall equal the aggregate amount of advances made by the Treasury to said reclamation fund, together with interest paid on the certificates of indebtedness issued under this act and any expense incident to preparing, advertising, and issuing the same.

SEC, 4. That all money placed to the credit of the reclamation fund in pursuance of this act shall be devoted exclusively to the completion of work on reclamation projects recommended by the Secretary of the Interior and approved by the direct order of the President of the United States.

SEC, 5. That this act is not intended as a repeal of any part of the act of June 25, 1910, being "An act to authorize advances to the reclamation fund, and for the issue and disposal of certificates of indebtedness in reimbursement therefor, and for other purposes."

Mr. BORAH. Mr. President, this amendment would not be offered if I felt that it would imperil the bill which is now being urged. I do not think it will or should. It establishes no new precedent. Some three or four years ago we passed an act in precisely the same language-at least, substantially so, and I think entirely so-providing for the advance of the sum of \$20,000,000. That has been entirely successful. This amendment has been pending as a bill before the Congress for some five or six months. It has been considered by the Committee on Irrigation and Reclamation of Arid Lands, but has not been passed upon, although I think I am perfectly safe in saying that the committee is practically unanimous in its support. In addition to that, the Secretary of the Interior has earnestly indorsed the proposition so far as the principle is concerned. This particular measure has not received his indorsement, but he has stated in his report that the Government could use not only \$50,000,000 but \$100,000,000 with entire success in the reclamation of the arid lands of the West.

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from New Hampshire?

Mr. BORAH. I do.

Mr. GALLINGER. The Senator suggests that this will not, as I recall his language, establish a bad precedent in that it is not without precedent.

It is not without precedent. Mr. BORAH.

Mr. GALLINGER. I will ask the Senator if it is not rather without precedent to incorporate an amendment relating to the irrigation projects now under way in a bill providing for building a railroad in the Territory of Alaska?

Mr. BORAH. The Senator was absent, I believe, a few moments ago when I stated that this amendment is germane to the bill for the reason that the entire subject is one of the conservation and development of the natural resources of the West. It relates to the subject matter. It is no different function to build a canal than to build a railroad when both are to

develop the Government's property.

Mr. GALLINGER. It would be in the line of conservation if the Government should appropriate \$50,000,000 to remove the rocks from the farms of the States of New England, and thus

give relief to our poor farmers.

Mr. BORAH. It would not be worth while to start with fifty millions. [Laughter.]

Mr. GALLINGER. If we could not get fifty millions, we would take a smaller or a larger amount if we could get it. The proposed amendment is anything but germane to the bill; and the Senator's advocacy of the bill now under consideration will be very seriously endangered if he seeks in this way to take \$50,000,000 from the Treasury of the United States to complete the irrigation projects now under way or to start new That is my opinion.

Mr. SMITH of Arizona. I should like to suggest, if the Senator will permit me, that it might become relevant by letting the title of the bill be changed so as to read "and for other

purposes.'

Mr. GALLINGER. That would necessarily follow.

Mr. BORAH. I do not understand that there is any rule in this body by which amendments to a measure of this kind are ruled out for the reason that they are not germane. Anything is germane on this kind of a bill which a Senator's ingenuity or patriotism may suggest and which he has the good fortune to secure enough votes to carry.

Mr. GALLINGER. The Senator is right about that; but the suggestion that attracted my attention was that it was not without precedent. I believe it is not. I believe there was once a land law attached to a private pension bill, but it was most

remarkable legislation.

Mr. BORAH. And perhaps the land law was the better of

Mr. GALLINGER. I think likely so.

Mr. BORAH. That is the way I feel about this matter. Mr. GALLINGER. It certainly took more money from the

Treasury than the private pension bill did.

Mr. BORAH. This does not take any money from the Treasury, in a sense. It simply loans the credit of the Government to the reclamation of these lands which the Government owns. They are utterly worthless as they are. They belong to the Government, but they are of no benefit to the Government nor to its citizens. The Government has established the policy of redeeming these lands itself. If they were open to exploitation in such a way that capital, by massing itself, could go in and

reclaim them, or if they were private lands such as the lands in New Hampshire, no one would suggest, of course, that the Government should enter upon the proposition of developing

The Government is doing this work, however. It is now engaged in the work. It is a part of its policy. The only question here for determination is whether or not we shall do it, as the Secretary of the Interior says, upon such broad lines as to be most efficient and serviceable, or whether we shall do it piecemeal, from time to time, and in a way which is most

expensive to the Government.

Another fact which must be borne in mind is that under the law as it now exists every dollar of this money is to be returned to the Government. No acre of the land which will be redeemed is of less value than twice or three times the amount of money which will be expended upon it. I do not see how it can be said to be anything like the proposition the Senator from New Hampshire suggested, because this is the Government's property, and it ought to do something with it to make it habitable for mankind.

Mr. GALLINGER. If the Senator will permit me-

Mr. BORAH. Certainly.
Mr. GALLINGER. I gave my cordial support to the original irrigation bill. I believe I acted wisely in that matter. I afterwards voted for an appropriation of \$20,000,000 to continue the work, but I then thought no further appropriation would be asked for. I now wish to ask the Senator, in good faith, because I have not looked up the facts, whether that amount of \$20,-000,000 has been expended up to the present time, or what portion of it has been expended?

Mr. BORAH. The amount of \$20,000,000 has not been lit-

erally expended, but it has been distributed, in the sense that reclamation projects have been selected and estimates made as to the completion of particular projects; and, as I understand, the amount has been distributed so that there is no portion subject to use for any other projects than those to which it has

now been distributed.

Mr. GALLINGER. I will further ask the Senator, entirely for information, how rapidly or to what extent is the money that we have expended up to the present time being reimbursed

to the Government?

Mr. BORAH. I could not give the Senator figures as to the rate of repayment, nor as to the proportion of the amount expended which has been repaid. I wish to say, in all frankness, that it has been paid back very slowly. That is due, however, to the fact that these are raw, crude lands when the settlers go upon them, and they are supposed to be settled by people who have very limited means, and they must necessarily secure their money out of the lands themselves by cultivation, the raising of crops, and so forth. Therefore, taking into consideration the fact that in the first place it takes years to put the water upon the land, and in the second place that it takes a long time after the water is put upon the lands before it can be applied to the growth of crops and made productive in cultivation, it has been impossible to secure the return of the money with the rapidity with which in the first instance people anticipated it would be returned.

I wish to say, however, that the title to the land upon which this money has been expended is in the Government; the value of the land is all the way from three times to ten times what it was when the Government put the water there; and if the settlers should move off to-day, and the Government should put these lands into the market and sell them to new settlers at their actual value, it would have from three to ten times the

amount of money it has put into the lands.

Mr. GALLINGER. But the Senator does not seriously apprehend that the Government will ever foreclose on those lands? Mr. BORAH. No; the Government never will foreclose upon those lands, because they are settled up by a class of people who have at all times signified their willingness and their intention to make payments; and while I would not say they are making them rapidly in the ordinary sense, considering their means they are making them very rapidly.

Mr. GALLINGER. I have been watching the course of legis-

lation for a long time, and my impression is that instead of the Government foreclosing on those lands we are more likely to be met in the near future with a bill to exempt the settlers from the payment of that money to the Government. not come; but, if it should, I suppose the Government would survive even if it should pass that kind of a bill.

and I am not quite sure that the Senator's proposition of appropriating fifty millions may not appeal to me when I come to vote on the matter. I simply wanted a little information; that was all.

Mr. BORAH. I am very glad the Senator interrupted me, because I am satisfied he is coming my way very rapidly.

Mr. CLARK of Wyoming. Will the Senator permit me to

interrupt him for just a moment?

Mr. BORAH. Certainly.

Mr. CLARK of Wyoming. I desire to say to the Senator from New Hampshire that there has been some solicitude at the slowness with which payments have been made upon the lands under the Government irrigation projects; but I think in most if not all the cases that has been due to the delay in the completion of the projects. The engineers, in making their estimates, were almost universally at fault as to the time when the settlers would receive water on the lands, and the projects were thrown open for settlement under those conditions before they ought to have been thrown open.

The consequence has been not only a delay in the payments, but hardship and bankruptcy on the part of very many men who went on supposing that the water would be supplied at the

time at which it was advertised to be supplied.

I have not any question that any man who went in to make a homestead under one of these projects, if the water is supplied according to the terms of the contract upon which he entered,

will make his payments on time and in full.

Mr. BORAH. The Senator from New Hampshire suggests that within the due course of time there will likely be a bill introduced here to relieve the settlers of the West from the payment of these sums. The settlers never have suggested that, so far as I know, but I am very frank to say that I should support that kind of a bill without any hesitancy, and do so upon principles and precedents running all through our legislation.

Mr. STERLING. Mr. President-

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from South Dakota?

Mr. BORAH. In just a moment. Here is this land, as I said a few moments ago, which belongs to the Government and is absolutely worthless. stands now, it is simply a desert. The Government could not enter upon any enterprise more calculated to serve the entire people of the United States than to bring into cultivation millions of acres of desert land and make it productive for the gen-

eral supply of farm products in the United States.

Mr. SUTHERLAND. Mr. President, the Senator from Idaho has just said that he would support a bill which would relieve these appropriators of water from the payment of the amount which they had engaged to pay to the Government for the water.

Of course, many of them have made payments to the Government for their water, and many of them are now in process of making payments and will complete them in due course of time. Would the Senator be in favor of a bill which would propose to refund the money to those who have paid, as well as to relieve those who had not paid?

Mr. BORAH. It would be very difficult in almost all instances in that particular to find the man who had paid, because the lands would change hands. But we are discussing a purely impracticable and academic question. There is no question of refunding to the settler. As I said a moment ago, if such a bill were presented I would vote for it and support it, and I would justify it upon many precedents which are to be found in our legislative history. In 1831 or 1832—I may not have the date exact—when the settlers upon the western lands which they had taken up were found to be incapable of making the payments which they had agreed to make, the Congress of the United States passed a bill relieving them from the payments, which amounted to what in those days was a large sum.

Mr. President, when we spend a few dollars or give away a few dollars which have for their purpose and are calculated to make homes for those who are hungry for homes, to make producing farms, we need not play the part of the miser in reference to our public funds. It will be secured back in postage stamps which those people on the western lands will use on

letters to their eastern friends.

Will the Senator permit me just a Mr. SUTHERLAND.

Mr. BORAH. Very well, but I should have yielded to the Senator from South Dakota [Mr. Sterling].

Mr. SUTHERLAND. I may change my mind, but as at present advised I would not vote for the bill which the Senator from Idaho describes, for at least one reason. When the irrigation bill was presented to the two Houses and adopted, that very prediction was made-I heard it made in the House-that it would he only a little time until Congress would be asked to return

this money. It was said in the most solemn and in the most emphatic way by western Representatives and Senators that that would not be done; that the farmers who are locating upon those lands in the West would pay their bills; that Congress would not be asked to relieve them. For that reason, if for no other, I would not be inclined to vote for any such measure.

Mr. BORAH. I reject the doctrine that the statements of my predecessors can bind me. I take my own oath and legislate according to the lights which are before me, and not according to the lights which are behind me. I yield to the Senator from

South Dakota

Mr. STERLING. Mr. President, I am interested here, because I have introduced a bill for the relief of one class of homesteaders. From some general statements just made, I infer that some Senators have an objection to any bill to relieve any class of homestead settlers from the payment of the pur-

chase price of their lands.

There are at least two classes of homestead settlers, those upon the reclamation lands described by the Senator from Idaho and those on the Indian reservation lands outside of any reclamation project. It is for the relief of the latter class that I have introduced the bill. The price paid for lands on the Standing Rock and Cheyenne Indian Reservations under the act of 1908 is, I think, a little in excess of \$4 per acre, the appraised value being all the way from 50 cents up to \$6 per acre, but the average price is in excess of \$4 per acre. There have been four successive crop failures, and as a preliminary to the introduction of the bill to which I refer, I presented a petition here signed by 865 homesteaders on these lands, reciting the conditions and showing their inability to pay the Gov-ernment price for the lands. These settlers went out there with the idea largely in mind that they were getting free homesteads.

Now, as to the other class of lands, those within reclamation projects, we have one such project in the State of South Dakota, known as the Belle Fourche project. As in the cases stated by the Senator from Wyoming [Mr. Clark], there was delay in getting water upon the land, and the settlers there had to have some extension of the time of payment; but I have not known of any application upon the part of these settlers for relief from the payment ultimately of the purchase price of their lands.

I merely suggest now the difference between these two classes of land, and urge in this connection the careful consideration, at the proper time, of the bill for the relief of those who have taken and settled upon these Indian reservation

Mr. SMITH of Arizona. Will the Senator from Idaho yield to me for just a moment?

Mr. BORAH. I yield to the Senator.

Mr. SMITH of Arizona. If the Senator will pardon me, I want to express regret that this particular phase of the irrigation projects has been at this time precipitated on the Senate. Whatever may be the Senator's views or what may some day be the determination of Congress, I deprecate the suggestion of release of all payments, for it may raise hopes never to be realized. I am very much in sympathy with the statement made already on the floor by several Senators representing the West that the settlers do not wish or expect to avoid any just claims on their contracts with the Government. But we all know that the Government will be compelled, and ought unhesitatingly, to extend the time in the cases which have been mentioned here. After many long interviews with the Secretary of the Interior regarding the condition of settlers under these irrigation projects, we have all been pleased to see the wise suggestions and recommendations that he has made in his He has recommended to Congress that relief be given in this way by extending the time of payment on these lands and so graduating the payments as to make them as little burdensome as possible on the homes. I hope that we may secure such legislation at this session of Congress, and then under that improved condition I think the Senator and all of us would find that ultimately those people would find their way out of difficulties and trials and apprehension which now surround them.

Mr. GALLINGER and Mr. WILLIAMS addressed the Chair. The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from New Hampshire?

Mr. BORAH. I do. Mr. GALLINGER. I will yield to the Senator from Missis-

Mr. WILLIAMS. Does not the Senator think one reason why delays are being made in making these payments is the fact of the existence of the hope of ultimately being relieved from payment by legislation?

Mr. BORAH. No; I do not think that. Before I yield to the Senator from New Hampshire let me say to the Senator from Mississippi that I have discussed irrigation problems on many projects of the West before the settlers, because they have been in a distressed condition and we have met with them I have never witnessed more suffering, except that often. which arises from actual illness, than I have witnessed at times among the settlers of the West upon these irrigation projects. They have endured all kinds of adversity. They have given evidence of the highest grade of citizenship. They have met all kinds of untoward circumstances. I have never heard from them at any time a suggestion that they wanted to be relieved from payment. That has never come from them to me either by letter or by voice. Anything that I have said here with reference to my position, while it binds me and expresses my sentiments because I believe in being candid and it is my sentiment, does not purport to represent the men who are upon these reclamation projects in any expression of sentiment they have ever made to me.

Mr. WILLIAMS. It only arouses hope of ultimate relief and

leads to delay in payment.

Mr. BORAH. Perhaps I ought not to say it, for the reason that it might arouse a hope which never under the heavens

would be realized.

Mr. GALLINGER. "Hope deferred maketh the heart sick." Mr. BORAH. If this was a grant to a vast corporation like a railroad company, or an appropriation for the purpose of cleaning out some rivulet down which a duck could not swim; if it was the appropriation of millions of dollars along those lines and they were interested, they would realize their hope; no thought would be entertained of its being paid for or back; but being settlers, trying to build homes, trying to meet under most adverse conditions the requisite of good citizenship, they will in all likelihood be required to pay every dollar that they owe. We do not grant favors to so worthy and honest a people.

Mr. GALLINGER. Mr. President, if the Senator will permit me, I will say to my good friend from South Dakota [Mr. Sterling] that I had no knowledge as to the bill he has introduced, and hence had no reference to that matter. It may be that when a certain class of settlers who have endured great hardships and privation appeal to us for assistance such a bill might get my vote, and very likely it would. The Government has been liberal to these settlers, advancing the money, to be repaid in 10 years without interest, but I do not expect that it

will all ever be repaid.

I want to add this to what I before said: When the original irrigation bill was before the Senate I raised the question myself as to whether this money would in good faith be returned, and we had the assurance that it would. I want to have it returned to the fullest extent that it is possible for the settlers to return it. I hope that will be done, and that the assurance then given will be carried out in good faith as far as possible.

I will add the suggestion that, as we are about entering upon the Government ownership of a railroad in Alaska, building it at governmental expense, it might be good policy for this Government of ours, which has few defenders nowadays—and I hold no brief in its behalf—to irrigate these lands, if it increases the value fourfold or tenfold, as the Senator from Idaho says, and then sell them to men who desire to make

Mr. WILLIAMS. Or rent them and operate them.
Mr. GALLINGER. Yes; or rent them and operate them,
and in that way do something toward reducing the high cost of living.

Mr. President, I am now going to make an allusion that very likely will attract the attention of my good friend from Mis-

sissippi [Mr. Williams].
Mr. BORAH. I hope the Senator will not make it.

Mr. GALLINGER. Just a word. My suggestion is this: We have spent a great many million dollars upon the Mississippi River, in building levees, and we have greatly increased the value of the land thus protected, which land was practically worthless when we built the levees. A flood comes and overflows those lands, the value of which has been enormously increased by the Government, and a bill is rushed through Congress to reimburse those men.

Mr. BORAH. Without discussion or consideration or con-

science.

Mr. GALLINGER. Without discussion or consideration. We reimburse those men who have already made a fortune by increasing the value of the land because of the expenditure the United States Government has made. The levees necessarily throw the water back to the other side of the river, and as a result millions of dollars' worth of claims are now pending against the Government for destroying the land on the opposite side of the river. I am inclined to think those people have a pretty good claim, but the transaction is certainly not profitable to the Government.

Mr. WILLIAMS. Does the Senator remember any bill introduced to reimburse any private landowner for any losses dur-

ing an overflow?

Mr. GALLINGER. Not that I remember; but we have made appropriations to reimburse them to a certain extent, to relieve them from distress because of the overflow; and, while no bill has been introduced, millions of claims have been filed against the Government, and their payment will doubtless be urged

Mr. BORAH. Let me ask the Senator from New Hampshire a question. What is the difference between appropriating money for the purpose of protecting thousands of acres of farm land along the Mississippi River and appropriating money for the purpose of making land habitable in the West?

Mr. GALLINGER. I am inclined to think there is not much

difference.

Mr. BORAH. Is there any return? The Senator has been

voting for those bills.

Mr. GALLINGER. I have not seen any return, but what I more particularly desire to remark was, and I do not know that it will appeal to any Senator, that it might be good policy for Congress, if it has a very deep and abiding interest in the welfare of the General Government, to appropriate money to irrigate these lands in the name of the Government itself, and then either rent them or dispose of them at their increased valuation. But that is a mere suggestion. Perhaps we will come to that after we have got through appropriating money to complete these irrigation projects, if we ever do get through. New projects will be started. They will spring upon us month by month and year by year, and perhaps we shall never get

through appropriating money for that purpose.

Mr. BORAH. It is to be hoped that we never will get through so long as there is more land to come under cultivation and there is more possibility of feeding the congested centers of the United States. If it were not for that fact, if we did not have hope of relieving the congested conditions in the great cities of the United States, this Government would not endure 50 years. If we had to run the Government on the conditions which exist in New York City and Chicago it would not last a decade. It is by reason of the fact that the supply of brain and brawn and muscle and manhood and citizenship is fed from the great rural precincts of the country that we feel safe as to the future of the Republic. And I pause to say that there is to be found no broader vision of statesmanship than that which furthers all reasonable methods for building up and encouraging the agricultural interests.

Mr. GALLINGER. Beyond a question that is so, and yet is it not a fact that the arable land of the United States is not one-half tilled, that it is improperly tilled—wastefully tilled? If we could only get men from the great cities to go upon lands that are now ready for the hand of the farmer, we would greatly increase the products, and thus possibly relieve the people from the high cost of living. I do not know how it can be done. I have sometimes thought we might have a provision in our immigration laws that a certain definite proportion of the men who come to the United States should not stay in the great cities, but should be sent out into the farming regions of the great West.

They raise and educate families in Europe on 10 acres of land by the system of intensive farming. In this country a man gets 160 acres in the West and immediately he reaches out to grab another 160 acres, and another 160 acres, and is rarely satisfied until he gets a whole section of 640 acres. Of course, it is not properly tilled. We want more intensive farming than we have at the present time, and when we get that we will have enough for the people of the United States to eat, I have

not any doubt.

Mr. BORAH. The Senator is in error in one proposition, and that is that these lands are not being taken. of land is thrown open in the West, if it is agricultural land, if it is at all available, I have known them to stand 100 deep on one piece of land and actually carry their blankets and their food and camp at the receiver's office for four and five days in order to enter the land.

Mr. GALLINGER. Well, Mr. President, that is simply the American character.

This is what we build this Government on. Mr. BORAH. Mr. GALLINGER. The American desires to get something that somebody else wants. They tumble over each other to get these arid and semiarid lands, and then they can not make a living on them.

Mr. BORAH. Mr. President, are people who are willing to go and spend their time and energy for four and five years and stay for months and years where the Senator would not stay overnight to be criticized because, forsooth, some of them fail in making a success of their farms? If the Senator would go

West again, as he did a few years ago—
Mr. GALLINGER. I have been there a great many times.
Mr. BORAH. But the Senator has not been there lately, unfortunately. I hope he will go again and look over some of the deserts which he saw there 10 and 15 years ago. There are thriving cities there now, and in the country there are large white houses and red barns, and thriving communities paying taxes for the support of the county and State government. They are sustaining schools, they are educating their children, and they are as good a community as you can find anywhere in the United States, when four and five and six and seven years ago there was waste and silence—utter waste.

Mr. President, whatever opinion my Democratic friends have upon this subject, I know the Republicans will all support it, because it is a Democratic administration and we want you to get right as often as you can. Before our Democratic friends make up their minds upon it, I want to call your attention to the report of Secretary Lane. I think it likely that most of those who do not live in the West have not read this report. It is altogether one of the ablest reports which has been written by a Secretary of the Interior. It is not only brilliant in style, the turgid duliness which usually characterize state papers being absent, but it is logical and comprehensive in its presentation of purposes and plans with reference to these great subjects. I do not agree with all his views, but I, nevertheless, most heartily commend the broad, comprehensive statesmanship of this report. The Department of the Interior deals with those of this report. The Department of the Interior deals with those subjects which more nearly touch the vital interest of the real men and the real women who are developing this country throughout the West than any other department which we have. The Secretary has evidently studied the subject with a great deal of earnestness. He has traveled over the land, he has met the settlers, and he has presented a report here to the Congress of the United States which is worth any man's while to study. I am going to take the liberty of reading a paragraph or two in order to justify the position which I take in advancing this measure. I shall have occasion to refer to this report upon other subjects, but I direct attention now to those parts which have a bearing upon the amendment. have a bearing upon the amendment.

have a bearing upon the amendment.

It is, of course, known to you that there exists a feeling in the West that its affairs and needs have not been given that consideration at the hands of the National Government which they merit. This feeling is not confined to speculators or exploiters. It is the sentiment of many who are without selfish motive and regard the matter wholly from the standpoint of national growth. They point to the conditions which obtain in Alaska as unparalleled among people of our aggressive and nation-building stock. So, too, they are unable to understand why ways have not been found by which the great bodies of coal and oil lands, of phosphate and potash lands, may be developed, and the waters of the mountains made available for the generation of power and the redemption of the desert.

There is one very simple explanation for the existence of this feeling. We have adventured upon a new policy of administering our affairs and have not developed adequate machinery. We have called a halt on methods of spoliation which existed, to the great benefit of many, but we have failed to substitute methods, sane, healthful, and progressive, by which the normal enterprise of an ambitious people can make full use of their own resources. We abruptly closed opportunities to the monopolist, but did not open them to the developer.

The West will thank the Secretary of the Interior for this plain, brave statement. We have been criticized in the West as speculators and exploiters, desirous of monopolizing the public domain and the natural resources, when we have been asking for nothing more than an opportunity for honest citizens to develop and build up the country. The Secretary, having traveled over the country and examined the situation, has stated frankly and illuminatingly in his report that the conditions there are precisely as we have often described them; that there has been reservation and dedication to silence and to nonuse, but no machinery provided by which the people could develop the resources and build up communities, counties, and

So there has slowly evolved in the public mind the conception of a new policy—that land should be used for that purpose to which it is best fitted, and it should be disposed of by the Government with respect to that use. To this policy I believe the West is now reconciled. The West no longer urges a return to the hazards of the "land-is-land" policy. But it does ask action. It is reconciled to the Government making all proper safeguards against monopoly and against the subversion of the spirit of all our land laws, which is nessence that all suitable lands shall go into homes and all other lands shall be developed for that purpose which shall make them of greatest service. But it asks that the machinery be promptly established in the law by which the lands may be used. And this demand is reasonable. Already the Congress has recognized in many ways the appositeness of this policy, but it is for yourself and Congress to further extend this thought into our legislation.

I turn now, Mr. President, to the portion of the report which treats immediately of the subject under consideration.

treats immediately of the subject under consideration.

"The Great American Desert," as it was designated upon the map some 40 years ago, has become one of the richest portions of our country. This desert included a variable area, generally all west of the Missouri River to the Sierra Nevada Mountains. To-day it is harvest field, cattle range, mining camp, and orchard—where there is water. And where there is no water it remains desert. There are at least four States which can never increase greatly in stable population unless their lands are brought under irrigation. And in all of the Western States there are tens of thousands and in some millions of acres that will remain waste land, fit only for the poorest cattle range, and much not even for that use, without the expenditure of large sums for reservoirs, dams, canals, and ditches. That there is not water enough even with the fullest storage to supply the demands of all the arable land can safely be said. That, however, there is sufficient to care for a large part of this territory and bring it into fruitfulness there is no doubt.

Because of the magnitude of the money investment required, and appreciative of the need, the Congress of 1902 adopted the policy of undertaking irrigation projects of its own. The moneys received from the sale of public lands—less 5 per cent—went into a reclamation fund, administered by this department.

We should not overlook that fact, Mr. President, as we go These reclamation projects thus far, except the specific appropriation which was made a few years ago of \$20,000,000, have all been developed out of the fund realized from the sale of the public lands within the States where the reclamation projects are situated, and that fund has only been loaned for a time by the Government to the settler and paid back again. In other words, the settler goes into a region of country; he buys a part of the public land; he buys timber or some other part of the natural resources of the country and pays to the Government of the United States the value which the Government places upon it. The Government does no more with reference to it than to loan the money to the neighbor who got there after the land had been occupied which could be occupied without irrigation until his neighbor could irrigate that land and pay it back out of the resources realized from that land. The Government has never been out a dollar, and in my judgment its standing and its credit before the country has not been embarrassed in the least by the fact that it has advanced this money to the settler; and, in my judgment, it will not be out, because whatever my individual opinion might be as to the justness of the cost, the settlers will pay every dollar of this money back under the laws as they now exist.

The result has been the construction of some 25 projects, scattered through all of the arid-land States. In these the Government has invested approximately \$76,000,000. One of these, a pumping plant in Kansas, is now unused; another, a flood storage system in New Mexico, is only in partial use; both of these, however, represent less than 1 per cent of the total investment.

In other words, Mr. President, if those projects should fall and become utterly worthless, the Government would have lost less than 1 per cent of this investment and this enterprise of the money which it has invested, and I venture to say that that is a splendid record compared with individual enterprise with reference to investment.

The others are in operation, and less than 3 per cent of all the land which is served or which we are ready to serve is unoccupied. This work has been a success.

Less than 3 per cent of these lands which have been taken up by the Government and undertaken to be irrigated in a public way are now unoccupied. Perhaps if out of that 3 per cent could be taken land which is not subject to occupancy, which is unfit for use, it would be reduced practically to a minus

quantity.

Mr. SMITH of Arizona. If the Senator from Idaho will permit me right there, I will suggest that this land is in limited quantites; that it is used for the making of new homes, and is not held in any great number of acres. Every acre of which he speaks as being occupied is occupied by a

man who is going to make a home for himself.

Mr. BORAH. Those lands, Mr. President—and I address my remarks particularly to the Senator from New Hampshire [Mr. GALLINGER] now—are taken up, in the first instance, not in tracts of 160 acres, but they are cut from 160 acres to 80 acres or to 40 acres, as in the discretion of the Secretary of the Interior seems wise. Therefore, people leave their homes in the East, separate themselves from friends and associates, and go out into these unoccupied places to help build up communities, for what? For the enormous prize of 10 or 40 or 60 acres of land, every dollar of which in value they have put into the land themselves by exertion and labor before they ever get a title. If the settlers in the West, Mr. President, could calculate the labor which they themselves have put into these enterprises and could turn about and sell their labor for what it was worth at the rate-going wage, they would find that they would have paid for those lands several times over, to say nothing of the adversity which has accompanied them in their

efforts to secure these homes. There is no higher grade of citizenship under the flag than that of the man who is willing to sacrifice his time and his efforts and the conveniences of his family to establish a home. The home builder, the home owner, is the prime pillar upon which the Republic rests.

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from New Hampshire?

Mr. BORAH. Certainly.

Mr. GALLINGER. I am gratified to learn from the Senator from Idaho something that I did not before know, that these lands are being divided up into small farms. That is as it ought

to be, but I did not know that that was the rule.

Mr. President, I do not want it to be understood from anything I have said and the many questions I have propounded, that I have changed my mind in the least in reference to aiding all worthy people who are endeavoring to get a living and who are engaged in the work of adding to the productive wealth of our country. I remember, and I think one of my children was old enough to see on the old geography, "the Great American Desert." I have traveled over that "Great American Desert "two or three times and I have seen that it has been reclaimed; that there are now beautiful homes and prosperous farms where 40 or 50 years ago it was absolutely a desert and nothing else. I still hold the generous view that, as an eastern man, I can afford to vote for almost any appropriation that will help to develop the great West. I think I said once in the Senate—and I am going to repeat it, because it is a matter of pride with me that in a great western city I was once introduced to an audience of business men as an eastern man with western ideas.

thought it was a very great compliment.

Mr. BORAH. Yes; that was a distinct compliment.

Mr. GALLINGER. Thank you. I have voted for all of those bills that have tended to develop the great West, and perhaps I shall vote for the amendment which the Senator has presented. At any rate, I will give it very serious consideration. I do not, however, think it ought to have a place in the bill that is now under consideration. If the Senator is correct in saying that the committee is practically in favor of reporting it, I think it ought to come here as a separate and independent measure. However that may be, we shall meet it when it comes. I remember that famous declaration of Daniel Webster, the greatest man that New Hampshire ever produced and one of the greatest men the world ever produced, quoted by the Senator from Idaho, that that great country was only fit for the raising of sagebrush and the support of coyotes. I remember that Webster is also credited with having said that Almighty God placed an impassable barrier between the West and the East in the shape of the Rocky Mountains; that that country never could be occupied by intelligent people; that if States were formed there the men who were elected to the Congress of the United States to represent them would have to spend all their time every year in coming to Washington and getting back to their homes.

Mr. BORAH. The Senator from New Hampshire sees now

where the West stands, notwithstanding the prediction of Daniel

Webster and the divine decree.

Mr. GALLINGER. Yes; those were mistakes that Webster made, and I suppose there were a great many men who sympathized with Webster at that time in those views. We now know that they were entirely erroneous. The great West is now, to my mind, perhaps the most important part of our country. At any rate, it has had a marvelous development and. beyond question, irrigation is going to marvelously increase the

presperity and wealth of that section of our land.

I say this because it might be inferred by some from the questions I have propounded and the suggestions I have made that I may have changed my views. I have not. It is a mere matter in my mind as to whether it is wise at this time to make a Federal appropriation of \$50,000,000 or to delay that a while and to pass this railroad bill, which I think is very objectionable in its present form, and then take up this great question of further appropriations for irrigation later on. However that may be, or whatever my vote may be, my sympathies remain unchanged. I want to do what I can to help the country as a whole, and not vote for measures which are provincial or sectional in their nature. I have never done so and I hope I may never do so.

Mr. SMITH of Arizona. Mr. President, I want to say, from my long observation in public life, that no man in the West could say anything regarding the friendship of the Senator from New Hampshire [Mr. GALLINGER] toward that western country that was gracious and complimentary that his conduct here has not most richly merited, for in all the fights for statehood in the West the Senator from New Hampshire along, from his section, has always been found the friend of the western people. It gives me great pleasure to thus publicly pay the tribute of my State to what that Senator has done for it in its long struggle for independence.

I wish to make a suggestion to the Senator from Idaho now occupying the floor, and in order to impress it on Senators present I suggest that he do not let them forget the enormous individual expense involved in this matter in addition to the small comparative Government aid which is rendered. These men spend to reclaim that land in many instances forty, fifty, or sixty dollars an acre before the Government helps at all. They are made to pay under the laws for every possible engineering mistake made by the Government engineers. That is all charged against the settlers, and I want the Senate to be acquainted with that fact. These costly mistakes should not be borne by the farmer. But that is a question for future adjustment.

Mr. BORAH. Mr. President, the Senator from Arizona is quite right. The amount of time and labor expended upon these lands far exceeds the value of the land, to say nothing of the mistakes which have been made, for which the settler has to

Mr. President, permit me to read a little more from this report, for the report states much better than I can state them the things which I wish to say:

report, for the report states much better than I can state them the things which I wish to say:

But there is one matter of great moment to these people which should be corrected by law as soon as possible. We mistook the ability of the farmer to pay for his water rights. Ten years was the time given. His optimism and our own was too great. That time should be doubled. This should be done not alone because of the inability of many to meet their obligations to the Government, but because it will prove wise policy to give a free period within which the farmers may more fully use their farms. They can put their lands to a more profitable use, both to themselves and to the country, by being allowed to cumulate their earnings in the early years and be thus enabled to make investments in stock and machinery, which will make for larger profits later.

I feel the keenst sympathy with those upon these projects who are entering into this work of putting the desert into public service. They are genuine pioneers in a new field of work, on the success of which depends greatly the rescuing of a vast territory. The enemy of the Government and of the farmer is the land speculator. He is of two kinds. Sometimes he is a farmer who does not expect to farm, but to sell out at a higher price and go elsewhere. Generally, however, he is the holder of a large tract of private land within the project, who creates false values and burdens those who buy and attempt to farm with a load of debt which handicaps those who buy and attempt to farm with a load of debt which handicaps those who buy and strempt to farm with a load of debt which handicaps them in their efforts. Both of these are hostile to the welfare of the enterprise and tend to destroy the value of the service which the Government is attempting. But such matters may, I trust, be overcome by new methods of administration.

It is my hope that the Government will find its way to enter with zest upon more works of a similar character. Not to do this will leave undeveloped much of t

USE FOR ROYALTIES.

But where are the funds to come from to carry on such work? My answer is, From the public lands in these States. We sell these lands now and the proceeds go into the reclamation fund. This is the policy of Congress—that we shall for a time use the moneys which the Government derives from the sale of its lands to create new values within the States. Two years ago the Government went further and set aside \$20,000,000, to be used in the completion of the irrigation schemes now under way. This is an advance by the Government for which it takes what might be termed a mortgage on the moneys which the projects will yield from the sale of water rights. Why not extend this policy?

The West can use profitably and wisely \$100,000,000 in the next 10 years to the advantage of the whole country. Indeed, without this expenditure the asset which the Government has in its deserf lands will lie unused and be of no national value. The Government uil recover all of the money it advances, not to speak of the homes and the values created by its enterprise.

Mr. President, I shall not trespass upon the time of the

Senate to read more, much as I should like to do so.

Mr. President, the Secretary of the Interior in this report. which I can not too highly commend to the consideration of all Senators, has said that \$100,000,000 could be used in this reclamation work within the next 10 years for the benefit of the whole country; and, what is of equal importance, he states that unless we go ahead and advance that money, these appropriations, or advancements that these lands and these enterprises are to a large extent to remain wholly out of use of the Government and for the people. It will be necessary to continue the work in order to make entirely successful that which has already been done in a large measure. I do not see why—in proceeding as we are, to deal with the subject of opening up the resources in the West and de-veloping the West, for while this is a railroad scheme, we are building the road for the same reason precisely that we

built the Panama Canal, and we built the canal-already builtfor the same reason that we build the road, in order to exploit and develop the natural resources and to give the people who are going there an opportunity to realize, the object and the purpose of one being the same as the object and the purpose of the other—I do not see why it should not be made a part of this bill. In addition to that, Mr. President, both these propositions are recommended by the Secretary of the Interior in the same report and for the same reason, and based upon the same argument. I apprehend that they both may be regarded as administration measures. Certainly they have received the support of the one man in the administration who is most thoroughly equipped to pass judgment upon the validity of the enterprises, both with reference to Alaska and the building of these canals.

I am frank to say, Mr. President, that there is another reason why I arge this at the present time. I hope I will not be misunderstood when I raise that question, but I refer to the condition which exists in the West at this time. I am not going to stop to study and discuss what is the cause or what has brought about the existing condition of affairs, but there are at this time upon the Pacific coast, estimated at the lowest figure, 100,000 men out of employment. There could be no time at which the Government could enter upon this enterprise when it would be so beneficial to the West and when it would be so beneficial to the Government in the way of securing labor; and at no time could the Government enter upon this enterprise when it would do more to energize and exhilarate the business conditions of the West than at the present time.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the

Senator?

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. BORAH. Certainly.

Mr. CHAMBERLAIN. The Senator says it is estimated that there are at this time a hundred thousand men out of employment on the Pacific coast. I do not know whether or not he calls Idaho a part of the Pacific coast, but I have never heard any such estimate as that. It has been suggested, in Oregon at least, that there are about 1,000 or 1,500 men out of employment. I have not seen any accurate estimate of their number, but the daily newspapers which come to us say that it is not an unusual thing in any winter season in Oregon for men to be out of employment, because it is a period of the year when they leave the farms and go into the cities.

Mr. BORAH. I said that I did not propose to discuss-

I hope the Senator will not receive my suggestion with any sensitiveness-the causes of this depression. I would certainly hesitate to make an exaggerated statement about the nonemployment of men in the United States. I do not believe that there is anything to be gained by making such exaggerated statements, and, on the other hand, I do not believe there is anything to be gained by concealing actual facts. Whatever the causes may be, there is nothing to be gained by concealing

the fact that those conditions exist.

Why, Mr. President, the governor of the State of Oregon has been petitioned to call a special session of the legislature in order to provide means by which the unemployed in the State of Oregon may secure employment. Is it usual to petition for a session of the legislature to provide work for a thousand unemployed men? The governor of the State of California has been asked to call a special session of the legislature to provide means by which the unemployed of California could be given an opportunity to work; and the labor commissioner of the State of California has issued a public statement, as I am reliably informed by a Member of Congress who read it, that no man should come to the State of California in the next year who has not sufficient means to sustain himself, as the State of California has more unemployed than it can possibly take care of.

Mr. CHAMBERLAIN. Mr. President—
The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. BORAH. I do.

Mr. CHAMBERLAIN. I did not hear just what the Senator said in reference to the governor of the State of Oregon calling the legislature together for the purpose of laying out a plan of road work for the unemployed. I want to say that the city of Portland made some arrangement for the employment of those who claimed to be out of employment, and not 1 per cent of the alleged idle men took advantage of it; so that, in the final analysis, there is not any such number of unemployed men. I am not talking about the cause of it at all; but, so far as my State is concerned, I want to say that such a condition does not exist there.

Mr. BORAH. Mr. President, I will not read into the RECORD, then, upon the statement of the Senator, all the articles which I have here from the Portland papers. I will only read enough to justify my statement. A Senator in Washington has no means of acquiring information upon these matters other than that which comes to him in that way. I have here daily reports-news items, not editorials, but news items-from papers all up and down the Pacific coast; but if the Senator from Oregon says that no such condition exists in his State, I will take his word for it. I know that he is better informed than I can be as to conditions in Oregon, and I am perfectly willing to assume, for the sake of the argument, that the city of Portland and the State of Oregon may be left out. Now, here is an Associated Press dispatch, dated from San Francisco December 24, taken from the Capital News of my home city, as follows:

HUNDRED THOUSAND MEN ON THE COAST OUT OF EMPLOYMENT.

SAN FRANCISCO, December 24.

SAN FRANCISCO, December 24.

Christmas eve finds 100,000 men out of work in the principal cities of the Pacific coast. In commenting on the many robberies, burglaries, and crimes of violence of the past fortnight, Capt. Mooney, chief of the detective bureau, to-day estimated that there were 20,000 unemployed in San Francisco. Hunger has no conscience, he said, and the wave of crime is bound to rise higher unless the city provided work. Los Angeles reports 35,000 unemployed, and Portland and Seattle account for the remainder. Gov. Johnson, of California, replied to the delegation of workingmen that each city must care for its own problems. Gov. West, of Oregon, declined to call a special session of the legislature.

Another clipping from one of the Portland papers, under date line of San Francisco, says:

Men lay siege to governor's house. Johnson with demand for employment. Thousand unemployed call on

Another dispatch published in the Boise Statesman says: Homeless men fed, sheltered, at Frisco. City relief home fed 4,000

Under date of January 11, dispatch from Salem, Oreg., says: Idle men to present proposition to governor. Marchers will call upon Oregon executive on Monday. Church cares for men.

Another dispatch to the Statesman says:

Idle army turned down in Woodburn.

That is Woodburn, Oreg.

Governor tells the mayor, who applied for State protection, he can

In an editorial in one of the Portland papers which came today it says:

The unemployed are with us.

I only quote these with many others I might quote to show what I believe to be the situation.

Mr. CHAMBERLAIN. Mr. President, I thought the Senator said that Gov. West wanted to call a special session of the legislature.

Mr. BORAH. No; the Senator misunderstood me. I said he had been petitioned to do so.

Mr. CHAMBERLAIN. As I have said, I did not hear all of

the Senator's previous statement.

Mr. BORAH. I said that he had been petitioned to do so. These are the grounds of my belief, to say nothing of private letters and telegrams which I shall not use. It is a matter of public comment that it is so. I hope the Senator from Oregon is correct; but, in my opinion, if this bill could pass this Congress you would find that you had done a particular favor to thousands of workingmen-not idlers, not loafers, but workingmen-upon the Pacific coast. I believe the Government would find when it came to advertise for labor upon this kind of an enterprise that it itself would be advantaged by reason of the labor conditions upon the Pacific coast.

Mr. SMOOT. Mr. President—
The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Utah?

Mr. BORAH. I yield.

Mr. SMOOT. I notice in to-day's Congressional Record a speech delivered by Hon. William E. Humphrey, of Washington—and Washington, of course, is on the Pacific coast—in which he states that 227 lumber and shingle mills in the State of Washington were closed on the 1st day of last December. I simply call this to the Senator's attention to prove that if what the Senator has said does not apply to Oregon it certainly does apply to some of the other States on the Pacific

Mr. CHAMBERLAIN. Mr. President, I want to say that I realize that there have been some lumber mills and shingle mills closed down in the State of Washington; but those who live there will concede it to be a fact that for a long time little shingle mills were springing up everywhere, and the only wonder to me is, in view of the predictions of disaster that would come to the country during the discussion of the currency bill, that more of them do not shut down. Not only did these prophecies of disaster to the whole country tend to frighten business in the West, but they had a tendency to frighten business everywhere. The prediction was made that there would not be a bank in the country that would come into the new reserve association, whereas we find, notwithstanding such predictions, that they are breaking their necks to get in, and business is going on just the same. It is going to take a little time to get back and recover ourselves from the predictions that were made-some of them by the Senator from Utah

Mr. SMOOT. I deny that, Mr. President, Mr. THOMAS. Mr. President—

Mr. BORAH. I think I have the floor, Mr. President.

The VICE PRESIDENT. There is plenty of time this afternoon. It is not necessary for all Senators to talk at once. Does the Senator from Idaho yield to the Senator from

Mr. BORAH. I should like to say before I yield that I have no desire to engage in a discussion here as to the cause of this condition. I might agree with Senators that it was not due to the causes which have been prophesied as being the real causes. I am only stating what I happen to know to be a fact as bearing upon this particular measure, and, while we have discussed every other subject under the sun this afternoon except the bill which has been before the Senate, I do not care to go into a discussion of the tariff or of the currency.

Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Colorado?

Mr. BORAH. I yield.

Mr. THOMAS. I have no intention, and certainly no desire at this time, to go into the causes of present industrial conditions any more than any other Senator has, but as an item of evidence that there are operating causes which are more extensive than the limits of the Pacific slope or of the Nation, I want to call attention to a statement which I cut from the Associated Press dispatches in the Washington Post on the 30th of December last. It is an item from Blackburn, England, and reads as follows:

BLACKBURN, ENGLAND, December 30.

Eighteen weaving mills in this district have been closed within the last few days owing to a slump in the cotton trade.

It is understood that many other mills are about to cease operations.

And about the same time a newspaper published in this city-I forget which one-called attention to the existence of a large number of unemployed men at Winnipeg, and the formation there of a bread line in consequence of their nonemploy-These are symptoms, Mr. President, of a far-reaching industrial condition affecting other countries and indicating causes which can not be explained by local or national legislation.

Mr. SMOOT. Mr. President—
The VICE PRESIDENT. Does the Senator from Idaho

yield to the Senator from Utah?

Mr. BORAH. I yield to the Senator from Utah, but— Mr. SMOOT. I merely wish to correct a statement made by the Senator from Oregon [Mr. CHAMBERLAIN]. I do so because of the fact that I made no statement and no prediction as to the result of the passage of the currency bill at any time; and the Senator is certainly mistaken when he says that that prediction was made by the Senator from Utah.

Mr. CHAMBERLAIN. Mr. President, if the Senator will allow me a moment, I did not mean to say the Senator did it in terms, but no other inference could be drawn from some of his utterances on the subject than the one I have stated.

I should like to say that I do not believe the Senator can find a single, solitary word uttered by me which, construed in the light of reason, can bear the construction that I ever thought for a moment that the passage of the currency bill would bring distress upon this country.

Mr. CHAMBERLAIN. I may look it up.
Mr. BORAH. Well, Mr. President, it does not make so
much difference about prophesies, anyhow; but the most interesting feature of the question is, What is the actual condition now, regardless of who prophesied it or who did not, or what brought it about or what did not? I have no doubt about what the condition is there. I might have some doubt as to what caused it, but I have no doubt as to its existence; and it was for no other purpose than to cite the condition which existed that I referred to the fact, although I was perfectly conscious that I would be charged with laying it to the tariff or the currency or something else which had happened under the Democratic administration. I had no such idea in mind; but I want to say that, if the condition does exist-and it seems to be unques-

tioned that it does-the enactment of this legislation would reach the situation quicker than anything else that we could do.

Mr. President, what, then, is the situation which the plain facts present? We have these millions of acres, now worthless but capable of being brought into a state of marvelous productivity, capable of becoming a place of comfortable homes and the scene of thriving, prosperous communities. Is there anything so well calculated to stir the zeal and activity of a government when you take into consideration, also, that these acres belong to the Government and that it has been definitely determined that the Government alone is to improve them, either now or at some time?

We have, furthermore, a most anomalous problem to solvethe cost of living, soaring day by day. Consumers are constantly increasing and producers really decreasing—in any event not increasing by any means in proportion to the increase of consumers. With this simple, pointed, and painful object lesson before us, which, in view of our widespread area of untilled lands, ought to carry its own lesson, we still have learned professors and profound statesmen in mortal agony to find out the

cause of the high cost of living.

We have in addition-and this is the tragic and harrowing feature, according to reports-at least a hundred thousand men in the immediate vicinity of these lands out of work and winter upon us and apparently in unconcern for the shorn lamb. A hundred thousand idle men-not loafers, not idlers, but men wanting work and unable to find it-means before the winter closes at least 300,000 hungry and dependent people. It is a fearful condition. The tariff apparently has not reduced the cost of living. The currency does not help this particular situation, for these men have no credit, nothing to sell except their labor, and for that there is no market. Let us give them work and do so at once; let us give them a market for the only product they have to sell—their muscle and their brawn. If you do not do so, if these men do not find work before the winter closes, things must happen. The time is past in this country, sir, this land of plenty, when men will consent for their families to starve or freeze.

Now, by this amendment you loan this money to the reclamation fund, all of which under the law as it now exists is to be paid back. You reclaim millions of acres; you provide homes for home-hungry people; you provide work for the unemployed, and in the long run you furnish food and necessaries in greater quantities for the whole country. You bring idle, worthless lands under taxation to sustain the burdens of county and State government. Why delay action when every call of humanity, every rule of wise business and considerate administration, every consideration of justice and wisdom, suggest immediate action? The homesteaders are waiting and have been waiting under most adverse circumstances; the laborers are waiting, and certainly those who want cheaper things to eat are waiting.

I earnestly hope that this amendment will pass. It has been pending for a long time. It has been approved, in effect, by the Secretary of the Interior. We need transportation in Alaska; we need to do much for Alaska; but we need also to look at the situation at home, for there are conditions here which have some peril in them if too long neglected.

Mr. THOMAS. Mr. President—
The VICE PRESIDENT. Does the Senator from Idaho yield to the Senator from Colorado?

Mr. BORAH. I yield.

Mr. THOMAS. I was not in the Chamber when the Senator began his remarks. I wish to inquire, therefore, whether his position is that this bill should carry an amendment or a section providing for the entire relief of those who have settled under reclamation projects from the amount of money due from them to the Government under their contracts, or whether he proposes to extend the period of time in which those payments are to be made?

Mr. BORAH. I take pleasure in explaining to the Senator that this amendment does not cover either of those propositions. This is an amendment duplicating the bill which was passed in terms a year or two ago appropriating \$20,000,000 for the further reclaiming and building up of these reclamation projects. In other words, it is an amendment providing for the advance-ment on the part of the Treasury of the United States of \$50,000,000 from time to time, as we are doing now, to complete the projects which have been begun, and to initiate any other projects which may seem wise in the mind of the Secretary of the Interior.

Mr. THOMAS. I gathered from such discussion as I did hear that the question which was involved in the proposed amendment had reference to the relief of the settlers from the payment of the amount of their contracts to the Government or to the extension of the time.

Mr. BORAH. That matter has entered into the discussion here, but it is not germane to the amendment.

In closing, I ask leave to insert, in connection with my remarks, an editorial from the Portland Oregonian, headed "Mr.

Lane's land policy."

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

[Editorial from the Portland Oregonian of Friday, December 26, 1913.]

The matter referred to is as follows:

[Editorial from the Portland Oregonian of Friday, December 26, 1913.]

No document more inspiring to western people than the annual report of Secretary of the Interior Lane has recently appeared. We are not seen that the secretary of the Interior Lane has recently appeared. We are not seen that the secretary of the Interior Lane has recently appeared. We are not seen that the secretary of the Interior Lane has recently appeared. We are not seen that the secretary of the Interior Lane has written with masterly hand a state paper which may well become the basis of a new charter of liberty for the West. He combines the technical knowledge of the lawyer with the practical sense of the man of affairs, and calls to his aid in stating his conclusions the facility of expression of the trained newspaper man. To these qualities the adds an intimate personal said in stating his conclusions the facility of expression of the tarined newspaper man. To these qualities until in prompting him to humanize the land laws and their administration.

The Secretary finds that the Government has reached a deadlock in the land question, and he offers a key to unlock it. A halt was called on methods of spoilation and the Nation has been doing practically nothing white awaiting adoption of a new policy. He proposes the secretary in the proposes the proposes of the proposes the secretary of the secretary finds of the series of the proposes the recently of the series of the series

Mr. CHAMBERLAIN. Mr. President, I do not know of any other Senator who desires to address the Senate at this time on the pending bill. I am informed that there are two or three other Senators who will speak, and possibly some who will be prepared by to-morrow. In the absence of anyone who desires to address himself to the subject, I ask that the unfinished business be temporarily laid aside.

The VICE PRESIDENT. Without objection, that action will be taken.

CONDITION IN MINING DISTRICTS IN MICHIGAN.

Mr. TOWNSEND. Mr. President, out of order I should like to present a telegram which I have just received from the governor of the State of Michigan, and ask to have it read.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[Telegram.]

LANSING, MICH., January 15, 1914.

LANSING, MICH., January 15, 1914.

Hon. CHARLES E. TOWNSEND, Washington, D. C.:

The following telegram was to-day sent President Wilson: "Senator ASHUEST reported to have quoted Michigan Congressman twelfth district as saying, 'District the twelfth of Michigan is a part of the United States where constitutional government no longer exists; that the rights of citizens under our Constitution and our laws are overthrown and the laws and Constitution defied.' If the Congressman from twelfth district of Michigan said this he said that which is false in every particular, that which is a traitorous insult to his own district and the whole State of Michigan. Attorney General Fellows and I spent three days last week in copper country. Both of us have been in daily communication with strike situation. I know what I am talking about. Michigan has protected the life and property of all of her citizens, and will continue to do so. Michigan needs no outside help."

WOODRIDGE N. FERRIS,

WOODRIDGE N. FERRIS, Governor of Michigan.

Mr. ASHURST. Mr. President, so much has been said respecting what was quoted by me from Representative Mac-DONALD, I believe that along with the telegram ought to go into the Record exactly what I said yesterday. I wish to ask the indulgence

Mr. TOWNSEND. I will say to the Senator that I read that

myself from the Record.

Mr. ASHURST. The Senator read it? That is quite sufficlent

Mr. BACON. Mr. President, I wish to say one word, with

the permission of the Senate.

I recognize the right of the governor of Michigan to deny the correctness of any statement; but I thoroughly sympathize with the contention that no telegram or memorial or anything else couched in such language as that which has just been read ought to be read from the desk or incorporated in the RECORD imputing absolute falsehood to a Member of the other House. I do think the courtesy which is due from one House to the other, and from one House to the Members of the other, makes that an improper thing to do.

It is perfectly competent for the governor of Michigan to deny the correctness of a statement and to say that it is incorrect; but it is not necessary that that correction should be couched in language which must necessarily be offensive to a Member of the other House, and the reading and reception of which in the Senate, I think, is not in harmony with the courtesy and respect which is due from one House to the Members of another

House.

I am not going to make any motion in regard to it, but I am glad to say this much, because I would not wish it to appear that a telegram or a communication of any kind could be presented in this Chamber which denounced a Member of the other House in those terms and have it appear that that met with the acquiesence of the Senate. I do not know anything about who the Representative is. I do not know whether he is a Democrat or a Republican, and I care not; so what I say has no reference to that.

I wish to say another thing. I am in entire sympathy with the suggestion in the telegram that Michigan should be left to take care of its own affairs, so what I say is not influenced by any want of accord with the position of the governor of Michigan. The Senate will remember that when a similar question was before the Senate in regard to West Virginia I took the position then that it was not a proper thing for the Congress of the United States or for the Senate of the United States to be investigating the acts of officials of a State. predicted then that that was but the beginning of things which would come back to plague us on that subject, and I voted and spoke against the resolution with reference to West Virginia, so what I say now is not influenced by any unfriendliness toward the contention of the governor of Michigan. repeat, however, that it is an impropriety on the part of the governor of Michigan to endeavor to have presented in the Senate of the United States a communication which defames and accuses of absolute falsehood a Member of the other House.

Mr. WALSH. Mr. President, as this subject has now come before the Senate, I ask unanimous consent to present some petitions coming from my State asking that the investigation contemplated by the resolution may be had. These are from contemplated by the resolution may be had. These are from citizens of Anaconda, Mont.; Branch 165, National Croatian Society, of Butte, Mont.; Miners' Union, Butte, Mont.; Montana Federation of Labor; Belt Mountain Miners' Union, No. 7, Armington, Mont.; Hughesville Miners' Union, Monarch, Mont.; Workingmen's Union, Butte, Mont.; Teamsters' Union, Butte. Mont.; Local Union No. 185, International Brotherhood of Electrical Workers, Helena, Mont.; United Mine Workers of America in Montana; Great Falls Mill and Smeltermen's Union, No. 16, Great Falls, Mont.; Butte Stationary Engineers' Union. No. 83, Butte, Mont.; Sand Coulee Miners' Union, Sand Coulee, Mont., and Helena Typographical Union, No. 95, Helena, Mont. VICE PRESIDENT. The petitions will be referred to

the Committee on Education and Labor.

Mr. GALLINGER. Mr. President, in that connection I will observe that I have received several similar petitions and resolutions from the State of New Hampshire. Feeling, however, that the State of New Hampshire had no business to interfere in the affairs of the State of Michigan, I have not presented them to the Senate.

Mr. TOWNSEND obtained the floor, Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Colorado?

Mr. TOWNSEND. I do.

Mr. THOMAS. I simply wish to suggest that this telegram goes a little further, if I remember it correctly, and declares the Congressman to be guilty of treason to his State.

Mr. TOWNSEND. Please hand me the telegram.

I wish to say that ordinarily I would not have presented a telegram of this kind or of any other kind. I have received hundreds of telegrams and communications with reference to this matter, for and against it. I have not felt that it was my duty to present them to the Senate where they would be filed away never to be seen. When, however, a Senator rises in his place and declares that the Constitution and laws are not in force in a congressional district of Michigan, giving as his authority the statement of the Congressman from that district, who was then present in the Senate, it seems to me that the people who live in that district and the governor of that State have a right to be heard here, and that their request to have their answer given the same publicity as the original charge be granted.

I can readily understand how the governor of Michigan, or of any other State, might feel just resentment at a statement of the kind uttered last Tuesday by the Senator from Arizona. I know, and I think everybody knows who is familiar with the matter, that the Constitution and laws are and have been enforced in Michigan. Some offenses against law and order have been committed. So have they been in Arizona and in every other State, but at no time has anarchy existed in any part of Michigan. She has had troubles which have been aggravated by outside influences, but she has been able to handle her own affairs, and she asks no aid from the United States nor from any other source. So when the governor of Michigan has called to his attention, through the Congressional Record, an imputation that he had not been performing his duties, that he had not been enforcing the laws and the Constitution as he was sworn to enforce them, he would naturally feel justified in expressing his indignation.

It is possible that the governor has spoken harshly. He says, "If the Congressman from the twelfth district of Michigan said this," namely, that constitutional government no longer exists; that the rights, of citizens under our Constitution and laws are overthrown and the laws and Constitution defied in the twelfth district of Michigan, then that statement is false. No one knows better than Gov. Ferris the true conditions in Michigan, and naturally he feels strongly about the matter.

Mr. ASHURST. Mr. President, will the Senator yield to me?
Mr. TOWNSEND. Certainly.
Mr. ASHURST. I was not in the Chamber this morning
when the controversy arose. The Senator from Michigan has assured me he has read into the RECORD what I said.

Mr. TOWNSEND. I did, verbatim.
Mr. ASHURST. The governor of Michigan may well give his perturbed spirit rest, and eliminate the "if," because in this Chamber the Representative from the twelfth district of Michigan told me just what the Senator from Michigan has read into the RECORD, and expressly told me that I was at liberty to quote him. I am glad the Senator from Michigan has put into the RECORD of the day's proceedings exactly what

Mr. TOWNSEND. I did. I did not state, however, that at the time or just previous to the time the Senator made his statement the Congressman from the twelfth district of Michigan was sitting by his side in the Senate Chamber.

Mr. ASHURST. But the Senator does so now? Mr. TOWNSEND. I do now. That was the That was the fact. I have

stated what the RECORD discloses.

The governor of the State of Michigan, through implication, was charged on this floor with what is tantamount to treason. He had permitted the Constitution and laws to be suspended in the upper peninsula of Michigan. He had been faithless to his oath of office, which obligated him to enforce the constitu-

tion and laws of his State and of the United States. Could any conscientious governor remain in silence under such charges, made on the authority of a Representative in Congress by a United States Senator?

Every loyal son of Michigan knows that the governor has been performing his full duty during a critical time with great impartiality. So in his telegram to the President of the United States, and of which he has sent a copy to me, he directly denies the slander upon himself and his State, and he does it rather forcibly and yet in such a manner as to need no interpretation. He wants the truth told as be believes it to be, and he has proceeded in his way to tell it.

Mr. BACON. Mr. President, that does not reach the point The governor of Michigan has a right, of course, to have the statement of the Representative contradicted, contradicted emphatically, but neither the governor of Michigan nor the Senator from Michigan has the right to present to the Senate, by having it read from the desk, that which is an insult and a defamation of a Member of the other House.

I can imagine that some one might send a telegram to the other House denouncing myself or some other Senator in the same way, and I can scarcely imagine the feeling of indignation I would have if that were allowed to be done in the other House and to pass without condemnation.

Mr. TOWNSEND. Was the Senator's spirit at all disturbed when the governor of the State of Michigan was charged, as he was in substance charged, on the floor of the Senate on Tuesday last with faithlessness to duty?

Mr. BACON. If there was any charge made against the governor of Michigan in offensive language, it was certainly an impropriety, and it would disturb me just as much as this disturbs me.

Mr. ASHURST. Mr. President-

If the Senator will pardon me a moment, I Mr. BACON. do not know in what language the charge was made. I am not taking exception to the fact that the governor of Michigan denies the truth of what was charged against him. The thing to which I object is the use of improper language in making the denial. That is what I am objecting to. I am not objecting to the governor of Michigan denying the truth of it if he will do so in respectful language; but there is a way to deny the truth of a thing without doing so in defamatory and offensive language. That is what I am speaking of.

The thing that surprises me is that the Senator from Michigan this morning, this very day, presented and had read from the desk a communication which was generally recognized through the Senate as being couched in improper language when it had reference to a Member of the other House, and the Senator from Michigan, after the matter had been brought to his attention, and the expression had been freely made in the Senate that it was an impropriety, himself voluntarily withdrew it; and yet here again on the same day the Senator from Michigan repeats the same thing, and has a communication read from the desk in which language still more offensive is used as to the Member of the other House.

Mr. TOWNSEND. Mr. President, I think the Senator does not quite understand the situation. The language that I had overlooked this morning and which I voluntarily withdrew was that which gave the motive of the Michigan Representative in making his statement to the Senator from Arizona. It was the opinion of the petitioners. What the governor says, however, is stated as facts within his own knowledge. the governor says as to conditions in Michigan is true, and I have no reason to doubt its truthfulness, then I submit that he is justified in strongly and directly condemning anyone who traduces himself or his State.

Mr. BACON. Mr. President, I wish to say to the Senator from Michigan that if this matter is one open to controversy, if the presentation of such a telegram and the reading of it from the desk is not a matter which is recognized as improper, it should be made an impropriety by an express rule of the Senate. I shall myself undertake to see that the Senate has at least the opportunity to make a rule which shall not permit the introduction and reading from the desk of communications of any kind from anybody which are insulting and defamatory to a Member of the other House.

Mr. SMITH of Arizona. I will ask the Senator whether the spirit of the rule does not already protect Members of the

other House from that sort of an assault here?

Mr. BACON. I think it is absolutely unparliamentary. If that is what the Senator asks, I think it is. I think it trans-gresses all the proprieties of parliamentary usage and the comity and courtesy which should exist between the two Houses.

The VICE PRESIDENT. For the information of the Chair, who has great reliance upon the learning of the Senator from Georgia, the Chair would like to know what is the view of the Senator from Georgia as to a Member of the House of Representatives coming into the Senate of the United States, sitting down by a United States Senator, telling him that he is free to make certain charges, and having them made in the Senate of the United States and not in the House of Representatives? What is the view of the Senator as to the parliamentary courtesy under such circumstances?

Mr. BACON. Mr. President, I do not understand that that question is raised.

The VICE PRESIDENT. The Chair understands that is the

fact in this case, as stated by the Senator from Arizona.

Mr. BACON. If that is an impropriety, it does not excuse another impropriety.

The VICE PRESIDENT. What the Chair desired to suggest for the view of the Senator from Georgia was whether the comity that exists-and the Chair admits it exists, and ought to be enforced-exists when a Representative comes into the Senate Chamber?

Mr. BACON. I do not understand that that is before the

Mr. TOWNSEND. Mr. President, I think that is before the That is one of the questions under discussion here.

The VICE PRESIDENT. That is the Chair's view of the

Mr. BACON. It is within the power of the Senator from

Michigan to bring it before the Senate.

Mr. TOWNSEND. It has already been brought before the

I recognize the right and power of the Senator from Michigan to raise the question of the propriety of what has been done. That is what I say can be brought to the attention of the Senate by the Senator from Michigan.

Mr. TOWNSEND. It is quite clear that this matter would not and could not have arisen if it had not been that the Senator from Arizona stated that he spoke with the authority of the Member from the twelfth district of Michigan, who at that time was sitting in this Chamber by the side of the Senator.

Mr. ASHURST. Mr. President-

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Arizona?

Mr. BACON. I do.

Mr. ASHURST. Before we drift further, I desire simply to say that upon a close reading of what little I have said on the subject I find that I never mentioned the governor of Michigan, nor his name nor office. I do not believe I even mentioned the constitution and laws of the State of Michigan. I am very certain that I referred solely and only to the Constitution and laws of the United States. I am quite certain also, from memory, that until this hour I never mentioned the name of the governor, nor his office, on the floor of the Senate, or otherwise, nor at all until this hour. A close reading of my remarks, if Senators will do so, will disclose that they are not offensive, and they could not be construed as offensive by anybody. But, Mr. President, if it be improper for a Senator to disclose to the public in this public forum knowledge and information that a condition exists such as was disclosed to me, I am willing also to share the odium attached to such "impropriety."

With all respect to the Senate and every Senator, I assert that it is not improper when a Senator has been informed that the Constitution of the United States, which you all love and revere so much, and justly so, has been overthrown in a district to make such information public. To conceal such information might be treasonable; it would be, at least, misprision of treason. When a Senator of the United States is informed that the Constitution of the United States is overthrown, anyone who has a drop of American blood in his veins and any love for his country and her institutions should immediately

make such disclosure.

If any suggestion of criticism be implied toward myself in making such disclosure, I wish to say that such criticism is unjust; for if we love the Constitution and the laws of our country as much as we say we do, we will take proper action to ascertain whether these charges are true or false

That is about all I have to say, all I could say, and certainly

Mr. TOWNSEND. Mr. President, I certainly dislike to offend the notion of propriety that Senators may have in reference to the introduction of matters here reflecting upon either Members of this House or of the other. I think there is no man in the Senate who has a higher regard for his colleagues in both Houses than I have. I have brought this communication here because I have felt it was my duty to do it, but I am willing,

inasmuch as there seems to be objection to its vigorous English, to withdraw it and state in my own language what the governor of the State of Michigan says in regard to the statement which was made on the floor of the Senate last Tuesday by the Senator from Arizona; and with that in mind, Mr. President, I ask to withdraw the telegram.

The VICE PRESIDENT. It may be withdrawn.

Mr. TOWNSEND. I will state now, Mr. President, that I have to-day received a telegram from the governor of the State of Michigan denying the charges made on the floor of the Senate on Tuesday last by the Senator from Arizona when he quoted the Congressman from the twelfth district of Michigan. He insists that the Constitution and the laws have been in force during all of the time and are now in force in all parts of the State of Michigan; that he and the attorney general of that State have been on the ground for several days investigating conditions in the strike region of the twelfth congressional district of Michigan, and that all the people of that State are protected in their legal and constitutional rights, and at no time have they been without such protection; that any statement to the contrary is false and an insult to the upper peninsula of Michigan and to the whole State; that he personally knows what he is talking about, and wants the truth told, that Michigan has protected the lives and property of all of her citizens and will continue to protect them without any outside help. This is the substance of the message to the President, to the This is the substance of the message to the Freshell, to the Senate, and to the country. Permit me to add that at no time have the courts in the strike district been suspended; they have been open and busy all the time. A grand jury is now in session and numerous indictments have been found. Offenders have been lawfully tried by jury and convictions had. That anything approaching anarchy in the disturbed district does not Whether injustice has been inflicted upon employees by employers or wrong done to the operators by the miners I can not say, but that the law and the Constitution have been at any time suspended or inoperative is not true.

Mr. WORKS. Mr. President, I am glad the Chair has called attention to the fact that it may be an impropriety on the part of a Member of the other House to come upon the floor of this body and undertake to interfere with the proceedings of the Senate, by suggestion or otherwise. I had occasion only a short time ago to notice conduct of that kind when I was addressing the Senate upon a House bill, and a very important one, and the author of the bill in the House sat within my hearing while I was addressing the Senate and made remarks about what I was saying, and about the bill itself. I did not desire to raise any question with respect to it at that time, but I am glad the matter has been brought to the attention of the Senate. It is an abuse that should be called to the attention of the Members of the other House who have not regarded the impropriety of

a course of that kind.

Mr. GALLINGER. Mr. President, we have a well-established rule that ex-Members shall not appear in the Senate for the purpose of promoting legislation, but it is a common custom for Members of a certain other body to come here as we witnessed on Tuesday. I think it ought to be stopped.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Friday, January 16, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 15, 1914. MINISTER PLENIPOTENTIARY.

Daniel F. Mooney, of Ohio, to be envoy extraordinary and minister plenipotentiary of the United States of America to Paraguay, to fill an original vacancy.

ASSISTANT CHIEF INSPECTOR OF LOCOMOTIVE BOILERS.

Alonzo G. Pack, of Colorado, to be assistant chief inspector of locomotive boilers, vice Frank McManamy, promoted.

COLLECTOR OF INTERNAL REVENUE.

Lewis T. Carpenter, of Arizona, to be collector of internal revenue for the district of New Mexico, in place of Manuel B. Otero, superseded.

PROMOTION IN THE ARMY.

CAVALRY ARM.

Lieut. Col. James B. Erwin, Cavalry, unassigned, to be colonel from January 4, 1914, vice Col. George H. G. Gale, unassigned, retired from active service January 3, 1914.

Maj. Godfrey H. Macdonald, Thirteenth Cavalry, to be lieutenant colonel from January 4, 1914, vice Lieut, Col. John B. McDonald, Fourth Cavalry, detailed as inspector general on that date.

COAST ARTILLERY CORPS.

Second Lieut, Richard S. Dodson, Coast Artillery Corps, to be first lieutenant from December 30, 1913, vice First Lieut. Wilmot A. Danielson, resigned December 29, 1913.

INFANTRY ARM.

Lieut, Col. Chase W. Kennedy, Sixteenth Infantry, to be colonel from January 11, 1914, vice Col. William H. C. Bowen, Twelfth Infantry, retired from active service January 10, 1914.

Maj. Charles H. Muir, Infantry, unassigned, to be lieutenant colonel from January 11, 1914, vice Lieut. Col. Chase W. Ken-

nedy, Sixteenth Infantry, promoted.

Capt. Peter E. Marquart, Second Infantry, to be major from December 23, 1913, vice Maj. Amos B. Shattuck, Fifteenth Infantry, who died December 22, 1913.

Capt. William Brooke, Thirteenth Infantry, to be major from

January 11, 1914, vice Maj. Charles Crawford, Twentieth Infantry, detached from his proper command on that date.

First Lieut. Auswell E. Deitsch, Fifth Infantry, to be captain

from December 23, 1913, vice Capt. Peter E. Marquart, Second

Infantry, promoted.

First Lieut. Joseph C. Kay, Second Infantry, to be captain from December 24, 1913, vice Capt. David P. Cordray, Twenty-sixth Infantry, retired from active service December 23, 1913.

First Lieut. Walter C. Jones, Tenth Infantry, to be captain from January 11, 1914, vice Capt. William Brooke, Thirtieth

Infantry, promoted.

Second Lieut. Ralph W. Dusenbury, Twenty-fourth Infantry, to be first lieutenant from December 23, 1913, vice First Lieut. Auswell E. Deitsch, Fifth Infantry, promoted.

Second Lieut. Thomas C. Spencer, First Infantry, to be first lieutenant from December 24, 1913, vice First Lieut. Joseph C.

Kay, Second Infantry, promoted.

Second Lieut. Fauntley M. Miller, Fifteenth Infantry, to be first lieutenant from January 11, 1914, vice First Lieut. Walter

C. Jones, Tenth Infantry, promoted.

Second Lieut. Ray C. Hill, Twenty-second Infantry, to be first lieutenant from January 11, 1914, vice First Lieut. Archibald G. Hutchinson, Third Infantry, resigned January 10, 1914.

COAST ARTILLERY CORPS. Russell Alger Osmun, of Michigan, late midshipman, United States Navy, to be second lieutenant in the Coast Artillery Corps, with rank from January 10, 1914.

PROMOTIONS IN THE PUBLIC HEALTH SERVICE.

Passed Asst. Surg. John T. Burkhalter to be surgeon in the Public Health Service, to take effect December 1, 1913. This officer has served the required time in his present grade and has passed the necessary examination for promotion.

Passed Asst. Surg. John M. Holt to be surgeon in the Public

Health Service, to take effect December 1, 1913. This officer has served the required time in his present grade and has passed the required examination for promotion.

Passed Asst. Surg. Robert L. Wilson to be surgeon in the Public Health Service, to take effect December 1, 1913. officer has served the required time in his present grade and has passed the necessary examination for promotion,

CONFIRMATIONS.

Executive nominations confirmed by the Senate January 15, 1914. MEMBER OF THE CALIFORNIA DÉBRIS COMMISSION.

Maj. Robert R. Raymond, a member of the California Débris Commission.

RECEIVERS OF THE PUBLIC MONEYS.

James P. Folger to be receiver of public moneys at Evanston,

Charles R. Yeoman to be receiver of public moneys at Sundance, Wyo.

REGISTER OF THE LAND OFFICE.

Alex Nisbet to be register of the land office at Evanston, Wyo.

UNITED STATES MARSHAL.

Joseph P. Dillon to be United States marshal, district of

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

Capt. Ralph H. Van Deman to be major. First Lieut. Roscoe H. Hearn to be captain. Second Lieut. James H. Laubach to be first lieutenant. First Lieut. Morris M. Keck to be captain. Second Lieut. George R. Harrison to be first lieutenant.

COAST ARTILLERY CORPS.

Second Lieut. Augustin M. Prentiss to be second lieutenant in the Coast Artillery Corps.

ROMOTIONS IN THE NAVY.

Second Lieut. Francis T. Evans to be a first lieutenant in the Marine Corps.

APPOINTMENTS IN THE NAVY.

The following-named citizens to be assistant dental surgeons in the Dental Reserve Corps:

Meyer L. Rhein, a citizen of New York; Clarence J. Grieves, a citizen of Maryland; Charles W. Rodgers, a citizen of Massachusetts; Clyde M. Gearhart, a citizen of Ohio; John R. Barber, a citizen of Minnesota; and David J. Alexander, a citizen of Virginia.

POSTMASTERS. PENNSYLVANIA.

Effie R. Anschutz, Fort Washington. John E. Blair, Shippensburg. Charles A. DeHuff, Royersford. T. J. Dounell, Jenkinstown. G. G. Gaston, Tionesta, James S. Gordon, Natrona. W. H. Keener, New Bethlehem. Robert M. McCartney, McDonald. Michael F. McDermott, Jermyn. William D. McGinnis, Connellsville. Albanus S. Magargal, Sellersville. Isaac Scarborough, New Hope.

RHODE ISLAND.

Francis J. McCabe, Apponaug.

HOUSE OF REPRESENTATIVES.

THURSDAY, January 15, 1914.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

We bless Thee, infinite Spirit, our God and our Father, for the energy which Thou art ever imparting to Thy children, and which through all the ages has been the impelling force to larger intellectual, moral, and spiritual life. Continue, we beseech Thee, to impart unto us, that we may grow unto the measure of the stature of the fuliness of Christ, and Thine shall be the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had agreed to the amendments of the House of Representatives to the joint resolution (S. J. Res. 5) providing for the appointment of a commission to consider the need and report a plan for national aid to vocational edu-

The message also announced that the Senate had passed bills the following titles, in which the concurrence of the House of Representatives was requested:

S. 3550. An act ratifying the establishment of the boundary line between the States of Connecticut and Massachusetts;

2816. An act authorizing the Secretary of War to donate to the city of Abilene, Kars., two cannon;

S. 2715. An act to amend the military record of John P. Fitzgerald;

S. 2609. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Sauk Rapids, Benton County, Minn.," approved February 26, 1904;

S. 2561. An act authorizing the Secretary of War to donate

to the State of Kansas one cannon or fieldpiece;

S. 2415. An act relating to the exclusion of traffic from the streets and avenues of the District of Columbia during parades; S. 2269. An act to 3x the standard barrel for fruits, vege-

tables, and other dry commodities;
S. 1884. An act for the relief of Phoebe W. Chase;
S. 1644. An act for the relief of May Stanley, and for other purposes;

S. 1355. An act relating to easement in connection with recla-

mation projects;

S. 539. An act to amend section 3 of an act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1902, and for other purposes," approved March 3, 1901 (31 Stat. L., p. 1133); and S. 533. An act to consolidate certain forest lands in the

Ochoco National Forest, Oreg.

The message also announced that the Senate had passed the following resolutions:

Senate resolution 240.

Resolved, That the Senate has heard with deep sorrow the announcement of the death of Hon. IRVIN ST. CLAIR PEPPER, late a Representative in Congress from the State of Iowa.

Resolved, That a committee of eight Senators be appointed by the Vice President to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of

the deceased.

Resolved, That as a further mark of respect to the memory of the deceased the Senate do now adjourn.

In compliance with the foregoing the Vice President appointed as the committee on the part of the Senate Mr. Kex-YON, Mr. CUMMINS, Mr. BRADY, Mr. JONES, Mr. REED, Mr. LEWIS, Mr. THOMAS, and Mr. THOMPSON.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of

the United States for his approval the following bills:

H. R. 1966. An act to amend an act entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February 9, 1909; and H. R. 1967. An act regulating the manufacture of smoking

opium within the United States, and for other purposes.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 2715. An act to amend the military record of John P. Fitz-

gerald; to the Committee on Military Affairs.

S. 2816. An act authorizing the Secretary of War to donate to the city of Abilene, Kans., two cannon; to the Committee on Military Affairs.

S. 2609. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Sauk Rapids, Benton County, Minn., approved February 26, 1904; to the Committee on Interstate and Foreign Commerce.

S. 2561. An act authorizing the Secretary of War to donate to the State of Kansas one cannon or fieldpiece; to the Com-

mittee on Military Affairs.

S. 2415. An act relating to the exclusion of traffic from the streets and avenues of the District of Columbia during parades; to the Committee on the District of Columbia.

POST OFFICE APPROPRIATION BILL

Mr. MOON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 1338) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purpose

The SPEAKER. The gentleman from Tennessee [Mr. Moon] that the House resolve itself into Committee of the Whole House on the state of the Union to consider House bill

11338, the Post Office appropriation bill.

Mr. MOON. And, Mr. Speaker, pending that motion, - would like to make an arrangement with the gentleman on the other side for fixing a time for the general debate. How much time would the gentleman from Michigan like?

Mr. SAMUEL W. SMITH. How much time has the gentleman asked for? How much time does the gentleman expect to

Mr. MOON. How much time does the gentleman desire?

Mr. SAMUEL W. SMITH. I have received requests for 13

Mr. MOON. Will three days' debate be sufficient?

Mr. SAMUEL W. SMITH. I think so.

Mr. COPLEY. Mr. Speaker, reserving the right to object, may I ask the gentleman from Michigan whether in his 13 hours he has reserved 1 hour and a half for the party I represent?

Mr. SAMUEL W. SMITH. I have. Mr. 100N. Mr. Speaker, I ask unanimous consent that the general debate be limited to three days, and that the time be divided between the chairman and the ranking Member on the Republican side, Mr. SAMUEL W. SMITH.

Mr. PALMER. Mr. Speaker—Mr. PAYNE. Mr. Speaker, reserving the right to object, I do not exactly understand the arithmetic of the gentleman. I understood the gentleman from Michigan [Mr. Samuel W. Smith] wanted 13 hours on his side and the gentleman from Tennessee [Mr. Moon] is proposing three days. I do not know how much time the gentleman is conceding to this side on that lasis. I want to suggest to the gentleman from Tennessee that now, while we are not very much pressed for business, it would be very well to have this debate out, if possible. I do not want to interfere with any arrangement made by the members of the committee, but I want to suggest that we should have this debate out. The gentleman from Michigan can not get 13 hours out of three days' debate and use only half the time.

Mr. UNDERWOOD. If the gentleman will excuse me, Mr. Speaker, I think we are pressed for business now, because the appropriation bills are ready to move ahead; and, although I recognize the fact that there ought to be reasonable debate on all these bills, yet it is far from being the case now that there is no pressing business ahead of us.

Mr. PAYNE. Of course, my friend knows that the debate will not be strictly on the merits of the Post Office appropriation bill. I do not suppose that is contemplated. so much speaking that has to be done in this House at one time or another that it might be well now to get it out.

Mr. FITZGERALD. Mr. Speaker, there are enough important

matters in this bill to occupy the time.

Mr. PALMER rose.

The SPEAKER. For what purpose does the gentleman from Pennsylvania rise?

Mr. PALMER. To ask the gentleman from Tennessee [Mr. Moon] a question.

Mr. MOON. Very well. Mr. PALMER. I have heard some talk about a rule to make in order certain legislative features in this bill. Has that rule been reported?

Mr. MOON. It has not. It has been submitted, and is before the Committee on Rules for consideration. I understand they will meet Saturday for the consideration of that rule.

Mr. PALMER. The gentleman does not propose to have that

rule considered during this general debate?

Mr. MOON. No.

Mr. PALMER. That will not be taken out of the time for general debate?

Mr. MOON.

Mr. STAFFORD. Reserving the right to object, I should like to direct an inquiry to the chairman of the committee, and to ask him what plan he has in mind, in case the new legislation recommended and carried in the bill is made an order under the rule, as to the time for consideration of the respective items when they get before the House.

Mr. MOON. I take it there will be no disposition on the

part of anybody to limit debate too closely on new legislation.

Mr. STAFFORD. There will be liberal debate on each of those items?

Mr. MOON.

Mr. FOSTER. With due regard to getting through.

Mr. RUSSELL. Mr. Speaker, to-morrow being Private Calendar day, although there is very little upon that calendar for consideration, I presume business on the Private Calendar will be considered first. That being true, I should like to inquire if to-morrow will count as one of the three legislative days, assuming that part of it is taken up with the consideration of business on the Private Calendar?

Mr. MOON. No. I assume that there will be three days for this debate, and if any other privileged matter intervenes the time so consumed will not be subtracted from the general debate

on the Post Office bill,

Mr. UNDERWOOD. Why not fix a definite number of hours? Mr. MOON. I take it we had better fix the number of hours. How would it suit the gentleman from Michigan [Mr. Samuel W. SMITH] to take 10 hours on a side.

Mr. SAMUEL W. SMITH. I should like to ask the gentle-man from Tennessee if, out of his 10 hours, he can give me 2.

Mr. MOON. I hardly think that the majority of the House could give away any of its time. I will say to the gentleman that if I have any time to spare I will give it to him.

Mr. SAMUEL W. SMITH. I should like to have at least two hours of the gentleman's time, if the gentleman can spare it.

Mr. MOON. I should be very glad to give it to the gentleman if I have any time to spare.

Mr. AUSTIN. Mr. Speaker, reserving the right to object, I want to ask the chairman of the Committee on the Post Office and Post Roads if three days of discussion on this bill will not

be a waste of the public time, and why we can not take up the consideration of this bill under the five-minute rule without any

As far as I am concerned personally, Mr. Mr. MOON. Speaker, I am ready to proceed to the reading of this bill under the five-minute rule; but there always has been a pretty liberal general debate in this House upon this measure. It carries nearly one-third of all the revenues of the United States that are expended by the Congress. There are a great many questions connected with it that gentlemen desire to discuss, and I have no disposition to prevent the discussion of anything in the bill. It has been usual heretofore to have about that length

of general debate upon the bill.

Mr. AUSTIN. We were kept here all last summer. We have been here for an entire year. Now this is a long session of Congress. Our nominations and reelections are ahead of us, and the campaign is coming on. I am not uneasy about this matter on my own account, but I do have consideration for my colleagues. [Laughter.] I wish to ask if it is not really an unnecessary waste of the public time to consume three days here, not in discussing this bill but in discussing outside propositions and questions that have no relation at all to the bill. If we have political speeches to make in our own interests, let us not make them as against the interests of the country and tho measures that we ought to pass upon in this Congress, but let us adjourn as early as possible and make our political speeches to the voters in our respective districts. [Applause.]

Mr. PAYNE. May I ask the gentleman whether he would be willing to apply that same rule to claims and public buildings, and things of that kind?

Mr. AUSTIN. Why, certainly.

Mr. PAYNE. In the interest of not having any debate or

any time used in their consideration?

Mr. AUSTIN. I think in the administration of the affairs of this House we have carried the general debate to such extent that it is an abuse. I mean the general debate on all these appropriation bills. Much of the debate is on subjects that do not relate to any line, item, or provision in the bill.

How about the time consumed in that way by Mr. PAYNE.

the gentleman himself?

I should like to ask my colleague if it would not be a good rule in passing appropriation bills to vote first and

explain afterwards? [Laughter.]

Mr. AUSTIN. Certainly. Now, I want to say to the gentle-man from New York [Mr. PAYNE] that I have had less time for general debate than the average Member in this House, I recall distinctly that when the gentleman from New York [Mr. PAYNE] had control of the time in the tariff discussion I got only 10 minutes out of the 5 days devoted to general debate.

Mr. PAYNE. I do not remember about that; I gave to gentlemen like my friend from Tennessee all the time I had.

Mr. AUSTIN. The gentleman had half of 5 days, and I was offered 10 minutes. Now, Mr. Speaker, I am going to object to three days' discussion, and I am going to object to discussion of any subject not carried in this appropriation bill.

[Applause.] Mr. MOON. Mr. Speaker, I will suggest to my colleague that the limiting of debate to three days is in the interest of economy of time in this House. Under the rules this debate can proceed indefinitely. Each member of the committee will have the right to speak one hour unless the House of its own action shall prevent further debate upon the bill. I take it that one who comprehends the importance of the subject that is before the House now, the immense amount of money being expended, will readily see that it will be a wise thing to give full and reasonable debate and not undertake to limit it too closely. Heretofore this length of time has been expended, and sometimes more, on this bill. I assure the gentleman from Tennessee that if the debate is not limited to three days or some other time this general debate will not probably close within one week, unless the House takes the matter into its own hands and forces it to close.

Mr. AUSTIN. Let me say to the gentleman that 30 or 60 minutes after this debate begins there will not be 50 Members in the House during the three days given to general debate.

Mr. MOON. I am not responsible for that, but this committee

is responsible for full and thorough explanation of the bill.

Mr. AUSTIN. The chairman can make a statement in regard to this bill and all it contains, which is virtually only a reenactment of the present law, that will be satisfactory and probably cover every item in the bill, and under the five-minute rule every Member will have an opportunity to discuss the features and merits of every line in the bill. In the three days I venture the assertion that two days will be used in the discussion of

matters absolutely foreign to the provisions of this bill and to an empty House

Mr. MOON. Does not the gentleman from Tennessee know that these speeches are going to be made anyhow on this bill or some other bill?

Mr. AUSTIN. Not if we inaugurate the system of closing debate on these appropriation bills and getting down to business.

Mr. MOON. That is just what I am making this motion for, to limit general debate and get down to business. You can not limit it too closely. As far as I am concerned, I do not care to discuss the bill except under the five-minute rule. So far as my colleagues on the committee are concerned, they have no desire to do so, but my friends over there want 8 or 10 hours, and I think they are entitled to it. They ought to have it; they are in the minority and they have the right to talk and we have the right to vote. [Applause.]

Mr. COX. Will the gentleman yield? Mr. MOON. Certainly.

Mr. COX. I quite agree with the statement the chairman of the committee has made in his attempt to fix or limit the time for debate, but the question I want to ask the gentleman is, What objection can there be to holding night sessions for general debate?

Mr. MOON. None whatever, as far as I am concerned.

Mr. COX. It looks as if some arrangement might be brought about so that general debate can be closed in three days and give everybody an opportunity to be heard on the subject.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee that general debate be limited to 10 hours on a side, one-half to be controlled by himself and the other half by the gentleman from Michigan [Mr. Samuel

Mr. AUSTIN. Mr. Speaker, out of deference to the request of my colleague, Mr. MADDEN, of Illinois, I will not make my objection, but I hope Members will confine the discussion to the bill and finish it as speedily as possible.

Mr. MADDEN. I thank the gentleman from Tennessee.

The SPEAKER. The request is for 10 hours on a side, one half to be controlled by the gentleman from Tennessee and the other half by the gentleman from Michigan [Mr. Samuel W. Is there objection?

Mr. COPLEY. Reserving the right to object, Mr. Speaker, may I ask the gentleman from Michigan how much of that time we are going to have?

Mr. SAMUEL W. SMITH. One hour and a half.

Mr. COPLEY. Then I will not object.

The SPEAKER. The further understanding is that the Progressives are to have 11 hours out of the 10 hours of the gentleman from Michigan. Is there objection?

There was no objection.

The SPEAKER. The question now is on the motion of the gentleman from Tennessee, that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the Post Office appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. Hay in the

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill the title of which the Clerk will read.

The Clerk read as follows:

A bill (H. R. 11338) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes.

Mr. MOON. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MOON. Mr. Chairman, it perhaps would have been more satisfactory to the House if the chairman of the committee had prepared a speech, a careful statement in explanation of all of the items in this bill, but that would have taken an exceedingly great length of time to deliver, and I shall co .tent myself, if the House will bear with me, with a rather impromptu discussion of the features of this bill. In a measure of this kind, where there are so many questions so different in their nature to be presented to the House, I scarcely know where to begin, unless I do so with the inauguration of the postal system. We are told in the Revised Statutes of the United States, section 388, that a bill creating the Post Office Department at the seat of Government and providing for a Postmaster General to preside over that department, was passed May 8, 1794, and by subsequent statutes running over a long period of years the power then conferred on the Postmaster General has been divided among three assistants, and lately there has been added a Fourth Assistant. The Postmaster General and his four assistants control this great business organization of the United States. They have, under the statutes, the power not only to transmit the mail of the United States but to see to its power handling and tolling and the United States but to see to its proper handling and delivery to the people. There are employed in the Government under the supervision and jurisdiction of the Postmaster General and his assistants 205,469 officials, as shown by the letter of the chief clerk, as follows:

POST OFFICE DEPARTMENT, OFFICE OF THE CHIEF CLERK, Washington, January 15, 1914.

Hon, John A. Moon,
Chairman Committee on the Post Office and Post Roads,
House of Representatives.

My DEAR JUDGE MOON: In accordance with your telephonic request, I am giving you herewith the number of employees, by classes, in the Postal Service on December 31, 1913:

	486 1, 978 6, 006 0, 414	57, 884
Assistant postmasters. Clerks in charge contract stations. Clerks, third class	2, 000	118, 062

Mail messengers Screen.wagon contractors Star-route contractors, Alaska Steamboat contractors Sea post clerks Hural letter carriers Star-route contractors Mail-equipment shops, Washington, D. C. Post-office inspectors, 390; clerks, 80, at division headqus		42, 961 12, 201
Potel		295, 469

Yours, very truly, M. Q. CHANCE, Chief Clerk,

Practically all of the railroads, the steamboat lines, the ocean lines, the electric car lines of the United States, constituting many millions of miles in length, are engaged in postal service by this great department. The Government of the United States not only delivers its mail to its citizens and provides for obtaining it through post offices, but it has conventions with 31 other countries of the world, in which countries our mail is delivered and under which conventions the mail from those countries is delivered to the people of the United States. will be readily seen that this department in its ramifications reaches out to the four quarters of the earth, with a great army of men to administer its functions.

Under such conditions a rigid economy in administration is almost impossible. The method of administration is simplified by a division of the work between the various divisions of the department, and the classifications of the mails in the first, second, third, and fourth class matter—first-class matter being written matter, such as letters and postal cards; second-class matter being newspapers; third-class matter being magazines and books; and fourth-class matter general merchandise. The statute fixes the rate of postage upon all these different classes of matter, and it is from that source that the Government of the United States derives its revenue. The power of this great department has been gradually developing through a period of 117 years, and yet to-day it is by no means entirely developed, nor has the end come, nor is it yet in sight, in respect to the vast number of the great army of men that shall yet be required to give a full and efficient service to the people of the United States in this department.

The provision of the Constitution, Article I, section 8, that conferred upon Congress the right to establish post offices and post roads, was one of the exclusive powers that was granted by the Constitution to the Federal Government. No other sovereignty, no State, nor private individual or corporation can exercise the functions of this department against the will of Congress. The Post Office Department is a constitutional monopoly, expressly so made in the interest of the people. By construction the language to establish post offices and post roads has been widely extended and is not yet fully interpreted by the courts. What have you the right under that provision to do aside from the carrying and the disposition of the mail? You have the power to impress the service of corporations engaged

in the carrying business and compel them to carry the mail of the United States at just such figures as the Congress may decree, provided that the compensation is not confiscatory in its character. You have not yet exercised that power, but it is a power that soon must be exercised. You have the power to expend your Treasury, if you see fit, under this section in the establishment and building of post roads in the United States for the purpose of carrying the mails, because the power that enables Congress to establish post offices and post roads necessarily and impliedly carries with it the power to construct and maintain, and, furthermore, it carries with it the power to control the transmission of other methods of communicating intelligence. The right of Congress under the Constitution and the law to take over the telephone and telegraph companies of the United States as necessary auxiliaries and adjuncts of the Post Office Department, I take it, is not now questioned. that great power has not been exercised and it may not be exercised for some years, but it is a coming power; it is an authority that Congress will ultimately assume unto itself, and while it may cost the enormous sum of \$900,000,000, and may bring into the service hundreds of thousands of men, yet the power exists under the Constitution and the right of Congress to invoke this dormant power is not questioned. It abides only the exercise of your legislative discretion.

Mr. Chairman, the growth of this department of the Gov-ernment has been phenomenal. It has kept steady pace, steady advance with the increase in population, business, and industrial pursuits of a great people. Not more than 4,000,000 of people inhabited the United States when the first Post Office appropriation bill was passed. It carried, as I now recollect the figures are not now before me-the sum of \$17,000, and there were bitter contests against it as a useless expenditure, as a want of economy in administration, as an unnecessary burden, an improper appropriation of the taxes of the people; yet as the population grew, as the business interests of the country increased you find this bill at the end of a century carrying about ninety-two millions of money, with a deficit of about \$17,000,000. To-day I present to you a bill that carries in excess of three hundred and five million dollars, and give to you the information that there is no longer a deficit in the postal department of the United States but a surplus of \$3,800,000 to the credit of the Government. [Applause.] I confidently predict again, as heretofore, that two decades will not pass under a proper administration of this department without an expenditure of more than five hundred millions of money, bringing a surplus of \$50,000,000 to the National Treasury. [Applause.] And all this time the department has lengthened its cords and strengthened its stakes until it has reached out to the four quarters of the globe. We have carried rural delivery

Mr. SAMUEL W. SMITH. Mr. Chairman, I have been requested to ask the chairman of the committee if he would not

be willing to step down in front?

Mr. MOON. No; I would rather speak from this point. Mr. Chairman, as I remarked a moment ago, the Government. of the United States has pressed its mail facilities everywhere. To-day the rural population of almost the whole United States have the mails carried to their doors. It is only 16 years ago when I first went upon this committee, that, after a hard strug-gle, we increased the appropriation for this service from \$350,000 to \$750,000; yet to-day \$49,000,000 of money are expended in giving the benefit of free delivery to the rural population of the United States. All of your great cities have deliveries of mail of from two to six and seven times a day. There are yet, however, in the United States 20,000,000 citizens who do not have the same efficient mail service that the people in the rural districts and cities have. I speak of that vast population living in the villages and small towns of the United States. This bill carries a provision for the further experiment in village delivery for the purpose of ultimately bringing, by the act of this Congress, a complete and efficient service of delivery of the mails everywhere and to every person in the United States to whom it is practical to deliver the mails.

Mr. Chairman, this bill, as I have said, carries a sum in the aggregate of \$305,247,767. It is divided as follows, and the divisions you will see from the report which I will have placed

in the RECORD at this point:

in the Record at this point:

The Committee on the Post Office and Post Roads, in presenting the bill making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes, submits the following:

The appropriations for the fiscal year ending June 30, 1914, were \$283,444.717. The estimates of the Post Office Department for the year ending June 30, 1915, are \$306,953,177. The committee recommends appropriations to the amount of \$305,247,767. The increase in the estimates recommended by the department are due in part to the usual service and in part to the expenses incidental to the parcel post, now in practical operation. The report of the Postmaster General sets

forth fully the use of the money heretofore appropriated and the revenues to be expected and expended for the coming fiscal year.

The following tables show the appropriation for 1914, the estimates of the department for 1915, and the committee recommendations for 1915 in the office of the Postmaster General and the First, Second, Third, and Fourth Assistants, and in them may be found the separate items of appropriation under the jurisdiction of each of these offices, and the total of all appropriations, estimates, and recommendations. It is not deemed necessary to discuss here the new legislation asked for in the bill, as it will be fully presented and discussed in the House if a rule making it in order is adopted.

The subject matter of the jurisdiction of the various departments-under the Postmaster General's office proper we provide \$1,333,650 to look after the affairs of the Postmaster General's office immediately under his supervision. For the First Assistant, who has control of postmasters and provisions for their compensation, clerks, contracts, and matters of that sort affecting the postal system, we have provided by items aggregating \$136,710,100. For services under the Second Assistant Postmaster General, which covers the transportation service of the United States and foreign mails, \$104,429,847. In the Third Assistant's office we have provided for the service of that bureau \$3,091,750, and in the Fourth Assistant's office the sum of \$59,682,420. By a scrutiny of the report you will find under each one of these subdivisions the specific items of appropriation contained in the bill and the amount that the committee has seen fit to recommend for the consideration of this House. After a most careful hearing covering a number of days the committee were not able to lower the estimates of the department, so closely had they been scanned, more than a million and a half of money in round numbers. The last Post Office appropriation bill carried the sum of \$22,000,000 less than this bill. The House will very naturally ask the question, Why such an increase in this measure? The answer is that under the classification law and under the parcel-post provision there were largely increased fixed and permanent charges for this service against the Government. The normal increase from year to year in the appropriation bill is about 8 per cent. Add the 8 per cent to the additional fixed charges and you will find that the increase now provided for in this bill is only normal and necessary to meet the adequate wants of the service.

Speaking in a desultory way about this bill, I want to invite your attention, not, of course, to all of these items and the reasons for the increase or decrease of a particular item-because that you can find as to every single item in the hearings on the bill-but to other matters, certain innovations which have been engrafted upon the postal system of late years, for the reason that it may be well for us to discuss them. We ought to know just what the Government is paying, not only for the ordinary normal service, but also as the result of the new ventures in legislation undertaken on the part of the Congress

We adopted as an adjunct to the postal department of the Government a postal savings bank. That institution is intended to gather in the money of that class of people who were unwill-

of the mails.

ing to trust their funds on deposit with the National and State banks of the United States. It was supposed that there was a vast amount of money in hiding that would come into the post officers which were the depositaries of the United States Government, established under this law, and that would there be deposited. The provision was that the Government should pay the depositors 2 per cent and loan the money at 21 per cent to the banks

About \$33,000,000 found its way in the past year to the national postal banks. The administration of that bureau, which was independent for a while, but is now covered by Executive order under the control of the Third Assistant Postmaster General, was conducted at a loss to the Government up to date of about \$1,000,000. The friends of that institution are of the opinion that if the limit fixed for a deposit under the act which created the postal savings banks were removed and the deposits to any amount were placed in that system of banks and the interest on the basis of a thousand dollars placed to the credit of each depositor, this loss would not only be made good to the Government, but this postal saving system would be a source of revenue to the Government. How wisely they prophesy I know not, but this committee, in order to give every possible advantage to the Government and to make effectual the postal saving system, if possible, has provided a section in this bill, in order that it might go through with the certainty of the general appropriations, exactly like that which was passed by the House some days ago, removing the deposit limit. We hope to get relief for the Government through this method, and I may say that in view of the various communications submitted to the department as to the desire of the people to deposit large sums of money which they could not deposit under the limitations originally fixed, that result may possibly be obtained.

Mr. SIMS. Mr. Chairman, I did not understand my colleague

in what he says about the limitation of the payment of interest. Mr. MOON. Limitation of interest on a thousand dollars deposited.

Mr. SIMS. What is the object of that? Mr. MOON. To save money. Mr. SIMS. Will it not prevent the deposits?

Mr. MOON. No; it seems not, from the insistence of the department. But that, I may say, is a matter for the future to determine. We can not foresee what the result will be.

Mr. SIMS. I did not catch the explanation of the gentleman

as at first made.

Mr. MOON. Mr. Chairman, by the act of 1912 there was established in the United States a system of transportation of merchandise known as the parcel-post law. There is no separate and distinct bureau in the department known as the parcel-post bureau. The power conferred by that act is distributed, in accordance with its provisions, among the officials charged with the performance of the duties of that department. I have heard a good deal said about the paternity of the parcel-post law. Mr. Chairman, the parcel post was in full operation many years in European countries before the United States undertook its establishment. Hundreds of proposed laws have been offered on the floor of this House during previous sessions to establish a parcel post. The Committee on the Post Office and Post Roads incorporated a section covering that question in the bill, I believe, of 1912 for the service of the fiscal year 1913. Upon the floor of this House, for the purpose of ascertaining the temper of this body, it was my pleasure, by direction of the committee, to move a substitute to that provision. It passed the House and went to the Senate, and there its provisions were radically changed and the zone system was added. The bill then went to conference, and the conferees not being able to agree, after consulting with various Members of the House about the provisions of the bill, the enactment was left to the chairmen of the two committees. Senator Bourne and myself drew the bill that is now the statute. It was approved by the committee and approved by the House. Not so much of the House substitute which I offered here is in the bill as are the provisions of the Senate. Indeed, there were other provisions placed in it, suggested by Members, that are a part of the bill. If there is anybody, in my judgment, who is entitled more than anybody else, in connection with that bill, to the credit of its paternity, it is the former Senator from Oregon, Mr. Bourne. But, as a matter of fact, whenever asked as to the paternity of the parcel-post law, just answer simply that it is nullius filius. Mr. Chairman, the parcel-post act is now in practical oper-

ation. It has resulted in bringing a vast amount of revenue to Government. The Post Office Department estimates for the fiscal year 600,000,000 packages, with an average of 10 cents a package, or a revenue of \$60,000,000 from that system. On the first of the year the limit was raised from 20 to 50

pounds. Wide discretionary power was given to the Postmaster General to change rates, zones, and limits of weight. He advises us that he proposes to extend the parcel post so as to carry 100 pounds by the 1st of July, 1914.

Mr. SIMS. Without reference to zones? Mr. MOON. In certain zones, and in certain other zones 50 pounds.

Thus you observe the incomplete operation of this law. is believed by those who have had an interest in it that this system will eventually be a source of very great profit to the people of the United States. I recollect with pleasure the very intelligent discussion of this question on the floor of this House by my friend, the gentleman from Maryland [Mr. Lewis]. And. by the way, he is entitled to much credit for suggestions as to the formation of this law. I trust, nay, I may say, I believe, that in view of the facts that have developed, this system of the transportation of heavy packages as well as light ones through the mails will be a source of immense profit and benefit to the people of the United States. [Applause.]

There is another question that is intensely vital to the welfare of this people, a question the consideration of which by the Committee on the Post Office and Post Roads awaits only the incoming report. That is the matter of the computation of pay, the method of pay to railroads and transportation companies of the United States for the handling of the mails. railroads insist to-day that they are not sufficiently compensated for this service. The department tells us that the compensation of the railroads is too great. Of course, no honest man wants the railroad companies to carry the mails of the United States for less money than it costs them to carry those No man would be unwilling that they should have a fair remuneration. Yet the method by which this compensation is determined is so unsatisfactory, so incomplete, so unbusiness-like that you can not come within \$15,000,000 of determining what the legitimate pay should be for the inland transportation

You can know, of course, what you do pay. You know what they carry. You know what you receive by way of compensation in postage, but under the present methods you can not estimate sufficiently close to determine what would be the legitimate compensation, as I say, within \$15,000,000 or \$20,000,000.

By the way, I had better remark here that the United States

is divided into four divisions for the purpose of weighing the mails and ascertaining the compensation due to inland carriers for the transportation of the mails. There is a quadrennial weighing. For instance, the mails are weighed in New England That weight will form the basis of compensation by the ton-mile for four years. The mails in the western, northern, and southern sections are weighed, each once in four years, and the system of compensation there is the same. It is only every four years that you get at the weights, and it has been charged-I know not how truly-that during the weighing period the mails in one section are diverted and carried around through that section in order that the weight of the mails may be heavy in that section, in order that the same mail may be weighed many times and form the basis for computation of pay. Whether this is true or not, I can not say. I would imagine, however, that no great amount of fraud of this sort would be practiced. Yet, let it be ever so honest, the conditions of this country, its transportation, its business, its industries, vary so much in a period of four years that if you base the pay upon the first of the four years the compensation for the next three years must be altogether a matter of speculation, because the increase may be double what it was, or it may be less than one-half of what it was, or it may be normal. The commission which is soon to report will bring before the committee a plan by which it is hoped to obtain more satisfactory results.

Another thing in this connection: For the purpose of encouraging the dissemination of knowledge and information, for the purpose of keeping the American people in touch with the Government and its institutions, the Government of the United States has practically subsidized the newspapers and magazines of the United States. They are carried at the rate of 1 cent per pound. The best estimates of the best statisticians are that the Government is losing from 5 to 5% cents per pound on every pound of mail so carried in the United States. What are you to do in that condition? You can not fail to recognize the principle that knowledge must come through the press to the people as cheaply as possible. Yet, on the other hand, you must realize the fact that your Government ought not to subscribe to a sub-

sidy to that extent.

You must know that a great part of the alleged literature passing through the mails is but advertising matter of no substantial benefit to the adults or the youth of this land. believe in upholding and sustaining the press of the United

States as the instrumentality through which the liberties and rights of the people are primarily preserved. But the Government ought not to pay so much. Perhaps your county paper, your ordinary daily papers, weighing less than a pound, might be continued at the present rates. I should oppose, I think, an increase of the rates as to them. But how about it when you are confronted with the great papers weighing more than a pound, running up to four pounds, five-sixths of which are paid advertisements? How is it when the great magazines of the country are loaded monthly in great cities upon trains composed of 14 cars carrying them at 1 cent a pound, giving it to the people at a loss upon each pound of 4 or 5 or 6 cents? Is it right to the Government that this shall be done in the interest of the magazines when the proof before the Postal Commission shows the enormous sums they obtain for advertisements? One magazine in the United States obtains the sum of \$5,000 for many of its pages of advertisements, and yet it is permitted to send six or eight carloads monthly cut to the people at an enormous expense to the National Government upon the theory that it is the duty of the Government to foster and encourage education and the dissemination of knowledge.

Mr. SIMS. Will the gentleman yield? Mr. MOON. Certainly.

Mr. SIMS. Does the gentleman say that they get \$5,000 for a page of advertisements?

Mr. MOON. Five thousand dollars for some pages. Mr. SIMS. And the magazine is loaded up with a large

number of pages of advertisements?

Mr. MOON. Yes. Mr. Chairman, the Hughes Commission has made a report recommending the doubling of these rates and the congressional commission will report in a short time on the same subject. I want to advise the House that this committee proposes to take up that question and deal with it in the light of justice and on the facts. the light Williams, Mr. BRYAN, Williams, WOON, Yes.

Will the gentleman yield?

Mr. MOON. Mr. BRYAN. The gentleman just stated that as a result of this loss of something like 5 cents a pound in the movement and transportation of magazines a subsidy was created. I would like to ask the gentleman if the benefits of this subsidy go to the railroads or to the publishers of the newspapers and magazines?

Mr. MOON. The gentleman must not understand me too technically when I use the word "subsidy." A subsidy means technically when I use the word "subsidy." A subsidy means a gratuity. The policy of the Government was not to subsidize the railroad lines, but it gives a practical subsidy or benefit to the people, as they thought that the rate tended to enable the publishers to give the people the magazines at a lower rate than they got otherwise. It is a benefit to the publishers. The point is that we are giving too much in the interest of the dissemination of knowledge when we are interest of the dissemination of knowledge when we are not

getting knowledge, but mere advertisement.

Mr. BRYAN. That is the very point I want to impress in relation to this subsidy, and the way to cure the trouble would be to lower the rate paid the railroads for transportation rather than to raise the rates on the magazines. It does not cost any more to carry a trainload of magazines than it does a train-

load of coal.

Mr. MOON. That may be true; but the question in my judgment is. What shall be done as to both of these questions? I have no hesitancy in saying that the rate upon the magazines ought to be raised in accordance with the report of the Hughes Commission. [Applause.] I have no hesitation it saying that probably the short-line railroads in the United States are receiving scarcely a just compensation for the service they render, while the great trunk lines of the country are receiving

Will the gentleman yield?

Mr. MOON. I will yield to my colleague. Mr. SIMS. Is it not a fact that newspapers, second-class mail matter that does not go beyond the county, have the use of the mails absolutely free?

Mr. MOON. Yes; that is a provision of the statu's.

Mr. McKELLAR. Will the gentleman yield?

Mr. MOON. Yes.

Mr. McKELLAR. Has it been figured out what the Government loses in money each year by reason of this rate being

Mr. MOON. It has been, in a measure. The Government of the United States adopted a policy as to the delivery of magazines which we have designated as the blue-tag regulations. That is, the department instead of sending the magazines through the ordinary channels of fast mail, inasmuch as they are monthly publications, and inasmuch as the Government

zines in the post office within the time required for delivery, they have sent them in great carload lots by fast freight. It is true that the dates of publication and distance in some cases has prevented this being done, and they have to be carried by the mails. Yet by the adoption of that policy the Government has saved annually a million and a half dollars on magazines. There is a provision in the bill to sustain the blue-tag system.

Mr. LEWIS of Maryland. Will the gentleman yield?

Mr. MOON. I will.

Mr. LEWIS of Maryland. Does the gentleman know of any fundamental objection to utilizing the fast-freight service of the country for the carriage of parcels with rates very much lower than could be allowed on passenger trains?

Mr. MOON. No; I do not. I think it is an entirely prac-

ticable question.

Mr. Chairman, in this connection let me suggest to the House that there is an intense effort being made in the United States by the commercial interests to reduce the postage on first-class matter from 2 cents to 1 cent per ounce. There are to-day lying in the office of the Committee on the Post Office and Post Roads petitions requesting that change that bear the names of more than 3,000,000 people. The President of the United States has desired that this be done consistent with our revenues. take it that we all would be glad to reduce the postage from 2 cents to 1 cent; yet when you come to think about it, it seems that 2 cents were little enough to ask for carrying a letter across the continent. That reduction can not be brought about

to-day, and it can not be brought about to-morrow.

It can not be brought about at all until there has been a proper adjustment of the railway mail pay, until there has been a proper rate fixed on second-class matter, until there has been a practical consolidation of third and fourth class matter, and we see further operations of the great parcel-post system, which now bids fair to help us out of our troubles. They say, "Why do you not give us a 1-cent rate—does not first-class matter yield over \$60,000,000 profit to the Treasury of the United States? If that be so, why do you force us to pay the 2-cent rate on first-class matter in order that you may make up the deficit in revenue arising from second and third class matter and heretofore from fourth-class matter?" That is apparently a sound argument; and yet, when you come to think about it, it is totally illogical. The fact that there are four classes of mail matter and that part of those classes do not bring a profit and that one does does not affect the question at all. The Post Office Department is a unit. It is just as though a farmer has four fields corresponding to the four classes of matter. One field is a rich and fertile field and it brings the farmer a great revenue. The others are poor and do not pay, but the three others that are nonpaying are entirely essential and necessary to the transactions of the farm work and for the accruing of the benefits that come from the first. So it is in the Postal Service. You can not throw away the revenues from first-class matter because there is a big profit from that source and none from the others. If you go to 1-cent postage to-day under the conditions existing, you will not have a surplus of \$3,800,000, but you will have a deficit of \$33,000,000 in your National Treasury. That question is out of the way, therefore. This committee could not yield to it in the exercise of sound judgment.

Mr. BARTON. Mr. Chairman, the gentleman has stated the profit derived from first-class matter as \$60,000,000. What would be the loss on the other?

Mr. MOON. The loss on the rural delivery matter is some \$27,000,000, and it is suggested that the loss on the second class is about \$63,000,000.

Mr. AUSTIN. May I ask the gentleman from Tennessee a question?

Certainly.

Mr. AUSTIN. If Congress would increase the rate on secondclass matter with the surplus that is increasing all of the time, and which is bound to still further increase under the operations of the parcel post, will we not be able to give the people 1-cent postage?

Mr. MOON. I think that if we shall increase the rate to a proper rate on second-class matter, and consolidate the third and fourth class matter under a compensatory rate, and properly adjust the railway mail pay, in a few years the surplus may be so great that we may be able to give a 1-cent postage and leave it at 1 cent.

Mr. GREENE of Massachusetts. Mr. Chairman, will the

gentleman yield? Mr. MOON. Certainly.

Mr. GREENE of Massachusetts. Are not all the public buildings used by the Post Office Department maintained out of the fully performs its contract for delivery by placing the maga- Public Treasury and built out of the money of the Public Treasury and not from the postal fund? Is not all of the heating and lighting service paid for out of the Public Treasury?

Mr. MOON. The heating, janitor service, and lighting is provided for in the Post Office appropriation bill.

Mr. GREENE of Massachusetts. Not in public buildings? Mr. MOON. In post office buildings, and that is all that we are dealing with.

Mr. GREENE of Massachusetts. But where there is a cus-

tomhouse and post office together?

Mr. MOON. Where there is a customhouse that comes from

the Treasury

Mr. GREENE of Massachusetts. If that came out of the receipts from the sale of postage stamps and other receipts, there

would be a large deficit?

Mr. MOON. Certainly; necessarily so. If the Post Office Department had to construct all of the buildings of the United States, it could not do it out of its revenues, and that is not a part of its functions.

Mr. GREENE of Massachusetts. That has been paid for

years out of the Treasury of the United States.

Mr. MOON. It must be remembered also, on the other hand, that this department is the only self-sustaining one in the Government. The Department of Justice, the Department of War, the Department of the Navy, the Department of the Interior, the Department of Agriculture, and the Department of Commerce are all a dead incubus, so far as finances are con-cerned, to the Government of the United States.

Mr. GREENE of Massachusetts. I have been postmaster in my city, and I know there are customhouses located in many

buildings where the post office is.

Mr. MOON. The gentleman was postmaster in a building where the customhouse was provided for by the Treasury.

Mr. GREENE of Massachusetts. And very largely they are

fixed in that manner.

Mr. MOON. There are very few of that class of buildings in the United States compared with the post offices. In order that the gentleman may understand the exact situation and see how negligible the proposition he may make is concerned, there are in the United States 486 first-class post offices. That is where, in many instances, you have a public building, but in many of them you have not. Of the second class we have 1,978; of the third class, 6,006; and of the fourth class there are 49,414; and this department provides for all of those except perhaps of about 350, which are in customhouses in the United States.

Mr. GREENE of Massachusetts. In the original construction are those constructed from the receipts from the Post Office Department or from receipts from the Treasury?

They are constructed under the guidance of, or, rather, the Committee on Public Buildings and Grounds provides for them, and the buildings are authorized by the House and are constructed by the Supervising Architect out of the

Mr. GREENE of Massachusetts. That is it exactly; that is

Mr. MOON. But there are very few of them in comparison. Mr. AUSTIN. The gentleman should consider, too, that the post office carries mail for all the other executive departments.

Mr. MOON. I was going to say that it would more than balance the cost of all your customhouses if the cost of the franking privilege upon the Post Office Department was defrayed by the other departments. In other words, you strike a balance between the Post Office Department and the other departments of Government and a credit of millions of money annually would come to the Post Office Department which it does not now get. So the suggestion that there would be no surplus under the condition suggested by the gentleman from Massachusetts [Mr.

GREENE] avails nothing, in my judgment.

There is one matter I was about to forget. This bill carries a provision by which, I believe it is, \$200,000 is appropriated, with direction to the Postmaster General that he shall purchase all-steel railway post-office cars and provide for their carriage on the payment of wheelage or under such contract as he may deem advisable to make with the common carriers in the United States for the purpose of carrying the mail. It may be said that this is the first step toward Government ownership of a public utility of this character. Well, why is it that the Government should not use and own the instrumentalities by which the mails of the United States are carried? It owns its equipment, necessarily. It owns it post offices, necessarily. objection can there be to the Government owning the vehicles by which the mails are carried if it shall transpire that it is to the benefit of the Government to own them? I do not believe in the Government of the United States engaging in general business. I do not believe in its encroachment upon the rights of States or individuals anywhere, but if the Government has

the plenary and exclusive power under the Constitution, a Federal power, it ought to be just as jealous in guarding it as we would the rights of the States or the individual. The Government has the power to employ the instrumentalities it needs for the perfection of this system, the Post Office Department, for carrying with the greatest facility and the greatest benefit its mails to the people of the United States, and if it wants to own its cars and force the railroad companies to carry them for reasonable compensation it has the right to do it under the law, as I have said before, unless the compensation demanded or granted should be confiscatory. An all-steel car will cost from \$9,000 to \$10,000. A car of wood will cost from \$5,000 to \$6,000, railway post-office cars. There are to-day in the service wooden cars that have been in service from 15 to 20 years; one or two of them were in the service 40, 41, 42, and 43 years ago, if the reports here can be relied upon. If a car costs \$6,000 and the Government pays an annual rental of \$5,000 on it, and the car lives 15 years, there is \$75,000 for the use of a car that the Government could have purchased in the first instance for \$6,000, and the repairs upon it amount to 20 per cent, so it is a dead loss of over \$60,000 in a period of 15 years upon one of those cars, and a corresponding loss upon the all-steel car.

If that condition be true with respect to the thousands of cars that the Government has, will it not be wise to provide a means by which this enormous expense may be lessened?

It developed in the hearings when the question was raised as to the power of the Government to force an arrangement by statute, if it could not make arrangement by contract for the carrying of these cars, that the railroad companies, instead of charging wheelage, actually paid wheelage to the companies that furnished their freight cars and to the Pullman company. If it can do that for them, can not the carrying of the mail for the Government of the United States be arranged for on the same basis if we shall continue to pay them the stipulated rate per pound for carrying the mails? Or if we decline to do that, do we not save the rate that is paid?

Any way you compute the question affecting the railroad companies or the United States with respect to the railway postoffice cars, they obtain the advantage over the people of this

country to the extent of millions of dollars annually.

We have provided for an experiment along that line. We have provided that the Postmaster General shall make a purchase of some cars and try out this question. Even if we should be mistaken in our view on that question, it is clear that if the Government does not furnish all, it should furnish at least a portion of these cars for the handling of its dead equipment in return between the great cities of New York and Chicago,

There are other features in this bill that I ought to talk to you about, but there is only one that I will take up now.

Mr. GOULDEN. Mr. Chairman, will the gentleman allow me-to interrupt him right there before he leaves that car question? The CHAIRMAN. Does the gentleman yield?

Mr. MOON. Certainly.
Mr. GOULDEN. How many cars are necessary to carry the mails of the United States, approximately?

Mr. MOON. Thirteen hundred full railway post-office cars are necessary, besides compartment cars,

Mr. GOULDEN. It becomes an important matter in connection with the question of saving expenses?

Mr. MOON. Yes; it does, indeed.

The CHAIRMAN. The gentleman has exhausted one hour. Mr. MOON. The gentleman, having control of the time, will

yield himself some more. [Laughter.]

I come now, Mr. Chairman, to a question that from many viewpoints is a delicate proposition. It is not delicate to me. If it were, I would not discuss it here. But it is a proposition concerning which many of us are tender, because of platforms and political promises. I am going to discuss this ques-tion in a partisan spirit for a moment or two and then I am going to discuss it as a matter of economy and common honesty and from the point of view of the fundamental principles of a great Government, which I believe are in part subverted by the practice I shall refer to. I speak not of the mere change which we seek to make in the matter, but I speak of the general effect of the civil service.

There is a provision in this bill whereby-

Hereafter any assistant postmaster who may be required by law or by authority or direction of the Postmaster General to execute a bond to the Postmaster General to secure faithful performance of official duty may be appointed by said Postmaster General, who may require such bond, without regard to the provisions of an act of Congress entitled "An act to regulate and improve the civil service of the United States," approved January 16, 1883, and amendments thereto, or any rule or regulation made in pursuance thereof, and the Postmaster General shall have power to revoke the appointment of any assistant postmaster and appoint his successor at his discretion without regard to the act, amendments, rules, or regulations aforesaid.

That is what I call a Democratic section of this bill. [Applause on the Democratic side.] It is Democratic not in a partisan sense, but Democratic because it is right in view of the

conditions that exist on this question.

Now, let us examine it for a moment. Why should an assistant postmaster be placed under the civil service? He was not so placed until three years ago, when by Executive order he was given a life tenure in this most important office. First, under the law the assistant postmaster does not execute a bond to the postmaster, and yet he has a right to perform all the functions of a postmaster. He handles the postmaster's money; he makes the deposits; he makes the accounts; and yet he is imposed upon the postmaster without his will. obnoxious to him in every sense of the word, and yet the Government of the United States permits a man by an Executive order to perform the functions of the office of postmaster without being under bond to the postmaster. He may default to any amount, and the postmaster has no remedy.

He as principal must answer, and if he can by any peradventure be subrogated to the rights of the Government under the bond that is taken, it will be after a long litigation, a tedious contest, and permission by the Government. He is practically without protection. That order that placed them under the civil service, carrying with it the power that it did under the conditions then existing, was as much of a fraud upon the American people as was the order of President Taft, after his defeat for the Presidency, that placed 43,000 fourth-class postmasters under the civil service, when those post-masters had never had a civil-service examination. [Applause

on the Democratic side.]

Now, I want to confess that I do not believe in a civil service in any branch of this Government that carries with it the life It is in absolute derogation of every doctrine of the Democratic and Republican Parties as we understood those great parties in the days of their power, supremacy, and honor great parties in the days of their power, supremacy, and honor in the protection of the rights of the American people. Look at that question a moment. What moral right has the President of the United States in the exercise of a power that is executive and constitutional, I grant you, to lift up 43,000 fourth-class postmasters and 2,500 assistant postmasters from a position of temporary service, subject to the will of the party, to an office for life? Does it not close the door of opportunity to the people for a generation? If indeed it were possible to have a civil-service examination that was fair and just with have a civil-service examination that was fair and just, with the only purpose in view of obtaining efficiency, there might be some excuse for it. But let us digress for a moment and look at the practical operations of it. You know that it is a fraud to its very core as it has been practiced. There are, I believe, 2.560 assistant postmasters in the United States. If they had been properly examined and placed under the civil service, would 98 per cent of them have been Republicans? No; it could not have been so. And yet that is the practical fact. If those 43,000 men in the fourth-class offices had been examined, would 95 per cent of them have been Republicans? Gentlemen, you know how easily it is done. You know the manner of examination. Take a few concrete cases and let us see whether the way that they examine is or is not fair.

The examiners have been Republicans all along. I am speak-g of it partially in a partisan sense now. What kind of ing of it partially in a partisan sense now. What kind of questions do they put up? They take a man in a little village and examine him for the position of fourth-class postmaster. and examine him for the position of fourth-class postmaster. They do not ask him very much about the operation of the office or about the routes, or how long he has studied the time cards, the departure of trains, and all the practical things that are necessary, but they put up to him questions on history, on geography, and on mathematics. Here is one: Will you please name the Kings of Great Britain, the dates of their reigns, and the principal acts or events during their reigns? That is in history. Will you tell me the three greatest generals of the Revolutionary War? In mathematics now: Will you tell me the difference between an acute and an obtuse angle?

Mr. COOPER. Will the gentleman permit an interruption?

Mr. MOON. Yes.

Mr. COOPER. The gentleman now is purporting to quote verbatim

Mr. MOON. Oh, I am not purporting to quote verbatim. am purporting to state some of the foolish propositions that have been asked.

Mr. COOPER. Will the gentleman please tell when and

where those questions were asked?

Mr. MOON. For your sake and your party's sake I had

better not tell them.

Mr. COOPER. I think possibly for the gentleman's own sake he had better not attempt to tell where any such questions were asked on an examination for fourth-class postmaster.

Mr. MOON. I will tell you one right now, presented by the gentleman from Missouri [Mr. Shackleford].

Mr. COOPER. When were the questions asked that the gentleman has just been giving, and where were those quesons asked of applicants for a fourth-class postmastership?

Mr. MOON. Some in the Volunteer State and some in others. Mr. COOPER. When? Mr. MOON. About two weeks ago.

Mr. COOPER. By whom? Mr. MOON. By a Republican inspector.

Mr. COOPER. One moment. Does the gentleman say-

Mr. MOON. I am not going into details now to tell the gentleman about all these matters; some of them are confidential. Mr. COOPER. I should think so. Does the gentleman say that a Republican inspector of post offices had any authority to examine a man on his application for a fourth-class postmastership?

Mr. MOON. Why, of course. Does not the gentleman know that where the post office pays less than \$180 the inspector controls it?

Mr. COOPER. Now, does the gentleman say that at Leighton, in his State, those questions were asked?

Mr. MOON. I understand so.

Mr. COOPER. Were they made of record?

Mr. MOON. I do not know about that. Here was a case in another county:

See to it if you can not have an impartial man sent here to examine for fourth-class post offices and carriers in this county. The Republican postmaster has an agreement, with a Democrat who has betrayed his party, and two Republicans to give them the three highest degrees, and give them to nobody else.

I want to tell you that the order was made and that piece of villainy is not going to be accomplished. Now, what I am going to tell you I believe took place up in Wisconsin.

Mr. COOPER. What place?

Mr. MOON. I do not know; somewhere about where the gentleman lives, I think. [Laughter.]

Mr. COOPER. I do not believe it.

Mr. MOON. The gentleman must not get too serious. Now, the postmaster was asked to describe the difference between a

parallelogram and a parallelopipedon; to describe the right angle to a rectangular triangle. [Laughter.]

Mr. Chairman, to be serious with my friend from Wisconsin. while these may not have been the exact questions, they were along that line, just as reasonable and senseless. Judge Shackleford suggested to me that an applicant was required to show the direct course of a river, its bearings, immediately in front of the city of Paducah.

I refer to these matters to show you that the examinations are never just what they ought to be. They may not always be fraudulent, but they are not examinations for the purpose of attaining an efficiency record. They are examinations con-trolled by favoritism and prejudices. What is the result of the examination? How is it that all of these Republicans get into examination? How is it that an of these Republicans get into office and no Democrats? The examination is certified to the department; the three men, in the opinion of the examiners, that made the best grade are placed upon the eligible list. There may have been one Republican and two Democrats who passed, or it may have been the opposite; but the Congressman, if a Republican from that district, is called upon to say which one of the three shall have the office, and, of course, gives it to a member of his party. I do not, from a partisan standpoint, blame him. But if the examination is held for the purpose of efficiency in the public service, there would be no question about the fact that, if it had been honest and fair, the man who obtained the highest grade would obtain the office.

Mr. AUSTIN. Will the gentleman yield? Mr. MOON. I will yield to the gentleman.

Mr. AUSTIN. If my colleague will indulge me for calling his attention to something that he said, although I know he did not intend it, but he stated that President Taft's order carrying the fourth-class offices into the civil service was issued after his defeat. The order was issued prior to his defeat.
Mr. BARTLETT. On the 15th of October, 1912.

Mr. AUSTIN. Yes; the original order was issued by Mr. Roosevelt and was afterwards extended by Mr. Taft a few weeks before the November election.

Mr. MOON. I am not offering the suggestion as a criticism of President Taft. I am glad the gentleman has made the correction. The effect is the same. I have an exalted opinion of the patriotism and ability and faithfulness of ex-President Taft, and he is one of the last men in the world whose character would detract from.

Mr. AUSTIN. I knew that my colleague would not intentionally misrepresent Mr. Taft or anyone else.

Mr. MOON. I accept the suggestion as true, but it does not affect the wisdom or the unwisdom of the policy of the propo-

Mr. BRYAN. Will the gentleman yield? Mr. MOON. Yes. Mr. BRYAN. With reference to the time of the issuance of the order and Mr. Taft's defeat, everybody knew that Mr. Taft was defeated way back in June.

Mr. MOON. That may be true.

Mr. GOOD. Will the gentleman from Tennessee yield?

Mr. MOON. Yes.

Mr. GOOD. The gentleman has spoken of the fourth-class postmasters and the manner in which they have been ap-pointed. Is there anything in the bill that changes the law in

Mr. MOON. I am glad that the gentleman made the sugges-I had about forgotten to speak in that connection. There is nothing in this bill that changes the law. Under the plenary power vested in the Executive by the civil-service law President Wilson can and has changed the ruling as to fourth-class postmasters subjecting them all to an examination. Now, if the President was right in believing that an examination should be had instead of rescinding the order—and my judgment is the order ought to have been rescinded—but if he was right in the modification of the order, should not the same rule apply to the assistant postmasters? Is there any reason in one case that there is not in the other? So if the Rules Committee does not give a rule for an amendment of the law we ask, the committee has performed its full duty in that respect in justice to the postmasters of the country. It ought to go far enough to en-force that rule that the President enforced as to the fourthclass postmasters

Mr. SIMS. Will the gentleman yield?
Mr. MOON. I will yield to my colleague.
Mr. SIMS. I may be mistaken, but it occurred to me that

I recollect of seeing in the papers soon after the present administration came into power, that the administration advocated putting the postmasters, first, second, and third class, under the civil service. Now, if they had such purpose in mind, perhaps that may be governing the administration in not wanting the assistant postmasters taken out.

Mr. MOON. I find in the public press a statement which, I presume, is authentic, but I have no means of knowing that

it is. It is to this effect:

President Wilson let it be known yesterday that he was opposed to a return of the "spoils system" of post-office appointments, and would veto the Post Office appropriation bill now before the House unless the "rider" in it exempting assistant postmasters from the classified serv-

ice were eliminated.

The President, it is understood, has decided to call a halt to what has been charged by civil-service advocates as a tendency in Congress to break down the merit system.

HIS POSITION ON OTHER BILLS.

His Position on other bills.

He was confronted in the tariff, currency, and the urgent deficiency bills with the civil-service problem, but in signing these measures took the position that his power of piscing employees in the classified service had not been weakened, and that the merit system could be applied. The "rider" in the Post Office appropriation bill as reported to the House would give the Postmaster General the right to revoke the appointment of any assistant postmaster "and appoint his successor at his discretion," without regard to the civil-service act or its amendments.

pointment of any assistant postmaster "and appoint his successor at his discretion," without regard to the civil-service act or its amendments.

Postmaster General Burleson recently wrote Representative Moon, chairman of the Post Office Committee, stating his opposition to the proposal, but it was not withdrawn. The President is expected soon to inform House leaders of his views.

Mr. Speaker, the letter there referred to was written by the Postmaster General. He discusses the civil-service question in his report. The President of the United States does not approve this section in this bill. The President stands for civil service in the United States. He stands for the merit system. The President is an honest, able, and conscientious man, and 1 believe that in Woodrow Wilson this country has one of the greatest Presidents that it ever had. [Applause on the Democratic side.] I believe that in Albert Burleson it has one of the ablest and most efficient Postmasters General it has ever had. [Applause on the Democratic side.] But this committee is not here to bow to the will of the President or to the will of the Postmaster General upon a question upon which they differ. We perform our functions as legislators. If in our wisdom that law ought to be changed, no domination from the Postmaster General nor threat of veto from the President ought to swerve us from the course which we believe to be right. I do not know what this House thinks on the question. Personally it is really quite immaterial to me. I have long ceased to care personally as to the effect of votes on legislation in this I recognize Congress as a unit that controls. Its integral parts may fall, but the unit will yet stand and dominate in legislation. Suppose the President of the United States does veto this bill if the Congress should pass this section, he but I

exercises the functions of an executive conferred upon him by the Constitution, and Congress can not complain of the exercise of that duty on the part of the President. It can only override it, if it will, by a two-thirds vote, and he can not complain if Congress does that, because that is the provision in the Constitution to which he and you and I have sworn allegiance. So the views of the President of the United States and the Postmaster General, however much I respect them-and I do most profoundly respect them-certainly will not control me in my vote nor this committee in the presentation and the discussion of a question of this sort, which I believe to be vital.

Let us look at it. I have spoken, as I have said, in a measure, in a partisan sense upon this question. It is not in my nature to want to throw any man out of employment because he may differ with me in religion or politics. It is not my desire to lay the hand of oppression upon anybody anywhere. I have lived too long not to know that men do differ and that . they have the right to differ and that they ought to respect and protect each other in their differences; but this is a fundamental question of government. I would not say, sir, that the merit system, as it is called, was wrong, nor have I any respect for those insinuations, such as are made in the minority report here, that we are seeking to inaugurate an era of the spoilsman again because we oppose the civil-service policy. What is a spoilsman? Is he a plunderer, or, politically speaking, is he one who belongs to a victorious and triumphant party into whose hands the reins of government have been consigned by a decree of a majority of the people, who demand the party of which he is a part shall have a voice in the administration of that government which they have called into power? Whom did the American people elect? Was it President Wilson and his Cabinet alone? I think not. The election was an indorsement of the principles and policies of the Democratic Party. It meant that into power should come with the President those means by which Democratic principles and policies should be sustained. It did not mean that the offices should be held by the party defeated at the polls, although that party had clothed with the sanctity of civil service all of the men, or 98 per cent of all of the men, in the service of the Government. It meant that the Democratic principles and policies should be executed by Democrats. What general, when he has captured a portion of the enemy, in the next great pitched battle would place be-fore his vanguard the sentinels chosen from the ranks of the enemy? How long would it be before treason would destroy the army and the purposes for which it had been organized?

When you come to political questions, I believe that the Democratic Party is right; I believe that its principles and policies must triumph if human liberty shall be preserved upon this continent. I have naught to say against the patriotism of men who differ from me, but that view is the one which has fastened itself upon me as firmly as I know of my existence. If the power were mine, I would put none but Democrats on

guard.

nard. [Applause on the Democratic side.]
Mr. CURRY. Mr. Chairman, will the gentleman yield for a moment?

Mr. MOON. Not now. I desire to conclude. The CHAIRMAN. The gentleman declines to yield.

Mr. MOON. Mr. Chairman, as I said a while ago, I have my partisan views on these things, and yet I would not want to partisan views on these things, and yet I would not want to deprive any man of office on account of that. But let us take another view of this question that is by no means partisan, one in which gentlemen who differ widely may find, possibly, common ground in view of their desire to support a common government. Let us concede that the civil-service law is properly executed. That is why President Wilson so firmly stands by it. He believes in law and in the enforcement of law until that law is repealed and proposes to enforce it conscientiously. The result is going to be the retention of thousands of Republicans in office. And that is his matter, none of mine. It is not a matter about which I would suggest any criticism, but suppose, as I said, the examinations were correct, that the merit system was really in force, that it had all the effect that was expected of it. Then what comes of the life tenure in these offices? Men and women go into the service from 21 to 45 years They spend their lives in that service. They become, by reason of continued occupation in a particular line, unfit for any other service.

Now, when they are old and decrepit, when they are holding their places, tell me whether this merit system under that condition performs an efficient service to the Government of the United States? It is a service totally inefficient, totally valueless, for which the people are paying. But what are you going to do with them? They hold on, and there comes another generation following in the same wake. You will be inevitably driven, if you have any sense of moral justice, to a civil pen-

sion list, so these people can be retired when they reach the age of inefficiency, that the Government may have efficient service in the employment of others. Are you going to extend the pensions to the civil list in the employment of the Government? He who has bared his bosom to the brunt of war for his country's sake, he who is aged and decrepit as a result of suffering and hardship following the banner of his country, is entitled to a pension, not only a pension, but a splendid remuneration for his service. [Applause.] But, sir, there is no moral ground upon which you can place or for one moment rest the claim for a civil pension. You have inaugurated a system which you call the merit system, and which you found to be an inefficient system, so far as public service is concerned. And what have you to do? I believe it will be better to have fresh blood from the fields, named by commissions or Congressmen, than to have the continued dull flow of inefficient blood of long years of tenure in the offices of your country. What have you to do? I say, if you obey your common sense of justice, if you adhere to the common precept of ordinary morality, you have to provide now for the retirement of thousands of inefficient men and women in the service of the United States; and while I do not believe in a civil pension, yet when certain conditions confront us we have got to set aside the views we may have upon general practice and apply that remedy that will give relief in the particular instance. You have got to retire them on pay in part—you should do it as soon as you can—from the public service, that vast army of inefficient men and women who have passed beyond the period of life when they can be of any more value to the Government and never can be of much value to themselves You must give to them a pension that will care for them for life, and while we oppose the policy, the condi-tions are such we are driven to this conclusion; but when you do it, amend your law so that the examinations will bring with more certainty efficient men into the public service.

Do not give a life tenure; give a reasonable term of years, and when they have entered upon the service let it be known that minute that on a certain day and a certain hour they must go out of the service. They will meet the conditions that confront them; they will be prepared to stand the battle of life when their public service is over, and the Government will have at all times and under all conditions an efficient corps of public servants. But, sir, that is the view that we take not only in the interest of the Government but of the employees. There is yet another deeper and more profound consideration in connection with this question. We are creating under this law an official class for life. It forms one of the corner stones upon which the antagonism to republican institutions can and will rest. In considering this question we had as well look to

the conditions that confront us.

Who are we? What are we? From whence do we come? Ours is the greatest and freest Government on the face of the earth. It is true that mankind have been linked in the bonds of slavery by their fellowmen in all the ages. It is true that this Government, the first great experiment in republican institutions, has proven to be the greatest and most beneficent Government yet known to mankind. Yet, sir, the purposes of this Government have not been accomplished. We must avoid those policies of government that look to the undoing of the fundamental principles upon which it rests.

Take for a moment the consideration of the original Constitution, before the amendments were attached to it, and tell me if you can find among the constitutions of the earth one that was so complete a chart for a limited monarchy as the original Federal Constitution was before the amendments were attached

What did it do with the executive power? It gave the Executive of the United States greater power than any other ruler of any government in the world. He names all the officials, practically, of the Government. He exercises the veto power, He names all the officials, which it takes two-thirds of the Representatives of the people to override. He hold his hand upon your Treasury. He commands your Army and your Navy. And, ah, he appoints the postmaster of your village, your marshals, your collectors, your internal-revenue agents-with the consent of the Senate. Where and in what way could greater power be vested in an executive? But for the fact that the Presidency is not hereditary, the original Federal Constitution is more of a chart of despotism than of a free republic.

But how did it arise? We had ended the great war for dependence. That great declaration had gone forth to the independence. That great declaration had gone forth to the earth. But when you came to the Constitutional Convention, there you met the insidious power of the Tory and the Federalist, and let it be admitted—for it is true—that Federalism overcame democracy in that convention, and the Federal Con-stitution does not breathe the spirit of the American Declara-

tion of Independence. There, in the very beginning, in the inception of your Government, you found those conditions unfavor-

able to the welfare of the common people.

Sir, under the original Constitution there was no recognition of the sovereignty of the States. The great Commonwealth of Georgia was haled by a private citizen into court, and the Supreme Court of the Republic sustained the contention of the individual against the Commonwealth of Georgia. was not guaranteed the right of liberty in that Constitution. The power that was given to the judiciary under that Constitution has grown and has been amplified and enlarged until to-day, under the doctrines asserted under a life tenure, the Federal courts are taking jurisdiction of almost every question. By fixing the proper limitation, by establishing the doctrine of diversity of citizenship, by the removal of causes on the ground of prejudice, by the assumption of jurisdiction because it is alleged that a Federal question is involved, or because there has been some decision under Federal statutes in alleged contravention of the Constitution, they have stolen, as Mr. Jefferson said they would, the whole field of jurisdiction, until to-day the rights of the Commonwealths and of the people are but a dream of the past in the jurisprudence of your country.

Do you believe that judges That is the result of life tenure. sitting upon that bench, responsible to the people for election, would be void of human sympathy on all occasions? believe they would lean, as it is said they do and as the trend of their decisions shows they do, particularly in the inferior courts, in favor of the vested interests of the country as against the people? Would you believe that the day would come in the exercise of Federal jurisdiction in the United States when your courts, Federal and inferior courts all over the country, were charging juries on the question of international and

interstate lewdness?

How, indeed, has the jurisdiction of these courts grown! They have been reaching out and implying power, and from the implication of power fairly implied in the first instance, of exclusive jurisdiction under the Constitution, they have gone beyond the limit; and whatever men may think or say of it, it is as true as that there is a God in heaven that the sovereignty of States perished on the field of Appomattox. Not, indeed, that their rights are not preserved in terms in the amendments to the Constitution, because in those amendments are the guaranties of American liberty. Not, indeed, because they do not lie dormant there and unexercised, but because the rapid advance of the Federal institution was such as to oppress them in the dark hours of that day; and the States of the Union will all yet appeal in vain for the supremacy of the rights of States that were wrung from them by Federal jurisdiction and the en-croachment of national power. Your Government is being consolidated. It is builded upon the theory of ultimate supreme power under a system of federalistic dominion and construction of the Constitution. What are you going to do about it? You have hundreds of thousands of employees now under the civil service. Not a single representative of the Federal Government, save the Members of this House and by recent amendment the Senators, is chosen by the American people at the ballot box. Your President is chosen by an electoral college. He, in the exercise of that exalted power which he has under the Constitution, with his Cabinet and officials, choose all the other representatives of your country. There stand, with a life tenure, the administrative officers of the Government.

If you wanted to make a monarchy of the Republic, all you would have to do would be to apply the civil service to Congress, the President, and his Cabinet. [Applause.] You have no republican government. You never had anything but a representative Federal institution, with tendencies more federally monarchical and in accordance with the Government of St. George than in accordance with the declaration of American independence until, as I said, your amendments to the Constitution came. Are they sufficient to protect you?

Look at your Consular Service to-day. Ah, nearly all Republicans, covered by the civil service. They are your representatives in business. I have no objection to their being Repub-They are of no account, except for some reports that

they send in now and then.

Look, to-day, at the Diplomatic Service of the United States. No man who is not worth millions of money can hold a position in one of the great courts of Europe as ambassador or minister plenipotentiary of the United States. They are there giving a false light to the conditions in America. Your recent ambas-sador to the Court of St. James is said to have expended \$300,000 per annum in maintaining his dignity as a representative of the United States. Yet there is scarcely an official international act to his credit. What are you going to do? Are you no longer to be represented in France, Germany, Spain, Bel-

gium, and Great Britain by men imbued with the spirit of the Declaration of Independence? Are you no longer to be represented by true Republicans and true Democrats? Must the leadfalsely represent the feelings and sentiments of the American people? You have not the slightest use in this ers of society, with the false glare and glitter of their position, for an ambassador or a minister plenipotentiary in any court on In these days of cablegrams and close communication your Government, if it should have any trouble anywhere, might communicate with its business consuls, if it desired, or with the Governments direct, and deal with all questions of international importance. Your Diplomatic Service is a superfluous appendage to a Republic in this day, and your whole diplomatic corps, in the interest of economy and good government and a decent conception by foreign people of the views and habits and conditions of the American people, ought to be abolished. [Applause.] They form a distinct class, so distinct, I understand, that they scarcely pay any regard to the Senators who vote for their confirmation when once they have approached the throne of royalty. [Laughter.] It is that gang of political reprobates and society degenerates that we ought to wipe out of existence. [Applause and laughter.]

What are you going to do about all these questions? Are you going on in the same line in which you have been going? If you do, your Government will be consolidated and every vested right of the people will have perished before you know it.

There is a remedy. You are drifting rapidly to the exercise of central power. If you shall adopt the policy of the purchase of the telegraphs and telephones, you will have proceeded far to the federalization of power. You will have added thousands of offices to your Government. If you should go further and become the owners of the railroads, you would see a vast army of people who would be in control, a Federal menace to human rights and human liberty under a Constitution and laws in which the people have no part in selecting the officers to administer. Ah, the battle cry of the Progressives in the last campaign will no longer be heard amid the thunder tones of the progressive democracy of the Republic when the people understand that they have no part in their own Government. You have to amend your Constitution so as to bring the people of the United States closer to the Federal Government, to establish more affectionate relations between the masses of the Why is it that in each people and the Federal institutions. of the States to-day there is that spirit of intense loyalty to the institutions of the State, so far as power is exercised in one of these separate sovereignties that constitute this Union? It is because the people in village and hamlet and district and city and county participate in their government. It is because they have a voice in all that is done. Why is it that they feel strangers to the Federal institution in many places? It is because the Federal institution is a stranger to them. You must liberalize your Government more in the interest of Federal power, for in the interest of the Union itself the hour must come when the Federal centralization must, for the good of the people, be increased, and it often happens in a great government that even power must be conferred upon one for the benefit of many. If in the administration of your Federal affairs it becomes necessary that you add to the vast army of your employees, then the counterbalance power must exist.

If the liberty is preserved and equilibrium of government maintained, you must go to the ballot box for the solution. You must let all the people of the country select the postmaster at the place where the office is held; let the patrons select Why should a Democratic President dictate who the postmaster should be in a town or village where the Democrats are in an overwhelming minority? . Why should a Republican President appoint the postmaster in an office in a town which is overwhelmingly Democratic? It is not democratic. offices must remain under the Federal jurisdiction, but the people should elect them. There is no more reason why the people should not elect their postmasters, and after being certified to the proper officer, the President issue a commission, than there is why the people should not elect the sheriff in the counties and have the votes certified to the governor for his

Why this difference in the form of government? The State is a sovereign democracy, and the Federal Government is an imperial despotism in comparison. Why not elect your marshals, your district attorneys, your collectors of internal revenue, so that all the people in these subdivisions of the Gov-ernment shall have a voice in the affairs of the Union? Why should the inferior judges of the United States be given a life tenure? Whenever you vest in a man judicial power, arbitrary and discretionary, as is vested in a Federal judge, he ought to be subject to removal at the will of the people at the close of his term of office. [Applause.] Nearly all of your States elect

the judiciary, and it challenges comparison most splendidly with the Federal judiciary. The State judiciary comes from the people, known of the people, and by the people, and has some sympathy with the masses. That is untrue in the Federal jurisdiction.

Look for a moment. A Federal judge in violation, in my humble judgment, of the spirit of the amendments to the Constitution that provides for jury trials, will instruct a verdict both in civil and criminal cases, thus invading the province of The rule has ever been that judges might sustain, subject to the supervisory power of the appellate court, a demurrer to the evidence, and thereby instruct the verdict, and where there is not a scintilla of evidence to support the case of the plaintiff he might in the exercise of his judicial discretion instruct the verdict; but your Federal judges to-day when the facts are weighed evenly in the balance, when the jury, which is the bulwark of English liberty, is entitled to pass on the facts, instructs a verdict, and in most cases his error can not be corrected because of the immense cost coming to the citizen to reach the Court of Appeals or the Supreme Court. This would not happen often under an election system. The one-man power could not be sustained.

Again, he imposes the punishment in criminal cases. Some of the States are so unwise as to conform to that practice today. No judge ought ever to be permitted to fix the term of a sentence for a citizen convicted of a crime. It is the duty of a jury, and a jury only, because in that hour every human feeling and every human sympathy ought to be aroused in behalf not only of a State whose laws have been outraged, but in behalf of the poor prisoner who under unfortunate conditions may have violated the law. You need a complete revision of your judiciary.

The ballot box and the abandonment of the life tenure in office is our only safe remedy. This Government, if it ever shall advance to the position that our forefathers destined it to hold, must be brought down to the control of the people. We must revere the institutions of the Republic, have the same pride in its history and in its traditions that we have in the

Commonwealths in which we live.

The American citizen must live with the flag above him and the Constitution pressed to his heart, ever providing in love and devotion for the defense of the honor and glory of the greatest people known to the annals of time. [Applause.]

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield two hours

to the gentleman from Minnesota [Mr. STEENERSON].
Mr. STEENERSON. Mr. Chairman, "Carrier of love and sympathy, messenger of friendship, counselor of the lonely, bond of the scattered family, enlarger of the common life," thus Dr. Elliot describes the beneficent postal service. It occupies a very close relation to all the people. It reaches them everywhere. Upon it the most important business and social affairs depend, from the aged father, looking for news from his dear ones far away, to the prattling babe that perhaps marks a few scrawls upon a letter to papa in a distant place.

It serves the people most helpfully and in this respect it is proper to distinguish this governmental activity from other activities of the Government. Government in its derivation signifies, first, to rule or guide, as a ship or boat. It rests upon force, either actual or potential. It moves us when used in that sense against our will. It rests upon law in free governments or in an autocracy upon the will of the sovereign; but in all cases that first sense of the word signifies some coercion applied to men, and we, therefore, are prone to regard it with some sort of disfavor or aversion, because it is one of the instincts of the human heart and the human mind to desire to do as we please to enjoy liberty, and it is the right of men in free states to do so, except as limited by law.

It is founded upon the just principle that each one who uses it shall pay for it in proportion to the amount of the service that he gets. The true idea behind that service is that it shall be self-sustaining; that it shall not be a tax upon the people outside of those who use it, but on the contrary that it shall not be a source of revenue to the people aside from simply

being self-sustaining.

That is the true idea that should guide the management of a postal service. It should be free from a surplus and a deficit as nearly as practicable. That has been the guiding principles in the carrying on of this service almost since the earliest periods of its installation.

The postal business is the best index to the growth and expansion of the country and its business and its social relations and its prosperity. The Federal Government to-day expends most of its energies in what might be called public service, as distinguished from strictly governmental functions. Outside of the War and Navy Departments and the Department of Justice,

the chief work of the other six departments of the Federal Government is of this public-service character, and of these the

Post Office Department is the principal one.

This bill, making appropriations for the service of the Post Office Department for the next fiscal year, carries \$305,247,767, the largest appropriation bill that has ever been brought before Congress. It is not claimed, and can not be claimed, that this appropriation is excessive. The fact that it is a large appropriation bill is not due to extravagance, but to the expansion of the service. I favor every item, with one or two exceptions, that appears in the bill, so that I do not claim that there is any extravagance in the size of these figures. Last year the bill carried \$283,444,171. Ten years ago, when I first had the honor to serve on the Post Office and Post Roads Committee, the bill carried \$153,511,549, so that it will be seen that the appropriations have practically doubled since that time. But it should also be borne in mind that the postal service is to-day self-sustaining, and therefore these appropriations do not involve any burden upon taxpayers in general.

POSTAL DEFICIT.

For many years we had a postal deficit. In 1904 it amounted to more than \$8,000,000, and the following year increased to more than \$14,000,000; in 1906 it amounted to \$10,-516,996; in 1907 it was \$6,350,000; in 1908 it went back to \$16.873,000; and in 1909 to \$17,441,000, the highest in our The postal deficit was, no doubt, largely due to the rapid increase of the Rural Delivery Service. It has often been claimed that the Rural Delivery Service was a gratuity or subsidy to the farmers, but I think in the long run that our postal finances will show that the installation of the Rural Delivery Service tends to stimulate the volume of the general mail to such an extent that after a time it really becomes self-sustain-The quadrennial period, from June 30, 1909, to June 30, 1913, is remarkable for two things. It wiped out the largest postal deficit in our history, of nearly \$17,500,000, and closed with a surplus of \$4,510,650; and, second, for the inauguration of postal savings banks and parcel post.

The gentleman from Tennessee predicted dire results to the Government and the people if postal activities should be extended to telegraphs and telephones. I do not think we are ready for that. Certainly not as long as the spoils system in

the Civil Service remains a debated issue.

FRAUD IN THE MAILS.

But this beneficent service, like many other good things, is sometimes turned to bad uses, and it is no exaggeration to say that hundreds of millions of dollars annually are transferred from the pockets of honest people to the pockets of swindlers through the postal service. Under sections 3929 and 4041 of the Revised Statutes of the United States the department is authorized to issue fraud orders against swindlers using the mails to conduct schemes to defraud, and for many years it was the practice to refuse to deliver such mail, but return it to the sender. For some reason the practice was almost wholly discontinued and reliance placed on criminal prosecutions under the statutes. Thousands of prosecutions and a good many convictions were had. During the last fiscal year 2,879 such schemes were investigated, 510 persons were arrested, and 304 convicted. The 304 persons convicted are estimated to have swindled the people of \$54,000,000, and it is further estimated that in two years prior to June 30, 1912, 1,000 persons who were arrested for such swindling through the mails had obtained by their operations more than \$129,000,000.

I see by the annual report of the Postmaster General that it is proposed to resume the practice of issuing fraud orders, and I am heartily in favor of it, for it is much better to prevent fraud from being perpetrated than to punish the perpetrators after they have succeeded in the swindle. But these criminal schemes to defraud, which are now punishable under existing law, constitute only a small part of the schemes that are actually perpetrated through the mails, or by means of the postal service. There is a class of fraud outside of that which is punishable under the penal code, and which, morally, is just as culpable—and I refer to the prevalence of false and fraudulent advertising of wares, goods, and merchandise in newspapers, magazines, and catalogues carried in the mails. There has been an effort on the part of the best newspapers and periodicals to exclude such advertising from their columns, but a great deal of it still circulates.

The establishment of parcels post has rendered this question more important and urgent than ever. It was a maxim at common law that the purchaser should beware, but the rule of caveat emptor is no longer applicable where the seller and the purchaser are distant from each other, and the latter must

rely upon the written or printed representations of the former. The most flagrant offenders against honest advertising have been, and continue to be, the dealers in patent medicines and in intoxicating liquors. The arts of these dealers in worthless nostrums and poor liquor are too well known to require description, and it is really surprising that respectable journals will give access to their columns to this class of advertisers. I have introduced several bills on this subject which I hope will receive consideration in the near future. One bill is to exclude a certain class of advertisements from the mail entirely, and another seeks to punish the person who inserts a false advertisement in any newspaper or periodical which is intended to and does actually circulate in the mails. Many of the States have enacted laws against false advertising, and that, of course, is entirely within the jurisdiction of the States, so that whatever legislation Congress enacts must be based upon its authority over the mails. But we have the right to punish anyone who circulates this kind of matter in the mail, and proper legislation to that effect, I believe, could be made effective.

It is like locking the stable door after the horse is stolen. Here are the great rascals in New York, Hawthorne and Quincy, who are said to have swindled the American people out of \$17,000,000, and when one of them was sent for a few months to the Atlanta Penitentiary he is, I believe, successfully in augurating an investigation of that institution because he was not treated as nicely as he thought a millionaire ought to be

treated in a penal institution. [Laughter.]

In a recent hearing before the Committee on Interstate and Foreign Commerce it was shown that the practice of misrepresenting common articles of merchandlse, as to value and quality, was and is quite common, and the people swindled in consequence by means of advertisements. This evil of fraud in the mails can be combated, not only by criminal prosecutions and fraud orders in the department, but by publicity, for the more these schemes are given publicity the less opportunity there is for them to succeed. An ounce of prevention is better than a pound of punishment after the damage is done.

THE POSTAL FINANCES.

The Postmaster General, in his report, shows that at the end of the last fiscal year the audited expenditures and adjusted losses exceeded the audited revenues by \$4,510,650.91, and he goes on to state that the last "actual surplus" was announced by the Postmaster General 30 years ago and he criticizes the practice which has prevailed for more than 30 years of ascertaining the surplus or deficit by comparing the audited expenditures and losses with the audited revenues. He claims that by the use of this "faulty method" there was shown to be a surplus of \$219,118.12 for the fiscal year 1911 instead of a deficit of \$720,768.63. He argues that some of the payments which were audited in 1912 should have been charged to 1911. He then proceeds by his new method to show that instead of the surplus of \$4,510,650.91 for the fiscal year 1913 there is actually only a surplus of \$3,841,906.78.

The intimation, of course, is that Postmaster General Hitchcock, for political reasons, shoved over into 1912, by "unusual delay in certifying accounts for payments near the end of the fiscal year," an amount sufficient to show a surplus of \$219,-118.12, instead of a deficit of \$720,768.63. But he estimates the amount shoved over from 1913 into the present year at \$658,744.13, a sum more than 70 per cent of the figures complained of. It is even possible that the estimates are too low and that outstanding claims pertaining to the business of 1913 may yet turn up so as to swell the sum "shoved over" to a greater figure than those attributed to the "unusual delay" in

1911.

But if the reported surplus for the fiscal year 1911 was carried over to 1912, then the 1912 deficit should be reduced accordingly, and the result is substantially the same. Why such prominence is given this matter in the annual report of the department seems at first hard to understand, but an explanation can be found in the fact that the Democratic Party made a campaign issue of this specious argument in the last campaign under the headline "Made deficit a 'profit.' Clever scheme of the Postmaster General fully exposed." They circulated this ridiculously false and unfair campaign article, in which the Postmaster General was charged with juggling the accounts, so as to show a surplus when there actually was a "deficit of nearly \$7,000,000." It now appears from the department's own report that there was no jugglery whatever in Postmaster General Hitchcock's accounts, but that he followed the practice that had prevailed for years. If there was a surplus in 1911 because we did not include all the expenditures of 1911, then they were paid in 1912, and they would increase the deficit, if there was any, for that year,

Postmaster General Hitchcock was at the head of the department until the 4th day of March, last, and the present administration was in power only 3 months and 26 days during the last fiscal year, and it can hardly be contended that there was any great revolutionary reform inaugurated in the department during these few weeks. It stands upon the record that in the quadrennial period from June 30, 1909, to June 30, 1913, during which Postmaster General Hitchcock was at the head of the department, greater results were accomplished than ever before in the history of the country. As I have already said, it was during this period that the two great additions of postal savings banks and parcel post were inaugurated, and the legislation providing for these reforms was Republican legislation, approved and signed by a Republican President. President Taft repeatedly recommended these reforms in his messages to Congress. It is true that the House of Representatives had a Democratic majority in 1912 at the time that the parcel-post law was enacted, but it should be remembered that the bill passed by the House contained no parcel-post provision except one for the delivery of parcels on rural routes.

The House committee reporting the appropriation bill had included a so-called parcel-post provision at a flat rate of 12 cents a pound, with rural-route parcels service; but the 12 cents a pound item was stricken out, and in that shape the bill went to the Senate. In the meantime the national conventions of the two parties convened in June and adopted platforms as

follows:

PARCEL-POST PLANK IN THE REPUBLICAN PLATFORM.

In the interest of the general public, and particularly of the agricultural or rural communities, we favor legislation looking to the establishment under the proper regulations of a parcel post, rates to be graduated under a zone similar in proportion to the length of carriage.

PARCEL-POST PLANK IN THE DEMOCRATIC PLATFORM.

We favor the establishment of a parcel post or postal express, and also the extension of the rural-delivery system as rapidly as practicable.

It will be noticed that the Republican platform declares in favor of the zone system, and more than a month later, on August 24, 1912, the parcel-post law, as proposed and passed in the Republican Senate, was agreed to in the House and approved by President Taft. These are facts and can not be disputed. Experience with parcel post demonstrates further that the present rate is not compensatory in the seventh and eighth zones, but that whatever profit there is is derived from the short hauls, so that the wisdom of the zone system has

I am very glad that the head of the Post Office Department has administered this new law with ability; but I want to call your attention and the attention of the American people in all fairness to the fact that the most difficult period in the inauguration of the service of the parcel post was at the beginning. We have made it a success so far as we know. Now, whether or not it is as great a success financially to the Government as some people claim may be doubted. I am not going to make any calculations on that matter, because I understand there is a commission now sitting, headed by ex-Senator Bourne, which is considering the question of second-class mail pay and railroad mail pay, and when we find out the truth about those things we can better calculate the profits or loss, if any, from this extension of the postal service.

At the time that the debate on the parcel post occurred I ventured the suggestion that there was a difference between ordinary mail, which was carried at a flat rate for any distance, and heavy parcels, and that the distinction was especially important because of the system of railway mail pay. Railway mail pay is based on per mile per pound, or per ton per mile basis, distance multiplied by weight. There is no reduction for long distance or for weight. You pay as much per pound per mile for a package weighing the highest limit as for a letter that weighs a fraction of an ounce to the railroad. much per mile for carrying it 3,000 miles or more across the continent as you do for 1 mile-pay at the same rate per mile.

When it is heavy matter, as parcels sometimes are, of course it should be taken into account in adjusting the rate, which has not been done. As stated by the chairman, there are claims being made by the railroads that they are not sufficiently paid. I do not believe that Congress has been unjust. But I suspend judgment, like the chairman does, until the facts can be fully investigated. I do not believe there is anyone on either side of the House, in Congress or anywhere else, that desires the mail carried at confiscatory rates. It is just that compensatory rates should be paid.

CIVIL SERVICE.

There are several propositions for new legislation in this bill, some of which are necessary and proper and some of which are objectionable. It is proposed to attach these legislative

provisions on this appropriation bill as riders by means of a rule to be reported by the Committee on Rules; otherwise they would go out on points of order. Legislation by means of riders on appropriation bills has been quite too common. That method of legislating should only be resorted to in case of a great emergency, or where the proposed legislation is so interwoven with the texture of the appropriation itself as to make it necessarily a part thereof. The leaders of the Democratic Party, including the chairman of the Committee on the Post Office and Post Roads, when in the minority, always criticized this method of legislation. They declaimed against the practice of attaching riders to appropriation bills with great earnestness, but I venture to say that since they became the majority party in Congress more riders have been attached to appropriation bills than in any other period in our history. Some of these riders have been most objectionable. One of these legislative provisions which it is proposed to attach as a rider to this bill is one which removes assistant postmasters from the classified civil service and makes them the personal appointees of the postmaster.

I did not feel authorized to mark my dissenting report on this bill the minority views, although I knew that all of the Republicans on the committee were opposed to this rider. so happened that the ranking member of the Post Office Committee was absent at his home during the holiday recess, and he returned only last Monday, when Congress convened. There was no time for consultation, because the bill was reported that day. At the time that the bill was reported I requested unanimous consent to file my views. Some one asked if they were minority views, and I said, no, that they were my views, because I did not feel authorized to speak for the whole minority. I did not know whether they would agree to all I said. I had no opportunity to submit it to them, and then the chairman requested permission for the ranking member, Mr. Smith, to file minority views, and the gentleman from Wisconsin, Mr. Stafford, also requested permission for any member of the minority to file his views. These requests were granted, but I had my report ready, and I gave it to the Journal Clerk so as to have it printed with the report on the bill.

Owing to these circumstances a great many members on both sides got the impression that there was disagreement among the Republican members of the Post Office Committee. They spoke to me, but I told them that that was a misapprehension on their There was no disagreement as to the proposition in question. I wrote this report and did not denominate it the minority views, because I believed that there were members of the majority party who shared in the views that I expressed, or at least they were opposed to the adoption of this rider. My reason for that was that at the time of the consideration of the urgent deficiency bill a very large part of the majority party represented in this House voted against that rider placing deputy marshals and deputy collectors outside of the classified service. My recollection is that the vote was 106 to 110. It was not my purpose to make political capital out of this civil-service question. Far be it from me to be so unkind as to do that, but I thought I would appeal to the members of the Democratic Party on this floor who represent States where the civil-service law is not as unpopular as it appears to be in some of the States of this Union, where the sentiment in its favor is strong, and where a Congressman would not last long if he made a speech like the speech just delivered by the distinguished gentleman from Tennessee [Mr. Moon], or like speeches made by other gentlemen who have spoken against the merit system. I thought those gentlemen, gentlemen representing New York and other great States, who voted against the rider in the urgent deficiency appropriation bill, might also vote against this rider for the same reason.

So that I am here pleading for the defeat of this proposed rule to bring in this proposition to take assistant postmasters out of the classified service. I am appealing to Republicans and Democrats alike, and I do it for the reason stated in my report, that it is not a partisan question, because the parties, through their respective platforms, declared they agreed to uphold the merit system. The Democratic Party is pledged to the maintenance of the merit system.

This will be a distinct blow to civil-service reform and the fourth one of the kind that has been inflicted since the advent of the Democrats into power. The first was the exemption in the tariff bill of employees for the collection of the income tax; the second the exemption of deputy marshals and deputy collectors of internal revenue from the civil-service law; third, the exemption of the employees under the recently enacted Federal reserve act. All these acts have been approved by the President, although in the case of the deficiency act, which removed deputy marshals and deputy collectors from the civil service, he

apologized in an explanatory note for signing the bill. And, too, all this has been done in spite of the repeated platform declarations in favor of civil-service reform and the protestations of the leaders of the Democratic Party of friendship for

the merit system.

I therefore have the right to confidently appeal to the men who voted against the rider in the deficiency appropriation bill to vote against the rider in this one and I do it with so much greater confidence because, according to the gentleman from Tennessee, I am supported by the President of the United States. He read a piece from the newspaper to that effect. I know that I am supported by the Postmaster General because I have his official report and I quoted it in my printed views in the report on this bill. Why, therefore, should not all of the supporters of this administration be with me in striking a death blow to this monstrous proposition; this violation of party pledges that appears here as a menace to the postal service? I am not vain enough to suppose that my report, which has been largely quoted in the press of the country, was the cause of any change in attitude on the part of the administration. I am not going to sing with the sparrow that it was I that did it; that I killed Cock Robin. Far be it from me to suggest anything of the kind. No doubt the wise statesman who now occupies the White House would oppose this proposition without regard to the opposition that I might offer. am sorry he did not veto the urgent deficiency bill on account of a similar rider. You will observe that when he signed it he wrote an apology in which he said that the deputy marshals and the deputy internal-revenue collectors would not be less within his authority after the passage of that law than before. His words were:

I am convinced, after a careful examination of the facts, that the offices of deputy collector and deputy marshal were never intended to be included under the ordinary provisions of the civil-service law. The control of the whole method and spirit of the administration of the provision in this bill which concerns the appointment of these officers is no less entirely in my hands now than it was before the bill became law; my warm advocacy and support both of the principle and of the bona fide practice of civil-service reform is known to the whole country, and there is no danger that the spoils principle will creep in with my approval or connivance.

Now, I beg to differ with that legal proposition he makes. I submit it to the lawyers in this House whether, if this proposition is enacted into law, it does not permanently remove the officers therein named from the operation of the civil service? After Congress has declared that the offices shall be outside of the civil-service law and that they may be filled without regard to it, that being the last expression of the legislative intent, has the Executive the right to then cover them into the civil service? I question it. It seems to me upon ordinary principles of statutory construction that they would

remain outside the civil service until altered by law.

We have been entertained by a very able and enlightening discussion of the Constitution and State rights and its effect on the civil service. I am reminded of an incident that occurred the first year I was in Congress. I met at my hotel a gen-tleman about 80 years old, a Yankee from Connecticut, a very interesting old man. He told me that he, with his father, was in business in Washington before the war and that he was here at the time that Daniel Webster was in the Senate and heard his speech dedicatory of the north end of the Capitol. He said he then went up in those days and listened to the debates, and now after having been away from here more than half a century he went up to the Senate and he heard the Democratic Senators talk about the Constitution and State rights, just the same as they did when he was a little boy. He probably was present when no appropriation bill was up, for you will

generally find that a State rights Democrat forgets all about his hobby whenever there is an appropriation in sight.

Now let us consider this matter of the civil service in the light of history, philosophy, and experience. In the first place, What is the civil service? It is defined to be: The departments of the public service that are under the Executive control, that is, neither the military nor the naval. The merit system, as defined in the Standard Dictionary, is "a system of appointments and promotions, especially in Government service, based on merit. In United States politics it is opposed to the spoils And the spoils system is defined to be the practice of distributing Government patronage among the adherents of the political party in power and displacing political opponents without regard to merit."

looking at it historically, when did this controversy first begin in this country between the spoils system and the merit system-between civil-service reform and spoils system? In the nature of things we can not elect all the officers that either rule or serve us. In a democracy officers must either be elected by the people or appointed. To elect the hundreds of

thousands of minor officials and clerks that carry on the administrative and industrial works of the United States Government is manifestly impossible. Are you aware of the fact, or have you forgotten, that this was a vital question at the very beginning of our history as a nation? The gentleman from Tennessee [Mr. Moon] referred to the Declaration of Independence, and I want to refer to it, too. The Declaration of Independence enumerates 27 specifications of grievances against the British Monarch. Among these are:

9. He has made judges dependent upon his will alone for the tenure of their offices and the amount and payment of their salaries.
10. He has erected a multitude of new officers to harass our people and eat out their substance.

It is a matter of history that that monarch went to the extreme in the exercise of absolute power. He imposed what may properly be termed, and what has been termed, a "personal government" upon the British nation, and he extended it to the Colonies. Under that system of personal government the system of patronage grew up, and these appointments were made as a matter of favor, and not as a matter of merit. He appointed, from the highest to the lowest, those who were subservient to him. He therefore imposed upon the Colonies unsuitable and unpopular officials.

That was one of the principal causes of the American Revolution. Sir George Otto Trevelyan, in his History of the American Revolution, states specifically that the King in his abuse of the appointing power and in his exercise of that power without restraint not only caused the war with the Colonies, resulting in their independence, but inflicted a deathblow to that kind

of government in England. He says:

It was a system which, as its one achievement of the first order, brought about the American war, and made England sick, once and for all, of the very name of personal government.

Thereafter the system of parliamentary government, the system of party government, grew up, so that the sovereign no longer had the disposal of the patronage. After the institution of the cabinet system of government in Great Britain the House of Commons assumed not only legislative but executive power, and controlled the power of appointment through the cabinet, which must be in accord with the majority in the House of Commons.

That system has grown, but it has not been coincident with the growth of the spoils system. They have, very much as we have, established a civil service based upon merit, because the men responsible for the appointments are responsible to the people who elect them for that service. So that, whether you look at representative government as developed in the United States or as developed in England, you must conclude that the spoils system is inimical to free institutions.

What is this idea of patronage and favor appointments? it not more pertaining to a monarchy and to absolutism than to free institutions? Is it not susceptible of and liable to abuse? In whose interest is it that every minor office and every office that does not govern, but serves the people, as I said in the beginning of my speech—an office that is simply ministerial or clerical—should be open to the poor and to the rich, to the influential and the uninfluential of every race or previous condition on the basis of merit and examination and appointment as the result? Is it better for the common people, for the public, that it be dispensed by a monarch exercising absolute authority, or his friends, or, if you please, by Senators and Representatives in Congress or irresponsible political bosses? If a Senator or Representative, by means of his power of recommendation to the President, selects a man without regard to merit, is it not a remnant of that old absolutism and privilege that was condemned and which received its death blow in the American Revolution?

Mr. Chairman, will the gentleman yield? Mr. COX. The CHAIRMAN. Does the gentleman yield?

Mr. STEENERSON. I will yield for a short question. Mr. COX. Would the gentleman be in favor of turning all first, second, and third class post offices into the civil service by Executive order without a written examination?

Mr. STEENERSON. I will discuss that. I am very glad the gentleman called my attention to it. Mr. Chairman, how much time have I left?

The CHAIRMAN. The gentleman has half an hour.
Mr. STEENERSON. I will not devote much more of my
time to the discussion of the historical phase, except to say that the framers of our Government did not believe in the principle of appointment by favor by the ruler; did not believe in having the governor or the President or anybody else remove and fill offices as he pleased; because that is the very thing that they complained of in the Declaration of Independence against King George III. Therefore we find that for 40 years after the establishment of the Constitution there were very few removals from office-less than a hundred.

There were only 73 removals in 10 administrations. Washington made 9, John Adams 9, Jefferson 39, Madison 5, John Quincy Adams 2, Monroe 9. In this period the rule was that the President made removals for legal and moral reasons only. President Jackson, in 1829, introduced a new order of things. In one year he made 734 removals, some of them to punish his political enemies, some to reward his political friends, and some to strengthen his party. This was adopting in its widest latitude the theory that the President could remove at his pleasure. The new method, it was said, was borrowed from the politicians of New York, and Mr. Marcy, of that State, in defending it in the Senate, used the famous phrase, "To the victors belong the spoils of the enemy.'

This matter was extensively debated at the time of the enactment of the civil-service law in 1883. In his report Senator Pendleton, the principal author of the civil-service act, and a very eminent Democrat in his day, went over this history at some length.

He spoke of the effect on Congress as follows. I read from page 3 of his report, which is found in volume 3 of Senate reports, first session, Forty-seventh Congress:

The malign influence of political domination in appointments to office is widespread, and reaches out from the President himself to all possible means of approach to the appointing power. It poisons the very air we breathe. No Congressman in accord with the dispenser of power can wholly escape it.

I tell you this, gentlemen, for your own benefit. You have not had very long experience yet. You are in accord with the President who is in power, and Senator Pendleton says that you can not escape this malign influence.

The report continues:

It is ever present. When he awakes in the morning it is at his door, and when he retires at night it haunts his chamber. It goes before him, it follows after him, and it meets him on the way. It levies contributions on all the relationships of a Congressman's life, summons kinship and friendship and interest to its aid, and impose upon him a work which is never finished and from which there is no release. Time is consumed, strength is exhausted, the mind is absorbed, and the vital forces of the legislator, mental as well as physical, are spent in the never-ending struggle for offices.

GIVING OFFICES IN CHARITY.

It has come to be a wide-spread belief that the public service is a charitable institution, furnishing employment to the needy and a home to those adrift. Employment is sought of the Government because it can not be found elsewhere, and to escape actual want. The number of those who thus crowd all avenues of approach to places in the public service is constantly on the increase, and is daily becoming more importunate.

The late Secretary of the Treasury (Mr. Windom)—

An honored Senator from Minnesota at one time-

An honored Senator from Minnesota at one time—
is reported to have said that five-sixths of the applicants for office while he administered the Treasury based their demands not on merit, or fitness, or character, but on their poverty and incapacity otherwise to obtain a livelihood. This class of place seekers follows the public service everywhere and the public man in every position who has influence to exert or a place to fiil. No one can stop his ears to its pitiful cry or resist its importunities. And everyone who walks the streets of Washington or dwells within the shadow of the Government service anywhere in this land is pressed into the work of dispensing charity through the emoluments of official position. No one can criticize the motive which prompts the pressure of this class of applicants for office upon the appointing power, but everyone must see that to yield to that pressure is to subordinate the demands of the public service to the claims of charity and to lose sight of the exigencies of the Government and the standard of excellence in those who serve it in the vain attempt to make it an almoner to the needy. As a rule, such appointees are neither capable nor willing to render service to the Government. They expect to repay personal influence by active political partisan service.

He reaches three conclusions against the speils existent which

He reaches three conclusions against the spoils system, which I commend to your consideration. He also quotes from the speeches of Mr. Garfield and others, which have been quoted in this House recently.

Now right here, while we are speaking of Garfield, I believe it fair to say that if it had not been for the excitement resulting from office seeking and the spoils system, Garfield would not have been assassinated. It is not too much to say that the spoils system was the cause of his assassination.

Now, the places in the service of the Government, outside of the Army and Navy, are given in the last report of the Civil Service Commission as 469,528. Of these, 236,061 held positions subject to competitive examination under civil-service rules. Of the 159,399 persons whose positions are not in the classified service 10,397 are presidential appointees, 8,228 being postmasters of the first, second, and third classes; 36,332 were fourth-class postmasters. These were the figures for 1912.

We are creating new offices constantly, extending the activi-

ties of the Government so that it is within limits to say that the offices now number half a million. About three-fifths of them are in the classified service and at least two-fifths are outside that service. It is interesting to note that at the time

when it was said that the spoils system was first inaugurated under Andrew Jackson in 1829, that he removed 734 incumbents of offices, and there had been less than 100 removed in the 40 years before that. However, it appears in the debates in Congress that President Jackson removed only a small percentage of the incumbents in office, and probably a great deal less than one-fifth, but it so shocked the people's minds in those days that it was generally accepted that he should be considered the father of the spoils system.

I have here the debates that occurred in January, 1832, upon this subject. An interesting circumstance is the fact that this debate as here printed took place in executive session of the Senate, and afterwards the injunction of secrecy was removed, and the speakers, being Henry Clay, Daniel Webster, Senator Marcy, and Senator Calhoun, and others, prepared abstracts of their own speeches, and they are printed in this volume of congressional debates. So they are more brief and concise than if they had followed our system. I have heard gentlemen speak of the aphorism "To the victor belongs the spoils," and attribute it to Andrew Jackson. Of course it was actually the language of Senator Marcy. Now, I want to read here the passage in which it occurred:

It may be, sir, that the politicians of the United States are not so fastidious as some gentlemen are as to disclosing the principles on which they act. They boldly preach what they practice. When they are contending for victory they arow their intention of enjoying the fruits of it. If they are defeated they expect to retire from office. If they are successful, they claim, as a matter of right, the advantages of success. They see nothing wrong in the rule that to the victors belong the spoils of the enemy.

Senator Calhoun said in his report to the Senate that the-Spoils system was as perfect a scheme as could be devised for enlarging the power of patronage, destroying the love of country, and substituting a spirit of subserviency and man worship, encouraging vice and discouraging virtue, preparing for the subversion of liberty, and the establishment of despotism.

This throws a light on human nature as it exists to-day. The debate was on the question of the confirmation of Martin Van Buren as minister to Great Britain. One of the speakers assailed Van Buren as the author of the spoils system, alleging that he had brought it from New York where it originated and put it into practice in the Federal Government. He criticized him for that, and also for another reason, that Van Buren had written a letter to Mr. McLean, minister to Great Britain, saying that another party had come into power and that our former claim for a participation in the colonial trade of the West Indies and other British colonies was untenable, and to remind the British sovereign of the fact that we had a new party in power. For this reason they criticized the appointment. But the main debate turned upon the question of the President's wholesale removal of officials from the civil service.

The contemporaries of Jackson, especially those in opposition, viewed his action in assuming the arbitrary exercise of the appointing power in the same light as I have indicated. Mc-Master, in his History of the People of the United States, Volume VI, page 224, says:

This term (Whigs) had been adopted during the spring elections in New Hampshire and Connecticut by those who, charging the friends of Jackson with restoring the kind of government against which our forefathers rebelled, called them Tories and themselves Whigs.

Senator Marcy, in the speech I read from, says that it is strange that the Senator from Kentucky—referring to Henry Clay-should denounce the spoils system when it was well known that the Senator from Kentucky himself rewarded his friends whenever he had an opportunity, and if he came into power he would be in favor of the system because he had practiced it. So when we charge each other with being addicted to the spoils system when in power, it is nothing new. It is 80 years old, and perhaps older. And this was true of each succeeding administration that followed.

You have noticed in this debate Democrats get up and say,

"What did you Republicans do? Did you not remove certain officers from classified service in order that you might fatten upon the public patronage? Did you not connive at bogus examinations?" It seems to be a sufficient reason for Demoexaminations?" It seems to be a sufficient reason for Democrats nowadays to do wrong because the Republicans did wrong in their day. We have heard it over and over again here. The gentleman from Virginia [Mr. Glass], in defending the rules in the procedure on the currency bill, defending the action making it a party measure under secret caucus rule, said his authority was the practice that prevailed under Speaker Cannon. As a matter of fact, the precedent he cited did not apply at all. The emergency currency law was only considered in Republican conference after the chairman of the Banking Committee [Mr. Fowler] had reported an asset currency bill the majority did not want, and had refused to report anything else, and defied the Speaker and the whole majority. I mention this only to

show that the Democrats nowadays think it is sufficient to answer our criticism by saying, "You Republicans were just as bad as we are now," thereby admitting they now practice what they formerly condemned. That is about all the argument they give us on the question of the merit and spoils system. It is no de-

fense to say that the Republicans did wrong.

Now, to what extent should the classified civil service go; what are its proper limitations? It is a very interesting question. The gentleman from Tennessee [Mr. Moon] and other Democrats I know seem to go to the extent that the whole system of civil service should be abolished. Officials that supervise and carry out general governmental policies should not be in the classified service because it is necessary that they should be in harmony with the men at the head of the Government in order that its policies may be carried into effect. There are also a number of confidential positions near to the head officials

in the administration that are properly excepted.

But is it true that assistant postmasters are of that class? I say no. There is nothing in the argument that it is because they handle the money of the office, because there are other clerks who handle money just as much as they do. The best proof that it is wrong to take these assistant postmasters out of the classified service is the fact that the head of the Postal Service, Democrat as he is, the Postmaster General, who is familiar with the service, is opposed to it. He knows what he is talking about, and every other Postmaster General has taken the same attitude in recent years. I can not see for the life of me why the Democratic Party, as represented on this floor, should support the proposition brought forward by the chairman of the Post Office Committee for a rule making this legislation in order as a rider on this appropriation bill. It violates the spirit of your platform. It is wrong, and it is chock full of trouble for every Congressman, because the more offices, the more patronage you get, the worse you will be off. There are postmasters in my district who were originally appointed by Grover Cleveland, and they are still serving. Fourth-class postmasters, so far as I know anything about it officially, have had a permanent tenure just as much before the late order as they are supposed to have now-or more so. I understand that a different rule has been followed in some other sections of the country, but I believe if so it is largely due to the activities of the Congressman himself, and that he was in error when he sought to dictate patronage of this kind.

Mr. Chairman, I admire the frankness of the gentleman from Tennessee [Mr. Moon], and I am glad that he has spoken so plainly, because it will show to the people of the United States the exact attitude of the dominant party on this question-at least it will if he is indorsed by the Rules Committee and a majority of this House. He is against the merit system. says it endangers the freedom of our country, and he is not alone in that regard. I remember in the debate on the other bill that the gentleman from Florida [Mr. CLARK] and the gentleman from Kentucky [Mr. Johnson] spoke upon this subject, and I shall insert their remarks in the Record. I want to call attention to what the gentleman from Kentucky [Mr. Johnson] said in respect to the rider on the urgent deficiency bill:

But this amendment has for its purpose now a correct one, the democratic one, that when the Democrats are in control they should have the offices. I am one who does not believe that when we have a Democratic President and a Democratic Congress that that contemplates and makes a Democratic administration. I do not believe we will have or can have a Democratic administration until every office is administered by a Democrat. [Applause.] We find the departments in washington, we find the departments in every part of the United States, full of Republicans not in sympathy with the Democratic administration; and they are asked to administer the affairs of the Democratic administration. [Applause on Democratic side.] They are there to make trouble for and to betray the Democratic administration, [Applause on the Democratic side.]

Then he goes on to say that he was for four years internal collector for the largest internal revenue district in the United States, the district in Kentucky, and he knows whereof he speaks, forgetting that for nearly half a year he served under Mr. McKinley, a Republican President, and he would have us believe, therefore, that it was impossible for him to serve without betraying the McKinley administration. He served his full term. He did not resign. He says that they are there to make trouble and to betray the administration. I do not believe any such thing. I do not believe that Mr. Johnson was disposed to betray the McKinley administration nor that he did. You are doing an injustice when you claim that the partisanship of the subordinates is carried to that extent. Why, according to this doctrine where a man and wife belonged to different political parties, as they often do in suffrage States, it would destroy their faith and confidence in each other and the marriage tie!

The gentleman from Florida [Mr. CLARK], October 10, 1913, page 6235, Congressional Record, Sixty-third Congress, first session, said:

Session, said:

I am in favor of Senate amendment No. 8. I am in favor of it principally because I am opposed to the whole civil-service propaganda. [Applause.] I am opposed to it because I believe it is hypocritical, insincere, and fraudulent in its every aspect, and, as my friend at my right suggests, damnable. Mr. Speaker, I am opposed to it because I believe with Andrew Jackson that to the victor belongs the spoils.

I do not believe that any President of these United States can successfully carry into execution his policies unless every agent under him is in line with his policies and believes as he believes. Take it to-day. An eminent Federal official only a few days ago told me that the two stenographers in his office were Republicans; that he could not dictate a letter that had not to be dictated to a Republican. Here we are undertaking to conduct a Government upon Democratic lines with Republican agencies to execute them.

If civil service was honestly enforced, it would not result in bettering governmental administration, but it is not honestly and fairly enforced, and, in my judgment, it never will be. A graduate of Harvard or Yale might be entirely unfit to fill the office of deputy United States marshal, while the most ignorant of men would be first-class deputies, although they could not stand the examination. The whole crooked, fraudulent civil service should be wiped from the statutes.

You are also mistaken in saying that 98 per cent or anything

You are also mistaken in saying that 98 per cent or anything like that amount of the appointments in the civil service are of one party. You can not produce proof of any such absurd thing. Further, the incumbents are not active partisans. Of course, there may be instances like the one cited where the examination is a fraud, etc., but those men should be punished. Let us rather than destroy the merit system join together andimprove the civil service. Let us improve the examination. Let us take measures that will make it a certain protection against incompetency and partisanship everywhere. Then we will inaugurate a reform for which I believe your President has frankly stood and, if he has not been changed lately, he still believes in it and believes in that position, and we will then render the American people a great service.

I share in the anxiety of the gentleman from Tennessee

[Mr. Moon] about the future of this Government. I fear that by creating these many offices we are going to endanger the stability of our institutions unless we have a more perfect system of civil service. I am anxious to see the country I am as truly desirous of the future prosperity and progress. glory of this great country as any other person anywhere and

I am not a strong partisan.

I believe those mistaken advocates of this system which we are now considering will regret their course. If they are ever successful it will come back to punish and plague them. I used to have little patience with men who seemed to have a doubt or express gloomy forebodings about the future of representative government and free institutions, and yet when we see Government activities growing on every hand, expansion in every direction in recent laws and in those proposed, when we see that thousands and thousands of offices are being created by reason of very recent acts of Congress, when we see that the Government through its officers will have control in the near future, not only of business of a public nature, but of private, and of the very credit and means of exchange of the people, I have become somewhat solicitous of the future of my country, especially if we should resort to following that relic of monarchical absolutism, that played-out system everywhere known as the spoils system. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

APPENDIX.

[From Annual Report of the Postmaster General for fiscal year 1913.] POSTAL FINANCES.

POSTAL FINANCES.

The postal revenues for the fiscal year ended June 30, 1913, as reported by the Auditor for the Post Office Department, amounted to \$266,619,525,65, an increase over the preceding year of slightly more than 8 per cent, as compared with a corresponding increase of less than 4 per cent for 1912. The marked gain in the percentage of increase in revenues is to be attributed to the operation of the parcelpost system that was inaugurated on January 1 last.

The audited expenditures for the year amounted to \$262,067,541.33 and the adjusted losses by fire, burglary, etc., to \$41,333.41. The excess of audited revenues over audited expenses and losses is reported to be \$4,510,650,91. This reported surplus is based largely upon the audited accounts of the fiscal agents of the department showing their actual receipts and expenditures during the year, but does not represent the actual financial condition as it is derived from a comparison of amounts that are not properly comparable. It does not include obligations which were incurred but not paid within the year. On the other hand, it does include payments on account of obligations incurred in prior years.

The last actual postal surplus was announced by Postmaster General Gresham 30 years ago, when fair account was taken by him in the financial statement of the department of outstanding obligations. The practice of reporting outstanding obligations was continued by a number of his successors. In recent years, however, Postmasters General have stated the persistently recurring postal deficit in terms of the excess of audited expenditures over audited revenues, and have published as the financial statement of the department of the department of the Post Office Department (an accounting officer of the

Treasury, whose duty it is to andit only actual receipt and disbursement of funds), without taking into account the outstanding obligations for the service of the year on which report is made. Although the overlapping payments on account of prior years compensate in a measure for the obligations incurred on account of the year for which report is made, but which are not paid until subsequent years, the element of error inherent in such a method of stating the financial condition arises from the effect of the natural growth of the service on the items of cost transposed. For this reason the payment for prior years tended always to be less than the corresponding outstanding obligations of the current year, and this practice of inaccurate statement has had the effect, therefore, of making the deficit announced each year less than the actual deficit. Unusual delay in certifying accounts for payment near the end of the fiscal year, although fully justified, also results in unduly increasing the payments in subsequent years with a like understatement in the accounts for the current year.

By the use of this faulty method a surplus of \$219,118,12 was shown in the annual report of the department for the fiscal year 1911, in which the claim was advanced that the service had finally been made self-supporting. Taking into account the outstanding obligations for that year, which were not reported, there was in reality a deficit of approximately \$732,301,90. The actual deficiency for the year 1911, hased on payments on account of that year which were made up to June 30, 1913, was \$720,768,63, and obligations are still outstanding amounting to approximately \$11,533,27.

This report states the audited surplus of \$4,510,650,91, reported for the fiscal year 1913 by the Auditor for the Post Office Department, for what it really is, namely, the amount by which the audited revenues have exceeded the audited expenditures actually made within the current year. This is necessary and useful information, but it bears obliquely on the r

Statement of revenues and expenditures for the fiscal year 1913, based upon the estimated expense of the service for that year, irrespective of the time when payment was or is to be made.

Reported revenues Charges against revenues for allow-ances to postmasters on account of fire, burglary, etc..... \$266, 619, 525. 65 41, 333, 41

ment funds.

262, 067, 541. 33

Payments during fiscal year 1913 on account of prior years.

Estimated surplus for the year 1913

3, 841, 906, 78

year 1918

3, 841, 906. 78

It is gratifying to report that on this basis the total expenses of maintaining the postal service for the fiscal year ended June 30, 1913, is found to be exceeded by the revenues for the same period, that there is an actual surplus of \$3,841,906.78, and that the postal service is now for the first time since 1883 self-supporting.

However, it should be borne in mind that certain other factors of cost, such as the annual rental value of Federal buildings, fixtures, and equipment used wholly or in part for postal purposes, and the expenses incident to the conduct of the Post Office Department and the office of the Auditor for the Post Office Department, are not charged against the postal service, nor does the postal service receive credit for all functions performed—as, for example, free transportation of franked and penalty mail and the virtual subsidy of \$50,000,000 on second-class matter, which, if accounted for, would much more than offset these costs.

For a statement of the audited revenues and expenditures attention is invited to the financial summary on page 44 of this report.

VIEWS OF MR. STEENERSON.

This bill was considered by the committee in a nonpartisan spirit, which has been customary in that committee for years, and only on a few points were there irreconcilable differences developed among the members. The principal one of these is the proposal to remove assistant postmasters from the classified civil service and make them the personal appointees of the postmasters. The clause is as follows:

"Sec. 6. That hereafter any assistant postmaster who may be required by law or by authority or direction of the Postmaster General to execute a bond to the Postmaster General to secure faithful performance of official duty may be appointed by said Postmaster General, who may require such bond, without regard to the provisions of an act of Congress entitled 'An act to regulate and improve the civil service of the United States,' approved January 16, 1883, and amendments thereto, or any rule or regulation made in pursuance thereof, and the Postmaster General shall have power to revoke the appointment of any assistant postmaster and appoint his successor at his discretion, without regard to the act, amendments, rules, or regulations aforesaid."

It is proposed on the part of the majority of the committee to include this vicious rider as a part of this appropriation bill by a special rule for that purpose. The policy of inserting riders on such bills is vicious,

and to resort to it can only be excused in case of a great public emergency. The Democratic Party, when in the minority in this House, uniformly declaimed against it, but no sooner were they in power than they resorted to it at every opportunity. The proposal is so radically wrong and vicious that it could not possibly receive the approval of Congress coming as a separate measure, but it is proposed in this way to force it upon Congress and the Executive.

There are about 2,400 assistant postmasters in the United States, practically all of whom have entered the classified service by a civil-service examination. It is proposed to take these tried and faithful public servants out of the classified list and make their tenure of office dependent on the whim of the postmaster appointed under the spoils system as a reward for party service. In many, if not most, cases it would be equivalent to a dismissal from office without cause or excuse. But the injustice of the proposal as affecting these men is not the main objection to it, but that it is an attack on the merit system and civil-service reform generally. It is a backward step, and will be injurious not only in its effect on the postal service, but to the cause of good government generally. It is no step in the direction of the readoption of the spoils system.

I submit that this is not a party question, for the simple reason that all political parties represented in Congress in their respective platforms declared in favor of civil-service reform and the merit system. The Democratic platform, upon which the majority Members of this House were elected, reads as follows:

"The law pertaining to the civil service should be honestly and rightfully enforced, to the end that merit and ability shall be the standard of appointment and promotion, rather than service rendered to a political party; and we favor a reorganization of the civil service with adequate compensation commensurate with the class of work performed, for all officers and employees; we also favor the ext

Mr. SAMUEL W. SMITH. Mr. Chairman, how much time was consumed by the gentleman?

The CHAIRMAN. Two hours. Mr. SAMUEL W. SMITH. I yield 20 minutes to the gentleman from Illinois [Mr. Copley].

Mr. COPLEY. Mr. Chairman, a few weeks ago, as a member of the Committee on Post Offices and Post Roads, I voted with a majority of the Democratic members to remove assistant postmasters from the operation of the civil-service law. Some people might say that I voted to remove them from the protection of the civil-service law, but that will be determined after I have presented my reasons for so doing.

This vote was entirely at variance with every act and word of my life, and was cast only after mature deliberation and cast only in the light of my own experience in the working of the present civil-service law.

My field of observation has been limited to practically the one district which I have the honor to represent in this Congress, with here and there an occasional glimpse beyond its borders out into the State of Illinois. In justice to my fellow members of the Progressive Party as well as myself, I am going to cite you examples of several years' working of the

civil-service law in my State and my district.

I take it that the highest conception of civil service involves an ideal as well as a condition, the ideal being that every man who serves the Federal Government ought to give that service his whole thought and all his time, whether he be in the list known as "classified" or in the list covered by the term "presidential appointment." The spirit is the same, the ideal is the same, and it is this ideal which I want to see fostered and codified into law, not a law which furnishes immunity if the spirit is broken in the interest of the political satrap and which is rigidly enforced if the spirit is broken contrary to the interest of the overlord. In other words, the civil-service law which protects certain men in the so-called classified service if they do the bidding of their masters, one which subjects them to every sort of indignity, demotion, and even dismissal if they do not is not a good law according to my belief.

I shall take the liberty of disregarding the example of the distinguished chairman of this committee. In the concrete instances cited I shall give names and dates.

The State of Illinois was one of the first in this Union to adopt a State-wide primary law. In the primary of 1910, held on the 15th day of September of that year, I presented my name as a candidate for Congress. Realizing exactly the condition of affairs in my State and my district, that at least two-thirds in number of the newspapers were either owned directly or

controlled by men who were then filling Federal offices, it was perfectly apparent how impossible it would be to present my case fully and fairly to the people of the district; and, as a matter of fact, out of 37 newspapers printed in that district at that time 17 refused to accept my advertisements, couched in plain, simple terms and expressed in dignified, courteous, and gentlemanly language. Each one of these papers was con-trolled by a Federal officeholder in the district. Evidently some other method must be used to reach the voters. Consequently I went to one of the newspapers, the Aurora Beacon, published in my home city of Aurora, Ill., and asked the editor if I might pay for a certain number of copies of his paper for one month prior to the primary and have the paper sent through the mails in the regular course of trade during that period. He wrote Mr. H. M. Bacon, then superintendent Division of Classification, Post Office Department, asking if this would be construed as a violation of the law designed to prevent the indiscriminate use of the second-class privilege by news-papers and other publications. Mr. A. M. Travers replied for Mr. Bacon under date of August 15, 1910, that it would not I shall attach to my speech at this point copies of all these

Mr. Chairman, I will here ask unanimous consent to print

these letters in my remarks.

The CHAIRMAN. Without objection, permission will be granted.

There was no objection. Mr. COPLEY. I will only read one or two.

AURORA, ILL., August 6, 1910.

Aurora, Ill., August 6, 1910.

Mr. H. M. Bacon,

Superintendent Division of Classification,

Post Office Department, Washington, D. C.

Dear Sir: A politician wishes to subscribe for one month to the Aurora Beacon, for several hundred subscriptions, paying for the same in advance and furnishing the list of names.

Will you kindly tell us whether or not this will come under the head of paid subscriptions or sample copies? Will you kindly inform us also how many sample copies we would be entitled to send out on the basis of 10,000 paid circulation, 2,600 of which goes through the mails?

With best regards, and hoping to meet you again at the Inland Daily meeting, I am,

Very respectfully,

AURORA BEACON PUBLISHING Co., A. M. SNOOK, President.

Post Office Department, Third Assistant Postmaster General, Washington, August 15, 1910.

Mr. A. M. Snook,
President the Aurora Beacon Publishing Co.,
Aurora, Ill.

President the Aurora Beacon Publishing Co.,
Aurora, III.

Dear Sir: Your letter of the 6th instant, stating that "a politician wishes to subscribe for one month" for several hundred copies of the Aurora Daily Beacon—admitted as second-class matter at Aurora, III.—and inquiring whether the persons to whom such copies are sent may be regarded as a proper part of the "legitimate list of subscribers" for the publication, has been received.

In reply to your inquiry with regard to the rate of postage chargeable upon such copies, you are informed that under an opinion of the Assistant Attorney General for the Post Office Department subscriptions of this nature. If made for the purpose of circulating information of a public character and not in order to circulate private advertising, although paid for by others than the recipients, may properly be included in the "legitimate list of subscribers" required by the law. Such subscriptions do not affect the second-class status of the publication unless the number thereof, considered in connection with the character of the paper and other circumstances, brings the publication within the following prohibition of the statute:

"Provided, however, That nothing herein contained shall be so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes or for free circulation or for circulation at nominal rates."

Under this ruling it is the practice of this office to accept at the usual second-class rates of postage copies mailed in fulfillment of so-called "political" subscriptions.

In answer to your question regarding sample copies, your attention is invited to paragraph 5, section 456, Postal Laws and Regulations, on pages 20 and 21 of the inclosed pamphlet, from which you will see that sample copies of the Aurora Daily Beacon may be accepted for mailing at the rate of 1 cent a pound:

"** * to the extent of 10 per cent of the total weight of copies mailed to subscribers and not upon the basis of the weight of copies mailed t

A. M. TRAVERS, Acting Third Assistant Postmaster General.

United States Post Office, Aurora, Ill., September 5, 1910.

A. M. Snook, President Aurora Beacon Publishing Co., Aurora, Ill.

DEAR SIR: In mailing the many sample copies that you have been doing since September 1 you are violating the postal laws and defrauding the Government. The extra copies should not be mailed with your regular subscribers and should also have stamps affixed. Let me know what you are going to do about it.

L. A. CONSTANTINE, Postmaster.

UNITED STATES POST OFFICE, Aurora, Ill., September 12, 1910.

Mr. A. M. Snook,

President Beacon Publishing Co., Aurora, Ill.

Dear Sir: I am in receipt of a communication from the Third Assistant Postmaster General, Washington, D. C., under date of September 9, 1910, containing the following instructions, the conditions of which I wish you would comply with at once:

"Please obtain from the publisher and forward a statement showing the regular circulation of the Aurora Beacon as to subscribers, the number of extra copies of the latest issue of the publication mailed to persons who were not actual subscribers for the same, and a full and detailed explanation of the arrangement under which these extra copies are mailed.

persons who were not actual subscribers for the same, and a full and detailed explanation of the arrangement under which these extra copies are mailed.

"If the extra copies thus mailed are paid for by any person or persons other than those to whom the copies are sent, please request the publisher to give the name of the person paying for the same, the interest which such person has in the circulation of the publication, whether the insertion of any matter in the publication is paid for by the person who pays for the copies, or by any other person or persons in his behalf, and if so, please identify such matter. Finally, request the publisher to state what evidence he has to show that the persons to whom these extra copies are mailed have agreed to accept the same or to regard themselves as subscribers.

"As it is impossible to determine accurately the number of extra copies of the publisher's practice in offering such extra copies for mailing intermingled with the copies offered for mailing to regular subscribers, you are directed to estimate, as well as possible, the number of extra copies of the paper offered for mailing over and above the number mailed to regular subscribers. For this purpose the weight of the mailings, or the number of copies mailed to subscribers in the week before the mailing of the extra copies began, may be taken as a basis. Upon the number of copies thus obtained you are further directed to require a deposit in money to cover postage at the transient second-class rate until the question whether such copies may be accepted at the publisher's second-class rates has been determined by this office."

Yours truly,

Louis A. Constantine, Postmaster.

THE AURORA DAILY BEACON, Aurora, Ill., September 24, 1910.

THIRD ASSISTANT POSTMASTER GENERAL, Washington, D. C.

DEAR SIR: The inclosed copy of a letter to Mr. L. A. Constantine, postmaster at Aurora, Ill., will probably give you all the information you desire in regard to the deposit of \$400 demanded by the Aurora postmaster from the Aurora Beacon, in connection with the recent mailing of a number of so-called "political subscriptions" by the

These extra subscriptions, as you will see by the correspondence submitted, were accepted and sent out in accordance with instructions given us from your office under date of August 15, 1910.

We trust that you will kindly give the matter your prompt attention, and wish to thank you for the favor.

Very respectfully,

[Inclosure.] THE AURORA DAILY BEACON, Aurora, Ill., September 23, 1910.

AURORA BEACON PUB. Co., A. M. SNOOK, President.

Mr. L. A. CONSTANTINE, Postmaster, Aurora, Ill.

DEAR SIR: In reply to your favor of September 12, in which you quote a letter received from the Third Assistant Postmaster General, Washington, D. C., under September 9, 1910, as follows:

"Please obtain from the publisher and forward a statement showing the regular circulation of the Aurora Beacon as to subscribers, the number of extra copies of the latest issue of the publication mailed to persons who were not actual subscribers for the same, and a full and detailed explanation of the arrangement under which these extra copies are mailed

detailed explanation of the arrangement under which these extra copies are mailed.

"If the extra copies thus mailed are paid for by any person or persons other than those to whom the copies are sent, please request the publisher to give the name of the person paying for the same; the interest which such person has in the circulation of the publication; whether the insertion of any matter in the publication is paid for by the person who pays for the copies, or by any other person or persons on his behalf; and if so, please identify such matter. Finally, request the publisher to state what evidence he has to show that the persons to whom these extra copies are mailed have agreed to accept the same or to regard themselves as subscribers.

"As it is impossible to determine accurately the number of extra copies of the publication mailed, as a result of the publisher's practice in offering such extra copies for mailing intermingled with the copies offered for mailing to regular subscribers, you are directed to estimate, as well as possible, the number of extra copies of the publisher of copies mailed to subscribers in the week before the mailing of the extra copies che weight of the mailings or the number of copies mailed to subscribers in the week before the mailing of the extra copies began may be taken as a basis. Upon the number of copies thus obtained you are further directed to require a deposit in money to cover postage at the transient second-class rate until the question whether such copies may be accepted at the publisher's second-class rates has been determined by this office.

"Yours truly,"

"LOUIS A. CONSTANTINE, Postmaster."

In accordance with your request we will state that our copies sent regularly through the mail at this time to our regular paid subscribers number 2,726. Beginning with the 27th day of August, 1910, and continuing until the 13th day of September, 1910, we have sent through your post office, according to our own records, the following number of papers in addition to our regular list:

Aug. Aug. Aug. Sept. Sept. Sept.	27	1, 915
Ana	29	2, 325
Mug.		
Aug.	30	2, 300
Ang.	31	2, 300
Claus.	4	2, 640
sept	1	
Sept.	2	2, 620
Cont		4 050
DUDL.	0	4, 000

Sept. Sept. Sept.	6	4, 650 4, 650 4, 650 4, 650 4, 650 4, 650 4, 650
	Total	42, 460

These papers, in accordance with instructions given to the Beacon in a letter written by A. M. Travers, Acting Third Assistant Postmaster General, together with our list of regular subscribers, were mailed and paid for at second-class rates. This was done for the entire time and for all the papers which we have enumerated. On receipt of your letter of September 12 we deposited with the Aurora postmaster a certified check for \$400 on his demand, and on the dates of the 12th and the 13th of September marked the packages carrying the special subscription list "Special," that it might be distinguished by the Post Office Department from the regular list.

With the date of September 13, owing to your notification that the Post Office Department intended to exact from us 1 cent each for every paper sent other than our regular list, we discontinued mailing the so-called "political subscriptions," although we had received an order to send the same for a full month and the money had been deposited at our office to pay for the same at our subscription price.

My authority for sending these extra papers at our pound rates was the following letter from the Third Assistant Postmaster General:

"Post Office Department."

"THIRD ASSISTANT POSTMASTER GENERAL, "Washington, D. C., August 15, 1919.

"Mr. A. M. Snook,
"President Aurora Beacon Publishing Co.,
"Aurora, Ill.

"President Aurora Beacon Publishing Co.,

"President Aurora Beacon Publishing Co.,

"Aurora, III.

"Dear Sir: Your letter of the 6th instant, stating that 'a politician wishes to subscribe for one month' for several hundred copies of 'the Aurora Dally Beacon'—admitted as second-class matter at Aurora, III.—and inquiring whether the persons to whom such copies are sent may be regarded as a proper part of the 'legitimate list of subscribers for the publication,' has been received.

"In reply to your inquiry with regard to the rate of postage chargeable upon such copies, you are informed that under an opinion of the Assistant Attorney General for the Post Office Department subscriptions of this nature, if made for the purpose of circulating information of a public character and not in order to circulate private advertising, although paid for by others than the recipients, may properly be included in the 'legitimate list of subscribers' required by the law. Such subscriptions do not affect the second-class status of the publication, unless the number thereof, considered in connection with the character of the paper and other circumstances, brings the publication within the following prohibition of the statute:

"Provided, however, That nothing herein contained shall be so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates."

"A. M. TRAVERS,

The extra papers sent out were subscribed for and paid for by Col. I. C. COPLEX, who is a candidate for Congress, in behalf of his own candidacy and that of friends on the legislative and county tickets, whose cause the Beacon was supporting. The list of names to whom papers were being sent were furnished by Mr. CopLex and other candidates. The labels on the addresses stated that the subscriptions were paid up to September 22, and more than 99 per cent of the papers sent were delivered to and accepted by the people to whom they were addressed.

Previously, to and during the directions.

paid up to September 22, and more than 90 per cent of the papers sent were delivered to and accepted by the people to whom they were addressed.

Previously to and during the time these papers were circulated advertisements were carried in the Beacon for Mr. Copley and for most of the other candidates before the people at the regular commercial advertising rates of the Beacon, the extra circulation having no consideration whatever in securing the ads or in the charge therefor. No political advertising whatever was solicited by the Beacon.

Mr. Copley, who subscribed for the papers, is a stockholder in the Beacon, but has little to do with its active management, and the Beacon was only one of three papers in his district with which he made similar arrangements for extra circulation in distributing his propaganda and that of his friends among the other candidates.

No other papers were interfered with by the postmasters in the towns where they were issued.

We would not have accepted these subscriptions at the price we did nor would we have attempted to send them through the mail at pound rates as regular subscriptions except for the instructions which we received direct from the Third Assistant Postmaster General, wherein he stated that these "so-called political subscriptions" would be accepted by the post office at usual second-class rates of postage.

We ask you, therefore, in all fairness, to at once return to us our cleck for \$400, which you required us to deposit and to cease any further attempts to annoy us in the publication and distribution of a legitimate, high-class newspaper, even though the politics of that paper be opposed to the wishes of the present incumbents of the post office in this congressional district.

Very respectfully,

Aueona Beacon Publis.ams Co.,

A. M. Snook, President,

AURORA BEACON PUBLISHING Co., A. M. SNOOK, President.

POST OFFICE DEPARTMENT,
THIRD ASSISTANT POSTMASTER GENERAL,
Washington, October 15, 1910.

Mr. A. M. SNOOK, President the Aurora Daily Beacon, Aurora, III.

Mr. A. M. Snork,

President the Aurora Daily Beacon, Aurora, III.

Dear Ser: I have received your letter of the 24th ultimo, with which you forward a copy of one directed by you to your postmaster, regarding the mailing of extra copies of certain issues of the Aurora Daily Beacon to persons who had not themselves paid for the same. In your former communication to this office you inquired whether "several hundred copies" for which "* * a politician wishes to subscribe for one month * * paying for the same in advance and furnishing list of names," might be accepted at the publishers' second-class rates of postage.

It now appears that in fact several thousand extra copies of various issues of your paper were mailed. It also now appears that the person who paid for these extra copies was Mr. I. C. Copley, who was a candidate for office, and that his advertisement appeared in the various issues of which extra copies were mailed. This would tend to indicate that these extra copies fell within the provisions of paragraph 3, section 455. Postal Laws and Regulations, on page 19 of the inclosed pamphlet, and were therefore subject to the transient second-class rate of postage.

Again, although you stated that these copies were to be mailed at Mr. Copley's order for one month, from August 27 (or up to September 22—your letter upon this point is not clear), you censed to mail them on September 13, immediately upon notification by your postmaster that this office was investigating the matter with a view of determining whether the transient second-class rate was not properly due on the copies. This tends to strengthen the inference that the copies were not sent to subscribers, but were circulated free by the publishers.

You say that—

"* * more than 99 per cent of the papers sent were delivered."

which you may care to submit upon the doubtful points involved.

Kindly forward for examination by this office copies of each of the various issues of which extra copies were mailed on behalf of the various issues of which extra copies were mailed on behalf of the Coplex.

A. M. Travers,

Acting Third Assistant Postmaster General.

A. M. TRAVERS, Acting Third Assistant Postmaster General.

THE AURORA DAILY BRACON, Aurora, Ill., October 28, 1910.

Mr. A. M. Teavers.
Acting Third Assistant Postmaster General,
Washington, D. C.

DEAR SIE: Replying to your favor of October 15, I am surprised at the contents of your letter, in which you intimate that you should regard extra copies of the Beacon, sent out a month since, as coming under that clause of the postal law requiring a 1-cent stamp for each

the contents of your letter, in which you intimate that you should regard extra copies of the Beacon, sent out a month since, as coming under that clause of the postal law requiring a 1-cent stamp for each copy.

These papers were sent out only after we had been directly authorized by you, in your letter of August 15, to send them as regularly paid subscriptions. We explained to you exactly in our letter how we intended sending them, and there was no mistaking your instructions "that the Post office Department had and would continue to regard so-called political subscriptions as regular paid subscriptions." It is true that the original order given us was for less than 1,000 copies, but as the campaign developed Mr. Coplex, the candidate in question, saw fit to increase his order, furnishing us a list of names, supposed to include practically every voter within a certain radius of Aurora. Mr. Coplex furnished us a list of names, to which the papers were sent, and the regular subscription price was charged by the Reacon, and Mr. Coplex furnished us a list of names, to which the papers were sent, and are open for your inspection.

Mr. Coplex's original order to the Beacon was to send each of these subscriptions for a full month, but owing to the fact that the local postmaster served notice on us that the department intended to change its ruling and exact 1-cent postage on each copy, a price which is equal to the regular subscription price of the Beacon, and also required us to deposit a certified check for \$400 to cover the cost of the same, the extra papers were then discontinued.

Mr. Coplex had been notified of the increased cost which the post office purposed to enforce, and as he did not care to bear the extra expense advised the Beacon to discontinue sending further copies.

We are sending you, under separate cover, copies of the Beacon of the dates when the extra mailing was in progress. You will note that they are all legitimate newspapers, with the usual amount of general news and editorial features, as w

nomination for Congress and Session.

If you will kindly refer back to your letter of August 15, which shows how clearly your authorization was for us to go alread with this extra distribution, every copy of which was ordered and paid for by Mr. Corlex, handling it as regular second-class matter, I think that you will promptly decide the case in our favor and instruct the Aurora post office to return our \$400.

Very respectfully,

Aurona Beacon Publishing Co.,
A. M. Snook, President.

Two days after the first batch of papers were sent out carrying my advertisement the local postmaster at Aurora, Mr. L. A. Constantine, notified the Beacon in a letter that they were violating the postal laws and were likely to have the papers excluded from the mails. The editor replied, showing him Mr. Travers's letter as his justification. Within 48 hours after this interview Mr. R. P. Goodwin, then an Assistant Attorney General of the United States and assigned to the Post Office Department, who at that time lived in Aurora, dropped into town and immediately ruled that the paper was violating the postal rules and was liable to exclusion. At once the editor of the paper put up a certified check of \$400 to cover any possible first-class postage necessary and demanded that no action be taken on that certified check until a final ruling had been secured from the department. Mr. Constantine or Mr. Goodwin evidently at once took the matter up with Mr. Travers, and he at that time replied, unquestionably inspired from exactly the same source as were Mr. Goodwin and Mr. Constantine, receding from his former decision and trying to find some place in which the newspaper had violated the confidence he had placed in it.

There was a sequel after my nomination and election. called upon the Postmaster General and presented the entire case to him orally. A few days after my visit the certified check was returned to the paper without any comment. The check was given September 13, 1910, and returned December

At the same time the papers hostile to me in the district were being circulated in exactly the same manner by my opponents,

being circulated in exactly the same manner by my opponents, none of whom paid first-class postage, and none of whom were asked to pay first-class postage, and carried to every voter in the district by every city and rural carrier.

One of the postmasters of the district, Mr. Ernest G. Howell, of Geneva, Ill., laughingly asked some of his fellow postmasters why they made any such trouble as that, and suggested that he had a plan which was just as efficacious and which resulted in exactly the same thing, viz, he simply dropped the several papers per day which were sent to his office in the basement of the post office until the amount reached into thousands and finally sold them for old paper. Whether he pocketed the receipts or not I am unable to say, but I do repeat the charge, which I have previously made, that they were dumped in the basement of his office practically in toto during the month covered by that period under discussion and prior to the primary

Every postmaster in my district, whether presidential or covered by the classified service; every carrier, whether city or rural; every assistant postmaster or supervisory employee, and every other employee of the Federal Government in my district was instructed and driven to do his utmost to encompass my defeat.

I was asked to address the convention of the Illinois Rural Letter Carriers' Association on August 8, 1913, which was held in my home city of Aurora, and I told them at that time that the one thing they needed more than anything else was a civilservice law which was designed to protect them so long as they did their duty and which punished them whenever they did not. I recalled the circumstances of this campaign two and one-half years ago, and made the charge that practically everyone was driven by his political overlord to his best endeavor to encompass my defeat, but reaffirmed for them my belief in a civil-service law which would protect them if they did refuse to do the bidding of this overlord and which would punish them if they did such bidding. Immediately after the address more than 15 carriers employed in my district came up and said, in the presence of more than 50 men, that I had told the absolute truth; that they had all been lined up, in many instances en masse, and given their orders what to do.

There is on file in the Post Office Department, or was only two years ago, the report of inspectors who were sent to the city of Joliet where two rival candidates for the post office were striving mightily each for his own success, and charges of incompetence were made against both of them indiscrimi-The department was asked to send inspectors and did so, and the report unqualifiedly stated that neither candidate was fit for the position, and yet one of these two, Mr. John T. Clyne, was appointed March 3, 1903, and has been reappointed twice since that date, and is still postmaster at Joliet. I do not know whether this report is still on file or not, but I have seen it with my own eyes and know that it was there two years The then First Assistant Postmaster General, in answer to a question of mine whether he thought the man ought to have been appointed under those circumstances, unhesitatingly replied that he did not.

September 11, 1884, Miss Minnie Dillon was appointed in the post office at Aurora, Ill., to a clerical position. She worked under successive administrations-Republican, Democrat, Republican, Democrat, and again Republican-working her way up until she held the best clerical position to be occupied by a woman in that office, namely, the money-order clerk. On the 20th day of January, 1898, the same L. A. Constantine, to whom I have referred, was appointed postmaster, and immediately took into the office the destructive spirit of political organization which has done much to ultimately overthrow the political hierarchy that controlled that district for a great many years. Miss Dillon came from a large and influential Democratic family, although one of her brothers was a Republican. Her father and all of her brothers for a few years after appointment supported the Republican Congressman in that district, but did not support him and his coterie of followers in their vain efforts to control local political affairs. Then began a series of petty persecutions and indignities and demotions until Miss Dillon found herself occupying the most unpleasant position of any clerk in the office. Many times she was told that if her family would "get right" there would be no trouble, but, being unable to influence them in such local political affairs, she was made the target of every conceivable kind of persecution that could suggest itself to the miserable, little mind that directed the policies of that office.

The culmination finally came when the postmaster, after making, first, almost impossible hours—beginning in the early morning and having a long recess at noon, and then on again in the evening—and finding that she still remained at her post, silently suffering these indignities and being unable to dislodge her and unable to find any fault with her in her work which would warrant her discharge, suddenly, on the 14th of October, 1911, came to her and told her that he was going to hold out the sum of \$28 from her salary, as, he alleged, she was short in her accounts that amount. This was too much for the woman, who had then been 27 years in the service, whose family name had been a synonym for integrity and for honesty of purpose for over half a century in the city of Aurora. She told the postmaster that he was entirely wrong and brought her father and brother down to the office to see the postmaster. This was an infraction of the rules and her first. Immediately, an assistant of his saw to it that a report was sent to the Chicago papers that this lady had slapped the postmaster's face, which, according to the testimony of both at a subsequent hearing, was entirely erroneous. She was suspended for this serious breach of rules, and shortly thereafter preferred charges against the postmaster while awaiting her own trial, copies of which I shall herewith attach. The evidence developed by the subsequent trial of Miss Dillon entirely exonerated her and showed that the \$28 shortage was the fault of another clerk, as the official report on file in the Post Office Department will confirm.

Mr. Chairman, at this point, by unanimous consent, I will put these in the RECORD.

The CHAIRMAN. Without objection, the permission will be granted.

There was no objection.

There was no objection.

To the Hom. Frank H. Hitchcock,

Postmaster General, Washington, D. C.:

The undersigned, Minnie Dillon, of the city of Aurora, county of Kane, and State of Illinois, respectfully represents that she is of the age of 48 years, and for 28 years last past continuously has been employed in the post office in said city of Aurora. During the first 23 years of such service she had charge of the money-order and registry department. Subsequent to that time she has been employed as money-order clerk, and since August 1, 1900, as stamp clerk, and that her employment is regulated by what is termed the civil service in force in the Post office Department; that on account of the fact that she has been unable to influence her father's family in the support of certain political affiliations in the interests of Louis A. Constantine, postmaster of Aurora, under whom she is employed, she has been for nearly seven years last past made the subject of petty annoyances and charges for the purpose of forcing her to resign her position in that office; that she has been charged with being discourteous and uncivil in her treatment of customers, being short in her accounts, and in many ways conducting herself in a manner not in keeping with the full requirements of the service, all of which she charges are untrue and without any foundation whatsoever; that on her return from her annual vacation, on the 8th day of October, 1911, the stamp window and supplies were turned over to her without being checked, and on the 14th day of October, 1911, there was found to be a shortage of \$36, \$8 of which was afterwards accounted for by error on the part of other employees, and that the remaining portion will be taken out of her salary at the end of the month; that she claims that there is no means of showing that the shortage was caused by any fault on her part, and that there is no means by virtue of which she is able or has been permitted to review the records and accounts in order to determine wherein or against whom the

Charged. She further claims that in the manner in which the effice of post-master in Aurora has been managed many things have been done and are being constantly done in the office that are not in keeping with

the rules and regulations governing the same, and in substantiation of said condition makes the following specific charges:

I. That the clerks of the office are constantly away from the office during working hours, frequently three or four days at a time, and almost daily many hours without making any report or charge or offset on salary on account thereof, as required by the rules of the

offset on salary on account thereof, as required by the rules of the office.

II. That during the last two years clerks have been and are being employed in the office not under the civil service regulating same or under bonds, as required, when at the same time there are several parties on the waiting list of the civil service eligible thereto.

III. That clerks not on the pay roll are doing work in the office, and the salary drawn therefor is in the name of and by other parties.

IV. That the postmaster, Louis A. Constantine, almost daily takes cash from the stamp drawer, placing slips therein in place thereof, and that at the date of the subscription to these charges there are two slips in the drawer for such purpose.

V. That on the 30th day of September, 1911, there was a surplus on hand in the stamp department of \$11.50, resulting from the sale of envelopes and other matters wherein the charge therefor is a fraction more than the cost thereof; that, on that date, \$8.35 was remitted and the balance was given to Clerk Margaret Hassett to apply on account of her shortage.

VI. That oftener than once a week during the last summer ice cream and cake parties were held in the money-order office, at which other parties than the clerks of that office were present, and that outsiders, in no way connected with the Post Office Department, are continually in said office.

VII. That the minute book on which is noted the time of employees.

than the clerks of that office were present, and that outsiders, in no way connected with the Post office Department, are continually in said office.

VII. That the minute book, on which is noted the time of employees of the office, is not in keeping with the facts; that Lena Stolp, one of the clerks of the office, would ring the clock in the morning, go to Elgin to the races, to the theater, and many other places, ring the clock in the evening, without having rendered any service, and has at all times drawn full pay therefor.

VIII. That frequently during the past two years the postmaster, Louis A. Constantine, has taken Miss Stolp or Miss Hassett to the theater, to ice-cream parlors, and other such places during the hours of their employment without making any note or charge in regard thereto.

IX. That Assistant Postmaster William R. Rees is treasurer of the Brotherhood of Locomotive Engineers, an association of a great many members; that all of the business in regard to his said office is done in the post office during his working hours there; all collections are made at the post office, and the clerks of the money-order department make most of the collections and issue receipts therefor, as by him directed, and that the patrons of the office are hindered and delayed on account thereof.

X. That Edwin L. Solfisberg, financial clerk of the post office, has transacted all business in regard to his manufacture and sale of food cereals in the post office during service hours, and that all his books and papers are kept in the stamp safe of the office, requiring one of the clerks to keep her stamps in the money-order vault on account of his utilizing the space necessary therefor in the stamp safe; and that he has conducted all his business relative to building cottages and the renting of same in the post office, and the clerks of the money-order department have been instructed and have collected rents for him and issued receipts therefor.

XI. That during all elections and primaries that have been held in the pas

direction of Postmaster Louis A. Constantine, contrary to the rules of the office.

XII. That the assistant postmaster, William R. Rees, has taken two vacations a year of more than 15 days each, contrary to the rules and regulations governing such matters.

XIII. That the typewriter belonging to the office was loaned to Miss Ainsworth and taken away from the office and used for quite a period of time outside of the post-office building.

XIV. That a certain number of packages were received in the registry department of the office from Jerusalem, directed to certain parties in Aurora. One of them was not called for, and instead of being returned, as required by law, was signed for and taken out by the postmaster, Louis A. Constantine.

XV. That Lena Stolp, one of the clerks of the office, goes to the private mall boxes, takes out the mail, and delivers it to parties calling therefor, contrary to the rules of the office, and that she has severely criticized other clerks in the office for not waiting on her friends in a similar manner when she was absent.

XVI. That Lena Stolp, one of the clerks of the office, has rented boxes, without the key being delivered, contrary to the regulations of the office.

isimilar manner when she was absent.

XVI, That Lena Stolp, one of the clerks of the office, has rented boxes, without the key being delivered, contrary to the regulations of the office.

XVII. That Edwin L. Solfisburg, financial clerk of the office, gives no time or attention to the affairs of the office, and that his work is all done by Gus Krull, who is the only one who does any checking in regard to the affairs of the office.

XVII. That Lena Stolp and Margaret Hassett, two of the clerks of the office, are continually in the front private office of the postmaster visiting and having a good time generally.

XIX. Your petitioner further states that on account of her long and faithful service for the period of about three years last past she was entitled to an increase of salary; that the postmaster, Louis A. Constantine, on several occasions assured her that she would receive the same; that he had presented the matter to the authorities at Washington and that the same had been refused, when in truth and in fact she is informed and verily believes that no requisition or request in her behalf has been made.

On account of the above facts, and especially on account of the fact that she has been charged with dereliction of duty as clerk in said office, she respectfully requests that an investigation be had, the truth of all matters determined, and justice meted out to all parties.

All of which is respectfully submitted.

Minnie Dillon.

STATE OF ILLINOIS. County of Kane, 88:

Minnle Dillon, being duly sworn, on oath deposes and says that she has read the foregoing charges and knows the contents thereof, and that the same are true in substance and in fact as thereinbefore set forth. MINNIE DILLON.

Subscribed and sworn to before me this 22d day of October, A. D. 1911. JOHN M. RAYMOND, Notary Public.

Mr. COPLEY. Immediately a post-office inspector, whom the postmaster had entertained many times, appeared upon the

scene. Learning of his presence, I wired the department protesting against any inspection by that individual. A week or so later two other inspectors appeared and started to go over the situation. I have gone all over their report, and at every conceivable point they have tried to shield the postmaster and minimize all of his shortcomings. They practically admitted these shortcomings, but find some excuse for every one of them. The principal excuse was that he was badly advised by one of his subordinates, who confessed that he did not like Miss Dillon, and as a climax to the farce the inspectors recommended the dismissal of said subordinate.

It would weary you and litter the RECORD to put this report in at this point, but I will give you my word that more than one-half of the employees of the office, answering questions intended to conceal the fact, not to bring it out, admitted that they had been asked to do political work, and I will give you my word, further, that I have seen employees of the office, wearing the uniforms of the Federal service, standing at the polls working for their political chiefs, not once but several times.

As a result of this investigation the postmaster was whitewashed; not exactly censured, but mildly criticized for having listened to bad advice, although most of the charges against him were proven. The so-called bad adviser was recommended for dismissal, and it was recommended that Miss Dillon, for that serious infraction of the rules of bringing her father and brother into the post office when her good name was assailed, should be suspended without pay for a period of six months; and to cap the climax the "bad adviser," the man recommended for dismissal and who was afterwards dismissed, the man who testified that he did not like her, was assigned the task of notifying Miss Dillon of her suspension without pay before his own resignation was "accepted."

I did not know it at the time, but I have since learned that one of these inspectors was a school friend of the brother of the assistant postmaster and dined with him at his house at least two or three times while the investigation was going on.

All this occurred during the Sixty-second Congress. At that time the two contending forces in the district were lining up for another contest of strength at the primary and election of 1912, the entire Federal crowd being confident they could accomplish in 1912 what they had failed to do in 1910. All of this was laid before the Post Office Department, and I have absolute knowledge that much of it was presented to the Executive himself, although, I presume, orally. I never took it my-

Several Members of this House, pending the primaries of 1912, who had never heard the story from me, seemed to know all about it, and two of them at different times suggested that I go to the Executive, and that he would surely straighten it out. Inasmuch as I did not support him in the primary, I could not with dignity approach him on the subject; and inasmuch as I did not support him in the election after the primary, I felt it would be entirely useless, and let the matter drop. It may not be of interest to any of you, but it is nevertheless a fact, and I state this for the benefit of my Democratic brothers, that in the second primary, with exactly the same forces and under almost similar conditions, I carried practically every precinct of every presidential postmaster in my district, notwithstanding he was again out fighting to the last ditch; but this time his subordinates were more or less cautions and it is my mealing a price that tious, and it is my unqualified opinion that many of them voted for me, although it is my best opinion that almost none of them below the office of presidential postmaster took an active part in the primary of 1912.

The CHAIRMAN. The time of the gentleman has expired.
Mr. COPLEY. Might I have five minutes more?
Mr. SAMUEL W. SMITH. I yield the gentleman five minutes additional.

Mr. COPLEY. I have seen this in my district for the last 16 years. Once in a while my eyes have looked beyond the confines of that district. In the spring of 1909 the Legislature of the State of Illinois was trying to elect a United States Senator, and at one time I counted in Springfield, the capital of that State, the city where the legislature met, 168 Federal employees, all there for the purpose of trying to bring about the reelection of a man to whom they were under obligation for the generous salaries which they enjoyed and whose term expired forever March 4, 1909.

Many of these employees spent months in a vain effort to continue that policy, which had proven so obnoxious to the people of the State of Illinois.

This is the spirit of civil service as applied to unclassified Federal officeholders in the State of Illinois, and this is the story of the spirit in which the law governing the classified service was enforced in the eleventh congressional district of

the State of Illinois, and it has given me a contempt for the law, notwithstanding the fact that I believe in the general principle of putting every man who has anything whatever to do with the administrative service entirely beyond the range of the threat or revenge of any man in political office or political I am not going to insult your intelligence at this point with a discussion of the desirability of civil service, for every man in this Congress ought to know just as well as I what a real civil service means to the people of this country. any private corporation that attempted to run its business on the theory of changing employees every time there was a change in the head of the institution would soon find itself in bankruptcy, and so would this country were it not for the fact that the resources of our people are almost endless, and they can make all sorts of blunders, defy every commercial law, and still go out and raise enough money to run the various departments of this Government; but to the man who wants efficiency and economy there is but one way to get it. The tenure of office of the public servant should be determined solely by his ability to perform his duty and his willingness and zeal in thus performing it. Any other test is wrong. I know that it is a bit revolutionary to vote to overturn a law because it has been badly administered, badly enforced, but the fact is a Republican administration for 16 years has convinced me of its inability or unwillingness to enforce a law so long as it felt that its chief might benefit in the violation of that law, and when the chief benefited his immediate subordinates all down the line came in for their share. Where such things can be done in the name of the law there must be something the matter with the law, and at best such a law ought to be wiped off the Such wanton violation of one law begets a constatute books. tempt for all others. Civil service under late Republican administration has been a farce, and I want to see a change. I know you Democrats are going to make a worse mess of it, and when you do an outraged public, finally coming to its senses, will demand of you and me or our successors that we enact a law which puts every man engaged in the public service, whether he be an assistant postmaster or a postmaster, under a civil-service law which protects that man so long as he does his duty, and which without further process punishes him for any violation of the law.

I do not want to see the assistant postmasters removed from the classified service if it is genuine. In fact, I want to see the postmaster and the district attorneys and the marshals, the assistants and deputies, the collectors of internal revenue and their deputies all put under a civil-service law which will forever abolish the present system of overlord and vassal in

politics. [Applause.]
Mr. SAMUEL W. SMITH. How much time has the gentleman used?

The CHAIRMAN. The gentleman used 25 minutes.
Mr. SAMUEL W. SMITH. Mr. Chairman, I yield half an hour to the gentleman from Massachusetts [Mr. GILLETT].

Mr. GILLETT. Mr. Chairman, partisanship ought to stop at the frontier. In all that affects our relations with foreign Governments I want to support whatever administration is in power. When trouble comes with other nations the American people can be relied on to act as a unit. But an administra-tion ought not to rely upon that patriotic trait to plunge us unnecessarily into danger. It ought not to court foreign war or hazard in order to solidify its political strength, nor should reasonable criticism of a policy be suppressed so long as en-couragement and aid is not thereby given to an enemy. And if we abstain from all criticism until after the crisis is past we shall in a measure be estopped, for the retort will then be made that we withheld our comment and advice until the result was apparent and did not have the courage to express our opinions until we were perfectly sure of the event. Great restraint has certainly been exercised in allowing this administration unhampered scope in its foreign policy. Yet I think the policy or lack of policy of the State Department is one of the most censurable features of the administration. policy should be framed with the greatest care and foresight, not only because of its intrinsic importance but because of the precedent it establishes, for it is by such precedents that in-ternational law is formulated. All present action will limit and circumscribe our future action.

I do not suppose our Secretary of State had any special familiarity with his new duties, although that did not prevent him from discharging many of the trained and skillful force in his office and filling their places with men whose claims were based on political service and obligation. I think when he accepted that distinguished position we had a right to expect from him painstaking and assiduous devotion. The questions pending there were more important than providing offices for

his friends or cultivating his political supporters. room ought to have been thronged with those ready to throw light on his new problems rather than with office seekers and politicians. The country needed more that he should rend international-law lectures than deliver Chautauqua lectures. His much-criticized explanation of his continued absences I hardly thought did him justice. I do not like to believe that he was following Byron's precept:

So for a good old gentlemanly vice, I think I must take up with avarice.

With his salary of \$12,500 and the \$10,000 income from the large accumulations, which he admits, he can live quite hospitably and still save a little, to say nothing of the income from his newspaper, on whose subscription list I am sure no Democrat who wished office or power would dare not to be found; and how few delinquents that would leave. I like to think his real motive was a less sordid one. He is the most attractive orator of our generation. On ordinary, undisputed topics he has wonderful power to sway and please audiences. His aims and philosophy are noble and inspiring. His sympathetic, ardent temperament begets popularity. We all like doing what we do well, and the opportunity to display himself to new audiences, to use his office of premier to attach to him new followers, to at once swell his personal popularity, build up his political machine, and fill his purse may all have been more alluring than to concentrate himself to the unwonted toil of mastering the intricate details of diplomacy and history. He would undoubtedly be prodigously useful in a place which he fitted, and to which he would devote his great abilities, but he has apparently deemed the State Department rather a sinecure and a reservoir of patronage than a field of duty which requires earnest and intense and persistent application.

I do not, of course, forget the notable eulogium pronounced in his presence by the Secretary of the Navy and published by the press, wherein he was described as the greatest Secretary of State since Jefferson, but I think that was an index of the discretion of the Secretary of the Navy who spoke and the receptivity for adulation of the Secretary of State who listened rather than any impairment of the prestige of such predecessors

as Madison, Adams, Webster, and many others.

I think the episode which best exemplifies his administration is where he arranged that the reluctant representatives of foreign powers should pass by and address him in formal procession while a cinematograph preserved the spectacle for the delectation of American audiences and the glorification of Mr. Bryan. I do not imagine that the American people have been greatly disturbed by this novel conduct. Most of us do not read foreign papers and are not very sensitive to foreign criti-cism. Still, it is not pleasant to feel that the cultivated opinion of the world is laughing at us; that to their eyes these episodes and our subjecting our irregular emissaries to constant and unresented affronts from both parties in Mexico, where they have been flouted and outmaneuvered and made ridiculous at every turn, present a pitiful and humiliating spectacle; and that the dignity and prestige of the Nation suffers by it as well as the individuals directly responsible.

Serious questions of state are not settled by remunerative lectures or by moving pictures. A carefully thought-out policy is fundamentally essential. The first important act of this administration rejected and abandoned such a settled policy in China, and if the act was wise I suspect it was by chance rather than as a result of the thorough study the subject demanded. We had developed an elaborate system of using the national influence wherever possible to extend American trade and profit. It was a policy of practical idealism which would at once enhance our national prestige and increase our national commerce. Our long-studied program of participation in the benefits of Chinese trade and influence was suddenly discarded with an avowed philosophical purpose which seemed popular. and America's footing in China was abandoned. While the other nations waited to see if any stable government would be established there, we rushed in and recognized the Chinese Republic, which the people of China were quite unprepared and unqualified to uphold. Fortunately power was seized by a strong and able man. He has dissolved the legislature and is no more a representative of a popular suffrage or the result of a popular election than Huerta, but I believe in his assumed despotism lies the best chance for the orderly development of China into constitutional self-government.

Recent events seem to prove what was charged at the time. that our reversal of policy was not the result of a studious and comprehensive purpose, but was only the impulsive act of an opportunist, and that perhaps the significance and importance of the policy overthrown had not been adequately investigated or understood. The reasons for the change in our Chinese policy were given as follows:

The representatives of the bankers, through whom the administration was approached, declared that they would continue to seek their share of the loan only if expressly requested to do so by the Government. The administration has declined to make such request because it did not approve of the conditions of the loan or the implications of responsibility on its own part, which it was plainly told would be involved in the request. The responsibility on its part which would be implied in requesting the bankers to undertake the loan might conceivably go to lengths in some unhappy contingency of forcible interference in the financial and even the political affairs of that great oriental state. The responsibility of our Government, implied in the encouragement of a loan thus secured, is plain enough and is obnoxious to the principles upon which the Government of our people rests.

But if that had resulted from convictions founded on deep study we should not have the personal representative of the administration saying, in his note to Mexico:

The President of the United States of America further authorizes me to say that if the de facto Government of Mexico at once acts favorably upon the foregoing suggestions, then in that event the President will express to American bankers and their associates assurances that the Government of the United States of America will look with favor upon the extension of an immediate loan sufficient in amount to meet the temporary requirements of the de facto Government of Mexico.

The two sentiments are quite inconsistent. A politician may change his ground under emergency, but the foreign relations of a great Government should not be erratic and we should not offer to one nation what we had just declared to another was forbidden by our principles. Such conduct excites disquietude, because it makes us fear that our foreign affairs are being conducted on impulse, and not with the serious thoughtfulness and investigation which they deserve.

For this reason I am disquieted by the Mexican situation. fear that, too, was neglected until the crisis came, when some action was imperative, and then the action had to be suited to the existing conditions, instead of having the conditions influenced and arranged by previous careful preparation. I approve entirely of the avowed purpose to have order and a settled Government reestablished in Mexico with our friendly and sympathetic advice, and I indorse the self-restraint which prevents the hotheads from rushing to instant war, but I greatly fear the State Department's long inaction allowed affairs to drift to that condition where ultimate intervention will be the only possible result of our attitude. I think myself that instead of waiting six months before outlining any policy we ought to have followed the advice of our representative on the spot and recognized the provisional government of Huerta. There is no reason to believe that was not the plan of the previous administration, and one is haunted by the suspicion that it may have been that very fact which caused the adoption of the present course, and that the desire manifested in so many ways to discredit and differ from its predecessor and not borrow even advice or information from its ambassador or agencies may have been one of the impulses which affected the policy. In Huerta lay apparently the only prospect of an orderly government, and strengthened by our recognition he offered the best chance of a permanent and stable administration. I have no admiration for Huerta's character as generally reported. Although it is impossible to sift the evidence, yet if half what is charged against him is true, his conduct would not be tolerated in any lawabiding community. But I suspect very few of the innumerable rulers of Mexico in the last century would meet our ideals of a constitutional leader. They have their own standards. Diaz, whose Presidency gave Mexico her best chance of development, and who was perhaps as high a type as Mexico would support, did not owe his long lease of power to methods we would

This administration refused to recognize Huerta, not because he was not the best representative and hope of stable govern-ment but because it disapproved of his conduct in attaining power. We all of us sympathize with that feeling. approve of cruelty and bloodshed and treachery, whether exhibited by individuals, by revolutionists, or by monarchs. But, in deciding whether to recognize a foreign Government, an administration's first motive should be the effect on our own country, and second to that should be the effect on the foreign nation; and only after that should individual feelings and repulsions be followed. And even if the President felt that public opinion would sustain him in indulging his sentiment at the expense of his country's interests, such conduct, if undertaken deliberately, would be a sacrifice of the public advantage to personal popularity. The whole American Nation vibrates to the emotion of horror at the crimes charged against the Mexican Presi-For an administration to voice that horror and to base its policy on that emotion is an easy way to immediate popularity, and it dispenses with the tedious and perplexing search for a permanent and far-reaching policy. But we do not have wise men for Presidents and Secretaries of State in order that

they shall be mere echoes of popular emotion. Especially in foreign affairs, which the ordinary citizen has not the time or detailed information to master, we expect those in power to rise above any popular sentiment, however natural and justified, which conflicts with the permanent advantage of this Republic; we expect them to look to the distant future and not to the present, to keep their reason and judgment unclouded by passion or by sympathy or by animosity, to disregard the popularity of the moment, and to find and follow that policy which future statesmen and future history will justify and approve. It was natural and commendable to abhor the crimes charged to Huerta, but it may be better for the United States, and even for Mexico, that a presidency won by foul means should be recognized than that thousands of the youth of our country should leave their bones to bleach in the mountains of Mexico, or that bandits and plunderers should bring anarchy into every province and set back for a generation the tranquil development of peace. We are not created by international law as the tribunal to pass sentence on the personal crimes or immoralities of the rulers of other countries. And, though our public sentiment naturally will be swift to express itself, that should not determine the policy of our State Department. There should be weighed the results upon our peace, upon our future prospects, upon our set-tled policy with other nations. *There*, most of all, should be carefully studied out the alternatives, the far-reaching conse-quences, and with those lofty ends clearly in view, undisturbed by emotion, regardless of momentary popularity, should be laid out for our ship of state a steady course whose way was marked by buoys of prudence and honor and forbearance, and which led straight to the harbor of safety and amity. The crimes, the un-deserved success or retribution of any foreigner are of slight account compared to the losses and miseries entailed on us by war. True proportion and perspective should not be obscured by personal indignation. The goal of our national interest should never be shut from view by a cloudburst of anger.

President Wilson refused to recognize a government in Mexico unless there should be a free election and unless Huerta withdrew as a candidate. He thus assumes a practical direction of Mexican politics. If he can dictate who shall not be President. he has equal right to dictate who shall be President. If he can eliminate one, he can eliminate all but one. And the result has been a sort of personal contention between our great Nation and one man, without apparently any wise information or provision on our part for the efficacy or success of the policy, so that our hands are tied, our influence is annihilated, and our citizens are abandoned and deserted by their own country. The vital question in recognition is not the means by which power was reached but the probability of establishing such a government as the country will permanently support. It is that in which we are most interested, as are the Mexicans. We could wish it might be attained by the Presidency of the purest, noblest patriot, elected to his office by the free suffrages of a peaceful people. But the history of many Republics south of us offers little assurance of such an event. So far elections have resulted in the choice of the one who superintended them. The man in power has been continued in power when the votes were counted. A South American diplomat said not long since that there was not a single instance in the life of certain Republics where an opposition candidate had ever attained power except by armed revolution. In the presence of such conditions is it frank or fair to talk of a free election? Everyone knows there never has been one. How can we expect it now in the midst of arms? There is no revolution in the proper sense—no one cause with a leader and a platform. There are numerous insurrections having apparently the characteristics of guerrilla warfare, the outcome of restlessness and ambition and love of loot. The downtrodden peons welcome the opportunity to exchange their tedious and wretched existence for the privilege of bearing arms and participating in plunder and are easily lured by the call of any successful bandit. One of the most prominent of the leaders of the constitutionalists has apparently been doing his utmost of late to prove that Huerta is not the worst man in Mexico and that cruelty and brutality are not peculiar to the chiefs of any one party. There has been only one leader of chiefs of any one party. There has been only one leader of national proportions and who offered any guaranty of the ordered government so desirable both for us and for Mexico, and that was Huerta. And we must not forget that the man most suitable for the Presidency here might be a failure there. I fear they need a man of blood and iron. But if we are to fear they need a man of blood and iron. determine who they shall not have and who they shall have, I suggest that we have one distinguished citizen just now out of employment and wasting his prodigious energies on wild beasts and barbarous jungles who is admirably equipped for that situation. Let us lend him to Mexico. I suspect there are many Americans who for one reason or another would welcome

the loan, and I can imagine the relish and delight with which he would undertake and, I believe, master better than anyone else the hard task. If we are going to interfere at all, we might

as well interfere effectually.

But to refuse to recognize the only man who has shown any capacity to establish a national administration leads but to one inevitable conclusion-intervention, and that is war. peace and prosperity in Mexico, but we do not want to attain it by uniting all Mexico against us in war and by sacrificing our blood and treasure to secure and then maintain it for them. I can see but one escape—and that is but a subterfuge—the recognition of some tool of Huerta, and thus saving our face while sacrificing our policy, and dealing with a mere figurehead

rather than the master spirit.

Mexico has never known real constitutional self-government. You remember the epigrammatic description of former Russian Government—despotism tempered by assassination. Mexican Government in the past might be described as despotism tempered by revolution; but the word "varied" would be more truthful than "tempered," for each recurring revolution, no matter how popular and democratic its professed purpose, has been merely a change and has always resulted in the same untempered military despotism. Madero, the reformer and idealist, could not keep from the resort to force. Apparently that is the only government with which Mexicans will be con-They demand men of blood and iron to preserve peace and order. If we had refused to recognize rulers who have climbed to power by violence and bloodshed, there are capitals south of us where we should have had few representatives during the past century. We can not afford to suddenly become critical and say that we and not the natives shall decide who is entitled to rule. If we had recognized Huerta months ago when the other great powers did and as our ambassador advised, he would probably now be ruling over an orderly country where Americans were not obliged to sacrifice their property and flee for their lives in obedience to orders from their own Government. And while Europe allows us to take the lead in Mexican affairs and naturally is but too willing to shift to us the responsibility of insuring peace and order and protecting her investments in that turbulent Republic and is not likely to criticize any authority we may assume, South American Republics are more sensitive at our overshadowing leadership; they do not contemplate with complacency any infringement on the rights of sovereignty, and already are showing symptoms of uneasuness and suspicion and dissatisfaction at our conduct.

The sentiments expressed so finely in the President's mes-sage on the subject that he desired peace and the prosperity of Mexico and did not aim at intervention I heartily concur in. But is his policy wisely planned to achieve that end? Those sentiments, I believe, reflect the views of the vast majority of Americans. Perhaps that fact was not out of mind when they were penned. Abhorrence of the conduct charged against were penned. Huerta is doubtless the common sentiment of all Americans. That, too, was doubtless remembered in the White House. But we do not elect the average man or his echo to be President. We want for President and Secretary of State greater foresight and wisdom than the average man possesses. them to act from sudden impulses, but in foreign affairs par-ticularly we expect them to study out that far-reaching policy which will best promote the permanent interest of the United States and not to permit personal likings or animosities or popularity to interfere with that lofty purpose. It is easy for anyone to judge of the merits of a man or a ruler if the facts are known, but the problem of wise statesmanship may be much more complex and difficult.

To recognize as ruler a man accused of crimes of treachery and bloodshed is disagreeable; a popularity-hunting leader would shrink from it and, secure in his popular defense, would risk the consequences, though the logical alternative should be armed intervention. The true statesman would not act hastily from an impulse which he shared with everyone, but would weigh distant probabilities, and even at the expense of temporary popularity would determine and adopt that comprehensive plan which would ultimately be most advantageous. Despite the noble words of peace, it seems to me our policy and conduct has from the beginning drifted steadily toward war. Peace has been our hope, but we have acted along the easy lines of impulse and thought out no effective methods to achieve the ends we desire.

When the war comes it will be no excuse that the Secretary of State has delivered brilliant speeches in favor of peace. The question will not be has he desired war, but has he taken such measures as would naturally avert it. An emotional and ora-torical glorification of peace is no sufficient atonement for a policy whose legitimate and logical result is war. If common report is correct, he has not been without good advice. Amid

the political appointments which filled his office there was one made for merit. Apparently it was recognized that it would be well to have one person there in a responsible post who by previous training and experience was qualified to give sound advice on our foreign policy, and no better man could have been found than the learned and distinguished counselor of the department. But according to the press that profound student of international affairs differed absolutely with the administration in its foreign policy and favored the recognition of Huerta.

It should be easy for the United States to undermine and destroy the supremacy of any contesting chieftain in Mexico. It may be more difficult to establish and uphold another. Under our policy-or lack of policy-the only man who had a semblance of national authority, the only man who displayed any capacity to establish order, has been systematically weakened and the country month by month has become more unsettled, guerrilla warfare has grown, greater numbers have deserted peaceful labor for the life of the bandit, the taste for plunder and excitement has increased, and the difficulties in returning to any régime of order and discipline and settled government have been enormously augmented. The lives of Americans have been endangered, their business ruined and abandoned, their property in large part destroyed, and the humiliating warning has been issued to them by their own Government that the ambassador who represented them has been recalled, that no action will be taken for their security, and that they should flee the country for their lives.

I trust that there is known to the administration some happy outcome which we can not see. I hope there has been and is some definite project which has never revealed itself in the pitiful negotiations which have been made public, but to me it seems as if the nine months of this administration had been recklessly devoted to increasing the difficulties of the problem, until the only possible outcome should be armed intervention. Some happy chance may prevent, some gifted chieftain may rise up with power and energy and resolution sufficient to assume responsible control over all Mexico unaided by us, but it would be a solution so extraordinary as to belong to the realms of

hope and fancy rather than of reason.

A few days ago the press informed us that in the midst of an address upon another subject in Nebraska the Secretary of State exclaimed: "I pray God may help me to make it unnecessary that this Government shall go to war with Mexico." admirable aspiration, in which we can all heartily join, but rather theatrically staged and apparently meant rather for the American people than for the ear to which it was ostensibly addressed. I am sure that this prayer, given out to all the newspapers in the United States, must have brought to the minds of many the verses in the Sermon on the Mount:

When thou prayest, thou shalt not be as the hypocrites are; for they love to pray standing in the synagogues and in the corners of the streets, that they may be seen of men. Verily, I say unto you, They have their reward.

But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly.

I quite approve of the Secretary invoking heavenly aid, but there is an old maxim, "God helps those who help themselves," and when the administration is pursuing a course which apparently leads straight to war, I can but fear no answering miracle will intervene to prevent the natural consequences. think study and preparation, with prayer in the closet at Washington, would be more effectual than the most dramatic and widely advertised invocation a thousand miles away. Meanwhile, Americans are left without protection or an ambassador in Mexico, and are advised to leave the country and sacrifice their property, and just now a warning is issued that they should not return. It reminds me of the imbecile policy of embargo adopted by a former Democratic administration.

I appreciate, however, that in foreign affairs secrecy is sometimes imperative; that there may be in the State Department some concealed and unsuspected and farsighted policy which has thus far been wisely hidden, but which, when the crisis is past, can be safely unlocked from the secluded archives where it rests and dazzle an unsuspecting world. I hope that may prove true, but I am skeptical, and fear there has been only the shifting policy of the hopeful and well-intentioned oppor-tunist, not the steady purpose of the studious, peace-seeking

statesman.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. GILLETT. Certainly.

Mr. GARRETT of Tennessee. In view of the fact the gentleman from Massachusetts is criticizing the policy of the present administration, may I not ask the gentleman what the difference is between the policy of the present administration and the last administration with reference to Mexico?

Mr. GILLETT. Why, certainly. Huerta came into power, I think, just about a month before this administration, and naturally the last administration, out of consideration for the President who had just been elected and who was about to assume power, would not embarrass this administration by any action. think that was considerate and courteous and natural. I intimated here, I have not much doubt myself that the last administration would have followed the course I have suggested, although I know nothing about it,

Mr. GARRETT of Tennessee. The gentleman, I understand, advocates the recognition of the Huerta administration.

Mr. GILLETT. If the gentleman has listened to my remarks, he knows my position.

Mr. AUSTIN. My recollection is that the Huerta government came into power on the 23d of February, 1913.

Mr. GILLETT. It was a short time before the 4th of March,

when the Democratic administration began.

I regret to make these criticisms upon our administration, toward which in all foreign affairs I feel the most intense loyalty But I am not willing and wish the very completest success. to wait until the end and then say "I thought so all the time." If I am wrong, I shall be rejoiced; if the administration has a wise and fruitful policy, I will join in praising it. But I fear it has carelessly and optimistically floundered on trusting to happy chance, and that the stern lessons which history gives us of the fate of such a policy will be here repeated. plause.] I yield back the balance of my time.

Mr. SAMUEL W. SMITH. Mr. Chairman, how much time has the gentleman from Massachusetts consumed?

The CHAIRMAN. Twenty-five minutes,

Mr. REILLY of Connecticut. Mr. Chairman, acting for the chairman of the committee, I yield 20 minutes to the gentleman from New Jersey [Mr. HAMILL].

Mr. STAFFORD. Mr. Chairman, before the gentleman from New Jersey proceeds, will the gentleman state how long he intends to run this afternoon? It is now 5.30 o'clock, and we

have barely 30 Members here at the present time.

Mr. SAMUEL W. SMITH. I think I can say to the gentle man, after conference with the chairman of the committee, that the gentleman about to address the committee now will be followed by two others-one for 20 minutes, and the other for 10

The CHAIRMAN. The gentleman from New Jersey [Mr. Hamil] is recognized for 20 minutes.

Mr. HAMILL. Mr. Chairman, I can not too strongly oppose the clause in this postal appropriation bill which removes the position of assistant postmaster from the protection of civil service and relegates the office to the category of political appointments. I can not too strongly advise the membership of this House to vote against this vicious provision, because if adopted it would imperil and injure the proper conduct of business in our post offices. I particularly call upon my Democratic colleagues to prevent the passage of this law, because on them, as members of the majority party, will be visited the odium of this attempt to tear down the system of civil service.

It is over four or five years ago at least since the Executive order was issued which covered assistant postmasters into the classified service. The order was exceptional in the important respect that it required every candidate for assistant postmaster to first demonstrate his capability for the place to the satisfaction of the Post Office Department before he could get the This was a proviso never before benefit of the classification. attached to an Executive order, and the result of it was that none but most experienced and competent officials succeeded in passing the test. Many of these officers have served in that capacity from 10 to 15 years. Their efficiency gives us a splendid example of the benefits which accrue from a civil-

It can, indeed, be truly said that the classification of assistant postmasters is a greater necessity than that of any other body of civil employees, for the reason that their work is largely a work of multitudinous detail and because the laws that apply to the running of the Postal Service are so minute and vary so constantly that only by long years of training and experience can one learn to accurately supervise and direct their enforcement. No business house would think for a moment of changing employees of the character of assistant postmasters. perhaps no business in the United States is of such importance to the public, and especially to our merchants and business men, as the work of the Postal Service.

Consider the functions which are imposed on a post office to-day. It not only does postal business and money-order business and postal savings business, but it does express busi- Democratic President the advisability of from time to time

ness also. And we all know it is the assistant postmasters who conduct the post offices and who direct the men in the performance of every detail of their many and complicated duties. In view of all this would any sane man insist upon having assistant postmasters removed from the civil service?

The objection to their retention in the service seems to be that they were admitted into it by Executive order instead of by examination. But the same objection could be made with equal force against a great number, perhaps the greater number, of those holding civil-service places. There never could have been a civil-service system without the exercise of the Executive order. These orders have wisely been made not only at the commencement of civil service, but from time to time afterwards, as occasion made their issue necessary, and I am certain they will continue to be made until all employees of the Government whose work requires skill, training, and experience are included in the civil-service system.

The first civil-service law was introduced by Senator Pendleton, a Democratic Senator from Ohio, about the year 1870. The result of this legislation was that all employees below the grade of chief clerk were put into what now is called the classified The first President to broaden this classified service so established was Grover Cleveland. About 1896, toward the end of his second administration, President Cleveland issued an Executive order which extended the limits of civil service by covering into the system such officials as chief clerks, chiefs of divisions, and the like. This was a great step forward.

Mr. Cleveland's Republican successor made some changes in this arrangement, but the fact remains true that any subsequent improvement in civil service, so far as the extent of its scope was concerned, merely followed the lines laid down by Senator

Pendleton and President Cleveland,

After all, the civil-service system is at bottom a sound busi-ess plan. The purpose of it is to retain competent and experiness plan. enced employees as assistants to the administrators of our various Government departments by assuring to these employees permanent positions in return, and as a reward for them on their part showing zeal and efficiency in the discharge of their duties.

When by means of Executive order the system of civil service had become quite generally established, it then became necessary to devise some way whereby a high standard of merit could be maintained among its members. At first mere pass examinations were resorted to, but these proved to be ineffective. Then the competitive system was put in vogue, which remained the

rule and prevails at the present time.

Of course, those in the employ of the Government when the first civil-service law was passed and the comprehensive order of Mr. Cleveland promulgated included among them some incompetents who were benefited along with the rest. however, was owing to fortuitous circumstances which could not occur again, and the condition straightened itself out in a very few years. Everyone now admits and admires the high excellence of our civil-service system, no matter how it grew up and developed.

Every department head realizes what an immense advantage he possesses in having at his call and command trained men of long experience to carry out the details of his office work. Every Senator and Representative appreciates the same thing when they stand in need of data or documents which only officials who have had long experience are able to furnish.

It may be remarked here that when our Government was first established there was not the remotest intention of changing minor officials, and for a generation there was no change. policy of removing for political reasons officials whose duties are purely ministerial has not worked well in practice, for it must be borne in mind that after all the Government is a great business corporation, and that its successful administration depends upon the same character of good service as that of any other mighty business enterprise.

The people clearly realize this and as a result have imposed public condemnation on every attempt to tamper with civil

ervice.

Regarding these places of assistant postmaster, I know, of course, that numbers of worthy Democrats believe they have a right to fill them. So in a sense they have, and if these positions were open nothing would please me more than to help these Democrats procure them. But our civil-service system ought not to be assailed and these positions are in that system, even though placed there by the Executive order of a Repub-

I am, however, a Democrat to the core and will gladly bend every energy to appoint Democrats to positions which are not in the classified service. I, moreover, recommend to our present

covering into the classified service such Democratic appointees as in his judgment should properly be included in the regular classified service, in order that the ratio of Democratic to Republican employees may bear some equality. But by all means let us preserve civil service. The people esteem the system and demand that it be maintained.

The civil-service system is essentially a democratic system in the sense that it is open to all classes of our citizens on equal terms. It makes no distinction between rich and poor, but recognizes impartially one or the other according to merit. The highest places within the service are open to all, and the only qualities necessary to attain them are efficiency, experience, and

fidelity to duty

Time has splendidly vindicated the wisdom of establishing a civil-service system in our country. Therefore I depreciate this unjustified and unjustifiable attempt to undermine and weaken this system in the manner proposed in this measure by taking out of it such responsible positions as assistant postasters. [Loud applause.] Mr. SAMUEL W. SMITH. Mr. Chairman, how much time

did the gentleman use?

The CHAIRMAN. He used 10 minutes. Unless gentlemen yield back their time, it will be counted against them.

Mr. HAMILL. I yield back my 10 r inutes, Mr. Chairman. Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 20 minutes to the gentleman from Michigan [Mr. MAPES].

The CHAIRMAN. The gentler Mapes] is recognized for 20 minutes The gentleman from Michigan [Mr.

Mr. MAPES. Mr. Chairman, I shall confine myself in what

I have to say to section 6 in this bill.

If there is one thing more than any other which Congress has done since the beginning of this administration that has been a distinct shock and disappointment to the American people, it is the assault that has been made upon the civil service and the apparent determination on the part of the party in power to disrupt and destroy that service.

The civil service has been a steady growth. The advocates of it have been obliged to fight for its extension all along the line, but there have been few backward steps. The results in economy and efficiency in the work of those who have entered the public service through competitive examinations under civil service regulations have civil service regulations have proved the worth of the law until it has been almost universally approved, and no political party in recent years has dared to appeal to the people for their support without a declaration in its platform in its favor.

The Civil Service Commission, in its report for the year end-

ing June 30, 1912, felt justified in declaring that-

The popular approval of the system of competitive examinations as a means of producing increased economy and efficiency and of suppressing abuses due to improper political influences is shown in the platforms adopted by the different political parties during the campaigns of more than a quarter of a century. The principles of the competitive system are approved by the whole country without distinction of political faith. This unanimity indicates that the American people are satisfied with the results of the system and marks the cessation of all organized opposition to it.

They also declared in that report that-

The development and improvement of the practical methods of the mer't system in recent years have been rapid.

The number of appointments through competitive examination has grown year by year, and there is abundant evidence that in those parts of the service to which the civil-service law has been applied the Government has been enabled to effect large savings. More is being done with few employees, and done far more economically.

They go on to say that President Taft-

In a message to Congress dealing with the loss to the Government from the present patronage method of filling the higher unclassified positions, states that the loss amounts to at least \$10,000,000 annually, and that "it is not to be doubted that where no saving would result the classification of the local officers would increase the efficiency of the service."

Notwithstanding such unanimity of sentiment in favor of it on the part of the people and the rapid progress and extension of the system in recent years, this Congress, in each of the three principal bills which have been enacted into laws since the convening of the special session in April last, have inserted a paragraph taking certain officials and employees of the Government out of the classified service, similar to that contained in section 6 of this bill. If this bill passes with section 6 in it as now proposed, this will be the fourth successful assault upon the civil service in a few brief months.

The tariff bill exempted collectors of the income tax from the civil service, and further provided that when they were not employed in that work they might be employed on general internal-revenue work.

The deficiency appropriation bill took out of the civil service deputy United States marshals and deputy collectors of internal revenue and their subordinates.

The banking and currency law contained a provision providing that all employees of the Federal reserve board should be appointed without regard to the provisions of the civil-service law and the regulations of the commission.

Now we have the fourth bill of general jurisdiction which has come before this Congress, and it proposes to take out of

the classified service all assistant postmasters.

It was so truly stated in a recent editorial in the morning paper of my home city, the Grand Rapids Herald, that-

It is not an exaggeration to say that the civil service has not been as openly and deliberately undermined and assaulted in two decades as it has been during the 10 months' fling of the present administration.

These assaults have been made in two cases, at least, by means of riders on appropriation bills. Being inserted, as it is in this case, in the bill as reported by the Post Office Committee, there is no way to get a separate record vote on that section alone, unless a majority of the Committee of the Whole vote in the Committee of the Whole, where no roll call is allowed, against the provision and against the position of the Post Office Committee, which reported it. This the Memthe Post Office Committee, which reported it. bers as a rule hesitate to do.

It is not a sufficient answer to the critics of this legislation to say that it is necessary, in order to get the most satisfactory results, to have men in the subordinate offices who are of the same political faith as the administration in power. Such a contention, put into practice, would disrupt the entire civil service. Besides, those who have had the most experience and the greatest responsibility declare the contrary to be the fact, and, in the light of the liberal rules of the commission and of the law for discharging inefficient employees, such a contention is without any justification. The last Secretary of the Treasury, in his report of 1912, declares that-

it is impossible to maintain full efficiency or full character in the customs service or in any other service unless it is rigidly separated from the influence of political organizations, no matter to what party they belong.

Mr. MORGAN of Oklahoma. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. MAPES. Certainly.

Mr. MORGAN of Oklahoma. I am very much interested in what the gentleman is saying and approve of the line of his talk. I would like to know whether he has any knowledge as to whether or not the President approves this provision in the bill which takes assistant postmasters out of the classified service?

Mr. MAPES. I will say as to that, Mr. Chairman, that the only knowledge I have was conveyed by the notice that was contained in the paper this morning, to the effect that the President had finally determined to take a firm stand against any further attacks on the civil service.

Mr. MORGAN of Oklahoma. Now, if the gentleman please, another question. I will ask if the gentleman knows whether or not the Postmaster General, whom I regard very highly, has approved a provision similar to this in this bill, taking assistant postmasters out of the classified service?

Mr. MAPES. I think he has opposed it openly, notified 'he committee which reported the bill; but that the committee, in spite of that recommendation and the attitude of the Postmaster General and that of the Chief Executive, have reported this section as it is contained in the bill.

Mr. MORGAN of Oklahoma. Now, if the gentleman will permit one more question, I shall try not to interrupt him any more. I would like to know what the gentleman thinks about the proposition of extending the civil service so as to include postmasters as well as all employees under the postmasters. The gentleman remembers, I think, that President Taft recommended that proposition,
Mr. MAPES. I believe that is the recommendation of those

who have had the most experience, and it is the recommenda-tion of the Civil Service Commission; and for one, I believe that the country is fast coming to that, and that the public sentiment will soon require Congress to pass a law putting postmasters, as well as the assistants, under the civil-service regulations.

Mr. MORGAN of Oklahoma. I am inclined to agree with

the gentleman, Mr. Chairman, that that would be good policy.
Mr. MAPES. It is thought by some that it is too-difficult to get rid of a civil-service employee after he is once appointed, and the service is sometire, criticized for that reason. Somethink that it is necessary to prepare written charges against think that it is necessary to prepare written charges against the accused, serve them on him, and have a trial of his case after the manner of a trial in a court of law. Nothing is further from the fact.

Such critics certainly do not understand how easy it is to get rid of an inefficient employee under the civil-service rules. The rules permit the head of any department to dismiss any

employee in that department in the classified service "for any cause which will promote the efficiency of the service." The only restriction is "that like penalties shall be imposed for like offenses and no penalties shall be imposed for political or re-ligious reasons."

In order to remove an employee it is only necessary to serve the charges on such employee and file them with the head of the department; and an employee may be demoted, and he may never know what the charges against him are, without the service of the charges upon him. As a matter of fact, some have been demoted in some of the deportments here in the last few months in just that way, without knowing what the charges against them are

1 listened with amazement to the remarkable speech of the distinguished chairman of the committee reporting this bill, so far as it related to section 6 and the civil service generally. seemed to me that he put up a straw man and then proceeded to push him over. He spoke of the life tenure of civil-service employees. He presented a fanciful picture of centralization and the supremacy of the Federal Government over that of the States, and deplored the fact that the people did not have a more direct participation in the affairs of the Federal Government. If this is true, the people are not charging it to the civil service, but to some extent at least to the lack of the civil service. No one ever heard of any complaint from the people because of an extension of the civil service. Their complaint has been that it has not been extended enough. have everywhere put it into force in those local and State governments in which they actively participate whenever given an opportunity to do so, some of them going so far as to incorporate a provision to that effect in their State constitutions. He stated it to be a fact that the people did not have the same love and respect for the Federal Government as they have for the State governments. Be that as it may, certainly a return to the spoils system, with its resulting hordes of office seekers, will not tend to increase their love and respect for it.

The civil-service report answers this criticism of the chair-

man of the committee fully. It says, on page 21:

man of the committee fully. It says, on page 21:

The rules are not framed on a theory of life tenure, fixed permanence, nor vested right in office. It is recognized that subordination and discipline are essential, and that therefore dismissal for just cause should not be unduly hampered. The rules have at all times left the power of removal as free as possible, providing restraints only to insure its proper exercise. In this way discipline is not impaired, just tenure is secured, and employees are protected against arbitrary removals. In other words, the public service is governed by the same theory as private service, in which tenure of place depends upon good behavior and efficiency, which are the mainspring of good service. The object in public as in private employment should be to secure good service and to reward fitness, experience, and tried abilities. At all times since the rules were established, in 1883, the power of removal for unfitness has rested wholly with the appointing officers for their free exercise. They are the sole judges of the qualifications of subordinates, and the question whether such cause exists as requires a removal for the efficiency of the service is for them to determine. Thus there has never been any foundation for the complaint that unfit men are "protected by the rules," that the rules establish a life tenure, or that persons who become inefficient are kept in office by the rules. The only restriction that has been imposed is that employees should not be removed for political or religious reasons or upon secret charges, and that for the same offense one employee should not be punished in a different manner from another.

It is certainly unnecessary at this late day to argue the merit

It is certainly unnecessary at this late day to argue the merit of the civil service, at least to people generally, it is so universally conceded. With over 235,000 of those holding Government positions throughout the country doing so under the civil service, some of you are now having plenty of trouble in filling those positions which do not come under it, and it is past under-standing how anyone would voluntarily invite more trouble of

the same nature by putting still more outside of the service.

Bearing in mind that there are over 7,500 people employed in the Treasury Department in Washington alone, over 3,400 in the Agricultural Department, and over 5,000 in the Interior Department, and that there are in all over 32,000 Government employees in this city alone, can anyone imagine the utter chaos and confusion that would exist and what the effect on the efficiency of the work of the different departments would be if any considerable number of this army of employees were taken out of the classified service and were obliged to start in as raw recruits, and as such obliged to get acquainted with their work every time there was a change of administration? Certainly the Members of this House do not want any considerable number of these employees to be dependent upon political influence for their appointment or promotion in office.

It is sometimes erroneously contended that it is all right to fill the minor positions by competitive examination and put them under the civil service, but that it is a mistake to put the higher positions and those requiring expert knowledge and skill under it. The experience of the Civil Service Commission has

demonstrated the fallacy of this contention. On this point the commission say:

The belief in many quarters that no distinguished expert or person of high professional or scientific attainments will compete in a civil-service examination is a fallacy.

They then go on to prove the correctness of their statement by their own experience.

The injury done by this bill in taking first assistant post-masters out of the classified service will not be confined to the assistant postmasters alone; the bad effect will extend to the whole post-office service. The enactment of this section into law will be the equivalent to a formal declaration to all the employees in the post offices throughout the country which have an assistant postmaster that no longer can they look forward to the time when they might be assistant postmasters by being promoted in the ordinary way on account of faithful and effi-cient service, but that they must participate actively in partisan politics for the purpose of gaining political influence and support in order to secure such an appointment.

In this connection I desire to read from the letter of the National Civil Service Reform League, dated January 14, 1914,

and addressed to the Members of the House:

NATIONAL CIVIL SERVICE REFORM LEAGUE OFFICES, 79 Wall Street, New York, January 14, 1914. To the Members of the House of Representatives:

NATIONAL CIVIL SERVICE REFORM LEAGUE OFFICES, 79 Wall Street, New York, January 11, 1911, To the Members of the House of Representatives:

On behalf of the National Civil Service Reform League, I respectfully but earnestly urge that the rider in the post office appropriation bill now before the House, taking assistant postmasters in first and second class offices out of the classified service be eliminated.

The assistant postmaster swere classified over three years ago by President Taft in an Executive order, in which he required that every assistant postmasters should satisfy the department as to his efficiency and qualifications before he be given a competitive classified status. All but about 100 of the 2,400 assistant postmasters in these offices now have such a status. Many of them have been appointed since the issue of this order, either through promotion, transfer, or original examination. The post offices, therefore, are now supplied with a thoroughly trained expert force from the assistant postmasters on down.

This organization is vitally important to the officient management of the postal business, particularly in view of the development of the postal savings banks and the parcel post system. The postmasters in these offices are not themselves postal experts—at least at the time of appointment—and have to depend on the permanent expert staff under them for the management of the office. If the assistant postmasters are removed from the classified service they will become political job holders, changing with every change in the postmastership. The appointments of the assistants will be governed to a large degree by political considerations, and it is a notorious fact that postmasters are forced under such a system to accept inferior persons as their assistants for political or less worthy reasons, and that they are, in fact, not free to make their own selection.

With assistant postmasters chosen on the merit basis alone on the other hand the tone and efficiency of the entire Postal Service have been

postmasters.

Furthermore, the passage of this rider will be a ruthless violation of the pledges of all three great parties in the last presidential campaign. The Democratic Party, for example, in the Baltimore platform declared that the civil service law "should be honestly and rigidly enforced" so that merit and fitness should be substituted for political service, and pledges even stronger than this were in the platforms of both the Republican and Progressive Parties. The passage of this rider will be recognized as the negation of these piedges, as a barefaced attempt to secure 2,400 valuable places for the payment of political debts, and as an utter disregard of public interest.

For these reasons this league earnestly asks that you vote for the elimination of this rider when it shall come before the House.

Respectfully, yours,

ROBT. W. BELCHER,

ROBT. W. BELCHER

The effect on the service generally of taking out of the classified service the higher positions is so well stated in the report of the Civil Service Commission that I quote from it at length. It confirms the statements in the letter from the Civil Service League:

As long as so large a proportion of the higher administrative posi-tions remain unclassified, to be filled from the outside without promo-tion, the classified service will not offer a career in competition with such outside fields of employment as are organized and conducted upon a merit basis and which have systems of retirement upon disability or superannuation. In this respect the civil scrvice remains inferior to the service of many business establishments which assure promotion for merit to the high-salaried positions and which give retiring allow-ances; and the Government can not hope to secure and retain the serv-ices of an equally intelligent and ambitious class of persons while these

conditions exist. The fact that higher positions are not open to promotion deters many of the better class of men from entering the examinations for appointment. Moreover, there is an increasing tendency on the part of the most capable persons who enter the service to resign for employment in fields in which there is better organization and greater opportunity for advancement. This constant depletion of the service means serious financial loss to the Government. The civil service is inferior to the military and naval services in this regard, since it does not offer the same opportunities of advancement and of retirement.

Again, where the higher positions are filled by political influence, and when the men filling them are, as they generally are, active in political work, it is inevitable that the minor force will fall under detrimental political influences.

A leading journal in a recent editorial emphasizes the fact that the classification of the higher offices in the Federal service is of an importance which can not be measured by numbers. It says:

It says:

The higher posts, while the number of them is small in comparison with the vast aggregate of offices, are of an importance which can not be measured by numbers; and this not only because the duties of these posts are of great moment and because of their tempting character as political prizes, but also for a reason profoundly affecting the service as a whole. A few offices involving questions of governmental policy should always remain subject to untrammeled appointment by the executive head of the Government, but purely business offices of high order, such as the first-class postmasterships, should become the natural goal of the men filling the lower places in the same branch of the service. Only so can the Government service in general become a true career for men of ability, and the effect of its being such a career would be felt in a most beneficent way throughout all the grades.

The CHAIRMAN The time of the gentleman from Michigan

The CHAIRMAN. The time of the gentleman from Michigan has expired.

May I have about five minutes more? Mr. MAPES.

Mr. SAMUEL W. SMITH, Mr. Chairman, I yield five minutes more to the gentleman.

Mr. MAPES. The Encyclopædia Britannica, under the title "Civil service," says:

"Civil service," says:

* * * The chief drawback to the full success of the (civil service) act within its intended scope of operation has been the withholding of certain positions in the service from the application of the vital principles of competition. The civil-service act contemplated no exceptions, within the limits to which it was made applicable, to the general principle of competition upon merit for entrance to the service.

* * * Thorough civil-service reform requires that these positions (postmasters and collectors of customs and of internal revenue) be made subject to the merit system, for in them is the real remaining stronghold of the spoits system. Even though all their subordinates be appointed through examination, it will be impossible to carry the reform to ultimate and complete success so long as the officers in charge are appointed mainly for political reasons and are changed with every change of administration.

I congratulate the President on having at last, according to

I congratulate the President on having at last, according to the announcement in the morning paper, determined to take a firm stand against any further assaults on the civil service.

I have heard men proclaim on the floor of the House their feeling of obligation to carry out the promises and pledges made by them to their constituents before election and their laudable and commendable determination so to do. To all such it may be well to recall the civil-service plank in the last Democratic platform, which declared:

The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather than service rendered to a political

Again, the concluding paragraph of the platform of the party solemnly declared, as though assuming for themselves a virtue which others did not possess:

Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign.

In the face of such solemn declarations will the Democratic majority in this body continue their attack upon the civil To continue longer to enact laws taking Government positions out of the classified service which have heretofore been in it, and exempting from it all new positions created by the laws of this Congress, will make your platform declarations a hollow mockery.

I appeal to you in the interest of efficiency and good government to vote against section 6 in this bill, to discontinue your attack upon the civil service, and to carry out in good faith this plank in your party platform. [Applause on the Republican side.

Mr. Chairman, I yield back the balance of my time.

Mr. SAMUEL W. SMITE. Mr. Chairman, how much time did the gentleman from New York occupy?

The CHAIRMAN. Twenty-three minutes.
Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. CALDER].
Mr. CALDER. Mr. Chairman, I have given close study to the Postal Service, realizing how important it is to the business interest of the country and to our citizens in general to have prompt delivery of the mail. The success of any business de-

pends largely on the efficiency of the mail service, and I have always felt it my duty to encourage in every possible way any suggestions for improving it.

The establishment of the postal savings system has done more to encourage people to save part of their earnings than any other influence that I know of, and it gives them a peace of mind to know that their savings are secure, as it has the guaranty of the Government behind it.

The parcel-post law has only been in effect for one year, and in that short space of time has grown beyond the comprehension of the mind of the ordinary man. It is only when talking to post-office men or in reading the reports of department officials that we can grasp the extent to which this new service has developed.

I noticed in the last annual report of the Postmaster General that, after careful study of the constitutional purposes of the postal establishment, he is convinced that the Post Office Department should have control over all means of the communication of intelligence. He also states that-

The monopolistic nature of the telegraph business makes it of vital importance to the people that it be conducted by unselfish interests, and this can be accomplished only through Government ownership.

The legislation already enacted and that which is proposed will in the course of time make the postal service the people's service in every sense of the word, as it will be the only means of communication that we will have. Its problems should be worked out carefully and with the only purpose in view of making it the most perfect that can possibly be had.

While the department officials and the Post Office Committee have given much time and attention to the many new innovations which have been installed in the service, I am particularly pleased to note that they have not overlooked the employees upon whose shoulders the burden of these added responsibilities fall.

It has been my pleasure since becoming a Member of this body to work and vote for the law to reclassify the salaries of letter carriers and post-office clerks, the law to regulate their hours of labor to 8 hours within a period of 10 consecutive hours, the law to make the initial or entrance salary \$800 per annum, the law to regulate Sunday service, which insures a day of rest each week for the employees, and the law to improve the working conditions of the substitutes. I have also worked and voted for the several laws to improve the working conditions of the railway mail clerks, the laws for relief of rural-delivery carriers, and have done all in my power to help the laborers in the Postal Service.

Every one of these measures were reasonable and just, and they possessed merit. In some cases I do not think the legislation went far enough to grunt the relief necessary, but as it was the best that we could get at the time I gave the measures my support.

Mr. Chairman and gentlemen of the committee, I believe that a contented working force is the best possible asset that the Government could have in conducting its business. I am sorry to say that we are far behind other Governments and many of the large employers of labor in our own country in looking after the welfare of the civil-service employees. Every civilized Government in the world, with the exception of the United States, have laws that provide for the retirement on annuities of their veteran civil-service employees when they become superannuated. Nearly every large corporation and railroad company have made like provision for their employees. this greatest of all Governments, this land of the free and home of opportunities, casts aside its employees without any reward when they become inefficient through superannuation. We are behind the times in this respect, but I think that it is caused by lack of knowledge and want of study of the problem by the Members of Congress. I trust that the time is not far distant, aye, it would afford me the greatest pleasure if the Committee on Reform in the Civil Service will bring before this body for consideration at an early date a bill that will provide for the retirement of the men and women in the civil service of the

Government when they become superannuated.

Another matter that should receive early consideration is the question of a Federal compensation law. A large number of the States have enacted laws that provide compensation for employees who are injured or killed in the discharge of their duties. There is a Federal law, the act approved May 30, 1908, which grants compensation to certain specified employees of the Government, but it should be made more liberal in its pro-

visions and more general in its application.

A compensation bill providing relief for employees of railroad companies was passed by both Houses in the Sixty-second Congress, but failed to become a law on account of a disagreement

in the conference committee prior to the adjournment of Congress. A bill drafted along the same lines as the railroad employees' bill was introduced in Congress to provide for employees of the Government, but no action whatever was taken on it by either House. This lack of interest for the welfare of those who can only hope for relief from the national legislative body is to be deplored. An employee of a railroad or any other corporation or employer can bring suit in a civil court for damages for injuries received, and can recover an amount assessed by a jury. An employee of the Government is estopped from bringing any such action, no matter what the cause of his injuries may be, and he has no redress whatever. It seems to me, Mr. Chairman, that this much-needed legislation has been too long delayed, and I trust that this Congress will enact a law that will grant to the employees of the Government the same rights and protection that we would compel those engaged in interstate commerce to grant to their employees.

In the bill now pending before the House the committee has In the fill now pending before the House the committee has wisely inserted a provision that will grant compensation to employees of the Postal Service for injuries they receive through no fault of their own. It will afford me the greatest pleasure to cast my vote for this beneficial legislation, as it possesses great merit. I wish to congratulate the Committee on the Post Office and Post Roads for giving the House an opportunity to vote on this paragraph in the bill. I trust that my friends on both sides of the House will join hands in voting for this much-needed legislation, and that it will meet with unanimous approval. [Applause.]

Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing an address by the Hon. George W. Perkins on the retirement of superannuated Government employees.

Mr. STAFFORD. Reserving the right to object, will the gentleman inform us how lengthy an address it is?

Mr. CALDER. It will make about three pages of the Con-GRESSIONAL RECORD.

Mr. STAFFORD. I have no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SAMUEL W. SMITH. Mr. Chairman, how much time did the gentleman from New York use?

The CHAIRMAN. Nine minutes.
Mr. SAMUEL W. SMITH. I yield to the gentleman from Tennessee [Mr. Austin].

Mr. AUSTIN. Mr. Chairman, I ask permission to extend my remarks in the Record by printing a letter from W. D. Brown, adressed to me. Mr. Brown is the editor of the R. F. D. News, in which he sets forth, in what I believe to be a fair and just manner, the claims of the rural free delivery carriers.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to extend his remarks in the Record by printing the article referred to. Is there objection?

There was no objection. The article is as follows:

WASHINGTON, D. C., January 12, 1914.

The article is as follows:

Washington, D. C., January 12, 1914.

My Dear Congressman: In the R. F. D. News of January 10 there was published a statement blank to show cost of rural-delivery equipment and annual expense of maintenance, which rural carriers were requested to fill out and return to me promptly. It is expected that statements from at least a majority of the carriers in your district will be in hand by the 20th instant, and they will be tabulated and forwarded to you at once.

But as the Post Office appropriation bill may be taken up in the meantime, I respectfully ask your support of a measure to afford rural carriers a substantial and well-merited increase in compensation. The statement is sometimes made that rural carriers have been advanced in salary more frequently than any other Government employees. This may be true, but the fact remains that after maintaining the necessary equipment their pay is still far less than other Government employees and wholly inadequate. The average gross pay of rural carriers is \$1,060 per year; average cost of equipment maintenance, about \$360, leaving net salary of \$700 per year.

The entrance salary of city letter carriers is \$800, and the law provides for automatic promotions of \$100 per year until the salary reaches \$1,000 at second-class offices and \$1,100 at first-class offices, with further annual increase for 75 per cent of the carriers having reached those grades. Furthermore, mounted city carriers are allowed the full cost of maintaining their equipment. The amount in some cases exceeds \$400.

Nothing is allowed rural carriers for length of service, is less than the entrance salary, after perhaps many years of service, is less than the entrance salary of city carriers.

The value of postal service should not be measured by cost or earnings, but by efficiency and public convenience. Rural delivery is admitted to be one of the most beneficial branches of the Post Office Department, and its popularity and value are attested by a growing demand for the ser

But the parcel-post law laid heavier burdens upon rural carriers, and the 50-pound weight limit, which became effective January 1, has brought them face to face with serious conditions. New and larger vehicles are required, and many carriers are not financially prepared for the necessary outlay.

It is contended that upon basis of present earnings railroads are unable to secure loans to provide necessary improvements, but that if the pending application to the Interstate Commerce Commission for an increase in rates be granted, Ioans may be obtained and desired improvements will be inaugurated. And so it is with rural carriers. The cost of living has advanced to such an extent and their net salaries are so small there is nothing left for emergencies, and it is impossible for many carriers to meet the additional burden imposed by the new parcel-post regulations without help in the shape of increased compensation.

On account of parcel post the Postmaster General has asked for

parcel-post regulations without help in the shape of increased compensation.

On account of parcel post the Postmaster General has asked for increased appropriations for Railway Mail Service and star-route service. Extension of city delivery is well provided for. Why should not rural delivery be recognized and aided?

Appended hereto are two orders of the Postmaster General, showing that the duties required of rural carriers by the department have been greatly increased, even to the extent of aiding city carriers, who are protected by an eight-hour law.

Efficiency in the Postal Service means delivering the mail from the sender to the addressee in the shortest possible time and best possible condition, and rural carriers are willing and anxious to do their part to maintain perfect efficiency, but they feel that they should be adequately compensated for same.

While the present maximum salary is inadequate, the basis of gradation is crude, unequal, and illogical. In fact, it may be stated that on account of varying conditions in different sections no one basis of pay can be made to apply equitably.

I take the liberty of suggesting two bases as tending to adjust the compensation more nearly in proportion to the service rendered, road conditions, and cost of equipment maintenance.

First. In addition to the present salary of each carrier, provide an annual equipment allowance of \$120 minimum and \$300 maximum, provided that carriers on routes not less than 16 miles in length shall be allowed a minimum of \$200; on routes not less than 24 miles in length, a minimum of \$200. Major fractions of a mile to be considered a full mile. Additional equipment allowance to be based upon condition of roads, quantity of mail handled, and length of time required to serve route.

Second. Fix arbitrarily the length of a standard rural-delivery route

of roads, quantity of mair handled, and length of time required to serve route.

Second. Fix arbitrarily the length of a standard rural-delivery route at 24 miles and the pay for same at \$1,200 per year; for each mile above the standard add \$30 per year and deduct a like amount for every mile below the standard, major fractions of a mile to be considered a full mile. In addition, allow for equipment maintenance for routes not less than 20 miles in length a minimum of \$100 per year and a maximum of \$200 per year, provided that the total of salary and equipment allowance shall in no case exceed \$1,400.

While neither of the proposed bases will fully cover the cost of equipment maintenance, the adoption of either will be a step in the right direction, and I can assure you that all rural carriers in your district will fully appreciate your support.

Expense statements from carriers in your district will be submitted as soon as received.

Sincerely, yours,

Mr. MOON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. Hay, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 11338, the Post Office appropriation bill, and had come to no resolution thereon.

ENROLLED JOINT RESOLUTION SIGNED.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

S. J. Res. 5. Joint resolution providing for the appointment of a commission to consider the need and report a plan for National aid to vocational education.

LEAVE OF ABSENCE.

Mr. Beall of Texas, by unanimous consent, was granted leave of absence indefinitely on account of sickness in his family.

ADJOURNMENT.

Mr. MOON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly the House (at 6 o'clock and 2 minutes p. m.) adjourned until to-morrow, Friday, January 16, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting estimates of appropriations required by the several departments of the Government to complete the service of the fiscal year ending June 30, 1914, and for prior years (H. Doc. No. 595); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Comptroller of the Treasury submitting a supplemental estimate of appropriation for his office for the fiscal year ending June 30, 1915 (H. Doc. No. 593); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Navy, transmitting a statement of the expenses incurred from June 30 to December 1, 1913, by officers and employees of his department in attending meetings or conventions of societies or associations (H. Doc. No. 596); to the Committee on Expenditures in the Navy Department and ordered to be printed.

4. A letter from the president of the Chesapeake & Potomac Telephone Co., submitting, as required by law, a report of the Chesapeake & Potomac Telephone Co. for the year 1913 (H. Doc. No. 597); to the Committee on the District of Columbia and

ordered to be printed.

A letter from the Secretary of the Treasury, transmitting schedules of claims allowed by the several accounting officers of the Treasury Department under appropriations, the balances of which have been exhausted or carried to the surplus fund (H. Doc. No. 594); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XII, Mr. OLDFIELD, from the Committee on Patents, to which was referred the bill (H. R. 9897) to amend section 12 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, reported the same with an amendment, accompanied by a report (No. 166), which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. KEISTER: A bill (H. R. 11683) to provide for a site for a public building for post-office purposes at Latrobe, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. SIMS: A bill (H. R. 11684) to erect a post office building in the city of Lexington, State of Tennessee; to the Committee on Public Buildings and Grounds.

By Mr. GRIEST: A bill (H. R. 11685) providing for the appointment of eligible substitutes as rural letter carriers; to

the Committee on the Post Office and Post Roads.

By Mr. SHACKLEFORD: A bill (H. R. 11686) to provide that the United States shall, in certain cases, aid the States and the civil subdivisions thereof in the construction and maintenance of rural post roads; to the Committee on Roads.

By Mr. GRAHAM of Pennsylvania: A bill (H. R. 11687) to make July 30 of each and every year a public holiday in the District of Columbia, to be known as Representative Day; to

the Committee on the District of Columbia.

By Mr. MONDELL (by request): A bill (H. R. 11688) authorizing the purchase of lands chiefly valuable for timber and for the growth of timber in the State of Wyoming; to the Committee on Agriculture.

By Mr. CLINE: A bill (H. R. 11689) to place on the retired list of the Army the names of the surviving officers who were mustered out under the provisions of the act of Congress approved July 15, 1870, in reduction of the Army; to the Committee on Military Affairs.

By Mr. GARDNER: A bill (H. R. 11690) creating a United States corporation commission, and providing for incorporation under the laws of the United States; to the Committee on the

By Mr. PORTER: A bill (H. R. 11691) prohibiting the sending of anonymous literature through the mails and providing the punishment therefor; to the Committee on the Post Office Post Roads

By Mr. PALMER (by request): A bill (H. R. 11692) to make December 21 of each and every year a public holiday in the District of Columbia, to be known as the Landing of the Pilgrims'

Day; to the Committee on the District of Columbia.

SENATE.

FRIDAY, January 16, 1914.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the

following prayer:

Almighty God, let Thy blessing rest upon us as we come before Thee day by day seeking first the benediction of our Father, and then, under Thine own inspiration and guidance, addressing ourselves to the affairs of state. With the tremendous responsibilities resting upon us with reference to our organized society, we know that we can only be responsive to the real call for social justice and for the betterment of the people and in all the paths of progress as we are responsive first to the Divine command and are in harmony with the Divine So we pray Thee to put our hearts and minds in attune with the Infinite that we may do that which is pleasing in Thy sight, and as the result of all our labors bring peace and pros-

perity and happiness to all the people. For Christ's sake. Amen. The Journal of yesterday's proceedings was read and approved.

IMPORTATION OF CONVICT-MADE GOODS.

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of November 10, 1913, all complaints on file in the Treasury Department alleging a violation of the law prohibiting the importation of merchandise made by convict or prison labor, together with all correspondence in relation thereto, etc., which, with the accompanying papers, was referred to the Committee on Education and Labor.

PETITIONS AND MEMORIALS,

The VICE PRESIDENT presented memorials of Andrew Jackson Branch and Molly Pitcher Branch, American Continental League, of Philadelphia, Pa.; of Andrew Jackson Branch of Whitman, Mass.; of Washington Branch of St. Louis, Mo.; and of the Thomas F. Burke Club, of Philadelphia, Pa., remonstrating against any appropriation by Congress for the cele-bration of the so-called one hundred years of peace among English-speaking peoples, which were referred to the Committee on Foreign Relations.

Mr. SHIVELY presented a memorial of the Indiana Retail Shoe Association and a memorial of the Indianapolis Retail Shoe Association, of Indiana, remonstrating against the enactment of legislation providing for the labeling, marking, and tagging of leather and rubber goods, which were referred to the Committee on Interstate Commerce,

He also presented a petition of the Chamber of Commerce of Indianapolis, Ind., praying for the enactment of legislation providing for a reorganization and increase of the Regular Army, which was referred to the Committee on Military Affaira

Mr. SMITH of Georgia. I present resolutions passed by the Southern Labor Congress, expressing their views upon the workmen's compensation bill, which is pending before the Judiciary Committee. I ask that they may be printed in the RECORD.

There being no objection, the resolutions were referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

Resolution by W. D. Jackson, Holmes, R. R. Robinson, J. A. Martin, O. M. Grace, and W. W. Patten.

Whereas there is now pending before Congress of the United States a bill known as the workmen's compensation bill, similar to the Brantley-Sutherland bill, which was defeated during the last session

of Congress.

This bill is a very dangerous piece of legislation, and should it become a law would be one of the darkest pages ever written on labor legislation, and would deprive the railroad employees of the United States the right of a trial by a jury, and would repeal the present employers' liability laws we now have upon the statute books of the different States and of the United States: Therefore be it

Resolved, That the Southern Labor Congress go on record against any form of a compensation law that is the exclusive remedy; and be it further

Resolved, That the president of the Southern Labor Congress notify the President of the United States, the President of the United States Senate, and the Speaker of the House of Representatives of the United States of the action of this congress; and be it further

Resolved, That the president and secretary of this congress express to the executive officers of the American Federation of Labor, Samuel Gompers and others, requesting them to take the same position on the subject of compensation as had been taken by the Brotherhood of Railroad Trainmen, Brotherhood of Railroad Firemen and Enginemen, and the Order of Railroad Conductors.

I, W. C. Puckett, secretary-treasurer of the Southern Labor Congress, hereby certify that the foregoing resolution is a true and correct copy of original adopted by the Southern Labor Congress, in regular session, at Nashville, Tenn., September, 1913, and which is now on file in my office.

W. C. PUCKETT, Secretary Treasurer.

ATLANTA, GA., January 2, 1914.

Mr. SHEPPARD presented a memorial of sundry citizens of Caldwell, Tex., and a memorial of sundry citizens of Groom, Tex., remonstrating against the adoption of the proposed literacy clause in the immigration bill, which were referred to the Committee on Immigration.

Mr. WEEKS presented resolutions adopted by the Board of Trade of Springfield, Mass., favoring the establishment of a more equitable basis of payment to the railroads for carrying parcels post, which were referred to the Committee on Post

Offices and Post Roads.

He also presented a memorial of Andrew Jackson Branch, American Continental League, of Whitman, Mass., remonstrating against an appropriation being made for the celebration of 100 years of peace among the English-speaking peoples, which was referred to the Committee on Foreign Relations.

He also submitted resolutions adopted by the Socialist Club, of Taunton, Mass., favoring an investigation into the mining conditions in the copper district of Michigan, which were re-

ferred to the Committee on Education and Labor.

Mr. KENYON presented the petition of Fred Holst and sundry other citizens of Treynor, Iowa, praying for the enactment of rural credit legislation at this session of Congress, which was referred to the Committee on Banking and Currency.

Mr. OLIVER presented a memorial of the Board of Trade of Philadelphia, Pa., remonstrating against the enactment of legislation to amend the antitrust laws, which was referred to the

Committee on the Judiciary.

He also presented a memoral of the Board of Trade of Philadelphia, Pa., remonstrating against the enactment of legislation providing for the legalization of trade unions and prohibiting injunctions in certain cases, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Board of Trade of Philadelphia, Pa., remonstrating against the enactment of legislation limiting the hours of labor of persons engaged in producing interstate commerce, which was referred to the Committee on Interstate Commerce.

He also presented a petition of Pride of Welcome Council, No. 33, Daughters of Liberty, of Pittsburgh, Pa., and a petition of sundry citizens of Meadville, Pa., praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

He also presented a memorial of Local Branch No. 1473, National Association of Letter Carriers, and a memorial of Local Branch No. 1263, United National Association of Post-Office Clerks, of East Pittsburgh, Pa., remonstrating against the enactment of legislation annulling the civil-service status of assistant postmasters, which were referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of the Central Labor Union of Erie, Pa., praying that an investigation be made into the conditions existing in the mining districts of Michigan, which was

referred to the Committee on Education and Labor.

He also presented memorials of the Wolfe Tone Society, of Pittsburgh; of the Daniel H. Comber Club, of Philadelphia; of Local Division No. 17, Ancient Order of Hibernians, of Wilmerding; of Andrew Jackson Branch, American Continental League, of Philadelphia; of the Thomas Davis Club, of Philadelphia; and of the Vinegar Hill Club, of Philadelphia, all in the State of Pennsylvania, remonstrating against an appropriation being made for the celebration of the so-called 100 years of peace among the English-speaking peoples, which were referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Meadville,

Pa., remonstrating against the enactment of legislation making the 12th day of October in each year a legal holiday, which was

referred to the Committee on the Judiciary.

Mr. SMITH of Michigan presented petitions of sundry citizens of Chesaning, Flint, Ann Arbor, St. Louis, Hastings, Free-

port, Ashley, Carson City, North Branch, Birmingham, Sumner, and Sandusky, all in the State of Michigan, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Detroit and Manchester, Mich., praying for the enactment of legislation to further restrict immigration, which were referred to the Com-

mittee on Immigration.

He also presented a memorial of Shipmasters' Association Lodge No. 8, of Marine City, Mich., remonstrating against the passage of the so-called La Follette seamen's bill, which was

ordered to lie on the table. He also presented petitions of Local Union No. 928, Painters, Decorators, and Paperhangers of America, of Grand Rapids; of sundry citizens of Three Rivers; of Local Union No. 75, Amalgamated Sheet Iron and Metal Workers, of Kalamazoo; and of the Trades Council of Jackson, all in the State of Michigan, praying for the enactment of legislation to make lawful certain agreements between employers and laborers and persons engaged in agriculture or horticulture and to limit the issuing of injunctions in certain cases, and for other purposes, which were referred to the Committee on the Judiciary

Mr. BRANDEGEE. I present resolutions adopted by the Norwich Business Men's Association, of Connecticut, which I ask may be read and referred to the Committee on Interstate Commerce.

There being no objection, the resolutions were read and referred to the Committee on Interstate Commerce, as follows:

Norwich Business Men's Association, Norwich, Conn., December 22, 1913.

Hon. F. B. Brandegee, Washington, D. C.

Dear Sir: At the last meeting of the eastern Connecticut development committee the following resolution was unanimously adopted:

"Resolved, That we, the committee on the development of eastern Connecticut, representing New London and Windham Counties, deprecate the application of the law relative to railroads owning vessels sailing in a coastwise trade, in so far as it applies to boat lines, many of which have for years been an integral part of rail lines rendering express service at a low rate, and said boat lines will in nowise be connected more than at present with traffic passing through the Panama Canal Zone.

express service at a low rate, and said boat lines will in nowise be connected more than at present with traffic passing through the Panama Canal Zone.

"We believe entirely unnecessary the diverting of lines like the New York, New Haven & Hartford Railroad and Central Vermont Railroad, which are at present operating in this coastwise trade, many of their lines having been in use prior to their having rail connections with New York, and we believe further that such a separation will work to the serious disadvantage of the farmers and merchants in general, through increased rates due to separate ownership, possibly requiring two or more charges for each consignment or much longer in transit, or both, which will surely result.

"It is further resolved by this committee, that a copy of this resolution be forwarded to the Interstate Commerce Commission, also the Attorney General of the United States, and our Representatives and Senators in Congress, with the earnest request that they do all in their power to prevent such dissociation, and that our secretary be instructed to forward such copies to those named."

Respectfully, yours,

Charles W. Pearson,

CHARLES W. PEARSON, Secretary. REPORTS OF COMMITTEES.

Mr. PERKINS, from the Committee on Commerce, to which was referred the bill (S. 2696) to authorize the city of Fairmont to construct and operate a bridge across the Monongahela River at or near the city of Fairmont, in the State of West Virginia, submitted an adverse report (No. 155) thereon, which

was agreed to, and the bill was postponed indefinitely.

Mr. BRYAN, from the Committee on Claims, to which was referred the bill (S. 661) for the relief of the legal representatives of Thomas B. McClintic, deceased, reported it without amendment and submitted a report (No. 154) thereon.

Mr. VARDAMAN. I am directed by the Committee on Commerce, to which was referred the bill (S. 1324) to authorize Robert W. Buskirk, of Matewan, W. Va., to bridge the Tug Fork of the Big Sandy River, at Matewan, Mingo County, W. Va., where the same forms the boundary line between the States of West Virginia and Kentucky, to submit an adverse report (No. 156) thereon.

A House bill similar to this bill having become a law, the committee have instructed me to ask unanimous consent that the matter be disposed of and that the bill be indefinitely post-

The VICE PRESIDENT. The bill will be postponed indefinitely.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows

By Mr. BRISTOW:

A bill (S. 4008) granting a pension to Allen Brown (with accompanying papers); to the Committee on Pensions.

By Mr. WORKS:

A bill (S. 4009) authorizing the Secretary of the Interior to acquire certain property in the District of Columbia for the purpose of providing a reservation for a public park and recreation house; to the Committee on the District of Columbia.

By Mr. BRADY: A bill (S. 4010) granting a pension to George W. Goodman

(with accompanying papers); and

A bill (S. 4011) granting an increase of pension to Albina M. Williams (with accompanying papers); to the Committee on Pensions.

By Mr. SHAFROTH:

bill (S. 4012) to increase the limit of cost of the United States public building at Grand Junction, Colo.; to the Committee on Public Buildings and Grounds.

A bill (S. 4013) granting an increase of pension to Charles White;

A bill (S. 4014) granting an increase of pension to Joel R.

Smith; and

A bill (S. 4015) granting a pension to George Washington; to the Committee on Pensions.

By Mr. KENYON:

A bill (S. 4016) to regulate the issuance of stocks and bonds by common carriers, and for other purposes; to the Committee on Interstate Commerce.

A bill (S. 4017) to provide for the monthly payment of pen-

sions, and for other purposes; and

A bill (S. 4018) granting an increase of pension to John L. Russell; to the Committee on Pensions.

By Mr. BRADLEY:

A bill (S. 4019) to authorize the Tug River & Kentucky Railroad Co. to construct a bridge across the Tug Fork of the Big Sandy River at or near the mouth of Blackberry Creek, in Pike County, Ky.; to the Committee on Commerce.

By Mr. BRANDEGEE:

A bill (S. 4020) to remove the charge of desertion from and correct the military record of Almar F. Dickson; to the Committee on Military Affairs.

By Mr. THOMPSON:

A bill (S. 4021) extending the time for aliens to file petitions for citizenship in the United States; and

A bill (S. 4022) relating to the naturalization of married women; to the Committee on Immigration.

A bill (S. 4023) to correct the military record of Waldo H. Coffman; to the Committee on Military Affairs.

By Mr. SAULSBURY :

A bill (S. 4024) granting a pension to Harlan Gause; to the Committee on Pensions.

By Mr. SHIVELY:

bill (S. 4025) granting an increase of pension to William

A bill (S. 4026) granting an increase of pension to Gashem Norris (with accompanying papers); and A bill (S. 4027) granting an increase of pension to William

R. Mathis (with accompanying papers); to the Committee on Pensions.

By Mr. HUGHES:

A bill (S. 4028) granting an increase of pension to Samuel Hill; and

A bill (S. 4029) granting a pension to Teresa Mindermann; to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 4030) granting an increase of pension to Edward Irwin (with accompanying papers); to the Committee on Pensions.

By Mr. SMITH of Michigan:

bill (S. 4031) to correct the military record of William Miles (with accompanying papers); and

A bill (S. 4032) to remove the charge of desertion from the record of Wilbur F. Lawton (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 4033) granting an increase of pension to Charles L. Stuck (with accompanying papers);

A bill (S. 4034) granting an increase of pension to Silas Wright (with accompanying papers);

A bill (S. 4035) granting an increase of pension to Kate W. Foster (with accompanying papers);

A bill (S. 4036) granting a pension to Margaret Tennant Fuger (with accompanying papers);

A bill (S. 4037) granting an increase of pension to John Rosenberger (with accompanying papers);

A bill (S. 4038) granting an increase of pension to Marshall

A bill (S. 4039) granting a pension to Hattie L. Fox; and A bill (S. 4040) granting an increase of pension to Alverton H. Town; to the Committee on Pensions.

By Mr. SHEPPARD:

A joint resolution (S. J. Res. 98) authorizing a survey and examination of the Rio Grande border of the United States to determine the advisability of constructing a highway either along the entire border or certain sections thereof; to the Committee on Military Affairs.

MISSISSIPPI RIVER BRIDGE COMMISSION.

Mr. REED. I introduce a bill which I ask may be read and

referred to the Committee on the Judiciary.

The bill (8. 4041) to empower and direct the President of the United States to appoint a commission to select and locate the route or routes of the railroad approach or approaches in the State of Illinois to connect with the municipal bridge of the city of St. Louis, State of Missouri, across the Mississippi River at St. Louis, and to amend an act entitled "An act to authorize the city of St. Louis, a corporation, organized under the laws of the State of Missouri, to construct a bridge across the Mississippi River," approved June 25, 1906, and the various acts amendatory thereof and supplementary thereto, and appropriating the sum of \$25,000 to defray the expense of said commission, was read twice by its title.

The VICE PRESIDENT. The bill properly belongs to the Committee on Commerce.

Mr. REED. I think, Mr. President, that the bill ought to be referred to the Judiciary Committee because it involves questions of law with reference to the right of this company to acquire certain lands. There has been much litigation in connection with this project, and I therefore request that the bill be referred to the Committee on the Judiciary.

The VICE PRESIDENT. Without objection, the bill will be

referred to the Committee on the Judiciary.

AMENDMENTS TO DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. LODGE submitted an amendment proposing to appropriate \$130,000 for the purchase of a site for the construction and equipment of a building or buildings for a municipal lodging house and wood and stone yard in the District of Columbia, intended to be proposed by him to the District of Columbia appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate \$360 for salary of foreman of municipal lodging house in the District of Columbia, intended to be proposed by him to the District of Columbia appropriation bill, which was referred to the Committee on the District of Columbia and ordered to be

printed.

AGRICULTURAL COOPERATION AND RURAL CREDIT.

Mr. GORE submitted the following resolution (S. Res. 245), which was read and referred to the Committee on Printing.

Resoived, That there be printed for the use of the Senate document room 1,000 additional copies of Senate Document No. 214, "Agricultural cooperation and rural credit in Europe."

RAILROADS IN ALASKA.

The VICE PRESIDENT. The morning business is closed and the calendar, under Rule VIII, is in order.

Mr. CHAMBERLAIN. Mr. President, before passing to that, I submit a unanimous-consent agreement in reference to the unfinished business?

The VICE PRESIDENT. It will be read.

The Secretary read as follows:

The Secretary read as follows:

It is agreed, by unanimous consent, that on Tuesday, January 20, 1914, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (8, 48) authorizing the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and that at not later than 5 o'clock p. m. on that calendar day the Senate will proceed, without further debate, to vote upon any amendment that may be pending, any amendments that may be offered, and upon the bill, through the regular parliamentary stages, to its final disposition.

The VICE PRESIDENCE Lat there objection to the prepared

The VICE PRESIDENT. Is there objection to the proposed agreement?

Mr. GALLINGER. As I remember it, Mr. President, a rule was recently agreed to requiring a call for a quorum before unanimous consent should be asked. Am I correct?

Mr. CHAMBERLAIN. I did not remember that the rule

had been adopted.

Mr. GALLINGER. I have an impression that it was agreed to. The VICE PRESIDENT. The proposed amendment to the rule went over on the request of the Senator from Arizona [Mr. ASHURST]

Mr. GALLINGER. I ask that the roll be called. I make the

point of no quorum.

Mr. THOMAS. I should like to inquire before the roll is called as to the day and hour fixed in the agreement.

The VICE PRESIDENT. Five o'clock next Tuesday. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Overman	Smoot
Bacon	Hughes	Perkins	Sterling
Bankhead	Johnson	Pittman	
Bradley	Jones	Reed	Sutherland
			Swanson
Brady	Kenyon	Robinson	Thomas
Brandegee	Kern	Root	Thompson
Bristow	Lea	Saulsbury	Thornton
Bryan	Lippitt	Shafroth	Townsend
Burleigh	Lodge	Sheppard	Vardaman
Burton	McCumber	Shively	Walsh
Chamberlain	McLean	Simmons	Weeks
Chilton	Martine, N. J.	Smith, Ariz.	Works
Clark, Wyo.	Myers	Smith, Ga.	
Dillingham	Norris	Smith, Mich.	E. Color Division
Callinger	O'Common	Smith & C	

Mr. SHEPPARD. My colleague [Mr. Culberson] is necessarily absent. He is paired with the Senator from Delaware

[Mr. DU PONT]. This announcement will stand for the day.
Mr. BRYAN. My colleague [Mr. Fletcher] is necessarily absent. He is paired with the Senator from Wyoming [Mr.

WARREN

Mr. CLARK of Wyoming. I desire to announce that my colleague [Mr. WARREN] is unavoidably absent from the city.

Mr. WEEKS. I wish to state that the junior Senator from Illinois [Mr. Sherman] is absent on account of business. ask that this statement may stand for the day.

Mr. REED. I desire to announce the unavoidable absence of my colleague [Mr. STONE] on account of sickness.

The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present. The Secretary will again read the proposed unanimous-consent agreement.

The Secretary read as follows:

It is agreed by unanimous consent that on Tuesday, January 20, 1914, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (S. 48) authorizing the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and that at not later than 5 o'clock p. m. on that calendar day the Senate will proceed, without further debate, to vote upon any amendment that may be pending, any amendments that may be offered, and upon the bill through the regular parliamentary stages to its final disposition.

The PRESIDING OFFICER (Mr. Swanson in the chair). Is there objection to the proposed unanimous-consent agreement?

Mr. WORKS. Mr. President, there are other Senators who desire to be heard on the bill, one of whom I know is absent, and amendments are to be submitted to it. This is a very important measure and it ought not to be hurried through, particularly in the absence of that Senator. I shall have to object at the present time. I shall be very glad if the Senator from Oregon will allow the matter to go over until to-morrow morning

Mr. CHAMBERLAIN. Mr. President, I would say that I have no particular reason for urging the agreement at this time, but so far as I have been advised I know of but two Senators who have expressed a desire to address themselves to the pending bill, and I assumed that anyone who wanted to speak would let me know about it, inasmuch as I have been honored by being placed in charge of the measure. If the Senator from California prefers to have the proposed agreement 30 over and come up to-morrow morning, I am willing to postpone it until that time; but I should like to have the matter disposed of, because appropriation bills will soon come before the Senate, and I desire to have the way clear, if possible.

Mr. WORKS. I have no desire to delay the bill unnecessarily, but in view of the suggestion I have made I prefer to have the proposed agreement go over until to-morrow.

Mr. BRISTOW. Mr. President, I desire to suggest to the Senator in charge of the bill that it seems to me, when the unanimous-consent agreement is asked, it should contain a provision similar to the one that we had on the currency bill, because amendments to this important measure may be offered, and, under the wording of the unanimous-consent agreement which is now asked, there could not be any information or any discussion of any character whatever had upon such an amendment. I think that is a very dangerous way to accept or reject amendments to important measures, and I should like a provision inserted in the unanimous-consent agreement which will enable amendments to be offered and debated for a limited time when the unanimous-consent agreement is finally asked.

Mr. CHAMBERLAIN. In what respect, then, would the Senator from Kansas suggest a change?

Mr. BRISTOW. I would suggest that the same phraseology be employed that was used in the unanimous-consent agreement with reference to the currency bill. The Senator from Oregon can look that up and see if it will meet with his approval.

Mr. CHAMBERLAIN. Inasmuch as a request has been made that the matter go over until to-morrow morning, I will confer with the Senator from Kansas, and probably change the form of

the request. I have no objection to his suggestion.

The PRESIDING OFFICER. There being no objection, the request will go over until to-morrow. Morning business is

Mr. JONES. Mr. President, I had hoped to be prepared to briefly discuss the Alaskan railroad bill to-day, but I have been unable to complete my preparation to do so. I gather from what has been said this morning that the bill is not likely to pass to-morrow. I therefore give notice that immediately after the routine morning business on Monday next I shall address the Senate with reference to the Alaskan railroad bill.

THE CALENDAR.

The VICE PRESIDENT. The Calendar under Rule VIII is in order.

The bill (S. 821) authorizing the Secretary of War to relieve the Washington-Oregon Corporation, as far as he may deem advisable in the public interests, from certain conditions in an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912, was announced as first in order.

Mr. JONES. I think my colleague [Mr. POINDEXTER] is in-

terested in the disposition of that bill, and therefore I ask

that it go over.

The VICE PRESIDENT. The bill goes over.

The joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women was announced as next in order.

Mr. SMITH of Georgia. Let that go over.
The VICE PRESIDENT. There being objection, the resolu-

tion will go over.

The bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, was announced as next in order.

Mr. GALLINGER. Let that go over, Mr. President.

The VICE PRESIDENT. The bill goes over.

The bill (S. 1240) to establish the legislative reference bureau of the Library of Congress was announced as next in order.

Mr. GALLINGER. Let that go over. The VICE PRESIDENT. The bill goes over.

The bill (S. 1760) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863, was announced as next in order.

Mr. SMOOT. Let that go over. The VICE PRESIDENT. The bill goes over. The bill (S. 654) to accept the cession by the State of Montana of exclusive jurisdiction over the lands embraced within the Glacier National Park, and for other purposes, was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill goes over.

The bill (S. 655) authorizing the Secretary of the Interior to survey the lands of the abandoned Fort Assinniboine Military Reservation and open the same to settlement was an-

nounced as next in order.

Mr. SMOOT. Mr. President, the other day the junior Senator from Montana [Mr. Walsh] asked that that bill go over. There was no reason assigned for the request, but the Senator from Montana is not now in the Chamber. I ask, therefore, that the bill go over, unless the senior Senator from Montana [Mr. Myers] can say that the present consideration of the bill will be perfectly satisfactory to the junior Senator from Montana.

Mr. MYERS. The junior Senator from Montana is not here just now. I take it that he asked that the bill go over because I was not in the Chamber at the time. I assume that that was his motive. I will try to reach him, and in the meantime will ask that the bill be passed over for the present.

Mr. SMOOT. Then I ask that that bill and the next bill, being Senate bill 657, go over until the junior Senator from Montana be present, he having requested on a previous occasion that both of those bills go over.

The VICE PRESIDENT. Senate bill 655 and Senate bill 657 will be passed over, at the request of the Senator from Utah.

Mr. MYERS subsequently said: I inquire what became of Calendar No. 68, being the bill (S. 657) to authorize the reser-

vation of public lands for country parks and community centers within reclamation projects, and for other purposes?

Mr. SMOOT. That went over for the same reason as the previous bill on the calendar.

Mr. MYERS. I think that my colleague asked that those bills should go over the other day because I was absent; and now it seems that they are to go over because he is absent.

Mr. SMOOT. I will say to the Senator that I have no such thought, and before the calendar again comes up for consideration I shall ask the junior Senator from Montana if he has any objection to the bills themselves; and, if he has none, I certainly shall not object to their consideration.

RIGHTS OF AMERICAN CITIZENS IN FOREIGN COUNTRIES.

The resolution (S. Res. 139) declaring the rights of American citizens to protection of lives and property by this Government was announced as next in order.

Mr. GALLINGER. I ask that that resolution go over under

Rule IX.

The VICE PRESIDENT. The resolution will 30 over under Rule IX.

PUNISHMENT FOR CERTAIN CRIMES.

The bill (S. 2674) to define certain crimes and to provide punishment therefor was announced as next in order.

The VICE PRESIDENT. The Chair will state that the bill

has been read on a previous occasion.

Mr. CUMMINS. Mr. President, I ask that that bill be passed. over for the present, holding its place on the calendar under Rule VIII.

The VICE PRESIDENT. The bill will go over without prejudice, at the request of the Senator from Iowa.

RELIEF OF AMERICAN CITIZENS IN MEXICO.

The resolution (S. Res. 152) authorizing the Committee on Foreign Relations to proceed with an investigation of the conditions of American citizens in the Republic of Mexico was announced as next in order.

Mr. GALLINGER. I make the same request concerning that resolution that I did as to the previous resolution, namely, that it go over under Rule IX.

The VICE PRESIDENT. Without objection, the resolution will go to the calendar under Rule IX.

BILLS AND RESOLUTIONS PASSED OVER.

The bill (S. 2725) authorizing the sale of certain lands to the Dwight Mission School, on Sallisaw Creek, Okla., was announced as next in or er.

Mr. SMCOT. Let that bill go over, and also 'he next busi-

ness on the calendar.

The VICE PRESIDENT. Senate bill 2725, and the next business on the calendar, being the joint resolution (S. J. Res. 41) authorizing the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co., a corporation, will be passed over at the request of the Senator from Utah.

The bill (S. 2242) making it unlawful for any Member of Congress to serve on or solicit funds for any political committee, club, or organization was announced as next in order.

Mr. SMOOT. I ask that that bill go over to-day, for the same reason that I gave when the calendar was last under

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 3112) to authorize the Secretary of the Interior to acquire certain right of way near Engle, N. Mex., was announced as next in order.

Mr. THOMAS. I ask to have that bill go over. The VICE PRESIDENT. The bill will be passed over. The bill (S. 2651) providing for the purchase and disposal of certain lands containing kaolin, kaolinite, fuller's earth, and other minerals within portions of Indian reservations heretofore opened to settlement and entry was announced as next in order.

Mr. STERLING. I ask that that bill go over. The VICE PRESIDENT. The bill will be passed over. The resolution (S. Res. 156) limiting expenditures for telegrams sent or received by Senators was announced as next in order.

Let that resolution go over.

The VICE PRESIDENT. The resolution will be passed over. The bill (S. 2860) providing a temporary method of conducting the nomination and election of United States Senators as announced as next in order.

The VICE PRESIDENT. The bill has heretofore been read.
Mr. GALLINGER. I ask that the bill go over in the absence
of the Senator from Montana [Mr. Walsh].
The VICE PRESIDENT. The bill will go over.

ANNOUNCEMENT OF PAIRS IN MAKING A QUORUM.

The next business on the calendar was the resolution (S. Res. 84) providing that any Senator, upon his own request, may be recorded and counted as present in order to constitute a quorum. The VICE PRESIDENT. The resolution will be read.

The Secretary read the resolution, which had been reported

from the Committee on Rules, as follows:

Resolved, That the rules of the Senate be amended as follows: In Rule XII, clause 1, after the words "by the Senate," there shall be inserted the following: "and any Senator may arise and declare that he is paired and state how he would vote if not paired, and may add that, being present, he desires to be so recorded in order to constitute a quorum, whereupon he shall be so recorded and his presence as a part of the quorum announced by the Chair."

The VICE PRESIDENT. The question is on agreeing to the

Mr. ROOT. Mr. President, I have no objection whatever to the rule, standing by itself, but it occurs to me that there should be some reflection upon the inevitable consequences that will flow from it. I will say to the Senator from Georgia [Mr. Bacon] that this is a resolution providing that a Senator may announce a pair and state how he would vote if at liberty to vote, and be counted to make a quorum. Now, Mr. President, it will follow from that that for the first time pairs will become a matter of the rules of the Senate. That is a complete overturning of the theory upon which we have always proceeded, and we ought to think about it.

Mr. BACON. I want to state to the Senator, as he has mentioned me especially, that I am not only not the author of that resolution, but I did not even agree to it in the committee.

Mr. ROOT. I referred to the Senator from Georgia-perhaps I should not have done so-because I noticed that he seemed to be very much interested in ascertaining what the subject was.

Now, are we ready to put the practice of making pairs into the rules of the Senate? I doubt if the subject has been thought out as much as it ought to be. At all events, I should like to have the Senator from Mississippi [Mr. WILLIAMS] tell us what his view upon that general subject is. I ask that the resolution

Mr. BACON. Mr. President, I want to say, before the Senator takes his seat and the matter goes over, that, in addition to the suggestion made by him, I think it is but a precursor to the counting of a quorum, to which I do not agree, and never

Mr. SMITH of Georgia. Mr. President, I think the Senator from Mississippi [Mr. Williams] is probably ill to-day. He left the Senate Chamber yesterday feeling quite indisposed, after making inquiry about what business would come up, and said he felt so very badly that he thought he ought to go home. The VICE PRESIDENT. On objection, the resolution will

go over.

UNANIMOUS-CONSENT AGREEMENTS.

The resolution (S. Res. 202) to amend Rule XII of the standing rules of the Senate was announced as next in order.

Mr. CHAMBERLAIN. I ask that that resolution may go over. Mr. BACON. I hope that we may act upon the resolution. We have plenty of time to do so, and it is a most important matter. Of course, if the Senator objects, I have nothing more to say.

Mr. CHAMBERLAIN. The only objection I have to that proposed amendment of the rules is that it makes absenteeism the rule of the Senate for the transaction of the business of the There are Senators-and the Senator from Georgia is one of them-who are usually here to attend to business, but there are many Senators who are frequently absent; and if that is to be the rule we might as well turn over the business of the Senate to those who do not take very much interest in the proceedings. I do not mean to say that such Senators neglect their duties, but I mean that they are in attendance upon com-mittees so that they can not be here. It seems to me that Senators who are in attendance upon the Senate ought to have some voice in legislation and in having business set down for determination.

That is an objection to the merits, the strength Mr. BACON. of which, of course, I recognize; but the question is whether we shall now consider the proposed amendment to the rules with a view to acting upon it. Such objections as may be urged against it will then be in order to be urged, and such reasons as may be suggested in support of it may be given. I think it is a matter that we ought to take up. If the Senate does not approve of the proposed amendment, it can vote it down, but I think we ought to act upon it.

Mr. CHAMBERLAIN. I withdraw my objection at the re-

quest of the Senator.
Mr. GALLINGER. Mr. President, I was heartily in favor of the amendment to the rules as originally submitted, but the door to making a change in a unanimous consent agreement. I

committee has recommended an amendment to the resolution, and I think that amendment ought to be read. It goes beyond the original proposition.

The PRESIDING OFFICER. The Secretary will read the

amendment proposed by the Committee on Rules.

The Secretary. On page 2, line 1, after the word "Senate," it is proposed to insert "but any unanimous consent may be revoked by another unanimous consent granted in the manner prescribed above," so as to make the resolution read:

prescribed above," so as to make the resolution read:

Resolved, That the rules of the Senate be amended by adding the following paragraph to the twelfth standing rule of the Senate, to be numbered and known as paragraph 3 of said Rule XII, to wit:

"PAR, 3. No request by a Senator for unanimous consent for the taking of a final vote on a specified date upon the passage of a bill or joint resolution shall be submitted to the Senate for agreement thereto until, upon a roll call ordered for the purpose by the presiding officer, it shall be disclosed that a quorum of the Senate is present; and when a unanimous consent is thus given, the same shall operate as the order of the Senate, but any unanimous consent may be revoked by another unanimous consent granted in the manner prescribed above."

Mr. LODGE: Mr. Provident I was most beautily in favor of

Mr. LODGE. Mr. President, I was most heartily in favor of the amendment to the rules as introduced by the Senator from Georgia [Mr. Bacon]. I think it an extremely desirable amendment which would cure a recognized evil, but I confess that I do not like the amendment which has been proposed by the committee, because the value of a unanimous-consent agreement is that it is to be a determination of the matter. Now it is proposed to adopt a provision which may practically nullify a unanimous-consent agreement, and under which we can go on indefinitely breaking up unanimous-consent agreements upon which we depend for the conclusion of our business. I think it would be very unfortunate to break through the custom of the Senate as to the finality of a unanimous-consent agreement. Mr. BACON. Will the Senator permit me to make a sugges-

tion in that regard?

Mr. LODGE. Certainly.
Mr. BACON. The Senator will note the fact that the unanimous-consent agreement can not be easily removed, because it would require a unanimous-consent agreement with a quorum

present in order to abrogate the former agreement.

It sometimes happens that the most imperative reasons are presented why a unanimous-consent agreement which was providently and wisely entered into should be abrogated and set aside. I am not sure the Senator was here when an incident occurred which illustrates what I now say. It occurred, I think, during the latter part of the last extra session. A unanimous-consent agreement was made, and at the time it was entered into there was no reason, apparent or suggested, why it should not be entered into. When the time came for action upon it, however, it was apparent to everybody that it was extremely important that that should not be done, and we had to resort to the device of acting upon it and then reconsidering our action in order to get around the difficulty.

I should very seriously oppose any opportunity for the abrogation of one unanimous-consent agreement by another unanimous-consent agreement unless the original part of the rule is also adopted, which would be a guaranty against anything like snap judgment by any small number of Senators who might be present in thus abrogating a former unanimous-consent agreement; but a single Senator can, by objecting, prevent the former unanimous-consent agreement from being abrogated. It seems to me that with the safeguard which will require the presence of a quorum before the former unanimous-consent agreement can be abrogated, the further safeguard of the power of a single Senator to prevent it will remove it from any great

degree of objection.

Mr. LODGE. I appreciate the force of that; but it seems to me the argument which has always been applied here and on which we have always stood in dealing with unanimous-consent agreements is applicable to the proposed amendment. That is, it it impossible to be sure that after a unanimous-consent agreement has once been made, persons present, granting that consent and greatly interested in it, shall all be present when the attempt is made to revoke it. We know that sometimes it is very difficult to get unanimous consent. Terms are entered into upon which those who perhaps are not very anxious to give the consent insist, and those terms are made in deference to their wishes. They may not be present when the attempt is made to remoke it, and it introduces at once an element of uncertainty into the unanimous-consent agreement.

I think the secret of the Senate's doing business-Senator knows, all important business is done by unanimous consent-has been that everybody has understood that when a unanimous-consent agreement was entered into it was final, and that at the time agreed upon the vote would be taken, and every man had due notice to be here. Now we are opening the think the other part, as the Senator originally introduced it, is of the utmost importance as an amendment to the rules, and I

shall vote for it with great pleasure.

Mr. BACON. I will say to the Senator that I am not the author of the amendment to the proposed amendment, nor did I suggest it, although I acquiesced in it. I think, however, the amendment is a very good one. My only objection to it was the apprehension that there would occur exactly what now occurs something which might endanger the original amendment by reason of the complication which results from there being two propositions instead of one to be considered.

Mr. SMOOT. Does not the Senator believe that where a unanimous-consent agreement conflicts with the better judgment of the Senate, as it did in the case to which he referred, it would be better to do as we did at that time, act upon it and then ask for a reconsideration, rather than to have a standing rule here by which a unanimous-consent agreement can be

changed by another unanimous-consent agreement? Mr. BACON. I myself would be perfectly willing to have

the amendment adopted as it was originally presented, Mr. SMOOT. I wish to say that I am heartily in favor of the amendment to the rules, provided the amendment to it is eliminated. I do not want to vote for the amendment to the rules with the proposed amendment in it. We ought to hold strictly, as the Senate always has, to the spirit and terms of a unanimous-consent agreement once given. It has always been the way of hastening legislation in this body.

Mr. OVERMAN. I think the author of the amendment to the amendment is not here, and therefore probably it would be

better to have it go over until he is here.

Mr. BACON. I should very much prefer to have the two propositions considered separately. There is no reason why that which is now offered as an amendment to the amendment should not be hereafter considered by itself as a substantive amendment. Even if the amendment to the amendment should be rejected now, I do not think it would be any barrier to its consideration hereafter by the Senate as a substantive amendment. I am speaking of the amendment for the abrogation of a unanimous-consent agreement.

Mr. LODGE. If the Senator from Georgia will allow me, I should like to call his attention to another point in this same connection. Of course, as the Senator from New York [Mr. Root] has suggested to me, if you can revoke the whole agreement you can revoke any part of it. That is, you can introduce a modification in your new agreement, which amounts to changing some of the terms. Some of the terms of a unanimousconsent agreement, as we well know, are insisted upon very frequently by one Senator or two or three Senators—some arrangement about the length of time for debate, if we put on the 5-minute rule or the 10-minute rule, or something of that sort. A Senator who may be very much interested in the terms of the original agreement may be absent when it comes up the second time. He can no longer rest on the assurance that an agreement made by the Senate is final.

As the other amendment is so important, I wish the committee would be willing to let this go and be dealt with as a separate rule, as the Senator from Georgia very properly suggests

can be done.

Mr. THOMAS.

Mr. THOMAS. Mr. President-The VICE PRESIDENT. Doc Does the Senator from Georgia yield to the Senator from Colorado?

Mr. BACON. I yield the floor.

Mr. THOMAS. I have the utmost deference for the judgment of Senators older than myself, not only as to the propriety but as to the practical operation of the rules of the Senate; but during the short time I have been here I have been impressed by the fact that many of our rules tend rather to the postponement and delay of business than to its prompt and efficient transaction.

I am heartily in favor of the proposed amendment, both as to the amendment originally offered and the amendment to the amendment. As far as unanimous consent is concerned, I think a quorum ought to be present when action is finally

taken upon such a request.

The suggestion of the Senator from Oregon [Mr. CHAMBER-LAIN], which, in substance, was that such a rule would practically put the business of the Senate in the hands of absentees, does not appeal to me at all. In the first place, absenteeism does not go to such an extent as to deprive this body of a quorum. Generally speaking, during the sessions of the Senate a quorum is obtainable; and I think perhaps it will have the good effect of increasing the attendance of Senators upon the sessions of the Senate. Whether that be so or not, however, it is perfectly logical and proper that a majority of the Senate should be present when so important a matter as the obtaining on each occasion.

of unanimous consent on important measures of legislation is under consideration. Consequently, I think the rule is a very desirable one, and should, therefore, be incorporated into Rule XII as provided by the report of the committee.

Mr. LODGE. Mr. President-

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Massachusetts?

Mr. THOMAS. Certainly.
Mr. LODGE. I entirely agree with the Senator's main proposition. We do not want to put anything in the rules which would tend to increase delay. On the contrary, we want to expedite business, because the tendency of the Senate is to delay too much. It seems to me, however—and that is one of my objections to the committee amendment—that it opens the door to fresh delays. At present, when we get a unanimousconsent agreement, the thing is going to be settled. It is now proposed to open the door so that it shall not be final, and we may change it.

Mr. THOMAS. I appreciate the force of the argument and the earnestness and sincerity of it. I have no doubt that such is the view of the Senator and that that view may be correct. The reason which animates my judgment in support of this amendment, however, is that I am incapable of understanding how a legislative body can have the power by unanimous consent to agree to something and at the same time deprive itself of the power subsequently to agree to undo the thing to which it has unanimously agreed. It seems to me the most illogical thing in the world to say that the Senate of the United States can unanimously agree to something and by that act deprive itself of the power to agree unanimously to undo it.

Mr. SMITH of Arizona. Provided a quorum is present.

Mr. SMOOT. Mr. President, will the Senator yield to me? Mr. THOMAS. Certainly. Mr. SMOOT. As a plain statement that would look reasonable; but I with other Senators look at it from a different standpoint. Many times when a unanimous-consent agreement has been reached there have been not over a dozen Senators in the Chamber. Nevertheless, the consent has been given.

Mr. THOMAS. I am in favor, as the Senator is, of that part

of the amendment as well as the other.

Mr. SMOOT. Yes; I am in favor of having no unanimousconsent agreement made until the presence of a quorum is developed. Suppose, however, the presence of a quorum is developed showing 50 Senators present and an agreement is then The Senator who has had the unanimous-consent agreement granted then feels assured that the agreement will be carried out, and he may not be present the following day and some other Senator asks unanimous consent that the unanimousconsent agreement be set aside.

Mr. THOMAS. A single objection would defeat it.
Mr. SMOOT. That is true; and a single objection in the first
place would have defeated the original unanimous-consent agreement.

Mr. THOMAS. Certainly. Mr. SMOOT. But the Senator or Senators interested in securing the unanimous-consent agreement in the first place may not be in the Senate at the time the subsequent request is made. Of course, no Senator particularly interested in the first

consent, if present, would allow the second request.

Mr. THOMAS. I do not think, under those circumstances, any Senator would violate a unanimous-consent agreement or change it in any way in the absence of the Senator at whose request the unanimous-consent agreement was first obtained. I do not think so; and I am certain that if an attempt were made there would be opposition, in consequence of which an objection

would defeat the efforts to make the change.

Mr. BRYAN. Mr. President—

Mr. SMITH of Georgia. Some Senator who was a friend of the absent Senator would certainly suggest it.

Mr. THOMAS. Yes; some Senator would do it, whether he

were a friend of the absent Senator or not.

Mr. SMOOT and Mr. BRYAN addressed the Chair.

The VICE PRESIDENT. There is plenty of time. Mr. THOMAS. I yield to the Senator from Utah.

Mr. SMOOT. If that were the case, then there would be no object in asking unanimous consent to have a unanimous-consent agreement set aside; the effort to have it changed would amount to nothing.

Mr. CLARK of Wyoming. Not necessarily.

Mr. THOMAS. I now yield to the Senator from Florida.

Mr. BRYAN. I wish to suggest that some of those who entered into the unanimous-consent agreement in the first place certainly would be present when unanimous consent was asked to modify the original agreement, because it takes a majority

Mr. SMOOT. Of course there would be a majority present, but it might be composed of Senators having no interest whatever in the subject. If that position is to be taken, I do not see what good the amendment to the amendment would do, because it would resolve itself into this proposition, that the Senator who asked for the unanimous-consent agreement would have to consent that it should be set aside, or else it never would be

Mr. THOMAS. I think the Senator's argument amounts to this-that there would be and could be no occasion on which the setting aside of a unanimous-consent agreement would be possible unless it should carry with it a violation of an agreement to some individual Senator, or a number of Senators, if you please; and, consequently, there would be no necessity for the rule. I do not like, however, to do things by indirection where they can be done directly and where they ought to be done directly.

I remember very distinctly the instance which was cited by the Senator from Georgia. It was one in which unanimous consent had been obtained to vote upon a certain matter at a certain time, and the Members of the Senate present were distinctly and unanimously of the opinion, because of the happening of exigencies that were not foreseen, that the unanimous-consent agreement ought to be voided. We were then confronted with the fact—and it was the first time I ever was confronted with it-that the Senate of the United States had the power by unanimous consent to agree to something, but did not have the power by unanimous consent afterwards to undo that which it had agreed to do.

Mr. SMOOT. That was a nomination.
Mr. THOMAS. It was a nomination.
Mr. SMOOT. It was not a legislative matter, and the Senator

knows that is the only case in his service in the Senate.

Mr. THOMAS. Yes. My service has been very brief, how-

Mr. SMOOT. I will say it is the only case that has happened in that way while I have been a Senator. It was so easily accomplished, since everybody knew as soon as the conditions surrounding the case were mentioned the person should not be confirmed, and the Senate decided to vote, as provided in the unanimous-consent agreement, and then immediately recon-

Mr. THOMAS. I am glad to know that in the Senator's experience here, which is very, very much longer than mine, this is the only instance in which such a situation has presented itself. I certainly hope no such situation will present itself hereafter; but the very fact that we were once confronted with such a situation suggests, I think, the reasonableness of the impression that it may again arise, and perhaps in some more important matter.

The Senator says we easily got around the difficulty in that case. As I remember, we discussed the situation for something over an hour, and then it was determined that there was but one way in which to avoid the dilemma-first to go ahead and do the thing we agreed to do and then move to reconsider our action, which motion was carried, after which the entire matter went over until some other time.

It seems to me that is practically whipping the devil around a stump. Why has not the Senate of the United States the authority, and why should it not have the authority, and why should not any legislative body have the power to undo anything which it has the power to do in the first instance? The inconsistency which to my mind is involved in the notion that the Senate, by taking some specific step, practically paralyzes its power with reference to that specific step thereafter, is such that it seems to me that if a rule is necessary for the purpose of reasserting the power-and certainly it must have existed once—the rule ought to be adopted.

I do not want to be understood as insisting that the matter be determined to-day. If there is any request that it should go

over, I am perfectly willing to postpone it.

Mr. SMITH of Georgia. Mr. President, I agree very fully with the Senator from Colorado [Mr. Thomas]. It seems to me to be utterly illogical for the Senate to put itself in the attitude of saying it can make a unanimous-consent agreement and it then loses the power by unanimous consent to do away with the unanimous-consent agreement. During the two years I have been here I have seen the Senate embarrassed a number of times by unanimous-consent agreements that have been made and embarrassed by the doubt as to whether by unani-mous consent we could do away with a unanimous-consent agreement, the older Senators all telling us that it could not be done away with and the younger Senators rather resenting the idea that it could not be done, but yielding to the experience and wisdom of the older Senators.

I can see no possible objection to the second clause in the resolution. I would rather see the first clause adopted than to jeopardize it in any way by having trouble over the second, but the second simply provides that after a unanimous-consent agreement has been made we can by unanimous consent recede from it. Before the second unanimous consent is obtained there must be a roll call. It would be impossible that absent Senators should slip up on it and that a second unanimous consent should be obtained in their absence to dispense with the first. The roll call will bring the Senators back into the Chamber, and it will only permit the Senate when we actually do want to get rid unanimously of a previous unanimous-consent agreement to have the power to do it.

Mr. TOWNSEND. Mr. President, I agree with the Senator from Georgia, and I wish to suggest another reason why there ought to be some way whereby the Senate can act by unanimous consent upon any matter that might come before it, and especially upon a subject agreed to by unanimous consent. seems to me that such a change in the rules would also be an inducement to some extent for Senators to attend the sessions of the Senate. For that reason, among others, it occurs to me that we ought to adopt some such rule as is suggested here.

Mr. SMITH of Georgia. I very much hope that the amendment will be adopted also, and not put the Senate in the embarrassing attitude, when everyone in the Senate feels that a unanimous-consent agreement ought not to be enforced, that

we can not get rid of it.

Mr. LODGE. Mr. President, I should like to suggest to the Senator from Georgia that it seems to me it would improve it very much, if we are to adopt the committee amendment, that there should be notice given of the intent to ask for the revocation, so that those who are particularly interested in the proposed revocation should at least have notice that it is going to be asked for.

Mr. SMITH of Georgia. Is there not this trouble about that? On the occasions where I have seen the Senate embarrassed by a unanimous-consent agreement it was right up against it and did not want to go on under the unanimous-consent agreement. Everyone on the floor felt that we were not ready to go on, and in one instance, as the Senator from Utah suggested-I do not think the Senator from Massachusetts was here; I think it was when he was away ill-

Mr. LODGE. Yes.

Mr. SMITH of Georgia. We were in that embarrassing position; we all wanted to recede, and some of us felt that we had a right by unanimous consent to recede, but others thought that we had not the right. So by unanimous consent we agreed to act, with the understanding beforehand that as soon as we did act we would reconsider the action.

Mr. LODGE. The Senator has pointed out what is perfectly true, that the revocation by another unanimous consent can not take place without unanimous consent, and I think it would be the feeling of many Senators that unless there is some previous notice given they should object on general principles to any revocation. I think that would tend to leave us in the same situation we are now in. If a unanimous-consent agreement is to be changed, I think some notice ought to be given that a request is to be made to change it.

Mr. SMITH of Georgia. Will the Senator from Massachusetts yield to me for a moment?

Mr. LODGE. Certainly.

Mr. SMITH of Georgia. My only idea would be that if any Senator felt that the unanimous-consent agreement ought not to be receded from he ought to speak up and stop it. We only want the privilege of receding when we really and actually have a genuine unanimous desire to recede from a unanimousconsent agreement. I would not want to help to make it easy to recede at all; it is only desired that it may be possible that we can recede when everyone present and everyone concerned with the matter actually unites in a genuine desire to suspend a unanimous-consent agreement.

Mr. LODGE. I think as it stands now Senators who would be very willing to modify or change or revoke the original consent, and would make no objection to it, would make an consent, and would make no objection to it, would make an objection on the broad ground that Senators might not be present who were present at the original one, and that they had no opportunity to be notified. I believe you will make it very much more difficult to get a revocation than if you put in a requirement of one day's notice.

Mr. BACON. As far as I am concerned, I am willing that

that shall be inserted.

Mr. THOMAS. I want to assure the Senator I have no desire to insist on the passage of the amendment in the original language used. I am perfectly willing to do anything that will recognize in the Senate the power to undo what it has declared it will do.

Mr. BACON. I suggest to the Senator from Massachusetts to offer as an amendment the addition of the words "after one

day's notice."

Mr. LODGE. Suppose we add, at the end of the committee amendment, "upon one day's notice," so as to read, "but any unanimous-consent agreement may be revoked by another unanimous-consent agreement granted in the manner prescribed above upon one day's notice."

Mr. BACON. Let the Senator offer that amendment to the

amendment.

Mr. THOMAS. That is perfectly satisfactory.
Mr. LODGE. I offer that as a committee amendment.
Mr. OVERMAN. I think that will be agreeable to the author
of the amendment, who is not here. I will not insist on the resolution going over, with that understanding.

Mr. SMOOT. I am not quite sure that the Senator from Mississippi [Mr. Williams] would be satisfied with that. The Senator from Georgia will remember that I made a similar suggestion before the resolution was referred to the committee.

Mr. BACON. I think it will be satisfactory.

Mr. CUMMINS. Mr. President, the amendment proposed by the committee was, as I remember it, unanimously adopted by the committee. I have no great objection to the amendment proposed by the Senator from Massachusetts to the amendment, but I do not recognize the soundness of the reason which has been suggested for it. We must all proceed upon the hypothesis that a unanimous-consent agreement may be asked for at any time, and the argument in favor of the position taken by those who have spoken against this amendment is an argument against every unanimous-consent agreement unless every Senator is in his seat. It is no greater hardship upon Senators to suffer the danger that a unanimous-consent agreement will be asked for to revoke or abrogate a previous unanimous-consent agreement than it is to know that a unanimousconsent agreement upon some matter in which the Senator may be interested may be asked for at any time, whether he is here or whether he is absent.

If the amendment with regard to the abrogation is to be adopted, then I shall incist that no unanimous-consent agreement shall be granted without one day's notice. It is just as fair to put Senators on their guard with regard to an original request for a unanimous-consent agreement as it is to put them on their guard with respect to the abrogation of a unanimousconsent agreement already made. I do not think that either is necessary, but if one is required the other ought to be re-

Mr. SMOOT. Mr. Fresident, I want to say frankly that, if the amendment is not adopted and I was in the Chamber and any Senator asked unanimous consent that a unanimous-consent agreement be set aside, I would object, no matter what Senator asked it, if the Senator who asked for the original unanimous-consent agreement was not present. It seems to me it resolves itself into this, that to have a unanimous-consent agreement set aside the Senator asking for the original unanimous-consent agreement would have to be present in the Chamber.

The VICE PRESIDENT. The questoin is on the amendment proposed by the Senator from Massachusetts [Mr. Longe] to

the amendment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question recurs on the amendment of the committee as amended.

The amendment as amended was agreed to.
The VICE PRESIDENT. The question now is on the resolution as amended. [Putting the question.] The ayes appear to have it

Mr. ASHURST. I ask for a division.
Mr. BACON. I suggest the absence of a quorum.
The VICE PRESIDENT. The Senator from Georgia suggests the absence of a quorum, and the Secretary will call the

The Secretary called the roll, and the following Senators answered to their names:

Gallinger
Hitchcock
Hollis
Hughes
Johnson
Jones
Kenyon
Kern
Lane
Lea
Lippitt
Lodge
McCumber
Martine, N. J.
Myers Ashurst Bacon Bankhead Smith, Mich. Smith, S. C. Nelson Norris Oliver Smoot Sterling Sutherland Bradley Brady Brandegee Overman Perkins Pittman Poindexter Swanson Thomas Thompson Thornton Townsend Bristow Root Saulsbury Shafroth Sheppard Shively Simmons Bryan Burleigh Burton Chamberlain Chilton Clark, Wyo. Cummins Vardaman Walsh Weeks Works Smith, Ariz. Smith, Ga. Dillingham

The VICE PRESIDENT. Fifty-nine Senators have answered to the roll call. There is a quorum present. The question is on agreeing to the resolution as amended.

Mr. GALLINGER. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BANKHEAD (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the Senator from Illinois [Mr. LEWIS] and vote. I vote "yea."

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withhold my vote. If I were permitted to vote I should vote "nay."

Mr. CHILTON (when his name was called). I have a general pair with the Senator from Maryland [Mr. Jackson].

In his absence I withhold my vote.

Mr. CLARK of Wyoming. I have a general pair with the Senator from Missouri [Mr. Stone]. I transfer that pair to the junior Senator from Wisconsin [Mr. Stephenson] and I vote "yea."

Mr. GALLINGER (when his name was called). I have a general pair with the junior Senator from New York [Mr. O'GORMAN], which I transfer to the junior Senator from New Mexico [Mr. Catron] and vote. I vote "yea."

Mr. JOHNSON (when his name was called). I have a pair with the Senator from Vermont [Mr. Page]. I transfer that pair to the senior Senator from Virginia [Mr. Martin] and vote. I vote "yea."

Mr. LEA (when his name was called). I have a pair with the senior Senator from South Dakota [Mr. Crawford] which I transfer to the Senator from Oklahoma [Mr. Owen] and vote. I vote "yea."

Mr. THORNTON (when Mr. RANSDELL's name was called). desire to announce the necessary absence of my colleague

[Mr. RANSDELL] on account of public business.

Mr. SAULSBURY (when his name was called). I have a general pair with the junior Senator from Rhode Island [Mr. I transfer that pair to the junior Senator from Louisiana [Mr. RANSDELL] and vote. I vote "yea."

Mr. SIMMONS (when his name was called). eral pair with the junior Senator from Milnesota [Mr. CLAPP]. I transfer that pair to the junior Senator from Ohio [Mr. POMERENE] and vote. I vote "yea."

Mr. SMITH of Arizona (when his name was called). I have pair with the Senator from New Mexico [Mr. Fall]. I transfer that pair to the Senator from Tennessee [Mr. Shields] and vote. I vote "yea."

Mr. SUTHERLAND (when his name was called). I am paired with the Senator from Arkansas [Mr. Clarke], who is absent. I transfer that pair to the Senator from Illinois [Mr. Sherman] and vote. I vote "yea."

Mr. CLARK of Wyoming (when Mr. Warren's name was called). I desire to announce that my colleague [Mr. Warren] is necessarily absent. He is paired with the Senator from Florida [Mr. Fletcher].

The roll call was concluded.

Mr. CHILTON. I transfer my pair with the junior Senator from Maryland [Mr. Jackson] to the senior Senator from Maryland [Mr. SMITH] and vote. I vote "yea."

Mr. DILLINGHAM. I again announce the necessary absence of my colleague [Mr. Page].

Mr. REED. I renew the announcement of the necessary ab-

sence from the Senate of my colleague [Mr. STONE].

Mr. SMITH of Arizona. I have just been informed of the illness of the Senator from Mississippi [Mr. Williams], which accounts for his absence to-day. I ask that this notice stand for the remainder of the day. The Senator from Mississippi is paired with the Senator from Pennsylvania [Mr. Penrose].

The result was announced—year 51, nays 8, as follows:

So the resolution as amended was agreed to, as follows:

So the resolution as amended was agreed to, as follows:

Resolved, That the rules of the Senate be amended by adding the following paragraph to the twelfth standing rule of the Senate, to be numbered and known as paragraph 3 of said Rule XII, to wit:

"Par. 3. No request by a Senator for unanimous consent for the taking of a final vote on a specified date upon the passage of a bill or joint resolution shall be submitted to the Senate for agreement thereto until, upon a roll call ordered for the purpose by the presiding officer, it shall be disclessed that a quorum of the Senate is present; and when a unanimous consent is thus given the same shall operate as the order of the Senate, but any unanimous consent may be revoked by another unanimous consent granted in the manner prescribed above upon one day's notice."

COMMITTEE ON PUBLIC DOCUMENTS.

The VICE PRESIDENT. The Secretary will state the next business on the calendar.

The resolution (S. Res. 218) proposing to create a standing committee to be known as the Committee on Public Documents was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The resolution will go over.

Mr. CUMMINS. That is the resolution offered by me. the Senator from Utah very desirous of having it go over?

Mr. SMOOT. I am desirous that it shall go over. The chair-

man of the Committee on Printing, the Senator from Florida [Mr. FLETCHER], is absent, and he has requested me to ask that the resolution be not considered in his absence.

Mr. CUMMINS. That is quite sufficient. I did not observe

that the Senator from Florida is absent,

The VICE PRESIDENT. The resolution will go over.

COOPERATIVE AGRICULTURAL EXTENSION WORK

The bill (S. 3091) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, was announced as next in order.

Mr. GALLINGER. I ask that that bill go over

Mr. SMITH of Georgia. I would be glad for the bill to have its formal reading at this time, which would also carry it into the RECORD. After that has been done I am perfectly willing to have it go over.

Mr. GALLINGER. The reason I asked that it go over was that, as I remember, the Senator from Georgia has promised to give us the benefit of his views on the bill.

Mr. SMITH of Georgia. To-morrow I hope to have an op-

portunity to do so.

Mr. GALLINGER. I think it is proper that the bill should

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill, as follows:

The VICE PRESIDENT. The Secretary will read the bill. The Secretary read the bill, as follows:

Be it enacted, etc., That in order to aid in diffusing among the people of the United States useful and practical information on subjects relating to agriculture and home economics, and to encourage the application of the same, there may be inaugurated in connection with the college or colleges in each State now receiving, or which may hereafter receive, the benefits of the act of Congress approved July 2, 1832, entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts" (12 Stat L. p. 503), and of the act of Congress approved August 30, 1890 (26 Stat. L., p. 417), agricultural extension work which shall be carried on in cooperation with the United States Department of Agriculture: Provided, That in any State in which two or more such colleges have been or hereafter may be established the appropriations hereinafter made to such State shall be administered by such college or colleges as the legislature of such State may direct.

Sec. 2. That cooperative agricultural extension work shall consist of the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities, and imparting to such persons information on said subjects through field demonstrations, publications, and otherwise: and this work shall be carried on in such manner as may be mutually agreed upon by the Secretary of Agriculture or his representative and the State agricultural college or colleges receiving the benefits of this act.

Sec. 3. That for the purpose of paying the expenses of said cooperative agricultural extension work and the necessary printing and distributing of information in connection with the same, there is permanently appropriated, out of any money in the Treasury of the previsions of this act: Provided, That payment of such installments of

the fiscal year following that in which the foregoing appropriation first becomes available, and for each year thereafter for nine years a sum exceeding by \$300,000 the sum appropriated for each preceding year, and for each year thereafter there is permanently appropriated for each year the additional sum of \$3,000,000 : Provided further, That before the beginning of each fiscal year projects setting forth the proposed plans for work to be carried on under this act shall be submitted by the proper officials of each college and approved by the Secretary of Agriculture before the funds herein appropriated shall become available to such college for that fiscal year. Such additional sums shall be used only for the purposes hereinbefore stated and shall be allotted annually to each State by the Secretary of Agriculture and paid in the manner hereinbefore provided in the proportion which the rural population of each State bears to the total rural population of of all the States, as determined by the next preceding Federal census: Provided further, That no payment out of the additional appropriations herein provided shall be made in any year to any State until an equal sum has been appropriated for that year by the legislature of such State, or provided by State, county, college, or local authority for the maintenance of cooperative agricultural extension work.

SEC. 4. That there shall be in the Department of Agriculture a director of cooperative agricultural-extension work, to be appointed by the Secretary of Agriculture and report directly to him. The salary of such director shall be such as may be provided for by law from time to time.

SEC. 5. That the sums hereby appropriated for extension work shall

director of cooperative agricultural-extension work, to be appointed by the Secretary of Agriculture and report directly to him. The salary of such director shall be such as may be provided for by law from time to time.

SEC. 5. That the sums hereby appropriated for extension work shall be annually paid in equal semiannual payments on the 1st day of January and July of each year, by the Secretary of the Treasury, upon the warrant of the Secretary of Agriculture, out of the Treasury of the United States, to the treasurer or other officer of the State duly authorized by the laws of the State to receive the same; and such officer shall be required to report to the Secretary of Agriculture, on or before the 1st day of September of each year, a detailed statement of the amount so received during the previous fiscal year and of its disbursement on forms prescribed by the Secretary of Agriculture.

SEC. 6. That if any portion of the moneys received by the designated officer of any State for the support and maintenance of cooperative agricultural-extension work, as provided in this act, shall by any action or contingency be diminished or lost, or be misapplied, it shall be replaced appropriation shall be apportioned or paid to said State; and no portion of said moneys shall be apportioned or paid to said State; and no portion of said moneys shall be applied, directly or indirectly, to the purchase, erection, preservation, or repair of any building or buildings, or the purchase or rental of land, or in college-course teaching, lectures in colleges, promoting agricultural trains, or any other purpose not specified in this act; and not more than 5 per cent of each annual appropriation shall be applied to the printing and distribution of publications. It shall be the duty of each of said colleges annually, on or before the 1st day of January, to make to the governor of the State in which it is located a full and detailed report of its operations in the direction of extension work, as defined in this act, including a detail

The VICE PRESIDENT. The bill will be passed over.

RAILROADS IN ALASKA.

Mr. JONES. Mr. President, on January 14 I offered an amendment intended to be proposed to the Alaska railroad bill, and asked that it might lie on the table. I understand the Committee on Territories expects to have a meeting to-morrow: so I ask that that amendment may be referred to the committee.

Also, in behalf of the Senator from Nebraska [Mr. Norris],

and at his request, I ask that the amendment which he submitted on January 14, and which is now on the table, relating to steamships for Alaska, may be referred to the same committee.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and it is so ordered.

BILLS AND JOINT RESOLUTIONS PASSED OVER.

The bill (S. 3403) to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes, was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill will be passed over. The bill (S. 3149) to remove the charge of desertion from the military record of Moses Chauncey was announced as next in order

Mr. BRYAN. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The joint resolution (S. J. Res. 26) proposing an amendment to the Constitution of the United States was announced as

next in order, and the Secretary read the joint resolution.

Mr. SMOOT. Let that go over. I believe it is accompanied

by an adverse report.

The VICE PRESIDENT. The joint resolution will be passed

R. W. BRANSON.

The bill (S. 156) for the relief of R. W. Branson was announced as next in order.

Mr. SMOOT. Let that bill go over.

The VICE PRESIDENT. The bill wil' be passed over.

CLAIMS OF POSTMASTERS.

The bill (H. R. 9321) to amend the act approved May 9, 1888, as amended by the act of June 11, 1896, was announced as next in order, and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

he Secretary read the bill, as follows:

Be it enacted, etc., That the act authorizing the Postmaster General adjust certain claims of postmasters for loss by burglary, fire, or her unavoidable casualty, approved May 9, 1888, as amended by the tof June 11, 1896, be, and the same is hereby, amended so as to read follows:

act of June 11, 1896, be, and the same is hereby, amended so as to read as follows:

"That the Postmaster General be, and he is hereby, authorized to investigate all claims of postmasters for the loss of money-order funds, postal funds, postal savings funds, postage stamps, stamped envelopes, newspaper wrappers, postal cards, postal savings cards, postal savings tamps, and postal savings certificates belonging to the United States in the hands of such postmasters, and for the loss of key-deposit funds, funds deposited to cover postage on mallings, and funds received as deposits to cover orders for stamped envelopes, in the hands of such postmasters, resulting from burglary, fire, or other unavoidable casualty, and if he shall determine that such loss resulted from no fault or negligence on the part of such postmasters, to pay to such postmastc. 3 or credit them with the amount so ascertained to have been lost or destroyed, and also to credit postmasters with the amount of any remittance of money-order funds, postal funds, or postal savings funds made by them in compliance with the instructions of the Postmaster General, which shall have been lost or stolen while in transit by mail from the office of the remitting postmaster to the office designated as his depository, or after arrival at such depository office and before the postmaster at such depository office has become responsible therefor: Provided, That no claim exceeding the sum of \$10,000 shall be paid or credited until after the facts shall have been ascertained by the Postmaster General and reported to Congress, together with his recommendation thereon, and an appropriation made therefor: And provided further, That this act shall not embrace any claim for losses as aforesaid which accrued more than four years prior to the date of approval of this act; and all such claims must be presented within six months after such date, and no claim for losses which may hereafter accrue shall be allowed unless presented within six months from the time the loss occurr

The bill was reported to the Senate without amendment, ordered to a third reading, read the thirl time, and passed.

Mr. BRYAN. I ask that there may be printed in the RECORD the report of the committee on this bill.

The VICE PRESIDENT. Without objection, that will be

The report (No. 149) submitted by Mr. BANKHEAD on the 14th instant is as follows:

[Report to accompany H. R. 9321.]

The Postmaster General is authorized by the act of May 9, 1888, as amended by that of June 11, 1896, to reimburse postmasters for losses of certain funds resulting from burglary, fire, or other unavoidable casualty while in their custody or in transit to their designated depositories, but there is no provision for the granting of relief in the case of similar losses of postal-savings funds, postal-savings cards, postal-savings stamps, and certificates, key deposit funds, funds deposited to cover postage on mailings, and funds received as deposits to cover orders for stamped envelopes, for which postmasters are equally responsible. It is the purpose of the accompanying bill to remedy this inconsistency and authorize the Postmaster General to accord the same measures of relief with respect to losses of these funds as may now be accorded in the case of losses of funds covered by existing law.

The bill (S. 2903) for the relief of Judd McKelvey was annonnced as next in order; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The Secretary read the bill, as follows:

The Secretary read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to issue a patent to Judd McKelvey for lots 5, 6, 7, and 8, and the northwest quarter of the northeast quarter, the northeast quarter of the northwest quarter of the southeast quarter of the southwest quarter, and the southwest quarter of the southeast quarter of section 18, in township 4 south, range 44 east, Montana meridian, as shown by the plat of survey of said township approved December 16, 1908, after the said McKelvey has, by deed properly executed and recorded, reconveyed to the United States lot 4 and the northwest quarter of the northeast quarter, the east half of the southwest quarter, and the southwest quarter of the southeast quarter of said section, as shown by the plat of the survey of said township approved July 25, 1887.

The bill was reprorted to the Southe without amendment, or

The bill was reported to the Senate without amendment, or-dered to be engrossed for a third reading, read the third time, and passed.

PUBLIC LAND RESERVATIONS.

The bill (S. 1214) to amend sections 2380 and 2381, Revised Statutes of the United States, was announced as next in order.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Public Lands with amendments, on page 1, line 11, after the word "for," to strike out "subdivision into villa sites at places suitable for resort by persons seeking pleasure, recreation, or health" and to insert "villa sites, summer homes, hotels, sanitarium, health, recreation, or pleasure resorts"; and, on page 2, line 9, after the word "lots," to insert "or tracts"; and, in the same line, after the word "size," to insert "for the purposes mentioned," so as to make the bill read:

poses mentioned," so as to make the bill read:

Be it enacted, etc.. That sections 2380 and 2381 of the Revised Statutes of the United States be, and the same are hereby, amended to read as follows:

"SEC. 2380. The President is authorized to reserve from the public lands, whether surveyed or unsurveyed, town sites on the shores of harbors, at the junction of rivers, important portages, or any natural or prospective centers of population; also lands having a particular value for villa sites, summer homes, hotels, sanitarium, health, recreation, or pleasure resorts.

"SEC. 2381. When, in the opinion of the President, the public interests require it, it shall be the duty of the Secretary of the Interior to cause any of such reservations or part thereof to be surveyed into urban, suburban, or villa lots or tracts of suitable size for the purposes mentioned, and to fix by appraisement of disinterested persons their cash value, and to offer the same for sale at public outcry to the highest bidder, and thence afterwards the unsold lots to be held subject to sale at private entry according to such regulations as the Secretary of the Interior may prescribe; but no lot shall be disposed of at public sale or private entry for less than the appraised value thereof, and all such sales shall be conducted by the register and receiver of the land office in the district in which the reservations may be situated, in accordance with the instructions of the Commissioner of the General Land Office."

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FISHLAKE NATIONAL FOREST, UTAH.

The bill (S. 1087) authorizing the exchange of certain lands within the Fishlake National Forest, Utah, was announced as next in order.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. POINDEXTER. Mr. President, I will ask the Senator from Utah to make a brief statement of the reasons for making this exchange of lands?

Mr. SMOOT. I will gladly do so.

This bill was sent to me by the Department of the Interior. There is a unanimous report from the committee. An investigation was made as to the value of the lands to be exchanged. The lands to be exchanged are now within a forest reserve, and are in private ownership. The Forestry Service desires that those lands shall be under the Forestry Service, on account of the better administration of the Fishlake Forest in the State of Utah. The parties owning the lands have agreed to make the exchange, the lands have been designated, and it is perfectly satisfactory, not only to the Government but to the parties owning the lands. I will say to the Senator that I knew nothing about the exchange until my attention was called to it by the department.

Mr. POINDEXTER. It is not one of these lieu-land grabs. I suppose, by which they exchange glaciers and bare rocks for valuable lands?

Mr. SMOOT. No; Mr. President, it is not. will look at the report from the department, he will find that that is not the case. I wish to say, in that connection, that I have fought such transfers just as hard as my ability would permit, and I am opposed to them just as strongly as is the Senator from Washington.

The VICE PRESIDENT. The bill has been reported from the Committee on Public Lands with certain amendments, which will be stated.

The amendments of the Committee on Public Lands were, on page 2, line 22, before the word "to," to strike out "fourth" and insert "forty"; and on page 5, line 8, after the word "Forest," to insert, "Provided, That the Attorney General of the United States shall certify that a good and sufficient title to the reconveyed lands will vest in the Government: And provided, That the lands reconveyed to the United States shall

forthwith become a part of the Fishlake National Forest," so as to make the bill read:

as to make the bill read:

Be it enacted, ctc., That the Secretary of the Interior is hereby authorized to issue prient to the Salina Land & Grazing Co., a corporation organized and existing under the laws of Utah, for the following described lands:

East half southwest quarter, southwest quarter northeast quarter southwest quarter southwest quarter, northeast quarter northeast quarter northeast quarter northeast quarter northeast quarter and the southeast quarter northeast quarter, seetion 35; southeast quarter northeast quarter northeast quarter northeast quarter northeast quarter, seetion 35; southeast quarter northeast quarter, seetion 35; and a strip eight chains in width extending from the northwest with the southeast quarter southeast quarter of section 25; township 23 south, range 1 east, of the Salt Lake meridian.

Lots 1, 2, 3, and 4, section 19; southwest quarter, northwest quarter northeast quarter, east half northwest quarter northwest quarter northeast quarter, seetion 20; northwest quarter southeast quarter, section 30, township 20; northwest quarter southeast quarter northeast quarter, northeast quarter, northeast quarter, southeast quarter northeast quarter, northeast quarter southeast quarter northeast quarter, section 12; said northeast half northwest quarter, section 12; said northeast half northwest quarter, southeast quarter, section 12; said northeast half northwest quarter, section 12; said northeast parter, section 5; northwest quarter northeast quarter, section 25; southwest quarter, section 25; southwest quarter, section 25; southwest quarter, section 26; southwest quarter, section 16; southwest quarter, section 17; southwest quarter, section 18; southwest quarter southeast quarter northeast quarter northeast quarter northeast

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RAILEOADS IN ALASKA.

Mr. CHAMBERLAIN. I believe that completes the calendar, and I ask to have laid before the Senate the unfinished busi-I am going then to request that it be temporarily laid

aside, unless somebody is ready to speak on it.

Mr. POINDEXTER. Before that is done, I desire to give notice that on Monday next, immediately after the transaction of the routine morning business, I shall make some observa-

tions upon the Alaska railroad bill.

The VICE PRESIDENT. The Chair will state, for the information of the Senator from Washington, that one announcement of that kind has already been made.

Mr. POINDEXTER. By what Senator?

The VICE PRESIDENT. By the Senator's colleague from

Washington

Mr. JONES. I desire to say that if my colleague desires to speak at that time, it will be perfectly agreeable to me.

Mr. POINDEXTER. I would not interfere at all with my colleague's announcement. I was not aware that he had made I will defer my observations until the conclusion of his.

At this time I desire to offer an amendment to the bill, and ask the Secretary to read it.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary. It is proposed to strike out all after the enacting clause and to insert the following:

The NECERTARY. It is proposed to strike out all after the enacting clause and to insert the following:

That the President of the United States is hereby empowered, authorized, and directed to construct, acquire, establish, and equip such system of transportation in the Territory of Alaska, including rail and water transportation on such routes and between such points as in his judgment shall best tend to meet the transportation needs of that Territory and to develop its resources; such system of transportation, and to develop its resources; such system of transportation, road from some available harbor on the south noneaghly equipped rail-road from some available harbor on the south noneaghly equipped rail-road from some available harbor on the south noneaghly equipped rail-road from some available harbor on the south noneaghly equipped rail-road from some available harbor on the south noneaghly equipped rail-road from some available harbor on the south noneaghly equipped rail-road from some available harbor on the south noneaghly equipped rail-road some senger boots as he may determine on the south noneaghly expensively and passenger boots as he may determine on the south noneaghly expensively and the south of the same senger boots as he may determine on the south of the same senger boots as he may determine.

Sec. 2. That the President is further authorized, empowered, and directed to cause to be opened and equipped on the public lands in Alaska reserved as hereinafter provided such coal mines as may be necessary to county with the terms of this act, and to provide for the vided in this act.

Sec. 3. That the President is further empowered, authorized, and directed to operate said transportation system, including railroads and boat lines, and all the accessories thereof, and to operate said coal mines and dispose of the product thereof by means of the agencies of the same president of the provided such points and the same president of the provided such provided in the same provided such provided such provide

ment necessary for the storage, sule, or distribution of coal to consumers.

Any existing railway connecting with any line of railway constructed under this act shall be operated in connection with the new line as a through route with through fares and rates upon a reasonable apportionment of revenues and expenses, to be determined by the President. Sec. 6. That the President or his agents are hereby authorized, for the purposes of this act, to enter into such contracts and to employ such persons as may be necessary, and, consistently with the provisions of sections 10 and 13 of this act, to fix their duties, powers, and compensations: Provided, That the President shall cause to be formulated suitable regulations, consistent with the civil-service law, to govern the selection of persons to be employed by the United States under this act, and he may utilize the services of any Army engineers, experts in the Geological Survey, or in any other Government department.

ment.

Any tools, equipment, or other property belonging to the United States used in constructing the Isthmian Canal, or elsewhere, and no longer needed for such purpose, may be transferred to Alaska and used for the purposes of this act.

The President shall employ a force of inspectors to insure the execution of his orders, rules, and regulations.

Sec. 7. That the construction of plants, as distinguished from the operation thereof, shall be conducted under the immediate direction of the President or of his agents, and upon the completion of such portions of plants as are capable of being operated as units said portions

shall be turned over to, and the operation thereof shall thereafter be conducted by, two services, to be known, respectively, as the Alaska transportation service and the Alaska mining service. The term "plant" as used in this act includes any or all portions of transportation facilities, or coal-distributing stations, extensions thereof, and permanent improvements in connection therewith. The term "transportation service" as used in this act shall refer to the Alaska transportation service; the term "mining service," to the Alaska mining service; and the term "services," fo the transportation and mining services taken together.

Each service shall be in charge of a chief appointed by, removable by, and acting under the direction of the President, and such chief of service shall have no power or duty other than the operation of said service; and the duties of inspection, fixing of wages and prices, and making of general rules and regulations provided for herein shall be in charge of other officials.

The transportation service shall be charged with the duty of operating for all purposes whatsoever all transportation facilities in the manner hereinafter provided.

The mining service shall be charged with the duty of operating for all purposes whatsoever all transportation facilities in the coal mines on lands reserved to the Government and the distributing stations, wherever established, in the manner hereinafter provided.

Sec. 8. That in each service the total debit account for any fiscal year shall comprise all expenditures for operation and maintenance during said year, including payments for lajuries to employees, charges for land, and other expenses with 5 per cent per annum interest thereon plus 5 per cent of the capital investment of said service, together with the depreciation charges for said year and payment for deficit accounts, if any, as specified in section 9; and the total credit account for any fiscal year shall comprise all money chargeable to original plant and extensions thereof up to the clo

at 5 per cent on the remainder thereof, shall be included in the total annual debit account of the appropriate service each year for 20 years thereafter.

Sec. 10. That the President shall fix, and from time to time readjust, the minimum wages and salaries and the maximum prices to be paid or charged by the services. The minimum hourly wage paid any class of labor shall be not less than the average wage paid that class of labor by other employers under conditions equivalent to those prevailing in the respective services; the maximum price charged for any class of transportation shall be not greater than will pay a reasonable net profit on operation and a reasonable interest on the actual physical valuation of the properties involved, the same to be determined by the President; the maximum price charged for coal shall be not greater than will pay a reasonable profit on operations, to be determined by the President, transportation, distribution, and rental value of lands to be included in cost of operation. The President may confer the power of fixing minimum wages and maximum prices upon an agent or agents appointed by him as provided in section 4, but such power shall not be redelegated, and nothing in this act shall be construed as allowing any other person or body to fix said minimum wages or maximum prices.

If, in either service, in any fiscal year the total credit account shall exceed the total debit account, the difference shall be charged to a dividend fund, to be dividend between the operatives in and the purchasers of service or products from said service, the share assigned to the operatives to be determined by the President, but not to be less than one half the dividend fund. The share of the dividend fund assigned to the operatives in any fiscal year shall be distributed among them in such manner that each operative shall receive an amount proportional to the wages or salary previously receivable by him during said year, and the share assigned to the purchasers aforesaid in any fiscal year, and the

said in any iscal year shall be distributed among them in proportion to the sums paid by each of them for service or products during said year.

The operatives in either service for any fiscal year shall comprise all persons who have been employed in said service during any portion of said year, including the chief thereof.

Sec. 11. That the President may in his discretion require that the mining service shall give preference in the sale of its coal output, so far as practicable, to certain classes of consumers in the following order: First, the transportation service; second, the United States Navy and other Government services; third, schools and other public institutions, including municipalities; fourth, domestic users of coal, or ultimate consumers; fifth, bona fide cooperative associations dealing with ultimate consumers; fifth, bona fide cooperative associations dealing with ultimate consumers; sixth, commercial retailers; seventh, whole salers; eighth, manufacturers and all other purchasers.

The term "cooperative association" as used in this act shall mean any association of ultimate consumers, not organized for commercial profit, based upon the following principles: First, each member to have only one vote in all transactions, regardless of the number of shares held; second, the number of shares to be unlimited and the price of a share to be not more than \$10; third, all dividends not appropriated by majority vote of the members for the general purposes of the association to be distributed in proportion to purchases.

Sec. 12. That any coal lands not reserved as provided in section 5 may be leased by the President to private parties for coal-mining purposes, all leases being subject to the conditions imposed in sections 52 to 14 inclusive, and any lease being revocable upon breach of any such condition: Provided, That it is the intent of this act that there shall be an equalization of coal production, as nearly as practicable, between the coal lands developed by the total number of lessees and by the

whatsoever.

The coal land leased to any one lessee shall constitute a contiguous tract, having an area or coal content estimated to be sufficient to form an efficient working unit, but shall not include more than 2,560 acres; no lease shall run for more than 50 years; no coal land shall be sublessed nor in any way whatsoever used for speculative purposes, and if any of the lands or deposits leased under the provisions of this act shall be sublessed, trusteed, possessed, or controlled by any device permanently, temporarily, directly, indirectly, tacitly, or in any manner

whatsoever so that they form part of or in any way effect any combination or are in any wise controlled by any combination in the form of an unlawful trust, or form the subject of any contract or conspiracy in restraint of trade in the mining or selling of coal, or of any holding of such lands by any individual, partnership, association, corporation, or control, in excess of 2,560 acres in the Territory of Alaska, the lease thereof shall be canceled, and said individual, partnership, association, or corporation shall forfeit the right thereafter of obtaining lands under lease under the provisions of this act.

The term "lessee" as used in this act shall refer to any person, firm, or corporation representing a single, independent interest, to whom coal land is leased under the provisions of this act.

All coal land leased to private parties shall be at such uniform charge per acre per annum as to be sufficient only to render unprofitable the holding of such land without production, said charge to be fixed and from time to time readjusted by the President, and an equivalent charge per acre per annum shall be collected from the mining service, the receipts from all such charges to be paid into the school and road fund of the Territory of Alaska, to be expended under the direction of the legislature.

SEC. 13. That all enterprises provided for in this act shall be governed by further provisions as stated in this section. The term "enterprise" as used in this act shall include any and all railroad construction or operation, coal mining, and all other work and activities whatsoever carried on by authority of this act by or under the President, either service, or any lessee.

The hours of labor of all persons employed in any enterprise shall not exceed 48 per week, save in emergencies wherein life or property is in imminent danger.

No lessee shall adopt a scale of hourly wages lower than the minimum wage scale fixed by the President for the mining service as provided in section 10.

The wages or salaries of all perso

No person under the age of 16 years shall be employed for any purpose whatsoever in any enterprise herein provided for.

The relation of the mining service to the transportation service as a shipper shall be identical with that of any other shipper; and the relation of the transportation service to the mining service as a purchaser of coal shall be, except as to the preference given in section 11, identical with that of any other purchaser.

SEC. 14. That the President shall make all necessary rules and regulations—

SEC. 14. That the President shall make all necessary rules and regulations—
To insure the safety of operatives employed in the enterprises provided for in this act.

To insure the safety of passengers in the transportation service.
To provide for detailed reports upon all accidents or occupational diseases occurring in any enterprise.

To provide for just and reasonable compensation to all operatives in any enterprise or to their dependents, who may be injured or killed or who may contract any occupational disease in the course of their work.

To provide a system of insurance of operatives employed in all enterprises under this act in cases of sickness, injury, or death, and for this purpose the employees of all lessees, or of all enterprises taken together, may be included in any single system of insurance.

To provide for an adequate system of sanitation, housing, and general living conditions for the operatives engaged in any enterprise under this act.

under this act.

To prevent unnecessary waste of coal in mining by the mining service by any lessee. To prevent any adulteration whatsoever of coal sold by the mining

service or any lessee.

To permit bona fide settlers actually residing on the land to coal from deposits in such land for domestic purposes only with

coal from deposits in such land for domestic purposes only without charge.

To provide for suitable and just fines to be imposed upon elither service or any lessee as penalties for specific breaches of rules or conditions of lease.

To provide for the sale of any surplus water or electric power egiving preference to ultimate consumers or municipalities) developed in connection with the operations of either service.

To carry out and enforce the provisions and ultimate purpose of this act, said purpose being to provide transportation service and coal at the lowest price consistent with the maintenance of the welfare of all operatives at a high level, the stimulation of efficient service, and the maximum and at the same time most economical utilization of the fuel and other natural resources of Alaska.

The President, in performing his duties under this act, may consult with and consider suggestions from any coal-land lessee, any advisory board, association, or body representing the citizens of any community in Alaska, the operatives in either service, or of any lessee or any other assemblage of persons affected by the aforesaid rules, regulations, or policies.

in Alaska, the operatives in either service, or of any lessee or any other assemblage of persons affected by the aforesaid rules, regulations, or policies.

SEC 15. That the President of the United States, or the Secretary of the Treasury upon the order of the President, is hereby authorized to borrow, on the credit of the United States, from time to time, as the proceeds may be required to defray expenditures authorized by this act (such proceeds when received to be used only for the purpose of meeting such expenditure), the sum of \$50,000,000, or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States in such form as he may prescribe and in denominations of \$20 to the extent that such denomination may be desired by purchasers, or any multiple of that sum, redeemable in gold coin at the pleasure of the United States after 10 years from the date of their issue, and payable 50 years from such date, and bearing interest, payable quarterly in gold coin, at a rate not exceeding 3 per cent per annum; and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority: Provided, That said bonds may be disposed of by the Secretary of the Treasury at not less than par under such regulations as he may prescribe, giving to all the citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon, and a sum not exceeding one-tenth of 1 per cent of the amount of the bonds herein authorized is hereby appropriated out of any money in the Treasury, not otherwise appropriated, to pay the expense of preparing advertising, and issuing the same: Provided further, That for the purpose of carrying out the provisions of this act there is hereby appropriated, sum of \$1,000,000, to be used and expended as required under and

according to the provisions of this act, and to continue available until expended, but the said sum of \$1,000,000 shall be reimbursed to the Treasury out of the first proceeds of the sale of said bonds.

SEC. 16. That there is hereby created a redemption fund in the United States Treasury to be known as the "Alaska utilities redemption fund," into which shall be paid in each fiscal year, by each service hereinbefore created, 5 per cent of the capital investment of said service; and the said redemption fund, or any part thereof, may be used from time to time, upon the order of the President, to pay the interest on the bonds authorized and issued under the provisions of this act and to redeem, cancel, and retire said bonds under such rules and regulations as the President may establish.

SEC. 17. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

The VICE PRESIDENT. What disposition does the Senator

wish made of the amendment? Mr. POINDEXTER. I will ask to have it lie on the table. Since I have offered it as an amendment, if it is within the

rules to have it referred to the committee, which I we derstand is to have a session on to-morrow, I should like to have that done

The VICE PRESIDENT. It is within the rules. Two amendments have been already referred to the committee.

Mr. POINDEXTER. I should like to have that action taken,

then.

The VICE PRESIDENT. The amendment will be referred to the Committee on Territories.

Mr. POINDEXTER. In order that there may not be any misunderstanding on the part of the friends of the bill in regard to this amendment, or in regard to my attitude on the bill, I desire to state at this time that I am in favor of this bill if it is all that can be obtained at this time for Alaska. In case the bill is passed, I think it will be absolutely necessary that other legislation shall be enacted in order to make a complete system.

The amendment I have offered contains a provision for the connection of the railroad which is proposed for Alaska by a line of ships with the United States, which I think is absolutely necessary to make valuable, for the purposes for which it is intended, the railroad in Alaska. It also contains a provision for the development of coal lands in Alaska by the Government. I think that those three enterprises, the railroads, the line of ships, and coal mines furnishing material for transportion and solving the coal question, are essential parts of what ought to be one complete system.

The amendment which I have offered and upon which I will speak on Monday also contains provisions which are entirely absent from the pending bill, provisions directing the manner in which the work of construction shall be conducted, establishing the relation between the United States and its employees, and directing the manner of operating the railroad after it shall have been constructed. All these things, it seems to me, are proper subjects for disposition while the pending measure is before the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled joint resolution (S. J. Res. 5) providing for the appointment of a commission to consider the need and report a plan for national aid to vocational education, and it was thereupon signed by the Vice President.

RAILROADS IN ALASKA.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which is Senate bill 48.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. CHAMBERLAIN. I understand that no Senator is ready to address himself to the bill now, and I ask that the

unfinished business be temporarily laid aside.

The VICE PRESIDENT. That action will be taken without objection.

Mr. SMITH of Georgia. Mr. President, there is no other matter, so far as I know, ready for the action of the Senate. Quite a number of Senators are engaged on committees that are necessarily in session preparing matters for the Senate. Unless some Senator knows a reason to the contrary, I shall now move that the Senate adjourn.

The VICE PRESIDENT. The Senator from Georgia moves that the Senate do now adjourn.

The motion was agreed to, and (at 2 o'clock and 2 minutes p. m.) the Senate adjourned until to-morrow, Saturday, January 17, 1914, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, January 16, 1914.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

O Lord God Almighty, maker of the heavens and the earth, of Lord God Almignty, maker of the neavens and the earth, through whose gracious providence we live and move and have our being, consider, we beseech Thee, our frailties, the folibles of our nature, the temptations to which we are constantly subjected, and have mercy upon us. Strengthen us by Thy might for all the duties of life, and guide us by the light of Thy wisdom, that we may fulfill Thy desires, have the approving conscience, and enter into the joy of the faithfu! now and always. In the spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

RESIGNATION FROM A COMMITTEE.

The SPEAKER laid before the House the following communication:

JANUARY 16, 1914.

Hon. CHAMP CLARK, Speaker House of Representatives, Washington, D. C.

Mx Dear Mr. Speaker: The duties of my other committee assignments are such I do not feel that I can give the attention to the work of the Committee on Claims its importance demands, and I hereby tender my resignation as a member of the Committee on Claims, to take effect immediately.

Sincerely, yours,

DUDLEY M. HUGHES

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

BOARD OF TRUSTEES, COLUMBIA HOSPITAL.

The SPEAKER. The Chair reappoints Mr. Samuel W. Smith, of Michigan, and Mr. Martin D. Foster, of Elinois, to succeed themselves as members of the board of trustees of Columbia Hospital.

BILLS ON THE PRIVATE CALENDAR.

The SPEAKER. This is the day devoted to the consideration of bills on the Private Calendar. The Chair will recognize the gentleman from Missouri [Mr. Russell].

Mr. RUSSELL. Mr. Speaker, this is not pension day, but is the day devoted to the consideration of other bills on the Private Calendar. There are some bills on the Private Calendar. and there is one pension bill which I expect to call up on Friday

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 2560. An act authorizing the Secretary of War to donate to the Grand Army of the Republic, Post No. 45, of Smith Center, Kans., three cannon or fieldpieces; and

S. 3206. An act for the protection of the water supply of the city of Baker, a municipal corporation of the State of Oregon.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3206. An act for the protection of the water supply of the city of Baker, a municipal corporation of the State of Oregon;

to the Committee on the Public Lands.

S. 2560. An act authorizing the Secretary of War to donate to the Grand Army of the Republic, Post No. 45, of Smith Center, Kans., three cannon or fieldpieces; to the Committee on Military Affairs.

POST OFFICE APPROPRIATION RILL.

Mr. COX. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 11338, the Post Office appropriation bill.

Mr. MILLER. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. MILLER. Mr. Speaker, how long since the House has had a private bill day?

The SPEAKER. The House had a private bill day on the

last preceding regular Friday.

Mr. SIMS. It was just before the holiday recess.
Mr. MILLER. Mr. Speaker, if this motion prevails, the next regular day will be two weeks from to-day?

The SPEAKER. Two weeks from to-day.

Mr. MILLER. There are only four bills on the Private Calendar to-day. Could we not have them disposed of in a few minutes?

Mr. FITZGERALD. Mr. Speaker, debate is not in order.

The SPEAKER. The question is on the motion of the gentleman from Indiana [Mr. Cox] that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the Post Office appropriation

Mr. MONDELL rose.

The SPEAKER. For what purpose does the gentleman rise? Mr. MONDELL. Mr. Speaker, I desire to emphasize the suggestion of the gentleman from Minnesota-

Mr. FITZGERALD. Mr. Speaker, I demand the regular

The SPEAKER. No one moved to go into the Committee of the Whole House for the consideration of bills on the Private Calendar, and the question now is on the motion of the gentleman from Indiana, that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Post Office appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Post Office appropriation bill, with Mr. HAY in the chair.

Mr. BRYAN. Mr. Chairman, before we proceed to the consideration of the Post Office appropriation bill, may I be permitted to occupy the time of the committee for a moment for the purpose of making a statement. I have been requested to announce to the Members of the House that there is on the first floor of the Senate Office Building an Alaska exhibit, which each and every Member of the House is especially requested to inspect. It is an exhibit of the resources-agricultural, mineral, and otherwise—of the Territory of Alaska.

Mr. COX. Mr. Chairman, in the absence of the chairman of

the committee, the gentleman from Tennessee [Mr. Moon], by agreement between himself and myself, I desire to announce

that I shall occupy 40 minutes of time.

The CHAIRMAN. The gentleman from Indiana is recog-

nized for 40 minutes.

Mr. COX. Mr. Chairman, I crave the indulgence of the committee a few moments. I shall follow the admonition of my friend from Tennessee [Mr. Austin] and endeavor to confine my remarks strictly to the bill under consideration. I had thought of addressing myself exclusively to section 8 of the bill, which proposes to give to the Postmaster General \$200,000 out of an appropriation of \$5,000,000 to enable him to buy and enter into contracts with railroads to operate Governmentowned railway postal cars.

The question of pay to the railroads for hauling the mail is a long-continued, vexatious question, and is as ripe to-day as it was 50 years ago, and will continue to be an unsettled question until it is settled right, but in view of the remarks made yesterday in the desperate assault upon section 6 of the bill, and I imagine others to follow, I desire to add a few words to what our splendid chairman so admirably said yesterday in defense

of this section of the bill.

The section proposes to take assistant postmasters out of the civil service and make them appointive, as they were prior to the Executive order i-ened by ex-President Taft on September

First, I desire to outline my position in this particular; I am a partisan and plead guilty to the charge, and I would not be anything else. Every Member of this House is a partisan; I care not whether he sails under the banner of the Republican or Progressive Party, Independent or Democratic Party, he is a partisan nevertheless; otherwise he would not be in Congress. I deplore the time if it should ever come in this country when we should not have two parties. In my judgment it is the only safeguard of the rights and liberties of the American people to have in this country two strong, fighting, virile parties, ever struggling for supremacy for the policies for which they stand. But I can be a partisan and at the same time not a spoilsman in its wide, broad, and universal scope, and while I am in favor of this section of the bill known as section 6, I believe I have reason for the faith that is within me, and that I am able to explain the reason why I think it ought to become a law—at least I am able to explain it to my own satisfaction—and in standing for it I decline to be classified as an absolute spoilsman. We have had in this country a "pretended" civil service for the last 30 years or more. I call it "pretended" civil service because that is all it is, all it ever was, and all it ever will be until the Civil Service Commission amends its rules and

regulations in regard to certifying eligibles who have passed a civil-service examination. Talk to me about merit system all We do not have merit system under civil service, never have had, and never will have until the rules and regulations of the commission are amended so as to make it strictly a merit system. The trouble with the civil-service system as it is administered to-day, in my judgment, is that you give a leeway for any and all persons and parties to play "football" with it, and the Republican Party for 16 years has played "football with it under the leeway. If the rules and regulations of the civil service were so amended that the commission would only certify the person making the highest grade to the department for appointment, then you would have an actual meritorious civil-service law, but until you amend the rules and regulations, only allowing one person to be certified to the eligible list, you will continue to play "football" with it, until you reach the point when it will be stopped by certifying the one who has honestly and meritoriously won by a competitive examination.

The majority report says that the purpose of this measure is to return to the spoils system. I deny that statement in their report. The criticism we have against it is this: The "blanket orders" issued by the President heretofore in covering men and women into the civil service without holding a written competitive examination, where brain power, and brain power alone, should be the supreme test of ability to win. I am not quarreling nor will I quarrel with President Taft, who, I be-lieve, holds the record for "blanketing" more people into the civil service than any President who ever administered the law since we have had a civil service law in this country. of his Executive orders whereby he turned employees into the civil service were right, in my judgment-for instance, the men in the employ of the navy yard and quartermasters' dearsenals, and various other institutions. It would be a difficult task to frame up a written competitive examination for employees to win on the merit system in this kind of work. These employees achieved their ability by constant and continued energy at work with their anvils, hammers, and saws, until they become not only efficient but proficient. With that class of men, where the President has turned them into the civil service by Executive order, I believe he did right. Nor do I have any quarrel to make with the Presidents of the past in the administration of the law, where in a few instances they have issued Executive orders turning a few individuals into the civil service. I had occasion two years ago to investigate the number turned in by President Roosevelt and President Taft, and found the number to be very small-I think less than 20-and if I remember correctly, every one of them except one had been at one time in the civil service, so with special Executive orders issued by Presidents of the past turning people into the civil service I have no criticism to offer whatever. But when we come down to purely clerical positions we reach a totally different proposition, where, in my judgment, ability, intelligence, learning, and education should be the test of fitness. On September 30, 1910, President Taft by an Executive order turned into the civil service approximately 2,400 assistant postmasters. Of these 2,400 assistant postmasters less than 500 of them had ever been subjected to or had ever stood a written competitive examination.

The remainder of them, 1,900 in number, had beyond doubt been appointed to their respective positions solely and exclusively because of their peculiar fitness politically. these Executive orders that the Committee on the Post Office and Post Roads undertakes to lift them out of civil service, and hopes that later the President of the United States will hold a written competitive examination for the purpose of filling these places with men under the merit system. Judge Moon yesterday covered the whole field along this line, showing that men have been turned by hundreds, aye, by thousands, into the civil service by Executive order without holding any competitive examination with the view of determining their mental qualifications to fill the position. Instead of the civil-service law being faithfully administered in the past, the service has been polluted; it has been destroyed; it has been dragged into the mire of political campaigns ever since the law was written on the statute books, and will continue so to be until that condition is remedied by requiring the Civil Service Commission to certify only the one making the highest rating.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield

for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. COX.

Mr. COX. For a question solely.

Mr. CAMPBELL. The gentleman has made the statement that the civil-service law has been violated continually since its Will the gentleman specify in what manner it has enactment. been so violated?

I will take pleasure in answering that before I close. Mr. FOSTER. Mr. Chairman, will the gentleman from Indiana yield?

The CHAIRMAN. Does the gentleman yield?

Mr. COX. I can not yield for a speech.

Mr. FOSTER. No; I just wanted to state that where the civil-service law has been violated has been in the appointment of these local examiners, where it is provided that they shall be nonpartisan and where they have been made partisan.

Mr. COX. Mr. Chairman, reading from the civil-service law

itself, it provides as follows:

Second. And, among other things, said rules shall provide and declare, as nearly as the conditions of good administration will warrant, as follows: First, for open, competitive examinations for testing the fitness of applicants for the public service now classified or to be classified hereunder. Such examinations shall be practical in their character, and so far as may be relate to those matters that will fairly test the relative capacity and fitness of the persons examined to discharge the duties of the service into which they seek to be appointed.

Now, that is the law itself. The law plainly provides there shall be an open competitive examination for testing the fitness of applicants for the public service now classified or to be classified hereafter. I ask you, gentlemen, whether or not the law was fulfilled and complied with when President Taft, on the 30th day of September, 1910, turned upward of 1,900 assistant postmasters into the civil service without holding any competitive examination with the view of testing their efficiency or

Mr. HAMILTON of Michigan. Mr. Chairman, will the gen-

tleman yield for a question?
The CHAIRMAN. Does the gentleman yield?

Mr. COX. I will yield for a question.

Mr. HAMILTON of Michigan. I wanted to ask the gentleman whether he and the President agree as to the advisability

of uncovering assistant postmasters?

Mr. COX. I am in thorough accord with the President of the United States on this subject. I am sure when he revoked the order of 1912 issued by President Taft, whereby upward of 50,000 postmasters were turned into the civil service by an Executive order, without any competitive examination, that even you approved of President Wilson's order, and I am equally sure that you did not approve of President Taft's Executive order when he turned this vast army of fourth-class postmasters into the civil service without any pretended examination whatever. President Wilson's order requires a written competitive examination in all fourth-class offices where the salary is in excess of \$180 per year. This is the merit system; it is the ability system; it is the brain-power system that should ever characterize the civil-service system. This system of "blanketing" these men into civil service without a competitive examination was and truly is the "spoils system"—no merit about it-and this is exactly what I hope will happen after this bill becomes a law: That the President will require a written competitive examination and that these places will be filled by men earning them at the end of a rigid competitive examination.

Mr. SWITZER rose.

Mr. HAMILTON of Michigan. But I understand from the newspaper statements-

The CHAIRMAN. To whom does the gentleman yield?

Mr. COX. I will yield first to the gentleman from Michigan. Mr. HAMILTON of Michigan. I understand from the newspaper statement that the President did not approve of the policy of uncovering the assistant postmasters. I assumed that the gentleman from Indiana might know-might have accurate

information in the premises

Mr. COX. I have not consulted the President on that subject nor has he consulted me; but, judging the future by the past, his past record is a signboard to me as to what he will do in the future, if this bill becomes a law, and if he does the same thing as to assistant postmasters that he did as to fourthclass postmasters-hold a written competitive examination and let merit win-I assure you the people of the country, without regard to party, will absolutely approve of it. Now, I will yield to the gentleman from Ohio.

Mr. SWITZER. Is it not quite clear as to what the Presi-

dent is going to do?

Mr. COX. I do not know anything about it. I have not con-

sulted him.

Mr. SWITZER. I want to ask what will be the method in Ohio, for instance, of having an examination of these fourth-class postmasters? Will the applicant who passes the highest in the examination be appointed?

Mr. COX. I do not know what will be the rule in Ohio, but

I can answer the gentleman as to the third congressional district

of Indiana, if he wants that.

Mr. SWITZER. I should like to know about Ohio. I am interested in that.

Mr. COX. I am not from Ohio and do not know anything about your conditions out there.

Mr. SWITZER. How will you do in Indiana?

Mr. COX. Exactly as you have played politics and "foot-ball" with the civil-service law for 16 years; I propose to turn the tables on you and do exactly as you have done; and, so far as your State is concerned, I take it that if a Democrat gets on the eligible register there will be enough warm Democratic blood in the Members of this House from the State of Ohio to see to it that Democrats are appointed.

Mr. SWITZER. Then you are not going according to the

civil-service policy?

Mr. COX. Yes; we are. We will be administering it exactly as the civil-service policy was administered by you and your party ever since you have been in power, and that is, see to it that every time a Democrat wins out in the written competitive examination, if he goes on the eligible register, see to it that he gets the position.

Mr. LLOYD. I am not sure that I understand the gentleman from Indiana. Is it the gentleman's idea that if the provision in this bill becomes a law there would then be a competitive

examination, or an examination of any kind?

Mr. COX. That would be my wish. Mr. LLOYD. But that is not the law.

Mr. COX. That is not the proposed law, but the civil-service law is at all times under the control of the President and he can call a written competitive examination at any time he wants it

Mr. LLOYD. The proposed law takes it out from under civil service.

Mr. COX. Yes; the President could immediately call for a civil-service examination and require applicants for assistant postmaster to stand it, even though we except them from it.

Mr. LLOYD. The President might have the power to do it. but he would not do it when the expressed will of Congress was the other way.

Mr. COX. I do not know what he would do. I wish he would do it. I would like to see them exempted from civil I would like to see them exempted from civil service, and then as soon as they are exempted would like to see the President call a competitive examination where brain power

and brain power alone would be the test of ability.

Mr. LLOYD. The President of the United States has the power to do that now, just as he did with the fourth-class post-

masters.

Mr. COX. Probably that is true.

Mr. LLOYD. With the law as it is now and the President having that power, but not exercising it, would you expect him to exercise it when the Congress of the United States took them out from under the civil-service law?

Mr. COX. I do not know what he would do. gentleman frankly. I can only express my wish. I hope, if this bill becomes a law, it will serve notice on the President of the will and wish of Congress to exempt assistant post-masters from the present provision of the civil-service law, and this will give him an opportunity to immediately call a written competitive examination and put them back into civil service

Mr. CRAMTON. I understand from a recent statement you have made that you expressly admit that your party-the Democratic Party-is to-day playing football with the civil service under the present rules.

Mr. COX. I did not expressly admit it. I said you had done it, and you know you have, or your party has, at least; every other man, woman, and child that knows anything about politi-

cal conditions of this country know this to be true.

Mr. CRAMTON. And you said that all parties would? Mr. COX. You can not expect anything else in return but retaliation from us.

Mr. CRAMTON. And that all parties would continue to do it under the present rules.

Until you amend the rules and regulations this condition will go on. That is exactly what you have done ever since you have been in power, and is exactly what every other party is going to do as long as the present rules and regulations of the civil service continue to exist as they now are.

Mr. CRAMTON. And thereby you have admitted that your party is to-day playing football with the civil service?

Mr. COX. This is exactly what you have done with the civil-service law for the last 16 years, and you know it to be true, and you can not blame the Democratic Party for retaliating in self-defense.

Mr. CRAMTON. Never mind your reason; but you admit

you are doing it.

Mr. COX. Whether you call it playing football or not, by your own example you have set the pace, and if we turn the trick on you, you should not blame us. I am a partisan; of course I am, and frankly state to you that if a Democrat gets on the eligible register for fourth-class postmaster he is going to get the appointment if I can aid him in so doing.

Mr. CAMPBELL. Will the gentleman yield?

Mr. COX. I will yield for a question. Mr. CAMPBELL. Suppose a Republican should have a higher grade than a Democrat for the same office, then what would

you do

Mr. COX. Ah, I have had to go up against that ever since I have been in Congress, I am sorry to say, where Democrats in my district who had taken rural-route examinations and were several points the highest in the grade. I have gone down to the Post Office Department and tried to get them to appoint the Democrat, but was told that some Republican referee in the State of Indiana, after both Republican United States Senators were defeated, had to be consulted, and their orders had to be obeyed; and the result was time and again that Democrats failed to get the position, although holding the highest grade.

Mr. CAMPBELL. They may have done that in Indiana, but
I know congressional district in Kansas—

Mr. COX. If you have any questions, I will answer them.
Mr. CAMPBELL. I know a congressional district in Kansas
where rural carriers and fourth-class postmasters are appointed

in accordance with their standing in the examinations.

Mr. HAMILTON of Michigan. I wish the gentleman from Indiana would not make the statement quite so sweeping, be-

cause I want to testify a little.

Mr. COX. I am only yielding for a question now.

Mr. HAMILTON of Michigan. All right. I do not know
whether I can put it in the form of a question, but I want to say to the gentleman that in the matter of rural carriers in the fourth district of Michigan there are many Democrats hold-ing those places. Within my observation and experience the Civil Service Commission has been absolutely fair.

Mr. COX. I am not quarreling with the Civil Service Commission. I imagine, so far as the examining of the papers are concerned, it is fair; but you have had an underground tunnel, a subterranean passage, whereby in some way or manner the Democrats in my part of the country have had no show on earth; and this became so obnoxious out in Indiana several years ago that bright, active, intelligent young men—Democrats—flatly refused to go forward and stand examinations.

Mr. CRAMTON. Will the gentleman yield?

Mr. COX. For a brief question.

Mr. CRAMTON. I have heard much from the gentleman on the lines of economy; may I ask him whether the reexistence of the spoils system will lead to economy in that regard?

Mr. COX. I do not think it will affect it one way or the other.

Mr. SIMS. Will the gentleman from Indiana yield?
Mr. COX. I will, for a question.
Mr. SIMS. Does the gentleman deem the evasion of the civilservice law by the Republicans a justification for us to do what

That is a matter for each individual to answer according to his own conscience. [Laughter.] Now, in response to queries from gentlemen on the Republican side, let me give you an instance as to how you have played football in the past with public offices. I had a Republican friend two years ago who wanted to be reappointed postmaster in my district, and, being a member of the Committee on the Post Office and Post Roads, I thought I might give him some little influence with Postmaster General Hitchcock. I called upon the General, and was told by him that the little post office in a little town of about 2,500 was on the auction block and that if the postmaster could deliver, the delegates to the district meeting that would select the delegates to attend the national convention he could receive the appointment. I informed my friend by letter, and he carried out my orders to a certain point, but failed to carry them out to the final conclusion, and the result was that he did not get that post office.

Mr. SWITZER. What was the highest bid?

Mr. COX. The bid was for the nomination of the Republican

President in 1912.

A MEMBER. Who told you that?

Mr. COX. Mr. Hitchcock.

Talk about the merit system; you men on that side of the House have evolved an entirely new definition for the word "merit," I went out yesterday and looked up the definition of | cloak and a cover and that is about all it is for any party in

"merit," according to the new Standard Dictionary, and it is defined as follows:

Merit: The state of fact deserving, either in a favorable or unfavorable sense; desert; as used absolutely, the state or fact of deserving well; excellence, worth, as, he is a man of merit. Reward or recompense deserved or received; specifically in some school systems, a mark or award of excellence.

You have not followed that definition at all in the past; you have evolved and manufactured a new definition of the merit system which has been a political merit system. By a political pull it has found its way into the appointment of civil-service employees so that you have filled practically every department with Republican employees at home and abroad, the exceptions being, indeed, very few. You have paid no attention to merit, ability, intelligence, education. These things were wholly unknown to you in your appointments. You were governed solely and exclusively by the political rule of political expediency; you have applied this test faithfully; have never faltered or fallen by the side along this line. Out of 1,900 rural route carriers in the State of Indiana to-day I assert it to be a true fact, for I have investigated it, that less than 5 per cent of this 1,900 rural route carriers are Democrats; the remainder were Republicans when appointed and are Republicans to-day, and were it not for encumbering the RECORD I would place in it a volume of correspondence from 82 of the 92 counties in my State conclusively showing this condition to be true.

Mr. CAMPBELL. Will the gentleman yield?

Mr. COX. For a question only.

Mr. CAMPBELL. Is it not true that the postmaster to whom the gentleman referred a moment ago as having not been retained was not under the civil service?

Mr. COX. He was not.

Mr. CAMPBELL. Then there was no pretense that the civil-service law was violated in that case?

I gave that instance in response to what the gentleman from Michigan said. I wanted to show that you are play "football" with the men who are under civil service, and playing football with the men who are not under civil service.

Mr. CAMPBELL. Then, why mention an instance of a man

who is not under civil service?

Mr. COX. It is an undisputed fact that Mr. Taft could never have gotten the nomination at Chicago if it had not been for the Republican officeholders. If it had not been for this method of selecting delegates you know it would have been impossible to have nominated him, and if you would take advantage of officeholders not in the civil service it is fair to assume that you would take advantage of the civil service to get your partisans appointed.

Mr. FESS. Mr. Chairman, will the gentieman yield?
Mr. COX. For a question.
Mr. FESS. Is the gentleman opposed to the merit system or the manner in which it is administered?

Mr. COX. I am opposed to the manner in which it has been administered by your party.
Mr. FESS. Can it be administered differently?

Mr. FESS. Can it be Mr. COX. It can be.

Mr. FESS. Is the gentleman afraid that his party can not

administer it that way, or why is he opposing it now?

Mr. COX. I am not afraid one way or the other. I tried to make myself plain on the proposition, that if you would get the Civil Service Commission to amend its rules and regulations so as to certify the person who has won the examination in open and fair competition, then you would get a merit system; but you will never have it until you do.

Mr. FESS. Does the gentleman mean that we can not get that regulation and that we must repeal the system?

Mr. COX. I do not know whether we can get it or not, we did not have it under the regime of the Republicans during 16 years. True downright merit was unknown during your rule and reign of supremacy in this country; political merit was the only thing you recognized.

Mr. FESS. Is not the gentleman's remedy worse than the

disease? Mr. COX. No; it is not. My remedy is the only remedy for the disease

Mr. BOWDLE. Mr. Chairman, will the gentleman yield?

Mr. COX. For a question.

Mr. BOWDLE. Assuming we have a civil-service law that has been worked by the Republicans for many years, and that may be worked by the Democrats for a good many years, will the gentleman please tell us in terms of simple English what is the value of the law in his judgment?

Mr. COX. That is a pretty hard question to answer. It is a

power. There is no use to dodge the question; we had just as well be honest with each other and honest with the country.

Mr. BOWDLE. Does the gentleman believe that the law is of no value?

Mr. COX. The way it has been administered in the past by the Republican Party I do not believe it is of any value whatever except to the party in power.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. COX. For a question.

Mr. FESS. In view of the question that my colleague from Ohio [Mr. Bewple] asked, and the manner in which the gentleman from Indiana answered it, does he mean that a civil-

service regulation can not be administered?

Mr. COX. No: I do not mean that. I believe it can be administered, but I doubt that it will ever be administered fairly unless its rules and regulations be changed as I have stated. How many rural-route carriers in the gentleman's district are Democratic? How many fourth-class postmasters in the gentleman's district are Democratic? I dare say less than 5 per cent of them. I was in the gentleman's district for three months two years ago, and I know something about it. stantially the same conditions existing in his district as exist in mine in the State of Indiana, and that is every job under civil service filled by a Republican. Will you contend for a moment that the Republican Party in your district represents all the brain power in it? Can not a Democrat be found who is able to win out on a written competitive examination for a rural-route carrier's job? It may be that a few rural-route carriers in your district are Democrats, but I dare say very few of them.

Mr. FESS. Will the gentleman yield to another question?

Mr. COX. Certainly.

Did the gentleman come to my district to find Mr. FESS.

out how many?

Mr. COX. Oh, no; I was there on totally different business, but while there took occasion to investigate some of the political conditions in your district, and found the same conditions there that exist in the State of Indiana.

Mr. FESS. Do I understand that it does not matter what the regulation, the gentleman is opposed to civil service on the

merit system?

Mr. COX. No; I am opposed to the way in which you have

administered it, or your party rather.

Mr. FESS. Then why does the gentleman not endeavor to administer it differently?

Mr. COX. Because partisans will administer it in a partisan If the gentleman from Ohio can rise above his partisanship, then he is the greatest man on the floor of this House.

Mr. FESS. Does the gentleman mean that the Democratic administration can not administer the civil-service merit system?

I do not mean to say it can not, but I mean to Mr. COX. say this, for the third and last time that I am going to say it, that if I have any control or any voice in the selection of persons to fill positions in my district where a competitive examination has been held, that if a Democrat gets on the eligible register he is going to get the appointment.

Mr. FESS. I thank the gentleman for his frank statement.

Mr. BOWDLE. Is it not true that what the gentleman is really saying to the House, by implication at least if not directly, is that the only way the civil-service law of the United States can be prevented from being a monumental farce is by raising

the ethical condition of the people of this Nation?

Mr. COX. The gentleman is absolutely correct in that. Mr. BOWDLE. That is the nub of this whole situation; and may I ask the gentleman whether he has any ways or means to suggest to the House for a way of accomplishing that thing?

Mr. COX. None on earth, unless some of the brethren on the opposite side of this aisle, who are now railing against the proposed enactment of section 6 of this bill, will agree to devote the remainder of their lives to raising the ethical standards in I know of no other way whereby it can be done.

Mr. CRAMTON. Does not the gentleman think that the Democratic postmasters can raise the ethical conditions of the

Mr. HAMILTON of Michigan. Let him start on the Demo-

Mr. COX. I do not have to start on the Democratic side right now. The ethical standard of the Democrats on our side of the Chamber is at least on a par, if not superior, to the standard of the men on the other side of the aisle. Now, this bill only proposes to exempt assistant postmasters from the provision of the civil service. I am for it because the nineteen hundred and some odd assistant postmasters never won their positions upon the merit basis, but, on the other hand, won their present posi-

tions solely by means of political pulls, and were political appointees pure and simple, and appointed solely for the purpose of awarding political merit; no other consideration entered into their appointment whatever, and I am not quarreling about this. I am not quarreling because they were appointed to reward them for partisan work. I would like to see them taken out of civil service, and then see a written competitive examination held with an amendment of the rules and regulations of the civil service so as to give to the one making the highest grade the position, and require the commission to so certify one name, and one name alone, and require the department to appoint the one to the position who was certified by the commission.

Mr. HAMILTON of Michigan. Will the gentleman yield to me

for a question?

Mr. COX. For one question.

Mr. HAMILTON of Michigan. For one question. Now, I understand the gentleman would be in favor, is in favor, of applying the principle which he has just expressed to fourthclass postmasters under this administration?

Mr. COX. Yes; as outlined by the President in his Executive

order last spring relating to fourth-class post offices

Mr. HAMILTON of Michigan. He would have all the fourthclass postmasters examined and the man who stands the highest,

he thinks, should be appointed.

Mr. COX. If I had my way about it I would like to see the Civil Service Commission amend its rules and regulations so as to only certify one eligible, and then let the one making the highest grade receive the appointment. I would give no leeway to any Member of Congress, postmasters, or any post-office inspector any right to designate who should be appointed to fill the place, but leave it absolutely up to the applicant who made the highest grade.

Mr. HAMILTON of Michigan. Let me suggest to the gentle-

I can not yield any more.

Mr. HAMILTON of Michigan. The gentleman knows at small places there is frequently only one store, and that facilities for conducting a post office are very meager.

Mr. COX. Oh, yes; I know that. But you have them all: some way you have found the man at the crossroads, and he is always a Republican. You are doing nothing except "singing the song of the dying swan."

Mr. HAMILTON of Michigan. No; we are alive and we are

getting better.

Mr. COX. I hope you will; there is room for improvement. Mr. SAMUEL W. SMITH. Will the gentleman yield?

Mr. COX. For a question.

Mr. SAMUEL W. SMITH. The gentleman spoke of the fact that so many Republicans are rural carriers. arise from the fact that they were appointed by the Republicans before they were put in the classified service?

Mr. COX. No.

Mr. SAMUEL W. SMITH. It certainly does.

Mr. COX. Not in my State; I do not know what pertains in the gentleman's State.

Mr. SAMUEL W. SMITH. All over the Union.

Mr. COX. I say it does not as far as Indiana is concerned. and I know what I am talking about. I know how the matter has been conducted in Indiana, and every other citizen of Indiana knows, be he Republican or Democrat. I have seen schoolteachers in Indiana carrying a two-years' license-and this requires considerable of an education in Indiana before one can earn a two-years' license-I have seen them stand civil-service examinations for rural-route carriers side by side with ward politicians, men with practically no education whatever, and yet invariably the ward politician received the job; and he was invariably a Republican at that.

Mr. SAMUEL W. SMITH. I want to call the gentleman's

attention to this

Mr. COX. I can not yield further. Mr. SAMUEL W. SMITH. Is it not true the majority of the rural carriers to-day in the rural service were appointed before they were covered into the civil service

Mr. COX. I do not know about this, and I refuse to yield

any more.

Mr. HAMILTON of Michigan. May I not ask the gentleman this question?

Mr. COX. Only a question.
Mr. HAMILTON of Michigan. Whether, in view of the facts he has stated, he has not come to the conclusion that Indiana is an exceptional State? Does he think that this same condition exists throughout the other 47 States?

Mr. COX. I am not expressing an opinion of conditions outside of my own State. I know nothing of the conditions in the gentleman's State, but what I state in respect to Indiana I state under the solemn sanction of an oath, because I know what I am talking about, and know it to be true.

Mr. HAMIL/TON of Michigan. I believe the gentleman is stating what he believes to be the truth, because I know the gentleman and have a high regard for his veracity.

Mr. COX. I do not know whether it is a fair inference to infer that the same condition exists throughout the United States as exists in the State of Indiana. If they do not exist in

the gentleman's State, all right.

Mr. HAMILTON of Michigan. They do not, I am glad to say

Mr. BOWDLE. Mr. Chairman, will the gentleman tolerate one friendly question? [Laughter.]

Mr. COX. I will yield for a question.

The CHAIRMAN. Does the gentleman yield?

Mr. COX. Yes.

Mr. BOWDLE. I would like to ask the gentleman this question: There are 398 post-office inspectors in the United States, and will the gentleman explain to the House the mystery whereby only 4 or 5 of them are Democrats?

I think the gentleman's ratio is correct. I think Mr. COX. there are three hundred and sixty-odd post-office inspectors, and I think only five or six of them are Democrats, while the remainder of them are Republicans.

Mr. BOWDLE. Allow me to make a correction, There are

390 post-office inspectors and 5 of them are Democrats.

Mr. COX. I can not explain this. Some of my ardent Republican friends on the other side of the Chamber could, no doubt, if they would, and I give it as my judgment that the Republican post-office inspectors have been the underground tunnel whereby many thousands of Republican rural-route carriers have been appointed, and many thousands of bright, active, intelligent young Democrats, who went in and stood a written competitive examination, failed to get the coveted plum, be-cause these inspectors are and were in direct touch with the appointing power here in Washington; and no doubt, while on their tours of inspection, they learned the politics of all the applicants standing these examinations, and, faithful to their political trust, reported to the appointing power here in Washington the favorite Republicans who desired to be appointed. Now, to sum this matter up, when these assistant postmasters were turned into civil service by an Executive order, why did not President Taft then call a competitive examination and let merit win, if you are in favor of the merit system? Ah, you took no chances on it; took no chances on giving Democrats an opportunity to come in and compete in these examinations; you were afraid a Democrat here and there might possibly win and get one of these positions; but with one stroke of the pen the President of the United States turned into civil service upward of 1,000 men by Executive order without any written competitive examination whatever being held, and this in the face of the plain provisions of a positive written statute which requires competitive examinations to be held to fill these places.

Now, let us get down to an honest, conscientious working basis. Let us, at least, not deceive ourselves nor undertake to deceive the country on this monstrous proposition. want to put this service on the merit basis where brain power, intelligence, and education shall win, have the Civil Service Commission amend its rules and regulations to certify only one man for appointment and then require every man filling clerical positions to stand a competitive examination and you will have a true merit system established, and you will never

have a merit system until you get it this way.

The minority report says that section 6 is a violation of our platform adopted at Baltimore last year. Let us see what the platform does say on that subject:

Civil-service law: The law pertaining to civil service should be honestly and rightly enforced, to the end that merit and ability shall be the standard of appointment and promotion, rather than service rendered to a political party.

How the minority can find anything in section 6 of the proposed bill that violates the Baltimore platform is more than I can understand. The makers of this platform recognized the blanketing abuse of Republican Presidents in turning thousands of employees into the civil service by Executive order without holding a written competitive examination, and hence the Democrats in the Baltimore convention declared in the platform that the civil-service law should be honestly and rightly enforced. I insist that the adoption of section 6 is a step in the direction and in line with the Baltimore platform. The platform could not have meant anything else other than a criticism of the "blanketing" orders of the Republican Presidents in turning men into civil service by Executive orders without competitive examinations. Talk about the Democratic Party to-day being a

spoils party! The Republican Party was the worst spoils party that ever administered this Government, and it used the civil service as a cloak, for the sole and exclusive purpose of getting possession of the spoils, places, positions, and jobs in the Government, and our criticism on it to-day is in the way and manner that you procured these jobs, positions, and places, not as the result of competitive examinations, but first filling them with Republicans, and then, by Executive orders, turning them into civil service. He who finds any antagonism between the provisions of section 6 and the Baltimore platform is only able to do it by a wide stretch of political imagination, and is unable to find any difference by any ordinary rules of construction of the English language.

Section 6 in this bill is based squarely on the provisions of the Baltimore platform. The platform aimed at the staggering evil of the Republican Party in getting possession of these places by Executive orders, and this bill proposes to exempt

them from the civil-service law.

Now, so much for this branch of the subject.

I want to say a few words in regard to section 8 of the bill. Section 8 appropriates \$200,000, and the Postmaster General is given the power to buy full railway postal cars for the purpose of carrying and transporting the mail therein, and he is further given the power to enter into contracts with the railroads for hauling the cars. The railway pay question is a tremendous proposition and one that the railways themselves are not agreed upon. They continue to insist that they are underpaid for the transportation of the mails; hearing after hearing has been had, and volumes upon volumes of evidence have been taken pro and con on this proposition, and as near as the railroads ever get to the proposition is the bare assertion on their part that they are underpaid for the transportation of the mail.

This bill carries \$60,600,000 as pay for the railroads; \$55,188,000 for the transportation of the mails at the pound rate, and \$5,412,000 as railway postal car rent, making a total of \$60,600,000 as the amount paid to railroads for transporta-

tion of the mails.

On the one hand the public continues to cry out that the railways are overpaid. That is met with the bare assertion on the part of the railroads that they are underpaid. I have read every word of every hearing that has been had on this subject for the last 10 years, and I am frank to confess that I do not know anything about it, and do not believe anyone else knows anything about it. I believe that many of the smaller lines of railway are underpaid while many of the great trunk lines are overpaid, and I believe my judgment is just about as near right as any other one's judgment. I hope this section will eventually lead to a solution of this much-vexed question. Some may criticize it on the ground that it tends to Government ownershp of transportation facilities. I do not believe it will lead that far; at least I hope it will not be an entering wedge to Government ownership of railroads, a proposition to which I am unalterably opposed. The Post Office Department owns its own mail bags, pouches, mail equipment, and so forth; why not own its own cars? Postmaster General Vilas, during his term as Postmaster General, urged upon Congress the passage of a law whereby the Government would own its own railway postal cars, and, in fact, from his day down to the present moment this question has been agitated with more or less vehemence.

My amendment is offered for the purpose of enabling the Post Office Department to try this experiment, and I believe that it will give the Post Office Department an opportunity to solve the vexatious question of railway mail pay. The Post Office Department now requires cars to be built out of steel, the average cost of which is about \$10,000; the average length of the life of a steel railway car is not known, because they are a matter of recent construction; the testimony before the Bourne Commission this summer shows that the average life of a steel car would be from 15 to 20 years. We are now paying an annual average rental of about \$5,000 for a full railway postal car, the cost of construction of which is approximately \$10,000. This is certainly a tremendous rental to pay for a railway postal car. If its average life be 15 years, and we pay \$5,000 per year rental for it, we have paid in the way of rental, during the 15 years, the enormous rental of \$75,000 for one of these cars. Of course, if section 8 becomes a law and the Postmaster General buys, builds, or constructs these cars, he will be required to enter into a contract with the railroads for hauling or transporting them. Many large business interests of the country own their own cars—the Pullman people, the packers, and many of the large manufacturers—and enter into contracts with the railroads for transporting their cars over their lines. They certainly find it more economical for them to own and re pair their own cars and enter into contracts with the railroads

to haul them than to have their produce shipped in cars owned by the railroad companies; otherwise they would not do business in this way, because large business interests are not in business for their health, but in business for the money there is in it. Reasoning along these same lines, I believe it will eventually be a matter of great economy for the Government to own its own railway postal cars and be permitted to enter into contracts with the railroads for hauling and transporting them over their lines of railway.

over their lines of railway.

Mr. AUSTIN. Will the gentleman, who is a member of the Committee on the Post Office and Post Roads, give us his opinion about penny postage and increased compensation for rural

carriers?

Mr. COX. I will if I get time. I am against both propositions. I will say that to you right now. We are not prepared to take on penny postage in this country at this time. How much clear profit the Government is deriving from first-class mail matter at this time I do not know, but statistics show that in 1908 the Government was deriving a net profit of approximately \$78,000,000 per year on first-class mail; and we know that if this be cut in two and penny postage be adopted the Government would lose one-half the amount of the revenue that it is now making on first-class postage, and the Post Office Department is not prepared at this time to lose this tremendous amount of revenue.

As to increasing the pay for rural carriers, the Post Office Department testified before our committee that the increased weight of mail matter carried by the rural carriers by reason of the parcel post was so negligible in quantity that it would not justify any increase of their salaries. I think we have been very kind to the rural-route carriers in the way of in-

creasing their salaries, and am opposed to it.

Mr. AUSTIN. How about an increase of the postage on second-class mail matter? What does the gentleman think on

that proposition?

Mr. COX. I am in favor of increasing the postage. I think it ought to be done. There is no question in my mind about In the last 10 years we have had commission upon commission appointed to investigate this question, and every one of the commissions have recommended an increase of postage on all second-class matter. We have expended between six and eight hundred thousand dollars upon these commissions, yet no good has ever come of it, exactly as no good ever comes from any of these special commissions appointed to investigate any subject. They are always a plea of confession and avoidance, a plea that something is wrong, but postponing the day of reckoning. The last commission appointed to study this question was presided over by Justice Hughes, a member of the Supreme Court of the United States. The commission sat for months during the year 1912 in various places in the United States, and found that the Government was transporting second-class mail matter at a tremendous loss, and conservatively recommended an increase of from 1 cent per pound to 2 cents per pound, but nothing has been done in the way of carrying out the recommendations of the Hughes commission. Complete and exhaustive statistics were gathered in 1907 and compiled in 1908, showing that the Government lost annually approximately \$63,000,000 in the transportation of second-class mail matter. Something ought to be done; something must be done in order to make this kind of mail matter pay its proportionate charge of transportation; and if legislation of this kind was enacted so as to reduce the cost of handling second-class mail matter to the Government, penny postage might not be a visionary dream but a reality.

The railroads, in transportation of mail, do not occupy the same position as common carriers in this regard as they do in the carrying and transporting of freight. In other words, railroads are not regarded as common carriers in the transportation of mail in the same light as they are regarded as common carriers of freight and passengers. Congress has the power to enact legislation making railroads common carriers of mail as well as common carriers of freight and passengers, but down to this time Congress has not enacted legislation declaring railroads to be common carriers of mail, and until Congress does this, and the statute is construed judicially by the Supreme Court of the United States, the question of railway mail pay will ever continue to be a disputed proposition. In the case of the Eastern Railroad Co. v. United States (129 U. S., 391) it was held that the company might have refused to transport the mails at the reduced rates fixed by the Postmaster

General in accordance with the act of Congress.

In the case of Minneapolis & St. Louis Railway Co. v. United States (24 C. Cls., 350) it was held that the orders of the Postmaster General and the business of carrying the mails are subject to the statutes and regulations of the department, which

constitute the terms of the contract; and a railroad company by carrying the mails accepts those terms: That the claimant company was not aided by the United States with grants of land or issues of bonds and so was under no obligations to carry the mails, and that it might at any time have abandoned the service if it were unwilling to accept the terms offered and imposed by the Postmaster General, as was held in the Eastern Railroad case.

In the case of Texas & Pacific Railway Co. v. United States (28 C. Cls., 379) it is said by the court that the company was under no obligation to perform the service for any agreed period and could have refused to take the mails at any time.

In the case of Chicago, Milwaukee & St. Paul Railway Co. v. United States (198 U. S., 385) it was held that while a contract may not be forced upon a railway, it may accept and become bound by the action of the Post Office Department.

In the case of Atchison, Topeka & Santa Fe Railway Co. v. United States (225 U. S., 640) it was held by the court that the railroad was not bound to furnish "half lines" nor to accept the terms named by the Postmaster General, for Congress had not legislated so as to require compulsory service at adequate compensation to be judicially determined, or in a method to be provided by statute, and as the plaintiff's road between Chicago and Kansas City had not been aided by a land grant, it was, under existing law, not obliged to carry the mails when tendered, nor to supply railway post-office cars when demanded. (Eastern Railroad Co. v. United States, 129 U. S., 391, 395, 396; United States v. Alabama Great Southern Railroad, 142 U. S., 615.)

In the case of Pensacola Telegraph Co. v. Western Union Telegraph Co. (96 U. S., 1) the court held that the act of Congress, July 24, 1866 (14 Stat., 221; Rev. Stat., sec. 5263, et seq.), so far as it declares that the erection of telegraph lines shall, as against State interference, be free to all who accept its terms and conditions, and that a telegraph company of one State shall not, after accepting them, be excluded by another State from prosecuting its business within her jurisdiction, is a legitimate regulation of commercial intercourse among the States and is appropriate legislation to execute the powers of Congress over the Postal Service, nor is it limited to such military and post

roads as are upon the public domain.

It was held in Pensacola Telegraph Co. v. Western Union Telegraph Co. (96 U. S., 1), Western Union Telegraph Co. v Baltimore & Ohio Telegraph Co. (23 Fed., 12; 19 Fed., 660) that railroads are post roads under the United States statutes, and a contract which grants the exclusive privilege to do telegraphing along any railroad is void as against public policy.

In the case of Western Union Telegraph Co. v. Pennsylvania Railroad Co. (195 U. S., 540) it was held that the act of Congress of July 24, 1866 (14 Stat., 221; Rev. Stat., sec. 5263, et seq.). giving a telegraph company the right to construct and operate its lines through, along, and over the public domain, military or post roads, and navigable waters of the United States, was a legitimate regulation of commercial intercourse by telegraph among the States and appropriate legislation to carry into execution the power of Congress over the Postal Service; it was merely an exercise of national power to withdraw such intercourse from State control and interference.

Questions relating to post roads have been further discussed

in other United States courts in cases following:

Cleveland Railway Co. v. Franklin Canal Co. (1 Pitts. L. J., 142; 5 Fed. Cas., No. 2890), Railway Mail Service cases (13 C. Cls., 199), United States v. Korchersperger (9 Am. Law. Reg., 145; Fed. Cas., No. 15541), Atlantic, etc., Telegraph Co. v. Chicago, etc., Railroad Co. (6 Biss., 158), Blackman v. Gresham (21 Blatch., 354; 16 Fed., 609), Hewett v. Western Union Telegraph Co. (4 Mackey (D. C.), 424), Western Union Telegraph Co. v. New York (38 Fed., 553), Michigan Telegraph Co. v. City of Charlotte (93 Fed. (C. C.), 11), Postal Telegraph Cable Co. v. Cleveland, Cincinnati, Chicago & St. Louis Railway Co. (94 Fed. (C. C.), 234).

I sincerely hope that section 8 of this bill will finally be adopted and become a part of the law of the land. I believe it to be a step in the right direction, an aid to the solution of

this embarrassing question.

In conclusion, Mr. Chairman, the Committee on the Post Office and Post Roads has presented a clear, clean bill. The appropriations are larger than they have been heretofore, but it is the one department of the Government that is self-sustaining. It is the department of the Government next to the Treasury Department; it comes nearer reaching every man, woman, and child throughout continental United States and its island possessions than any other great department of this Government. While this bill carries an appropriation of \$305,000,000—a tremendous sum of money—for the ensuing fiscal year of 1915,

it is believed by the Post Office Department, and this belief is supported and backed by the Committee on the Post Office and Post Roads, that the revenues next year to be derived from the mails will be sufficient to meet this appropriation.

I trust this bill in all its entirety will be passed and become a law exactly as the committee has presented it. [Applause.]
Mr. MOON. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. GRIFFIN].

Mr. GRIFFIN. Mr. Chairman, Postmaster General Burleson in his annual report makes the following recommendation for legislation to amend the law which grants compensatory time to letter carriers and post-office clerks on one of the six days following the Sunday on which they are required to perform service:

That after June 30, 1914, should the needs of the service require the employment on Sunday of letter carriers in the City Delivery Service and clerks in first and second class post offices, the employees who are required and ordered to perform Sunday work shall be allowed compensatory time for such service at such times as they can be most conveniently excused from duty.

The annual report of First Assistant Postmaster General Roper, for the fiscal year which ended June 30, 1913, contains the following comment on compensatory time for Sunday service:

Service:

The act of August 24, 1912, prohibits the opening on Sunday of post offices of the first and second classes for the purpose of delivering ordinary mail to the general public, but authorizes, when the needs of the service require it, the employment on Sunday of city letter carriers and clerks at such offices, provided they be granted compensatory time for such services on one of the six succeeding days.

The enforcement of this law, particularly the latter clause, not only adds largely to the cost of the service but materially lessens its efficiency. Mails are received and dispatched at practically all first and second class offices on Sundays, and during certain hours this necessitates the employment of at least a part of the force. Under the law these employees must be granted compensatory time on one of the six succeeding days. Owing to the constant fluctuation in the postal business this legal requirement works materially to the detriment of the service. For instance, during the very busy periods, especially between October and May, in order to prevent an undue accumulation of mail in post offices, it is necessary to require a considerable number of the employees to report for duty each Sunday. The granting of compensatory time to these employees during the succeeding week when the condition of the work urgently demands their presence and to employ inexperienced substitutes in their places results in serious impairment of the efficiency of the force. The granting of compensatory time to these employees that office of the services of about 190 clerks on every week day during the busy periods.

The department believes it would be in the interest of both the service and the employees to amend the law so as to provide for the granting of compensatory time for Sunday work when the employees can be most conveniently excused from duty.

How the department officials arrived at this conclusion is

How the department officials arrived at this conclusion is difficult to understand. That the Postal Service is to be benefited by depriving men of a day of rest each week to recuperate is not borne out by reports of investigations made by the Department of Labor. By what flight of the imagination can employees be benefited by compelling them to work on Sunday and granting them compensatory time at such times as they can be most conveniently excused from duty is beyond my comprehension.

The Sixty-second Congress passed the 8-hour-in-10 law and inserted a compensatory time provision, which, if put into effect properly, will grant one day of rest each week to employees, because a number of heartless, overbearing, and dictatorial supervisory officers continually made life miserable for postal employees by working them overtime and stretching their hours of duty over unreasonable hours of time each day. This law has only been in force since March 4, 1913, and it appears that instead of trying to conform with the law and adjust the service to meet its requirements, every possible effort has been and is being made to discredit it. To return to the old order of things and permit supervisory officials, popularly known as bureaucrats, to define the most convenient time to allow employees compensatory time for Sunday service would be to deprive the employees of compensatory time altogether and nullify the intention of Congress to provide a day of rest each week for the men who perform the actual work,

If it is the purpose of the department to save a few dollars

for the Government, why not do it in a direction where it will not work a hardship on a body of men who are now taxed to the limit? It was this cheeseparing policy that caused so much friction under the last administration, and it seems that the lesson learned by that experience has not made its impres-sion. It might be well for the Postmaster General and his first assistant to consult with some new advisers occasionally, particularly on matters affecting the working conditions of the employees. For a number of years the rank and file of the employees have received little consideration from department officials, who knew nothing whatever, through personal experience, of the actual working conditions of clerks and carriers in post offices, and it is high time that a remedy of this condition

should be had. So far the present administration has been successful in handling the big problem of the parcel post, and its success has been due in a large measure to the earnest, unselfish cooperation of the employees. This is attested by the Postmaster General and postmasters throughout the country, who have made public declarations to this effect and praised the men for the exceptional service rendered during the recent holiday season.

The enactment of legislation along the lines suggested in the recommendation of the Postmaster General will be in direct conflict with the principle of one day of rest each week to all those who labor. It would be a distinct step backward. Secretary of Commerce Redfield, my distinguished predecessor in this House, in an address before a meeting of the American Associa-tion for Labor Legislation held in Washington recently, is quoted as follows:

I am of the opinion that the day is not far distant when economically administered industrial enterprises will realize they can not afford to allow their employees to go to their homes in an exhausted condition.

If this expresses the sentiment of the present Democratic administration toward industrial enterprises, I am of the firm opinion that a similar policy should be pursued by the Government toward its employees as an example for captains of industry to follow. The United States Government should lead in this movement, and should not wait for private capital to prepare a humanitarian industrial policy. I contend that every man who labors should have one full day of rest each week. If it is necessary to employ letter carriers or clerks in post offices on Sunday, all well and good; but if they are required to work on Sunday, they should have another day for rest and recreation. The argument of cost is no argument at all, for it is an absurd proposition to compel a man in any line of business to work and then by some subterfuge or fiction deprive him of payment. The idea of ordering a man to perform Sunday work during the heavy rush seasons, and allowing him compensatory time divided into fractions of hours at a dull season, if such a one occurs, is too absurd to be considered seriously by men whose hearts beat in sympathetic unison with the trials and tribulations of the underpaid and overworked postal employees of this country.

The Post Office appropriation bill for the fiscal year which ended June 30, 1912, approved March 4, 1911, contained the

following section:

That hereafter for service required on Sundays of supervisory officers, clerks in first and second class post offices, and city letter carriers compensatory time off during working hours in amount equal to that of the Sunday employment may be allowed, under such regulations as the Postmaster General may prescribe; but this provision shall not apply to auxiliary or substitute employees.

This section was submitted by the department officials after a request had been made by the Post Office Committee for their opinion regarding the curtailment of Sunday service and the need of a day of rest each week for postal employees. To a great extent it was left optional with postmasters as to whether Sunday service should be curtailed or not, and the granting of compensatory time was left entirely to their discretion. Relief was granted to some employees, while others were deprived of it, and the result of the experience was anything but satisfac-So many were the protests against the manner in which the compensatory time provision was being enforced that Congressman REILLY, my distinguished colleague of Connecticut, a member of the Post Office and Post Roads Committee, in framing his 8-hours-in-10 bill, inserted a provision that gave compensatory time to employees on one of the six days following the Sunday on which they are required to work. It is this provision in the bill that the recommendation of the Postmaster General recommends changing.

The bill to regulate the hours of labor of clerks and carriers in post offices grew out of the unrest and discontent among the employees caused by the lack of method in enforcing the 48hour law. The mystery surrounding the whole proceeding, and the manner in which the case was made up and presented to the Court of Claims, upon which a decision was rendered which nullified the letter carriers' eight-hour law—the act of May 24, 1888—left a bad odor behind it, and the question of trickery and bad faith on the part of the administration officers who engineered the case up to court has been repeatedly made. So incensed were the employees over the breaking down of the eighthour law and the principle enunciated by the Government for regulating the hours of labor of the employees and the nonenforcement of the compensatory time provision and other petty annoyances, that the Postal Service suffered materially through lack of sympathy and cooperation between the officials and the rank and file of the men.

The present administration of the Post Office Department has up to this time commanded the admiration of the business world on account of the high grade of service it has given and is giving the public. The penurious, penny-wise economy ideas of the Hitchcock administration, whereby the service was curtailed in the hope of gaining a reputation for wiping out the postal deficit, has been done away with and prompt delivery and dispatch of mail has taken its place. The treatment accorded the employees up to this time has won back their confidence and cooperation, and as a result the Postal Service has benefited materially.

The Postmaster General, in his last annual report, has stated that for the first time in 30 years there is an actual surplus of receipts over expenditures for the fiscal year ending June 30, 1913, of \$3,841,906.78. The estimated revenue from the new parcel-post law, which has only been in effect six months of the fiscal year, reported by the Postmaster General, was approximately \$13,644,295.27. The burden of taking care of this new and additional service fell largely on the shoulders of the postal employees, and particularly on the clerks and service carriers. The business transacted during the holiday season, according to printed reports, was of such enormous volume as to tax the ability and energy of the officials and the rank and file of the working force. Every calamity howler in the country opposed to the Government ownership or control of public utilities was standing around anxiously waiting to be told that the parcel post collapsed under the crush of Christmas busi-But no, Mr. Chairman, at the back of the Postmaster General was an army of as loyal and faithful men as were ever banded together in these United States, and they met the situation unflinchingly and without hesitation, and by force of in-genuity and devotion to their work they came out victorious in the face of tremendous odds, and every package and every piece of mail was handled promptly and expeditiously, and the public was loud in praise of the service they received. I submit herewith a statement issued by the Postmaster General which bears out my contention:

OFFICE OF THE POSTMASTER GENERAL, Washington, January 1, 1914.

To the officers and employees of the Postal Service:

To the officers and employees of the Postal Service:

The splendid manner in which every employee of the Postal Service, in the department and in the field, acquitted himself in handling the enormous quantity of mail during the recent holiday season is not only a source of deep gratification to me, but a pride of every American citizen. Although the parcel post more than doubled the usual volume of Christmas mail, the task of handling this mall proved not so much a test of the capacity of the Postal Service as an opportunity for the employees to demonstrate their ability to meet all emergencies. The result is a substantial evidence of the energy, resourcefulness, efficiency, and loyalty of every employee, wherever his post of duty, from the highest to the most inconspicuous. This achievement assures me that all emergencies of the future will be promptly and effectively met.

Met. I extend to you my very best wishes for a happy and prosperous

A. S. BURLESON.

This tribute from the Postmaster General to the rank and file of his employees was the expression of a great administrative officer, who realized the loyalty and devotion of his men to him and the services in which they were engaged. not mere idle words, they should count for something in behalf of the men to whom they were directed. Such loyalty should be rewarded by fair, just, and equitable treatment and a keen appreciation of duty well done.

In all mechanical trades employees are paid double time for overtime or Sunday work, and if any change in the present hours of labor is contemplated I hope it will be in the direction of shorter hours and the enactment of a law that will insure one complete day of rest each week to these employees of the Government.

Mr. Chairman, I am pleased to note that the Committee on the Post Office and Post Roads has inserted a provision in the Post Office appropriation bill that will grant relief to postal employees who are injured or killed in the discharge of their duties who are not entitled to protection under the Federal compensation law. This is an onward step in the march of progress and is in keeping with the policy being pursued in a number of States of humanizing the law. Wise and humane changes are being made daily in the law of the land, and the old, obsolete common-law defenses are being superseded by paternal and progressive ideas. Our whole idea of human relations is constantly changing. The American people have relations is constantly changing. The American people have come to require a larger distribution of the perils of civilization and wider distribution of the benefits and the recognition of the rights of the humblest citizen to some share in every good thing we possess.

It is true that we are far behind many of the States in enacting much-needed progressive and beneficial legislation. It is true also that this body more than any other is sus-

ceptible to follow the pulse of public opinion in dealing with important problems. There is a great public demand from one end of this country to the other for the enactment of just and liberal compensation laws for the protection of injured employees, and, I trust, that the Members of the Sixty-third ployees, and, I trust, that the Members of the Sixty-third Congress will be afforded the opportunity of expressing themselves unequivocally on this question. There is a bill pending before the Committee on the Judiciary, H. R. 5899—known as the McGillicuddy bill—which provides compensation for employees of the United States suffering from injuries or occupions. pational diseases received or contracted in the course of their employment. I have examined this bill, and I believe that it is drawn on broad, liberal lines, and is in keeping with the spirit that dominates the American people throughout these United States.

The Federal compensation law, now on the statute books, is totally inadequate in regard to the compensation for injuries, as well as the number of employees to whom its benefits are restricted. It does not cover a single employee in the Postal Service, notwithstanding the fact that the last report of the Secretary of Commerce and Labor, dealing with the Federal compensation law, under date of February 27, 1912, shows that more than 2,300 of these employees were reported as having met with accidents during the three years that the report covers. This condition is wrong and should be remedied without delay. For the information of the Members of the House I will cite an instance that was brought to my attention recently: Mr. A. E. Rump, for 12 years a clerk in the St. Louis post office, has been confined to his bed for the past three years unable to move any part of his body except his hands and his While at his work in the St. Louis Union Station post office, in 1903, Mr. Rump was struck on the head by a large bundle of papers thrown from a car. He was knocked down and rendered unconscious, but his 170-pound constitution made light of the matter and apparently he suffered no ill effects. At the end of the year his sufferings from the effect of this accident began. He was treated for five years and continued to work in constant daily misery. For two years he went to and from his work on crutches; then he was placed in a plaster cast from his chin to his ankles, in which position he remained for 10 months. At the end of this period his joints were anchylosed and he is a helpless invalid.

This man is trying to eke out a living for himself and family by soliciting subscriptions for newspapers and maga-With only the freedom of his arms and fortified with zines. a stand-up chair built by a letter carrier, he has installed on either arm of his chair two telephones, and in this manner, together with the use of a typewriter, he is endeavoring to do business. It is a sad case, a very, very sad case. Yes, Mr. Chairman; it is a case that should receive consideration at the hands of this Government, yet it is only one of a number of others, none of which has been compensated for in any way. What a shame to throw helpless men on the charity of a cruel and unfeeling world. Let us hope that this condition will be remedied at an early date, as justice loudly demands it should.

This can be done by the enactment of the McGillicuddy bill into law.

Before concluding my remarks, Mr. Chairman, there is another subject that I wish to mention, one that, to my mind, affects the very stability of the civil-service law. There is a condition existing in the civil service with which I do not believe the American people are conversant, or there would be a public demand for a remedy. The employees in the Postal Service, and particularly the city and rural carriers, post-office clerks, and laborers, are paid only for the actual time they are employed. When overtaken by sickness or if they meet with an accident and become incapacitated for duty their pay ceases at once. It matters not if an accident was caused by the grossest negligence on the part of the Government, these employees have no redress for damages, not even for the loss of salary. They are laid off without pay until they are able to assume their official duties, and should the sickness or accident be of a nature to confine them for a period of more than 150 days they are notified to hand in their resignation, because a department rule provides that no employee will be excused for a longer period, no matter what the cause may be.

At no time during their official connection with the service do they receive more than enough to provide for the necessary wants of themselves and their families, and it is a very frugal and thrifty letter carrier who can save something for the proverbial rainy day. One thing is certain, and that is that no matter how saving he may be, if ill health or accident befalls him his little hoard soon melts away and he is plunged

into debt.

The very best men, the most devoted men, the men who wish to make it their life work, are the only men who continue in the Postal Service for a long number of years. It has been stated that the personnel of the Postal Service changes every seven years, and this will give an idea of the small percentage of those who do make it their life work. And now, Mr. Chairman, what is the reward for these men and women who give the best years of their lives to the public service? hard for me to say it, because I detest ingratitude, governmental or otherwise, these employees are forced to resign when they become superannuated, unceremoniously kicked out, and told that they are inefficient and can no longer do the work required of them—outlived their usefulness. It is one of the saddest incidents of our governmental life. Thrown out with the flotsam and jetsam of humanity who have no aim or object in life, because years of ardent labor have used up their energy and Yes, Mr. Chairman, like an obsolete piece of machinery or a broken piston rod, they are thrown on the scrap heap. What a terrible fate! And to think that this is the treatment accorded to our civil servants who have lived long, honorable, and exemplary lives. What a destiny for a faithful underpaid employee! Do the American people know of this condition? Have they the knowledge before them that their letter carrier whom they knew from childhood and whom they all loved and honored is treated in this manner? No, Mr. Chairman, a thousand times no. You and I and all of us here know too well that no red-blooded citizen in our district would stand by and permit such a condition to exist without entering a loud and emphatic protest.

And what are we going to do about it, might I ask? Are we to permit this shameful condition to continue longer without making at least some practical effort to remedy it? I hope not, Mr. Chairman, and I sincerely trust that the Committee on Reform in the Civil Service will take this question up at an early date and consider the several bills now pending before them in the hope of bringing before the House for consideration some measure that will bring about the necessary relief. [Applause.]

Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MOON. Mr. Chairman, I now yield 30 minutes to the gentleman from Tennessee [Mr. SIMS].

Mr. SIMS. Mr. Chairman, I wish to ask in advance to extend my remarks in the RECORD, as I may not read all that I have

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SIMS. Mr. Chairman, in order to relieve the Members of the House I promise not to refer to anything in the bill. [Laughter.] I shall address the House, or the committee, upon a matter of great public importance, and especially to all that section of the country lying north of the Potomac, east of the Mississippi, bounded by Canada and the Atlantic Ocean, known as the official classification territory, embracing, I think, 50 per cent of the entire railroad business of the country in volume and value, for which territory the common carriers are now asking a 5 per cent increase upon freight rates, which application is now pending before the Interstate Commerce Commission.

Ordinarily, it might not be proper to discuss in a public way and before the House the subject of increased freight rates asked for by carriers of official classification territory pending before the Interstate Commerce Commission for determination. Were it not for the unusual conditions surrounding this subject would I venture to discuss the same at this time and in this place, but because of that very singular situation it may not be deemed inappropriate to bring to public attention some phases of the efforts of the railroads to secure additional charges upon freight traffic.

When Congress by the original Cullom law of 1887 and by acts amendatory thereof and supplementary thereto created the Interstate Commerce Commission and clothed it with authority to hear and determine questions arising in connection with transportation, it was believed that there had been created a high, just, and competent tribunal that would hear and determine all such issues in a temperate and judicial manner, uninfluenced by any other than proper considerations, Certainly, this is the public view and the correct attitude the commission should always maintain before the country. But it is apparent that in this case the question of allowing or disallowing the carriers' application for increased transportation charges has passed from the domain of practical economics and has been directed into a public or political issue.

When these same carriers three years ago sought an increase in their charges they attempted to make a similar issue of their case which led Judge Prouty in his opinion in that case to say

it seems to be the popular impression that this is in some sense a political question which may properly be disposed of in accordance with the wishes of the majority.

This remark had reference to the fact that-

since the beginning of this proceeding great numbers of letters and petitions have been presented from individuals, organizations, and committees representing various interests, some urging that advances be sanctioned and others protesting against them.

Notwithstanding that admonition the bushes have been much more vigorously thrashed this time than was the case in support of the application for increased rates in 1910. No attempt was made to conceal the efforts to secure this sort of support nor to overcome opposition. The newspapers of the country were, wherever possible, induced to lend their powerful support to the railroads' cause, and they have succeeded in convincing a large part of the American people not only of the necessity for increased revenues by the carriers but that the same should be granted with little or no ceremony. Friendly jobbers, manufacturers, and material dealers, who sell to the carriers, have given their early adherence to the cause. It is of record that the Consolidation Coal Co., a large producer and shipper of coal in West Virginia and Kentucky, is much quoted as favoring the increase in rates "because the railroads need it," but the fact that this company is in reality a subsidiary of the Baltimore & Ohio Railroad Co. is not given equal prominence. Those who doubt this statement are referred to the report of the Interstate Commerce Commission to Congress of the investigation under the Tillman-Gillespie resolution, dated January 25, 1907. All manner of schemes have been worked to create public sentiment favorable to the increase of railroad freight rates. Many of the newspapers of the country have been misled into making

ridiculous statements concerning the alleged facts.

The literature of the publicity bureaus of the carriers were replete with wise observations from learned and disinterested writers upon economics tending to show the necessity for increased revenues by the railroads. The fact was concealed that sometimes these "disinterested" economists were in the railroad employ and were paid munificently to give these opinions. In the recent New Haven investigation it developed that a professor of the Harvard Law School drew \$833 per month from the New Haven Railroad for delivering lectures favorable to the railroads without telling his hearers that he was a paid employee. Likewise it was developed in that same hearing of immense sums paid to newspaper men for similar service, probably printing said professor's "lectures." This same professor proffered his aid to Gov. Foss, of Massachusetts, and assisted him in framing the public-utilities law of that State while on the pay roll of the New Haven Railroad. It is needless to say that since those disclosures there was an early vacancy in the chair of professor of transportation law in Harvard University formerly held by that professor. It is because of this unusual condition of affairs that the

House is now asked to listen to the question of increased

freight rates

The only object the railroads of this country could have had in conducting their campaign of publicity as they have is to overwhelm the Interstate Commerce Commission and compel it to grant their application regardless of its merits. Else why should there have been all this trouble, expense, and devious methods employed? Surely no one will have the temerity to say that the American people, or any considerable part of them, would for a moment withhold from the carriers what they could establish any claim to. The American people are now and always have been for fair play, for decency and justice. Even in the face of all the iniquitous wrongs of the past which they have suffered from railroads and their exploiters, the people of this country are more than willing that those wrongs shall not be held up against the carriers when they can prove that they are in need of public help.

The railroads first tried to gain sympathy by magnifying the public feeling against them. They have talked loud and long against "balting" and "reprisals" as though there never had been any wrongs to remedy or prevent. When faced with their crimes of the past they have declared that the regulative law, the very law they condemned, had done away with those offenses; yet if we turn to the last—twenty-seventh—report of the Interstate Commerce Commission, the advanced sheets of which were issued on December 15, 1913, we find a record of prosecutions of railroads for practices just as reprehensible as were any of the past, the only difference being that these prose-cutions are for willful violations of law clearly stated and frequently pointed out by courts in construing the statutes.

It has been the intention of the railroads to build such a

stone wall about the commission that, regardless of the facts that might be developed at the hearing made necessary by the act of Congress, that body would not dare to brave public opinion, albeit manufactured for the occasion, and deny the carriers' request for the privilege of additionally taxing the

American people.

The occasion for making this application was propitious, for it is said that many of the shipping public have begun to lose confidence in the commission itself. Some persons contend that recent decisions of that body have indicated a slackening of zeal for the law and its strict and just enforcement. alleged fact no doubt is only apparent and does not betoken a backward tendency upon the part of the commission, but, as some people say, it may also be that the commission, overwhelmed by its responsibilities and fearing the results of the attempts to enforce the regulative law as clearly intended by Congress, has lost courage. Whatever the cause may be of this apparent change in the attitude of some members of the com-Whatever the cause may be of this mission, or however rightly or wrongly shippers may interpret the signs of the times, the fact remains that such sentiments abound in all parts of the country, and the carriers were not unmindful of this fact when they planned their campaign for overwhelming the commission with their "made-to-order public sentiment." As an evidence of this sentiment against the commission, the North Carolina Legislature, as appears from the newspapers, in a recently called special session to consider the freight-rate situation, which has grown so utterly intolerable as to arouse the whole State—and it said in this connection that the same situation prevails over all the South with respect to transportation charges-declared that shippers of that State had appealed in vain to the Federal commission for relief, and expressed their solemn views to be that the commerce act was not being interpreted and enforced in the spirit of its enactment by Congress, calling upon Congress to investigate the subject, in order to determine if such be the fact.

Congress has created the commission, has clothed it with large powers, and in broad and general language directed that agency to see that there be no injustices practiced by the carriers, either in rates, fares, or services. By a recent amendment the commission was empowered to suspend and pass upon all increases in rates before permitting the same to become ef-fective, and under that authority the commission is now hearing this advanced-rate case. Having clothed its agent with the proper power and authority, it is not the duty or province of the Congress to prejudge its work or to interfere in any manner with its discretion, nor do I propose anything looking to such action; but Congress should not be deaf, dumb, and blind to a condition that is abroad, that may affect, as it threatens to affect, the very integrity of its agency in the commission. The commission whose judgment it is sought to arrest, and by "ways that are dark" another judgment sought to be substituted therefor, should not be left to struggle alone in the cause of the American people. It is a very vital concern of Congress to know what are the machinations that threaten such results. It is the business of the Congress to know that there is not even a partial miscarriage of justice in the advanced-rate case. If all this campaign of a political or semipolitical nature is for the purpose of unduly influencing the commission, by which the carriers hope to obtain something to which they are not legitimately entitled and the accomplishment of which they have sought through means and by ways and tricks that are not proper, then it becomes a matter in which Congress is most deeply and directly concerned. At least it should be made known that we are on the watchtowers keeping an eye on this affair and ready to take a hand should it appear that there is likely to be other than just treatment of this agency of Congress as represented in its commission.

It is not my purpose to discuss the pertinency or the value of evidence offered to the commission in support of the carriers' application for increased revenues through higher rates. A cursory examination, however, of the record made in that case does not disclose sufficient grounds upon which to warrant the approval of the commission. What the views of the members of the commission may be respecting this record, or what the ultimate combined judgment of that body may be respecting the evidence now adduced or which may be offered before the conclusion of the case, it is not my purpose to deal with

Under the law it is made obligatory upon the carriers to show by full and satisfactory evidence that an increase in the charges which they propose is warranted. It does not mean that an increase upon all the traffic, as it is proposed horizontally to make, would justify this increase in rates, even though it should appear that the carriers needed greater gross revenues. It is possible, and it will probably be shown before the conclusion of this case, that upon much of the traffic the carriers are already earning a margin of profit which compared with the cost of rendering the service is grossly out of proportion to what they should be entitled to earn. To tax this traffic with additional revenue, even though that increase might be no greater than 5 per cent, would be a gross injustice to that traffic which is already bearing an undue proportion of the burdens of transportation. Nor does it follow that even though the carriers' situation might be such that they would require additional revenues with which to conduct their business, if they propose to conduct it in the future as they have in the past, that an authorization of an increase in these rates would be warranted. It seems strange, indeed, to a Nation of intelligent people, such as the American people are, that these carriers with their greatly increased revenues, amounting to something like \$200,000,000 per year more than they were when the commission previously denied their application, that they can not conduct their business so as to reap a fair return upon the same. It would seem, in view of this fact alone, that an increase of 5 per cent would not make any material difference in their situation, for if their business is so conducted that their expenses are fast outrunning their revenues, 5 per cent would be a very small palliative and would afford no real relief.

Up to this time the carriers have not attempted to show anything more than gross earnings and gross expenditures. They have not attempted to segregate their passenger from their freight business to show what measure of profit or loss there may be in these two branches of their business. Neither have they attempted to segregate the raw-commodity heavy traffic from the high-class traffic and show what measure of profit there is in these two respective lines of traffic. If it be true, as commodity shippers have insisted before the commission, not only in this case but in numerous other cases, that low-grade commodities are already taxed unduly by the transportation lines, then it must follow that there is much of the traffic that is not properly taxed. If any increases are to be allowed, there should, it seems in all fairness and common sense, be a readjustment of the charges so that the increased burden, should any be found necessary, would be laid upon that class of traffic which apparently is not sustaining its fair share of expense of maintaining the transportation lines, but which in the very nature of things could best afford to sustain an increased charge.

In dealing with all these several questions the commission should not be hurried into a conclusion. The matter of increasing transportation rates is similar to that of increasing taxation rates by the Government. In fact, freight rates have been likened unto taxes by the Government. The effect is the same, since they both involve moneys to be paid. When a freight rate, like a tax rate, is once raised, it is next to impossible to secure its reduction. If, now, the Interstate Commerce Commission is to anthonize an increase in correction charges, perhaps no living to authorize an increase in carrying charges, perhaps no living man to-day will live long enough to see those rates so authorized reduced. Certainly, this will be true if the carriers continue to absorb in operating expenses, as they say they have, the rapidly multiplying and increasing returns which come to their business from the development of the country and the expansion of its commerce.

As I have just said, I have brought this to the attention of the House at this time that not only the Members but the country generally might know the character of the campaign which has been waged by the carriers in anticipation of this application, and also of the publicity and other means for giving to the public the railroad side of the controversy. There is no harm to come from a proper presentation of this case, though it may be considered bad ethics to try a case before the country through the newspapers, pamphlets, and otherwise rather than before the commission. It is not fair, however, to the commission who must determine this question, and determine it upon its merits, to have the public mind prejudiced in favor of the railroads by a distortion of facts, by the half truths, and by other subtle suggestions which do not go to the merits of the The commission, if it is to perform the great controversy. work designed for it by Congress, must at all times have the public confidence and enjoy the public good will, else its decisions will be treated with derision, its mandates violated, and the law set at naught. This Government has entered upon the

policy of regulation as a corrective for the great evils of corporations, particularly the transportation lines. That policy has not yet been fully developed, nor has it been brought to the full fruition of the hopes and expectations of those who planned this scheme. It must needs have time and a fair field within which to work out the plans under which regulation must succeed, if it can succeed at all. It is not fair, therefore, that in any such momentous event as this now pending that the public mind should be prepared to denounce the commission, should that body not find in accordance with the popular notion. If, for example, the country has been made to believe that national success and prosperity depend upon the success of the railroads, and that success can only be had by giving them the increased revenue which they now demand through increased rates, and if the commission should refuse such increase of rates, the country would be disposed to blame the commission and the entering wedge would have been driven into the popular belief in the efficacy of regulation.

Mr. LEVY. Will my colleague yield? Mr. SIMS. I will, for a question.

Mr. LEVY. In the last case of an application for an increase of rates, when the commission adjourned, on the 15th of December, all the evidence was in; they adjourned to give the opposition to the 15th of January. Then the commission will require a brief that will take six weeks longer, and then they will probably take two months for decision. I understand that sometimes the commission takes two years. Does not my colleague admit that there has been an enormous increase in the wages during the last four or five years and no increase in the rates, and that the roads are carrying the parcel-post matter for almost nothing? Does not the gentleman admit that we need 100,000 miles more railroads in the country? Does he not think that carrying a ton 6 miles for a postage stamp is a small rate?

Mr. SIMS. Well, Mr. Chairman, I am dealing with the subject consecutively. The question the gentleman asks would take too long to answer.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. SIMS. Mr. Chairman, I would like to have 10 minutes more.

Mr. FINLEY. Mr. Chairman, for the chairman of the committee, I will yield to the gentleman from Tennessee 10 minutes more.

Mr. Chairman, I now give a summary of the results of 28 principal railroads operating in eastern territory requesting increased rates, taken from annual reports to the Interstate Commerce Commission and to stockholders for years ending June 30, 1908, 1909, 1910, 1911, 1912, and 1913.

The following are the 28 railroads referred to above. namely: Philadelphia & Reading Railway Co.; Central Railroad of New Jersey; Lehigh Valley Railroad Co.; Erie Railroad Co.; New York, Susquehanna & Western Railroad; New York, Ontario & Western Railway Co.; Delaware, Lackawanna & Western Railroad; Delaware & Hudson Co.; Buffalo, Rochester & Pittsburgh Railway; Bessemer & Lake Erie Railroad Co.; Virginian Railway Co.; Chesapeake & Ohio Railway Co.; Hocking Valley Railway Co.; Baltimore & Ohio Railroad Co.; Western Maryland Railway Co.; New York Central & Hudson River Railroad Co.; Lake Shore & Michigan Southern Railway Co.; Michigan Central Railroad Co.; Pittsburgh & Lake Erie Railroad Co.; Cleveland, Cincinnati, Chicago & St. Louis Railway; Pennsylvania Railroad Co.; Pennsylvania Railroad Co.; Pittsburgh, Cincinnati, Chicago & St. Louis Railway; Vandalia Railroad Co.; Northern Central Railway Co.; Philadelphia, Baltimore & Washington Railroad Co.; West Jersey & Seashore Railroad Co.; and Norfolk & Western Railway Co.

Summary of results of the 28 principal railroads.

The only increases in stock issues by cash payments in the 28 railroads during the period from June 30, 1907, to June 30, 1913, have been the following: Lehigh Valley Railroad Co., \$20,000,000 issued to retire bonds; Pennsylvania Railroad, \$139,-270,000 issued to retire bonds; Norfolk & Western Railway Co., \$34,130,000 issued to retire bonds.

The Pennsylvania Co. issued a \$20,000,000 stock dividend and the Pittsburgh & Lake Erie Railroad issued a \$5,000,000 stock dividend.

COVERING EARNINGS OF THE SAID 28 RAILROADS IN TRUNK-LINE TERRITORY.

Attention is called particularly to the fact that the net earnings for stockholders for the year ending June 30, 1913, was the largest in the history of these roads, combining the results.

It is utterly impossible to tell what reports were used by the railroads in compiling the results in the combined statements submitted by them November 24 and 25, 1913. This is due to the carriers recasting their figures for the purpose of bolstering up their case.

In selecting the 28 carriers, the lines operating in New England, as well as the Long Island Railroad, were not considered, as increase in the rates of these lines can be made or denied regardless of any other carriers. The eight railroads being operated under receiverships have been also eliminated. The balance of the railroads in this territory are either small lines operating in a limited territory or short lines running north and south between the Ohio River and the Great Lakes, as increase to these lines can be granted or denied without consideration of the principal trunk lines.

The combined results of the eight main roads of the Pennsylvania system are within \$170,000 of the results of 1910. The net earnings to the Pennsylvania stockholders for 1912 were 8.78; 1913, 9.35. This does not consider the equity in any earnings which were not taken by this railroad in dividends from the underlying roads. The net results of the New York Central system's five main roads were within \$1,000,000 of 1910. The results of 1913 could have been materially increased on this road if they had taken down as large a dividend from the Pittsburgh & Lake Erie Railroad as they did in 1910. The balance of the railroads had a greater net income in 1913 than they did in 1910, with the exception of the following: Western Maryland, Chesapeake & Ohio, Baltimore & Ohio, New York, Susquehanna & Western, and New York, Ontario & Western.

In connection with the matter of variable operating expenses, the following extract is taken from the Interstate Commerce Commission's twenty-seventh annual report, filed December 15 last:

A matter of great importance and growing recognition in nearly all lines of business is the proper accounting for depreciation. The commission's classification of operating expenses for steam roads, issued in 1907, provided accounts for depreciation of the equipment of such carriers. The amount of such depreciation, measured in money value, was left to the determination of the carriers, the rules, however, planly requiring that such determined amount should represent the actual depreciation as nearly as it can be estimated. This latitude has resulted in widely different practices, the rates used by different carriers varying from nething up to 7 per cent or more per annum upon equipment operated under substantially similar conditions. It seems evident that

this variance is in some cases due to the differences in policy rather than differences in actual depreciation or in the estimates thereof. The effect upon the accounts may be best understood from an illustration: Assuming that a raliway company has equipment valued at \$25,000,000 and that the correct average rate of depreciation is 4 per cent, the resulting charge to operating expenses would be \$1,000,000 for the year. The rallway company elects to charge only 1 per cent, or \$250,000. The income for the year is thereby inflated \$750,000; the asset in equipment is overstated by a like amount, and a fictitious surplus is built up. On the other hand, a charge of 7 per cent would result in a corresponding overstatement of operating expenses, understatement of income, and writing down as assets, creating what is known as a "secret reserve." That the accounts of many rallroads are manipulated, with the results above indicated, can not be doubted. This matter is receiving the attention of the commission, and steps will be taken to compel the carriers that are delinquent in this respect to establish and use rates of depreciation which will conform to the requirements.

The results shown as net to stockholders is after paying all interest charges on borrowed funds of all kinds, but does not cover amounts set aside as appropriations to sinking funds, and so forth; as payments to reduce bonded indebtedness, it is the practice of the Pennsylvania system and the Pittsburgh & Lake Erie Railroad Co. to so state their results, which are shown on the detail sheets in italic figures.

Mr. Chairman, the Interstate Commerce Commission has made up a list of about 78 questions to the railroads asking the 5 per cent increase on freight rates. I intended to set them out in full in my remarks, in order that the pertinency of these inquiries may be seen, in order to arrive at any just determination of the proper course to be pursued by the commission in arriving at its conclusions, but I find it will take up too much space in the RECORD; and as a substitute I now read a list of pertinent inquiries for those railroads seeking the 5 per cent increase to answer, in order that we may be more fully informed of the real conditions with which these roads are confronted.

of the real conditions with which these roads are confronted.

First. Have the railroads in trunk-line territory during the last 10 years increased their capitalization? If so, what amount and for what purpose has it been spent? If spent in improving the property devoted to railroad purposes, has it been spent for the purpose of improving the property as a whole, considering its past freight and passenger business, or has it been devoted to the building of expensive non-revenue-producing terminals?

A. Have the operation of these passenger terminals been more expensive? If so, to what amount?

B. Have the railroads invested their funds in other nonproducing properties (coal lands or other real estate ventures)?

C. Have the railroads invested their funds in stocks, bonds, or advances to other railroads? Have any of these investments been made for the purpose of controlling traffic or policies of these lines?

D. Have the investments made by the railroads in other carriers returned them a sum in per cent equal to the payments made by these carriers to their stockholders during the same periods?

E. Submit a statement showing what returns, if any, have been received.

received.

F. Have the railroads leased other carriers during the last 10 years at fixed rentals that have been burdensome? Have these leases been approved by the State commissions and courts after investigation?

G. Have the railroads invested their funds in manufacturing industries? If so, to what extent?

H. Have there been any railroads that have sold their holdings in coal properties, so as to return to their treasury their investments in cash?

H. Have there been any railroads that have sold their holdings in coal properties, so as to return to their treasury their investments in cash?

I. Have there been any carriers that have carried out the intention of the commodities clause before or after the Supreme Court decisions of May 3, 1999 (213 U. S., 366), and April 3, 1911 (220 U. S., 257)?

Second. What proportion of the claimed increases in operating expenses have been due to the following causes:

A. Increased train schedules, both in number and speed, between New York City, Chicago, and St. Louis.

B. Is there an economic waste in the present schedule of the Pennsylvania, New York Central, and Baltimore & Ohio in their operation between New York, Chicago, and St. Louis?

C. Does the present passenger schedule on these roads tend to seriously interfere with their high-class freight traffic?

D. Have these carriers lost a considerable portion of their high-class freight business to the differential lines? If so, to what extent?

E. Have the operating ratios of the big three—Pennsylvania, New York Central, and Baltimore & Ohio—increased to a larger percentage than the ratios of the little three—Philadelphia & Reading, Jersey Central, Lehigh Valley, and Delaware, Lackwamna & Western?

F. Do the operating rates of large roads show economy in operation over smaller roads doing a trunk-line business in connection with other connecting lines?

G. Is there a tendency of shippers to favor the differential lines on account of their ability to give prompter and better service, both in operation and office efficiency?

Third. Have increases been made by the trunk lines in the freight rates on coal during the last 10 years? What increases in efficiency have been secured by the use of larger cars and locomotives in this class of freight?

Fourth. To what extent have the railroads attempted to control the local coal dealers by renting to them terminal facilities, and what restrictions are embodied in these leases?

A. Have terminal docks or coal plers been leased

fullest capacity?

A. Are these facilities used by middlemen and commission brokers for the purpose of storing shipments, enabling them to control the market prices and supply of necessities?

B. To what extent are terminal properties or cars used for the storage of shipments to or from foreign countries, in bond or otherwise, awaiting steamers for loading?

C. Report as to the desirability of increasing the present demurrage charge to \$2 and the imposing of additional charges for track storage at all points to relieve the present inefficiency in terminal operations? Seventh. Have the carriers conformed to the prescribed accounting rules of the commission?

A. What provisions have been made to cover expenditures from surplus funds: First, spent on permanent improvement of properties leased; second, advanced to companies controlled?

Eighth, Report to the commission any case where the carriers have failed to take advantage of increased rates when allowed by the commission after investigation.

Ninth, What effect, if any, has the constant blabbing of railroad executives as to their inability to borrow money had on the investing public; has this discouraged investments in railroad securities?

Detailed statement for the 28 railroads for the verus 1903-1013

Detailed statement for the 28 railroads for the years 1908-1913.

Mr. FINLEY. Mr. Chairman, I will ask the gentleman from

Mr. FINLEY. Mr. Chairman, I will ask the gentleman from Michigan to use some of his time.

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield one hour to the gentleman from Washington [Mr. Humphery]. He does not expect to use but 20 minutes. After that I will yield one hour to a member of the committee, and he does not expect to use but 20 minutes. I give this notice so that the other side may be prepared.

Mr. HUMPHREY of Washington. Mr. Chairman, I have been a Member of this House for something over a decade, and the other day I witnessed something new. For the first time since I have been a Member of the House the leader of either party made a political speech and refused to be interrupted when Members desired to propound questions. The distinguished gentleman from Alabama [Mr. Underwood] made a speech replying to some remarks that I had made and that some of the other Members had made, but when he was asked to permit questions he refused to be interrupted. It was not because the distinguished leader of the Democratic side of this House was not posted, because no man in this House knows more about the tariff question than does he. It was not because he did not wish to be courteous, because he is a very courteous gentle-man. The reason he refused to be interrupted was because of wisdom. I had been talking in regard to the closing of the steel mills throughout the country, and he knew that I stated the facts and that, if permitted, I would ask him questions he dare not answer. I do not, however, care to severely criticize the gentleman [Mr. Underwood]. I have no doubt that had he had his way about the present tariff law it would have been far different from relect it is different from what it is.

I do not care what motive is assigned to me by gentlemen on that side of the House for remarks that I may make in regard to these closed mills; but, so far as they dispute the correctness of the facts, I propose whenever I have an opportunity to show, if I can, that I am correct. I do not believe that I will be accused by Members of this House, when speaking upon the floor, of making statements recklessly; yet that insinuation is practically the only answer that was made to the figures I produced the other day. Some complaint was made upon that side of the House that I used Republican newspapers. As a matter of fact, I used only a trade paper. In order, no doubt, to show whether or not my statements were correct, the New York Times of yesterday contains a large number of telegrams from the owners of mills that I had mentioned that were closed in answer to one that they sent out, asking whether or not my statements were true. It will hardly be contended that the New York Times is a Republican newspaper. If I am correctly informed, it supported Mr. Wilson, and it is now supporting the administration. The headlines over the articles, which occupy something like half a page, are: "Steel men affirm HUMPHREY's figures."

I have looked through the figures, as they give them in detail, and if I have them correctly, out of 53 stacks reported closed in Pennsylvania they received telegraphic replies from 32, and every one of them say that my figures are correct. Out of a total of 123 they have received and published 45 replies, and every one of them say that my figures are correct. So far they have been unable to discover a single mistake which I made. I repeat again to my friends on the other side what I said the other day, and again challenge them now or hereafter to dispute the correctness of the figures I have given. I have not taken them from partisan papers, but if I had that is not material. Are they true, is the only important fact. Let any gentleman in this House show they are wrong if he can. As to why these mills closed is a question, of course, about which we differ, but I intended that the fact that they are closed no man shall dispute. This article in the New York Times, I may say, is a fair one. I have no criticism to make of it, although they have made one

or two mistakes in their statements owing, undoubtedly, to the lack of technical knowledge of the steel business. I want now to read a few quotations from the article:

Inquiry yesterday at the local offices of steel and iron companies and answers to telegrams sent by the Times to the points named in Congressman HUMPHREY's speech in the House on Tuesday, in which he said that 123 plg iron stacks, with an annual capacity of nearly 13,000,000 tons, had been blown out since March 1, indicated that his figures were substantially correct when made up last week, but that there had been some signs of improvement since then. As an instance, the ingot production of the United States Steel Corporation has increased 12 per cent since January 1.

In answer to the statement that there has been some improvements, I wish to quote from a telegram which I received yesterday from Cleveland from the Daily Iron Trade, the paper which furnished me the figures I used before, in which the New York Times and my Democratic friends have not been able to discover a single error. That dispatch reads as follows:

CLEVELAND, OHIO, January 15, 1914.

Congressman William E. Humphrey, Washington, D. C.:

Steel situation continues to grow worse. Connellsville, Pa., district coke workers' wages are being reduced 10 per cent, and 2,100 coke ovens closed down this week for indefinite period.

DATLY IRON TRADE.

I put that statement from a trade paper against their statement that things are improving. They say further:

Some points were made, however, that changed the interpretation put on the figures by Mr. Humphury to a certain extent. One was that the decline did not date from March, when the Democratic administration came in, but began in June and was not marked until November and December. This is shown by the actual record of production, as compiled by The Iron Age. The figures, in gross tons, are as follows:

January	2, 795, 331
February	2, 586, 337
March	2 762 562
April	9 759 764
May	2, 822, 217
June	2, 628, 565
Tuly	
JulyAugust	2, 560, 646
August	
September	2, 505, 927
October	2, 546, 261
November	2, 233, 123
December	1 082 607

I have no contradiction to make of that statement. It is true that the marked depression commenced about the time the tariff law went into effect; but I was going back a year. I went back a year because the figures were furnished to me in that way. I have no dispute if this Democratic paper insists that this depression had come on within the last three months, since we have had the new tariff law on the statute books. I think the figures they give in that particular are correct. Further down there is this which I wish to quote, and here is the one mis-take I find in the article, except as to matters of opinion, and I have no disposition to quarrel with them about matters of

The figures cited by Mr. Humpher also ignored the fact that since March new stacks, estimated to aggregate 60 or 70, had been blown in and no allowance was made for these as an offset against the 123 said to have been blown out.

The New York Times is somewhat muddled in that statement. In 1913 there were only four new blast furnaces constructed. They have a combined capacity of about 550,000 tons of pig iron annually. These four are the only ones that went into blast last year. There were two of these furnaces for the Pittsburgh Steel Co. at Monesson, Pa.; one for the Youngstown Steel & Tube Co. at Youngstown, Ohio; and one for the Oriskany Iron & Ore Corporation in Reusens, Va. These facts are taken from the annual number of the Iron Trade Review for January 1, 1914.

Now, without attempting to explain just what the Times did mean by the statement that I failed to include the 60 or 70 blasts they mentioned, it seems likely they have confused blast furnaces with open-hearth steel furnaces. There were 62 of the latter completed last year. But that is an entirely different proposition from the stacks I mentioned. I was speaking of blast furnaces that make pig iron, and they probably were talking about open-hearth furnaces that make steel. Outside of this error, which was undoubtedly intentional, I think the article in the Times is substantially and entirely fair.

Now, I want to read from this article in the Times once more. The other day, when I was talking, my distinguished friend from Georgia [Mr. Hardwick] said that the difficulty at this time was that we were still suffering from the calamity and hard times that had been inherited from the Republican administration. Now, the Times quotes from some gentleman, whose name it does not give, to show that the prospects in the steel business were better. Here is what he says about it, and I wish my friend from Georgia was here to hear it. He seems to think we inherited prosperity, not calamity, from the last Republican administration. He says:

I note that Mr. HUMPHREY goes back to March 1 to choose a date for the beginning of the depression. The blowing out of furnaces was made to begin then. It might as well have been November 1 as March 1, for the decline of iron and steel activity came suddenly toward the close of October, although the groundwork for it, in the shape of steadily declining orders, was being built in several months preceding.

OLD ORDERS HELPED.

Throughout the greater part of last year the steel companies were, after a manner of speaking, burning the backlog left from the previous year. I mean that the great accumulation of orders which carried over into 1913 from 1912 kept the companies busy up to nearly 90 per cent of capacity until winter. But new orders fell away steadily all the time. The result could not be anything else than it was. When specifications ceased to come against old orders, a slump of furnace and mill work occurred. The slump was the worst that I have ever seen in my experience in the steel business. Furnaces by the score had to be blown out because there was not anything for them to do, and thousands of men were let go for the same reason.

Now, I commend that to my Democratic friends, who have been saying that the conditions are inherited from the Republican administration. It shows that what little prosperity we did have in 1913, in the steel mills, at least, was from orders which were taken in 1912. As I pointed out the other day, the

which were taken in 1912. As I pointed out the other day, the United States Steel Corporation on the 1st day of January, 1913, had orders for 7,852,883 tons of steel. On January 1, 1914,

they had orders for only 4,250,000 tons. Orders given in the Republican year have so far largely kept the mills running in the Democratic year. I want to read one or two of the dispatches to the Times in regard to the statement I made in reference to the closing of these 123 mills, representing 38 per cent of the entire steel production of the country. I have here a copy of one of the telegrams sent to me this morning from the Columbus Iron & Steel Co., of Columbus, Ohio. Here is the dispatch that the Times sent to that company:

NEW YORK, N. Y., January 13, 1914.

THE COLUMBUS IRON & STEEL CO :

Asserting that 1,000,000 workmen are idle in the country, Representative Humpher in the House Tuesday said your company had blown out one stack on March 1, 1913. Will you kindly wire early Wednesday evening brief message, press collect, stating these facts: First, is Humpher's assertion true? Second, how many men have you laid off since March, 1513? Third, how many have you reemployed? Fourth, what is prospect of employing more men during 1914?

NEW YORK TIMES.

Now, here is their reply to that dispatch:

COLUMBUS, OHIO, January 14, 1914.

NEW YORK TIMES, New York, N. Y .:

Replying to your telegram January 13. One stack blown out January, 1914, instead of March 1, 1913. No men laid off since March. None reemployed. Prospects for employing more men during present year very poor, indeed.

THE COLUMBUS IRON & STEEL CO.

I read now some of the other replies to the same dispatch:

[Special to the New York Times.]

PITTSBURG, January 14.

We have four idle blast furnaces. We have laid off about 30 per cent of our men since March 1, 1913. As yet we have reemployed none. We hope conditions will permit us to employ more men during 1914.

JONES & LAUGHLIN STEEL CO.

I call the attention of the House to that particular dispatch because the distinguished leader upon that side of the House [Mr. Underwood], when talking the other day, inserted a newspaper clipping to the effect that there had been a large number of men reemployed in Pittsburgh, and among the companies mentioned that reemployed men was this company, the Jones & Laughlin Steel Co. The dispatch that I have just read shows that at least to that extent that dispatch was not correct. Then I read this one from Cleveland:

M. A. HANNA & CO.

[Special to the New York Times.]

CLEVELAND, OHIO, January 14.

Humphrey's assertion in regard to the furnaces we represent as agents is true, but we have not in this office the detail of the number of men laid off or reemployed. There is a decided probability that more men will have to be laid off at an early date.

M. A. Hanna & Co., Agents.

Then, I read this one from Chicago because my distinguished friend from Illinois [Mr. Fowler] asked me the other day to quote or to make some statement in regard to the condition in Chicago in the steel industry:

IROQUOIS IRON CO.

[Special to the New York Times.]

SOUTH CHICAGO, January 14.

We do not know how many workmen in this country are idle at the present time. This company was operating three furnaces on March 1, 1913, and employing 620 men. At present we are operating two furnaces and employing 421 men. The employment of additional men will depend entirely upon an improvement in the consumption of merchant pig from

IROQUOIS IRON Co.

Then, I want to read another one from Chicago. Here it is: INLAND STEEL CO.

[Special to the New York Times.]

EAST CHICAGO, January 14.

We had one stack out for repairs, but it is in blast again. We hid off about 1,000 men, some of whom were on a new kind of work, which is completed. Our regular operating departments are running about 75 per cent of capacity. If railroad buying should be resumed, we think full employment could be given through 1914.

INLAND STEEL CO.

Now, I will read one from the South:

CHATTANOOGA IRON & STEEL CORPORATION.

[Special to the New York Times.]

Our furnace has been shut down since July 1. We laid off 1,200 men employed at the furnace and the coal and ore mines. We have thus far not reemployed any, and there are no prospects for starting up during 1914, unless market conditions improve. In our opinion, the present depression is due to uncertainty caused by tariff legislation and threatened Government monopoly to regulate and control all industrial operations, which plan, if pursued, must inevitably result in a gigantic governmental trust that will eventually throttle all business competition between corporations, and leave no opportunity or incentive for individual endeavor.

C. E. BUEK, President.

Now, I will read one nearer home, and then I will put the rest of the list in the RECORD. This is from Sparrows Point, Md. I

MARYLAND STEEL CO. [Special to the New York Times.]

SPARROWS POINT, MD., January 14.

One blast furnace has been blown out and two furnaces banked since December 15, 1913. The blast furnaces and steel works are completely shut down for the first time in 17 years. The reason is the want of orders for steel rails. We intend to resume just as soon as we can secure orders for sufficient tonnage. About 1,500 men are laid off until then. The prospect is indefinite and not encouraging.

MARYLAND STEEL CO.

In conclusion, I desire to call the attention of the distinguished Secretary of Commerce and of the distinguished Secretary of Labor to the fact that they no longer have to look for the evidence. These "guilty wretches" have come up and an-nounced over their own signatures that they have closed down these mills. They have admitted the crime. Now let the execu-

tions proceed.

Before I sit down I want to mention but one other matter. The other day, when I was talking, my distinguished friend from Georgia [Mr. Hardwick] said that he knew something about the lumber business in the South, and intimated and, in fact, stated that the conditions in the lumber business there were very good. I am very glad the gentleman comes in just at this moment. I do not know anything about the conditions of the lumber business in the South, and what I read is simply a newspaper clipping. It is taken from the Herald of this city, of January 15, and the transaction that I am going to read about took place at the very time that my distinguished friend from Georgia was making his speech. Here is the dispatch:

[Washington Herald, Jan. 15, 1914.]

BIG LUMBER COMPANY FAILS—JUDGE HEARS PETITION OF FLORIDA CORPORATION.

TALLAHASSEE, FLA., January 14, 1914.

A petition was filed with Federal Judge Sheppard to-day by the Keyser-Muldon Co., of Pensacola, asking to be adjudged bankrupt. Liabilities totaled \$2,700,000, with assets aggregating \$1,700,000.

The general demoralization of the lumber business is given as the cause of the failure.

Again, just upon the general proposition, I read another dispatch from the Washington Herald of this morning:

SALARIES ARE CUT DOWN-WESTINGHOUSE EMPLOYEES FEEL EFFECTS OF RETRENCHMENT.

PITTSBURGH, PA., January 15, 1914.

Two thousand employees of the Westinghouse Electric Co. received notice to-day that their pay had been reduced 16% per cent.

This order, due to retrenchment, affects office men, officials, and all other than those employed in the shops on a piecework schedule.

Mr. SELDOMRIDGE. Mr. Chairman, will the gentleman

yield to me for a question?
The CHAIRMAN. Does the gentleman yield?
Mr. HUMPHREY of Washington. I yield; certainly.
Mr. SELDOMRIDGE. I would like to know if the gentleman has seen the report in the paper from Pensacola, Fla., to the effect that the closing down of the bank there was due to the failure of certain dealers in London to protect drafts that had been made upon them by this lumber company?
Mr. HUMPHREY of Washington. No; I know no

No; I know nothing about it.

Mr. SELDOMRIDGE. I think that was the cause of the failure.

The CHAIRMAN. The Chair understands that the gentleman from Washington wanted to be advised when he had consumed 20 minutes

Mr. HUMPHREY of Washington. Have I consumed that much?

The CHAIRMAN. That much has been consumed.
Mr. HARDWICK. Mr. Chairman, will the gentleman yield?
Mr. HUMPHREY of Washington. I will yield to the gentleman.

Mr. HARDWICK. I made a statement the other day, Mr. Chairman, in reference to the lumber interests in Georgia. If the gentleman from Washington will examine the RECORD, he will find it. But I understood the gentleman from Washington to say that there was no reason why the tariff should affect the lumber industry in the South, because we were a thousand miles or more removed from the Canadian border and had a freight rate which was a thorough protection against any competition of that kind. Now, if that be true, and some lumber concern has failed in Florida, how does that prove that the tariff has anything to do with it?
Mr. HUMPHREY of Washington.

I shall be very glad to answer the gentleman, although it will take a minute or two to do it.

Mr. HARDWICK. Yes; I would like the gentleman to answer that.

Mr. HUMPHREY of Washington. I will take great pleasure in answering that question. The answer to it is that whenever you have a tariff law such as you have now you stop production, as I said yesterday, and people stop buying. You take it to-day in the United States as compared with a year ago, and building has decreased over 30 per cent. If you will go back to your star Democratic year of 1896 and compare the figures of that year with 1912, take the statistics furnished by the Government, and you will discover that not only did the people at that time not buy half as much lumber, but they did not buy half as many clothes. Per capita they did not consume half as much bread. Per capita they did not consume one-half as much meat. Per capita they did not consume one-half as much of any of the necessaries of life. That is the reason why, when you have a Democratic free-trade tariff law upon the statute books you have panic and depression. People are out of work. You stop consumption. Men lose their wages. They are idle, and they do not buy either at home or abroad. That is the answer to the gentleman's question.

Mr. HARDWICK. Will the gentleman let me ask him one

more question, and then I will stop-or will it bother the gentle-

Mr. HUMPHREY of Washington. No; I am not going to follow the rule of the distinguished leader the other day, and refuse to answer questions. I do not think I am in as pre-

carious a condition as he was.

Mr. HARDWICK. I always yield to the gentleman. Does the gentleman still complain that the steel industry is languishing, or has he concluded his weepings along that line? I did not hear the first part of the gentleman's remarks. That is the

Mr. HUMPHREY of Washington. I will have to ask the gentleman to read the Record, because I have occupied more time now than I should, most of it upon that proposition.

Mr. HARDWICK. All right. I will ask this question, then: Does not the gentleman know that the railroads of this country consume probably 60 per cent of the steel men's output, and that their condition, which is in no way caused and could not possibly be caused by a Democratic tariff or any other sort of a tariff or by Democratic legislation, that their condition grows tariff, or by Democratic legislation—that their condition grows out of their overcapitalization and their inability to earn the returns on largely watered stocks and bonds, and is the real reason why the steel people have not got the orders they had

Mr. HUMPHREY of Washington. The answer to that is just the same as it has always been under a Democratic administration, that the railroads can not build. The people have no confidence. Business all over the country is depressed. The railroads have no tonnage. They can not borrow the money with

which to build or improve.

Mr. HARDWICK. Does the gentleman blame the tariff law

Mr. HUMPHREY of Washington. I will answer the gentleman's question, and then I do not want to be interrupted any more, because I am trespassing upon the courtesy of others,

and I do not want to do that.

I answer yes. As I pointed out to the gentleman the other day, within the last three months the condition of railroad business has changed so that instead of having a shortage of something like 1,200 cars, they now have idle cars to the number of 190,000.

Mr. HARDWICK rose.

Mr. HUMPHREY of Washington. I am not going to yield

any more. I hope the gentleman will not insist.

Mr. HARDWICK. All right. I will not interrupt the gen-

Mr. HUMPHREY of Washington. The railroads are unable to borrow the money now to extend their roads, and as a result of that, of course, they are not giving any orders for steel, and so the steel mills are closed. Solely for the benefit of the gentleman [Mr. Hardwick] I will say once more, I quoted from the New York Times, which has taken occasion to send telegrams presumably to each of the 123 mills that I said were closed, and they have published some 45 replies which say that every statement I made was correct. So the truth is to-day that there are 38 per cent of all the steel mills in this country closed-that is, representing 38 per cent of the production-and there are about 1,000,000 men out of employment. I do not care what explanation you give for it. That does not concern me. I am simply giving the facts to the House and to the country; because I believe that it is the patriotic duty of any man who believes, as I believe, that these conditions have been brought about by the legislation that the Democratic Party has written upon the statute books, and by what they propose to do; to tell the facts to the country and to tell them exactly

as they are. So far, no man has yet found that I have made a mistake. I believe it is my duty to see if public sentiment can be aroused by telling the truth until the Democratic Party will stop in its crusade of ignorance and mistake before the business of the country is entirely destroyed. [Applause on the Republican side.]

Mr. Chairman, I ask unanimous consent to extend my re-

marks in the RECORD.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HUMPHREY of Washington. I yield back the remainder of my time.

APPENDIX.

Idle plants and men in the steel industry.

[The accompanying table shows the number of men laid off by various steel plants of the country, as well as the number of stacks blown out, as reported by plants other than those of the Steel Corporation, in answer to telegrams sent by the New York Times to companies named by Representative Humphrey in the National House on Tuesday as having curtailed their production.]

Name of company.	Stacks out.	Number of men laid off since Mar. 1, 1913.	Number of men reem- ployed.	Prospect of employing more this year.

1 Per cent.

WHAT THE MILL OPERATORS SAY.

The Times sent inquiries to the steel companies mentioned by Mr. Humphrey in his speech, asking them these questions:

1. Is Humphrey's assertion true?

2. How many men have you laid off since March 1, 1913?

3. How many have you reemployed?

4. What is prospect of employing more men during 1914?

The replies received by the Times are given below:

LACKAWANNA STEEL CO.

E. A. S. Clarke, president of the Lackawanna Steel Co., writing from his office in this city, said:

"Representative Humphier's assertion that this company had blown out five stacks since March 1, 1913, is true as far as regards our blast furnaces at Buffalo, and his statement that we have blown out one stack at Cornwall and one stack at Lebanon is also true.

"As of March 1, 1913, our records show that there were 9,190 men on the pay roll, and as of December 27, 1913, there were 888 men on our pay roll. For the week ending January 10, 1914, the records show 5,220 men on the pay roll, the difference being due to temporary reemployment on account of a small accumulation of orders which had to be filled.

"I am unable to give any estimate of the additional number of men

to be filled.

"I am unable to give any estimate of the additional number of men which may be employed during 1914. In my judgment, it depends very largely on the prosperity of the railroads. If the railroads are not presperous, the number of men may be further reduced instead of being increased."

These statements were received by telegraph:

PENNSYLVANIA STEEL CO. [Special to the New York Times.]

STEELTON, PA., January 14.

HUMPHREY'S assertion is true. Four out of seven stacks were blown out since March 1, 1913. Net number of men discharged since March, 2,000; others on reduced time. We are keeping many men busy on remodeling portion of plant that would otherwise be laid off. The number of men has declined steadily. We expect to put on more men as quickly as we receive new orders, of which we will get our share. Present acute stagnation can not continue long. A demonstration of Democratic prosperity would reassure the business community for many years to come. years to come.

THE PENNSYLVANIA STEEL CO.

CAMBRIA STEEL CO.

[Special to the New York Times.]

JOHNSTOWN, PA., January 14.

We now have two idle stacks out of eight furnaces that were in blast in March. The present total force is practically the same as in March. The earnings of the men are 10 per cent less, on account of reduced time and tonnage. The force has been practically constant since March. Present indications are that a less number of men will be employed during this year, but we hope for improvement in business. The Cambria has operated more fully recently than orders warranted, in order to keep our men employed. This has been accomplished by making improvements and repairs and by stocking metal billets and other products.

CAMBRIA STEEL CO.

SHENANGO FURNACE CO. [Special to the New York Times.]

PITTSBURGH, January 14.

Yes. 2. Seventy-five at blast furnaces; 450 at mines.
 None.
 Hopeful that during the year we will have a full force reemployed, if the demand for ore and pig iron resumes.

THE SHENANGO FURNACE CO.

CENTRAL IRON & STEEL CO. [Special to the New York Times.]

HARRISBURG, PA., January 14.

HARRISBURG, PA., January 14.

HUMPHREY'S assertion is correct. We blew out one stack December 31, 1913, and have laid off approximately 200 men since March 1, 1913. We have reemployed none. The immediate prospects of employing more men during the current year are not very bright. This feature may change should the iron and steel trade pick up. Our reason for blowing out the furnace was due to the remarkably low prices obtainable in the demoralized pig-iron situation.

RECEIVERS CENTRAL IRON & STEEL CO.

SHARPSVILLE FURNACE CO. [Special to the New York Times.]

SHARPSVILLE, PA., January 14.

Our furnace was blown out March 3; laid off about 80 men; have reemployed none. The prospects of employing more men in 1914 depend on the condition of pig-iron market.

SHARPSVILLE FURNACE CO.

THOMAS IRON CO.

[Special to the New York Times.]

EASTON, PA., January 14.

We have blown out one Hokendauqua, one Hellertown, and one Alburtis furnace since March 1, 1913, and have blown in one Alburtis furnace since March 1, 1918. We have laid off 154 men since then and have not reemployed any of them. We will reemploy 100 men as soon as market conditions warrant. Prospects look more favorable.

THE THOMAS IRON CO.

PUNXSUTAWNEY FURNACE CO. [Special to the New York Times.]

DUBOIS, PA., January 14.

The Punxsutawney furnace was blown out early in October, 1918. We have laid off 150 men at that point and reemployed none. This plant will remain idle until business conditions are materially better.

Punxsutawney Furnace Co.

EMPORIUM IRON CO.

EMPORIUM, PA., January 14.

HUMPHREY'S statement is correct that we blew out one stack July 18, 1918, laying off about 150 men. None of them have been reemployed. We will resume our operations as soon as the market warrants.

EMPORIUM IRON CO.

EASTERN STEEL CO. [Special to the New York Times.]

POTTSTOWN, PA., January 14.

Since March 1 one furnace has been blown out, repaired, and not blown in. On account of insufficient business we have laid off about 135 men; none reemployed. We are unwilling to prophesy as to pros-

EASTERN STEEL CO.

EMPIRE STEEL & IRON CO. [Special to the New York Times.]

CATASAQUA, PA., January 14.

On March 1, 1913, we were operating five furnace stacks. On January 1, 1914, we were operating one stack. To-day we have two stacks in blast. On March 1, 1913, 1,150 men were employed. On January 14, 1914, 916 men were employed, neither the amount of business in sight nor the prices obtainable are such as to justify any increase in the present number of men employed. The present wage schedule, in effect since January, 1913, is the highest in the history of the industry in this section.

EMPIRE STEEL & IRON CO.

JOSEPH E. THROPP. [Special to the New York Times.]

EVERETT, PA., January 14.

Blew out Saxton furnace in July and laid off about 300 men at the furnace, mines, and coke ovens. No prospect for early resumption at Saxton, but hope to continue the Earlston furnace in blast.

JOSEPH E. THROPP.

TONAWANDA IRON & STEEL CO. [Special to the New York Times.]

NORTH TONAWANDA, N. Y., January 14.

NORTH TONAWANDA, N. Y., January 14.

According to iron trade statistics compiled as of January, 1914, Humphrey's statement of idle men in the country is conservative. Since March, 1913, we have shut down one-half of our plant and laid off a corresponding number of men, none of whom has been reemployed. The prospect of employing more men in 1914 is not regarded by us as bright.

TONAWANDA IRON & STEEL CO.

BON AIR COAL AND IRON CO. [Special to the New York Times.]

NASHVILLE, January 14.

HUMPHREY'S assertion is true. We have laid off 100 mcn. No men have been reemployed. The present prospect for iron business is locking better. The present condition, however, would not warrant employing more men.

RECEIVERS, BON AIR COAL & IRON CO.

BRIER HILL STEEL CO. [Special to the New York Times.]

Youngstown, Ohio, January 14.

One furnace has been closed since last March, and the number of men employed reduced about 25 per cent. We have not reduced wages, and expect to have 100 per cent of men employed by April 1.

Brien Hill Steel Co.

BELMONT IRON WORKS CO. [Special to the New York Times.]

Inonton, January 14.

Yes; we blew out one furnace December 20 and laid off 110 men. We ve reemployed none. The prospects are not promising for future employment. BELMONT IRON WORKS CO.

> COLUMBUS IRON & STEEL CO. [Special to the New York Times.]

COLUMBUS, January 14.

One stack was blown out on January 1, 1914. No men have been laid off since March and none reemployed. The prospects for employing more men during the present year are very poor, indeed.

COLUMBUS IRON & STEEL CO.

NORTON IRON WORKS.

ASHLAND, KY., January 14.

We closed our blast furnace down November 15, 1913, throwing about 160 men out of employment. We have not reemployed them. The prospects are not good at this time of employing more men.

NORTON IRON WORKS.

COLORADO FUEL & IRON CO. [Special to the New York Times.]

PUEBLO, COLO., January 14.

On account of the strike of Colorado miners and some reduction in the demand for steel our operating blast furnaces were reducted from three to one, and about one-half of our employees, or 2,000 men, were temporarily laid off. Conditions have improved. We have about 2,500 men working, are blowing in another blast furnace, and there is a fair prospect of still further increase in the working force.

J. F. WILBURN.

Mr. MOON. Does the gentleman from Georgia [Mr. Hard-WICK] wish five minutes?

Mr. HARDWICK. Yes.

Mr. MOON. I yield five minutes to the gentleman from

The CHAIRMAN. The gentleman from Georgia is recognized for five minutes.

Mr. SAMUEL W. SMITH. How much time has the gentleman from Washington consumed?

The CHAIRMAN (Mr. SAUNDERS). Twenty-nine minutes.
Mr. MOON. Mr. Chairman, I now yield five minutes to the
gentleman from Georgia [Mr. HARDWICK].
Mr. HARDWICK. Mr. Chairman, it is not my purpose to
pursue very much further this very interesting discussion between the gentleman from Washington [Mr. Hardwigsey] and my tween the gentleman from Washington [Mr. HUMPHREY] and myself, and yet I will use five minutes, because I want to call atten-

tion to the remarkable position that the gentleman from Washington has gotten himself into. He starts out with the argument that the country is being ruined, if not already ruined, by the operation of the Democratic tariff law, and he finds himself in this position: He says that the lumber industry and the steel industry are the two great industries that have suffered and fallen down on account of the Democratic tariff law.

Mr. HUMPHREY of Washington. I beg the gentleman's pardon, but I did not say that they were the only two.

Mr. HARDWICK. They were the two that the gentleman

specified and about which he undertook to go into particulars. The gentleman generalizes, I think, incorrectly about other

Mr. HUMPHREY of Washington. I do not want to be limited.

Mr. HARDWICK. I do not want the gentleman to be limited; I want him to have a field as broad as his pessimism requires. He takes the southern lumber industry and speaks of a Pensacola concern that failed. The other day the gentleman said that even if the lumber business in the South was in a prosperous condition, the removal of the duty could not have injured it, because they had several thousand miles freight rate protection from foreign competition. And yet, when he finds in a local newspaper an account that some Florida concern, on account of the failure of some of its foreign correspondents to pay their drafts, has failed, he immediately cites that as a proof that the Democratic tariff has hurt the country.

The gentleman takes next the steel industry, admitting the fact that fully 60 per cent of its product is used by the railroads of the country, and admitting the fact that the railroads can not possibly be injured by the lowering of the tariff duties, yet he says that the steel industry is very much damaged by this Democratic tariff law and by the general tariff conditions, saying that 24 per cent of them are shut down, whereas he knows, and the country knows, that whatever trouble the steel industry is in grows out of the railroad situation, and that that situation could not be affected either by a Republican or a Democratic tariff law.

The truth is that the railroads of the country have issued and overissued bonds and stocks until they find themselves unable to pay dividends, unless they are allowed to charge higher rates for freight and passenger service. For that reason they can not continue to make further improvements or pay the dividends on all this water.

I want to tell my friend that this is no new condition, and that it does not result from a Democratic administration. has been going on during the last two Republican administrations. It is no more occasioned by the tariff, it is no more the result of any tariff changes than this discussion is the result of conditions at the North Pole. The gentleman knows it, I think, or it seems to me that he ought to know it, for he has an acute intelligence.

Mr. HUMPHREY of Washington. The gentleman from

Georgia says that I admit that the tariff has nothing to do with the condition of the railroads. I do not admit that.

Mr. HARDWICK. All right; well, the gentleman does not deny that the steel industry sells about two-thirds of its product

to the railroads of the country?

Mr. HUMPHREY of Washington. I do not know. Mr. HARDWICK. Then there is one thing that the gentleman from Washington does not know. The gentleman can not dispute the fact that the position of the railroads is not attributable to a raising or lowering of duties?

Mr. HUMPHREY of Washington. I do not admit that.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. GREEN of Iowa. Will the gentleman yield? Mr. HARDWICK. I will yield to the gentleman.

Mr. GREEN of Iowa. Does not the condition of the rail-

roads depend upon the prosperity of the country?

Mr. HARDWICK. Oh, I thought the gentleman wanted to ask me a real question. The gentleman knows as well as I do, I think, that the trouble that the railroads are having with their stocks, bonds, and rates is not on account of the tariff question. If the gentleman does not know it, I do not wish to waste words upon him.

Mr. GREEN of Iowa. I showed the other day from statistics that the trouble with railroads was because their traffic is fall-

ing off every day

Mr. HARDWICK. On the contrary, the statistics which the gentleman offered did not prove it at all. He filed statistics showing the number of idle railroad cars. Does not the gentle-Mr. HARDWICK. man know, or has his observation been so limited that he has not noticed it, that every year after the crop season, after the crops are moved, the rallroads have many idle rallroad cars?

Mr. GREEN of Iowa. There are 171,000 more idle cars this

December than there were last December.

Mr. HARDWICK. But we had a great deal larger crop this

year than last year.

Mr. STEVENS of Minnesota. Will the gentleman allow me to

ask him a question? Mr. HARDWICK. In a moment.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. HARDWICK. May I have one minute more?

Mr. MOON. I yield the gentleman from Georgia one minute additional.

Mr. HARDWICK. For a gentleman who looks so wise and talks so confidently this gentleman's information is more limited than any man I have ever heard speak on this floor. When the crops are laid by every year there are a number of railroad cars that are empty. We can not have enough to carry the crops during the busy crop-moving time and not have some cars idle.

Mr. GREEN of Iowa. Very few the preceding December as

compared with last December?

Mr. HARDWICK. I trust the gentleman will obey the rules of the House and not interrupt me without my consent.

Mr. GREEN of Iowa. I treat the gentleman as he treats me. Mr. HARDWICK. The gentleman ought to obey, or try to obey, the rules of the House.

Mr. STEVENS of Minnesota. Will the gentleman yield for a

The CHAIRMAN. The time of the gentleman from Georgia

has again expired.

Mr. MOON. I yield the gentleman two minutes additional.

Mr. HARDWICK. Certainly.

Mr. STEVENS of Minnesota. I would ask the gentleman what would become of his argument if the report of the Interstate Commerce Commission in valuing the railroads should show that there is not an excess of capitalization over issuance of securities now and the actual valuation of the railroads now as it is being taken is about equal to the issuance of securities?

Mr. HARDWICK. The report does not show that. It has not even been made as yet.

Mr. STEVENS of Minnesota. I am asking the gentleman, of course the report will not be issued for some time?

Mr. HARDWICK. I do not think it will show anything like that.

Mr. STEVENS of Minnesota. I think it will. I think the report will show that, because nearly every State report that has been made has shown that there is an excess of valuation over the issuance of securities, and I think that the railroads were glad to see this valuation, because it would show that

the excess valuation of this country exceeds the issuance of securities, and that the gentleman's statement is incorrect.

Mr. HARDWICK. Now, let us see whether it is or not. As I understand the gentleman from Minnesota, he now is willing to state in his place as a Member of the House that he does not believe the railroads of this country are overcapitalized?

Mr. STEVENS of Minnesota. I think the value of the property, as far as anyone can get at it approximately, is about

equivalent to the capitalization of securities upon it.

Mr. HARDWICK. The gentleman's views and my own are so far apart I do not see any need of pursuing that matter any further. To my own knowledge, and as far as I have been able to observe things in my own part of the country, that statement is not accurate. Now, if it be true that they count the enhanced value of terminals, and that they figure on a great many things on paper, which probably they could not get money out of, they may be able to make somewhat better showing as to value that the real facts will, in my opinion, justify—

Mr. STEVENS of Minnesota. One more question.

Mr. HARDWICK. Let me finish the sentence. I do not

think anyone in this country believes, unless it is the gentle-man from Minnesota—and I say it with all respect—that the railroads of this country are not overcapitalized.

Mr. STEVENS of Minnesota. The gentleman, I think, will

take the valuation of the commission for which he himself voted on a bill which his own party supported. I will take it.

Mr. SAMUEL W. SMITH. Mr. Chairman, I want to say to the chairman of the committee that while I am going to yield to a member of the committee [Mr. Griest], he does not intend to occupy more than 20 minutes. I now yield 1 hour to the gentleman from Pennsylvania [Mr. Griest].

Mr. GRIEST. Mr. Chairman, having recently introduced a measure urging Congress to complete its business with dispatch and adjourn not later than May 30 next, I shall now endeavor to be consistent by addressing my remarks exclusively to the Post Office bill and by consuming but a portion of the time allotted me.

The Post Office Committee having disagreed with the Post Office Department's recommendation for the discontinuance of the town and village mail delivery service, I wish to present some reasons which seem to me to be conclusive in justification

of the committee's action.

Not less than 15,000,000 people are directly concerned ultimately in the success and permanence of town and village mail delivery, and general surprise and disappointment were evidenced at the failure of the department to estimate for an appropriation to continue the service after June 30, 1914. That the service has been unusually successful and popular, and is now almost indispensable, in the 114 towns scattered throughout the Union in which the service has been experimentally installed, is abundantly attested and verified by nearly all of more than 100 Members of this House in whose districts the experiment is in operation, and likewise by a multitude of business men and others in the communities affected. Inquiry in these districts discloses not one discordant note as to the popularity and necessity for this service but a unanimous desire for its continuance, as is fully shown by a digest of the letters received either from Members of this House or by their courtesy, and inserted in the Record as a part of my remarks, as proof positive of the success and desirability of the

town and village mail delivery service.

Two years ago the initial appropriation for experimental village delivery was \$100,000, and last year \$150,000 was authorized. The paragraph in the bill now under consideration

For experimental village delivery service in towns and villages having post offices of the second or third class that are not by law now entitled to Free Delivery Service, \$200,000.

These townspeople deserve to be treated squarely, and I am sure that the Members of this House will sustain the committee in its effort to give adequate mail delivery service to the

developing towns throughout this great country Not since the inauguration of the Rural Delivery Service nearly a score of years ago has the Government authorized a postal service which carries comfort and convenience to the very doors of as many people as can be benefited by the establishment of mail-carrier service in the towns.

The strong point of discrimination against the townfolk is the fact that Congress has deprived them of service which it has given the cities and rural districts. The time has arrived to complete the link, and by the permanent establishment of an

economical town delivery service the injustice will be eliminated.

Years ago the City Delivery Service proved its value to the
millions of people residing in the big cities having gross postal revenues in excess of \$10,000. In recent years the Rural Delivery Service development has been accompanied by great ad-

ery Service development has been accompanied by great advancements in the rural life of this country.

The City Delivery System serves fully 46,000,000 people at an annual expense of \$36,000,000, and the Rural Delivery, with its 42,000 routes, supplies 20,000,000 people at an annual expense of \$45,000,000. But there are more than 15,000,000 of our people in the towns who also help to support the Postal Service. These people live in communities having presidential post offices, and there are fully 4,000 such towns with from 1,000 to 8,000 population, each office producing postal revenues in excess of \$2,500 yearly. Such people are entitled to mail delivery if for no other reason than that their offices transact sufficient business to pay for the carrier service and still return a substantial margin of profit to the general postal fund.

substantial margin of profit to the general postal fund.

The town people are also entitled to the service, because the Government provides city carriers on routes serving from 800 to 3,000 patrons, according to the density of population, while on a rural route they serve from 300 to 1,500 patrons per route. In the City Delivery Service the average cost per carrier is about \$1,130, and in the Rural Service it averages about \$1,000. The average cost per carrier in the experimental town delivery service is \$625, and the First Assistant Postmaster General reports that with the extension of the service the cost per office will amount to about \$1,000 per annum. This, he says, would warrant a "conservative estimate that the operation of a satisfactory mail delivery at all second and third class offices will cost the Government ultimately \$10,000,000 a year." these figures be correct, this limit of expense would not be reached in years, and even then would be economical service for the supply of more than 15,000,000 people as compared with other mail-delivery branches of the Government service.

This town or village mail-delivery service has been experimentally installed at 114 post offices in 40 States, with 126 carriers. These towns range in population from 1,000 to 7,000 and have gross receipts of from \$2,500 to \$9,000. An examination of the figures and comparison of the receipts and expendi-

tures at these offices merit the conclusion that this demand for mail-carrier service is fully justified. I submit for incorporation in these remarks a list of these experimental mail-delivery post offices for the information of Members of the House in order that they can see the size, importance, and postal business of the class of towns which should be made eligible to receive a permanent mail-carrier service.

Class of towns which should be made eligible to receive a permanent mail carrier service.

Some months ago the patrons of the post offices at Marietta and Manheim, Pa., petitioned the Post Office Department for the establishment of mail-carrier service, and I recently invited attention to these petitions, urging that the service be in-augurated. In response I received the following letter:

POST OFFICE DEPARTMENT,
FIRST ASSISTANT POSTMASTER GENERAL,
Washington, December 27, 1913.

Hon. W. W. Griest.

House of Representatives.

My Dear Ma. Griest: In reply to your letter of December 23, 1913. relative to the establishment of experimental mail-delivery service at Marietta and Manhelm, Pa. I beg to say it is understood that in the bill making appropriations for the Postal Service for the ensuing fiscal year, which is now before the Post Office Committee of the House of Representatives, provision is being made for the continuation of experimental village delivery service by a special appropriation. It will probably be the pian of the department to administer this service in the towns where it has already been inaugurated, as well as in other towns for which its necessity may be shown by the department, by a combination of the rural delivery with the experimental delivery, thus reducing the number of village delivery carriers and hence the expense of operating the service.

The department will be able to inaugurate this service in a few more towns during this fiscal year, and if the rural carriers can be used as contemplated the number of towns which will receive the benefit of the experimental delivery service will naturally be considerably increased.

creased.
Yours, very truly,

DANIEL C. ROPER, First Assistant Postmaster General.

Since receiving the above letter Postmaster General Burleson has issued the following order, dated December 31, 1913:

Office of the Postmaster General, Washington, December 31, 1913.

Order No. 7745.
Section 717, Postal Laws and Regulations, 1913, is amended to read as follows:
"All persons, except those who reside within the city-delivery limits of a city where City Delivery Service is in operation, may be served by rural carriers, provided they will erect approved boxes on the established line of the route in the manner required by the department."

A. S. Burleson,

Postmaster General.

It is difficult to realize that the department expects to force its idea upon the people, as the letter and the order seem to indicate. In well-regulated boroughs and incorporated towns the authorities will hardly allow the erection of numerous posts and boxes along the gutters within the borough limits, even for the delivery of mail. The conditions in the towns justify an adequate system of carrier service, and the department should accept the expressed will of the Congress and arrange to give the townfolk merited relief in a complete and systematic

The First Assistant Postmaster General has furnished no specific reasons why the towns of 1,000 to 10,000 people should be deprived of carrier service. He says the primary object of "delivery service is to prevent congestion which would attend the effort to make a general delivery of mail at the post office." It might also be stated that mail-carrier service provides an expeditious exchange of mail and promotes the improvement of business and social life. The department, however, expresses the opinion that the rural letter carriers should be required to perform service on an eight-hour basis instead of a mileage scale, and says the carriers could then deliver mail in the towns as well as on the rural routes. But no definite plan was offered, and as the suggestion is evidently not feasible except in towns l

of only a few hundred population, the committee was strongly in favor of renewing and enlarging the appropriation so as to continue carrier service after July 1 in towns where the system has been installed

The department says:

Patrons have shown an appreciation of this facility where it has been extended. * * * But there has been a tendency to demand service of the same character as that rendered at city delivery offices.

Surely the patrons of the Postal Service are not to be condemned for desiring to secure the best obtainable mail facilities, especially when they have been paying for what they did not get. The nonmail-delivery post offices of the second and third classes are profit producers, but for years the profits have been expended elsewhere.

Reports which I have received concerning this experimental service show that it has proven highly successful, and has become indispensable, and would be even more so were it not for the failure of the department to provide mail boxes for the collection of the mail, despite the fact that the people were in many places compelled to incur considerable expense in numbering houses, erecting boxes at their doors, and otherwise complying with the requirements.

In towns of several thousand inhabitants it can not be expected that the rural letter carriers can deliver town mail in addition to their rural routes. After a carrier traverses a route of 18 or 26 miles, either in summer or winter, his team requires attention as soon as possible after the collected mail is deposited in the post office. With the development of the Parcel Post Service the rural carriers have increased burdens of their own, and the new parcel-post system is an additional reason why the towns should have separate carrier facilities.

Surely the people on the rural routes are not willing to wait for their mail until the town mail is all delivered, and the people in an active business town could not wait for their mail until the rural carrier returns from his route in the afternoon. Neither proposition would satisfy the people concerned, and an intermediate system between the City Delivery and Rural Delivery Services, such as the present town-mail delivery, is absolutely essential for practical business administration.
On February 24, 1910, and April 16, 1912, I offered remarks

in behalf of town mail-carrier service, and gave facts and figures to show the warrant for its establishment, and as an evidence of the public demand attention is invited to the scores of petitions which have been filed in Congress during the past three years praying for the legislation. In addition, Members of this House have made special effort to ascertain the views of their constituents concerning the experimental service, and I have received numerous letters which unanimously testify, as previously stated, to the success and benefit of the town delivery service. The reports tell how local business and postal revenues have been stimulated, and prove that the service has become a part of the permanent necessities of the various communities where it has been established. As incontestable evidence of the popular and enthusiastic demand for the permanent establishment of this mail delivery and collection service, I now offer excerpts from letters submitted by many of my colleagues; and I believe that a reading of them in the Record will satisfy the membership of this body that the Post Office Committee has acted wisely and well in its indorsement and retention of the town and village mail-delivery service.

Mr. GOULDEN. Mr. Chairman, will the gentleman yield? Mr. GRIEST. Certainly.

Mr. GOULDEN. Does the gentleman not think that he will destroy one of the great social functions of the country town by having the town furnished with a carrier? The post office is the place in which the fair maidens and gallant young men assemble, noon and evening, to receive their mail, and I have no doubt that that results in very many happy marriages. I am very much afraid that my friend is going to destroy one of the most important social functions of the small towns.

Mr. GRIEST. Hardly; though possibly the gentleman can speak with authority on that subject.

Mr. RUCKER. Mr. Chairman, will the gentleman yield? Mr. GRIEST. Certainly.

Mr. RUCKER. Mr. Chairman, if the gentleman will permit, desire to state that I received a very courteous letter from him asking with reference to the experience and sentiment of the people in a town in my district served with town delivery. Unfortunately, and through no discourtesy, I was unable to answer that letter. I now want to say, in connection with the other letters that the gentleman has put in, that I know from numerous statements to me from citizens of that town that the rvice is most gratifying and gives perfect satisfaction.

Mr. GRIEST. I thank the gentleman for his courtesy and information. That is precisely what is reported by other Mem-

bers of this body.

Mr. RUSSELL. Mr. Chairman, I desire to state that I received a letter from my colleague asking me whether the experimental free delivery established in my district at Jackson, Mo., was satisfactory. I did not answer the letter, for the reason that I desired accurate information from some patrons of that office before doing so. I wrote to three of the prominent citizens of that place and ascertained what the feelings of the patrons there were with reference to that service. I received two replies, I believe on yesterday. A reply from the third I have not yet received. That is the reason I did not reply to the gentleman's letter. The two letters that I did receive stated that the service was very satisfactory and that the people would regret very much to have to give it up.

Mr. GRIEST. Mr. Chairman, I am very glad that the gentle-

man has received information of that character.

Hon. John L. Burnett, representing Russellville, Ala., transmits a letter from Mr. J. A. Wilson, and says:

From this letter you will see that the people there are very much delighted with the service.

Commenting on the service at Russellville, Mr. Wilson writes: I think it is one of the most successful experiments that the Post Office Department has ever attempted; all the patrons are very much pleased with the service, getting two deliveries per day, except Sundays. Our carrier can not make the rounds on foot, because of the volume of mail matter, and frequently has to use a buggy. He handles more matter than either of the rural free delivery carriers.

Hon. Carl Hayden, representing Tempe, Ariz., presents a

letter from Mr. J. O. Mullen, who writes:

letter from Mr. J. O. Mullen, who writes:

In replying to your letter of the 30th ultimo, I am pleased to say that the experiment of village delivery in this town has been an entire success in so far as it has been carried out. There never has been any objection from the patrons except that collection boxes have not been placed, and that has not been exactly an objection to the service but rather a request for more service. Notwithstanding the absence of collection boxes, if the service were withdrawn now after they have been accustomed to its convenience there would be a great clamor go up from the people of this town. They would not stand for it at all if there was any way to help it. All mail, including parcel post, is now being delivered to a population of 1,400 for an allowance of \$900 per annum. That only leaves about 500 who are not being served, and many of these would take the service if they were asked, but our carrier has all he can do at the present time. He is delivering an average of 795 pieces daily, weighing an average of 155 pounds. The houses have been numbered and street signs put up, which is a great convenience for everyone who has any business whatsoever in the town.

Hon. H. M. Jacoway, representing Clarksville, Ark., writes:

Hon. H. M. Jacoway, representing Clarksville, Ark., writes:

I am in receipt of your letter asking for information relative to the sentiment of the people of Clarksville, Ark., toward the experimental village mail delivery which has been established at that place, and in reply will say the same meets with universal approval. I have never heard a word of complaint about the system, and I am sure that the people would not willingly give it up. The above system is regarded by all as an absolute success and a great convenience. I would hate to see the system abolished.

Hon. Otis T. Wingo, representing Van Buren, Ark., says: I am just in receipt of your letter of the 29th inquiring as to the experimental city delivery service at Van Buren, Ark., in my district, and in reply beg to say that this service has been highly satisfactory.

Hon. Robert P. Hill, representing Pinckneyville, Ill., writes:
Replying to your letter of recent date asking for information on the experimental test of mail delivery in Pinckneyville, Ill., I beg to advise that it is so highly satisfactory that the citizens of Pinckneyville feel that it is an absolute necessity from now on. It would be regarded as a great calamity if the same should be taken off. Postal receipts have increased, and business been greatly helped.

Congressman Hill has furnished letters from two constitu-

ents. One of the gentlemen, Mr. J. L. Gallimore, says:

Relative to the experimental test of free mail delivery in this city,
will say that in my judgment from what I have seen and heard it has
been a success and our people are more than satisfied, and we often
hear the remark, "How could we get along without it?" It is surely
a time saver for the busy man, and has done for this city an amount
of good. As one of your sincere constituents, I urge upon you to use
your influence to maintain the same. Our people, regardless of political
affiliations, are for free mail deliveries in Carterville.

Mr. J. A. Lander states:

Mr. J. A. Lander states:

I am, indeed, very glad to hear from you and especially on the subject of experimental free deliveries in small towns. I intended writing to you soon about this matter, as I saw in the daily papers that Postmaster Burleson did not favor it. I wanted you to know that I consider it a fine thing for the postal service of our town, and it is very popular and nearly everyone is using it. Our two carriers are carrying about 1,500 pieces per day. As to the receipts of the office, they are more since the carriers began March 1, 1913, than the same period, 1912. Besides, we have a loss of box rent, owing to the delivery, of over \$100 per quarter year and still our business holds out more than in 1912. Every business firm here, with only two or three exceptions, is using the service. I think it is but fair that small towns should have delivery service as well as large towns and rural communities. Mr. HILL, I trust you will use your utmost endeavor to have this service continued, and also extended to other towns in the country and also in your district. I know it will be appreciated by your constituents. your constituents.

Hon. Charles M. Borcher, representing Homer, Ill., submits a letter from Mr. James P. McPherren, who says:

Your letter of inquiry at hand, and in reply will say that the experimental city delivery was begun in Homer, Ill., on October 16, 1912. After careful inquiry I find that the most or majority of its constituents deem it a necessity and would feel that they would have been greatly wronged if it were discontinued. In regard to the postal receipts, we had a gain of \$340 for the quarter October 1 to December 31, 1913, over the quarter from October 1 to December 31, 1912.

Hon. WILLIAM N. BALTZ, representing New Athens, Ill.,

Replying to your letter of the 20th ultimo, wishing to know the attitude of my constituents toward the experimental service now in operation at New Athens, Ill., in my district, I beg to advise that from letters and personal conversation from these people they are highly pleased with the service. I can only say to you that as far as this office is concerned your experimental service has proven eminently satisfactory and has become indispensable.

Hon. Frank P. Woods, representing Coon Rapids, Iowa, reports:

I have received the following report from a friend in whom I have considerable confidence in regard to the service which was established by the Post Office Department at Coon Rapids, Iowa:
"Started here April 15, 1913; is working fine; the people like it and would hate to give it up now. It started with delivery for the resident part of our town first, and about August I was extended to the business part of town. One man does the work; makes two deliveries per day, and can make it promptly except two days per week; this is on paper days, Fridays and Thursdays, the days the local papers come out. These two days the carrier should have help. Our people here would want you to support its continuance."

Hop. City: The stream of the proposed the part of the proposed in the pro

Hon. GUY T. HELVERING, representing Minneapolis, Kans.,

In answer to your communication of December 29, will say that a few months ago there was established at Minneapolis, Kans.. in my district, an experimental village mail-delivery service. I understand that it is very satisfactory to the people of that town.

Hon. Dudley Doolittle, representing Wamego, Kans., says: I have made personal inquiry regarding the same, and the service performed has been extremely satisfactory to the patrons and the postal employees at that place.

Congressman Doolittle forwards a letter from Mr. Z. R. Detwiler, who writes:

There is no question about village delivery being successful in Wamego. Ninety-eight per cent of our mail is delivered. The people are building sidewalks right along, and the city putting in the crosswalks, putting up street signs, all houses numbered. As to the financial end of it, it has increased the business end of it more than the rural routes have. Should the department withdraw the services we think it would be very unjust.

Hon. William J. Fields, representing Carlisle, Ky., consulted constituents in regard to the experimental service and submitted letters "which are very encouraging."

The letter from Mr. A. B. Tilton says:

I want to say that the experimental mail-delivery service here has proven highly satisfactory and has materially increased the efficiency of our post-office service. The people here are pleased with it, and it seems now to be indispensable. Our postal receipts have been increased and business generally helped. I will mail you a letter from the officials and some of the leading citizens of Carlisle, giving their estimate of the value of the services to us. At the proper time we desire to get a hearing for the continuance of the service here, and I am sure every patron of this office will join in asking for our city delivery services to be continued.

Accompanying the letter was a petition, as follows:

Hon. W. J. FIELDS, M. C., Washington, D. C.

Washington, D. C.

Dear Sir: Relative to the experimental mail-delivery service now in operation in Carlisle, we, the undersigned officials and citizens of Carlisle, wish to say that we regard the service a great success here; in fact, we have found it to be so beneficial as to now be, as we believe, indispensable. The patrons of the Carlisle post office, in Carlisle, are greatly pleased with the service and would regard it almost a calamity to lose it. We find, also, that it has greatly increased the efficiency in the service of the local post office, as well as the postal receipts, as the records we are sure will show. The business of the town has been materially helped.

The service here is highly satisfactory, and we respectfully ask that you do everything possible to the end that the delivery service here is maintained.

We beg to remain yours, very truly,

J. H. Frez,

Mayor of City.

The petition was also signed by the six councilmen and other

Hon, John T. Watkins, representing Mansfield, La., writes:

In reply to your favor of the 29th instant, I will state that the experimental village delivery of mail at Mansfield, La., has proved eminently satisfactory; so much so that when it came to reappointing a postmaster there 90 per cent of the Democratic patrons of the office petitioned for the reappointment of the postmaster, who is a Republican, largely because they appreciated his services in procuring this village delivery of mail. The citizens of Mansfield would feel that it was a great deprivation if they should now have this service withdrawn from them.

Hon. THOMAS C. THACHER, representing Yarmouth, Mass.,

I would say that the experimental delivery of mail in Yarmouthport, Mass., has given general satisfaction to the patrons of this office.

Hon. Joseph W. Fordney, representing Durand, Mich., presents a letter from Mr. A. B. Freeman and a press item from the Durand Express (Mr. H. L. Izor, editor).

Mr. FORDNEY comments as follows:

This system has given very great satisfaction at Durand, and I wish to see the system extended as rapidly as possible.

Mr. Freeman writes:

I am pleased to say that free delivery worked out extremely satisfactory here and has become very popular with patrons. I have had my compliments for the department, and believe that another year will see it far more popular than it is to-day; but even now I know our people would regret very much having it discontinued.

Editor Izor writes:

Editor Izor writes:

Durand has had mail delivery a year. The first word should be that it has proven a "howling success." Durand patrons of the post office are more than pleased with the service the new system makes possible.

This assertion is made after a canvass of popular opinion, and it is safe to say that fully 90 per cent are enthusiastic in their praise of the city mail delivery. Those who are not enthusiastic can be accounted for in the fact that they live within close range of the post office and it is no trouble for them to call for their mail. The service has had a full test now, especially as the Christimas season has just closed. It was understood that when the free delivery in town started that it was of an experimental nature. That it has proven so successful and is of so much value and accommodation to the patrons in general must be a source of satisfaction to the Post Office Department in general.

Hon. Charles R. Davis, representing Zumbrota, Minn., kindly submitted a letter from Mr. S. B. Scott, who says:

Hoh. CHARLES R. DAVIS, representing Zumbrota, Minn., kindly submitted a letter from Mr. S. B. Scott, who says:

You ask me regarding the success of the Free Delivery Service instistuted at this office during the experimental period. It has been successful far beyond the expectations of us who are interested in its success. Our people are more pleased with the service at this time than when it was instituted; in fact, if it should be withdrawn I think we would have to turn in a riot call. The carrier is making two deliveries a day in both the business and residential district, and practically every resident of our village has taken the delivery; our business houses and residences are all numbered; street signs are erected at all intersections, at a considerable expense to our taxpayers, but they have never complained, as they consider the convenience more than repays them for the outlay. I find that the increase of business in this office this year is \$453.71 over the year 1912, which is a very substantial increase at an office of this size. We are handling considerable more first-class mall than ever before, and the increase is due largely from the resident district. It is surprising the amount of mail we receive addressed with the street and number, making it evident that our people take pride in being somewhat citified, and the Government is responsible for these improvements in the towns and villages of this size, as it would never be done only they must conform to the requirements in order to get the service. I find that since this service has been agitated that the people in the smaller towns and villages feel that they have been discriminated against by having rural deliveries in the country and free deliveries in the cities, and they have to go to the post office to get their mail and pay box rent besides. There is another, surprising thing—about the box rents not having decreased at this office to any great extent since this service was inaugurated. Nearly all the business houses keep their lock boxes,

Hon. EZEKIEL S. CANDLER, representing Corinth, Miss., writes: The experimental mail service at Boonville has been very satisfactory, and the discontinuance of it, I think, would be detrimental. I am glad that the service in Ephrata was successful. I think the discontinuance of this mail service where it has been established would be a mistake, and I would be glad to see it extended.

Hon. Thomas L. Rubey, representing Lebanon, Mo., says:

While this experiment has been going on in my own town, I have been away from there so much of the time that I do not know whether it has been satisfactory or not, but I feel quite certain that it has been, and I hope that we can continue it and make it permanent, and that like service may be extended to other towns and villages.

Hon. Charles F. Booher, representing Savannah, Mo., writes:

Hon. Charles F. Booher, representing Savannah, Mo., writes:

We have had this service now something like one year, and the people are greatly pleased with it and would not consent to have it discontinued. The postmaster tells me that it has increased the receipts of his office, and that one carrier is not enough to distribute the mail; that two carriers could be kept busy. He has asked the department for an additional carrier.

The people of the city regard it in the same light as the people of the country do rural deliveries, and I sincerely trust that your committee will see proper to extend this mail facility to other towns and cities or, at least, make an appropriation large enough to fully carry out its intent and purposes in towns where it is already in existence.

Hon. RAYMOND B. STEVENS, representing Woodsville, N. H., presents interesting letters from constituents.

Mr. James F. Leonard says:

Mr. James F. Leonard says:

This delivery is very satisfactory to the people of this place, the only criticism being that the delivery should extend to some places within the village limits to which it does not now extend. I presume this can not be done on account of the distance from the office and the limited number of carriers. I have talked with several of our representative business men, and they are all more than pleased with mail delivery, and I think that no more unpopular measure could be advocated than the abolishment or even curtailing of the mail delivery, sources.

Mr. F. P. Deenth reports:

Replying to your communication of the 31st, experimental mail delivery was established at this office April 15 last; we have two deliveries daily and two carriers. It has worked perfectly satisfactory, is very popular with the patrons, and a very strong remonstrance would be made if the service was to be discontinued. I trust that you will use your influence in the end that the service may be made permanent.

Hon, Archibald C. Hart, representing Leonia, N. J., says:

I am informed that there are several experimental services in my district, and these afford splendid satisfaction, and I would consider the discontinuance of these services most unfortunate.

Hon. EDWIN S. UNDERHILL, representing Painted Post, N. Y., forwards a letter from Mr. John L. Chatfield, who says:

I beg to say that the experimental village delivery has been in effect in Painted Post, N. Y., since July 1, 1913, and that it is very highly regarded by over 400 families served thereby.

The village mail carrier makes two trips daily and serves two hours in the evening in the post office as assistant postmaster, making a total service daily of about eight hours, for which he receives \$50 per month. The institution of this service has had practically the same effect, proportionately, that the Free Delivery Service had when installed in cities, doing away with the rental of post-office boxes by those served thereby. Instead mail boxes have been placed on their houses by the patrons of the village experimental delivery service, while the village board has had the houses numbered systematically in appreciation of the new service. Like the Rural Free Delivery Service, the experimental village service probably would not be considered self-supporting except as regards the golden opinions of those served. The population of this village is made up, to a certain extent, of those that are accustomed to advantages of city life, and the installation of the local experimental village delivery service apparently has pleased the great majority of the citizens. Of a population of about 1,600, more than 1,400 are enjoying the advantages of this delivery of their mail. Many former residents of Corning having homes here, to say nothing of those having their business in Corning, are having their mail delivered here. At the time the village experimental delivery service was put into effect here the capacity of this office, so far as box equipment is concerned, was taxed to the limit, every lock box being rented; so this new service relieved that congestion.

The receipts of this post office in the last month were the largest in the history of the office.

the listory of the omee.

Hon. Edwin Y. Webb, representing Newton, N. C., transmits a letter from Mr. F. M. Williams, who says:

The experiment in mail deliveries in Newton has been an entire success. There is but one carrier, and he serves about half the town. The people on the route like if so well that they say they never want to give it up, and the people not included are continuously inquiring at the post office if another carrier will not be soon put on, so that they can have the same convenience enjoyed by the other half.

How We have Comp. representing Fasten. Ohio, writes:

Hon. WARREN GARD, representing Eaton, Ohio, writes:

I beg to advise you that, at my solicitation, the Post Office Department established experimental service at Eaton, Ohio, and that the service is indeed highly appreciated by the citizens there, so much so, indeed, that they are striving with all their power to have their municipality advanced in post-office receipts so that the fullest advantage of complete city delivery may be had.

Hon. J. D. Post, representing Jeffersonville, Ohio, says:

Some eight months ago I procured the Post Office Department to establish the experimental test of mail-delivery service at Jeffersonville, in this county. From what I have learned this service has proven highly satisfactory to everyone who are patrons of the office within the limits of the village. The business men of the village appreciate it very much, and some, after having tried it, say that it is indispensable to them.

Hon. TIMOTHY T. ANSBERRY, representing Paulding, Ohio, expresses the hope that a liberal appropriation will be provided

Holl. Ithorthy T. Ansberry, representing Pathiding, Ohio, expresses the hope that a liberal appropriation will be provided for the service, and he says:

As you are a member of the Committee on the Post Office and Post Roads, I desire to call your special attention to page 15 of the annual report of the First Assistant Postmaster General to the Postmaster General, with reference to the appropriation for experimental tests of mall-delivery service in towns and villages not now eligible to receive city deliveries.

Paulding, Ohio, a second-class post office in my district, was designated as one of a number of places throughout the country for the experiment and has enjoyed the benefits of this service since December 1, 1912, and upon investigation I find that the patrons of this office are more than pleased with the service and enter their vigorous protests against the discontinuance of the same in the most emphatic manner.

I might add that the service at this office has proven a wonderful success, although they have been compelled to conduct the same without full equipment. Under instructions from the Post Office Department all preparations were made, and the posts were erected for collection boxes at the points designated by the inspector, with the understanding that these boxes would be furnished at the time the service was inaugurated, but although repeated requests have been made for same the office is still conducting the service without any collection boxes; but notwithstanding this handicap the people are enthusiastic over the service and consider it a great benefit. Paulding is one of the thriving towns of my district, with a population of about 3,000 inhabitants, and I am informed that the receipts of this office for the fiscal year will come within a few hundred dollars of the amount required for city delivery.

Congressman Ansberry also submits a letter from a con-

Congressman Ansberry also submits a letter from a constituent, who says:

stituent, who says:

As you are aware, our village is one of the fortunate ones selected for the first experiment in village free delivery and have been enjoying the benefits of this service since December 1, 1912. From this you will understand that our people are very much interested in the recommendation of the honorable First Assistant Postmaster General that this service be discontinued. We are at a loss to know on what grounds he bases the statement that the service has proven to be a failure, as in our individual case the reverse is true, same having proven a wonderful success, although we have been compelled to conduct the same without full equipment. Under instructions from the department all preparations were made and posts erected for collection boxes at the points designated by the inspector, with the understanding that the boxes would be furnished at once, but although repeated requests for same have been made, we are still conducting the service without any "collection boxes. But notwithstanding this our people are enthusiastic over this service, as it is a good help.

Our people desire to express their appreciation for this service and to voice their protest against the discontinuance of the same in the most effective manner, and any suggestion you might make as to the best way to proceed would be appreciated very much.

Hon. Isaac R. Sherwood, representing Swanton, Ohio, trans-

Hon. ISAAC R. Sherwood, representing Swanton, Ohio, transmits a letter from Dr. A. B. Lathrop, who forwards a petition bearing several hundred names and the signatures "of every business firm in the town."

The petition reads as follows:

We, the undersigned patrons of Swanton post office and living within the incorporated limits of said village, having enjoyed the service of village experimental delivery as established November 16, 1912, do

fully appreciate this service and pray that such service be continued, and that the bonorable Postmaster General be urged to ask Congress to make appropriation for said service to the end of permanent establishment.

Hon, Dick T. Morgan, representing Edmond, Okla., submits a letter from Mr. A. D. Dailey, who reports:

Replying to yours of January 5, relative to experimental free delivery of mail in Edmond, will say that in my opinion the so-called experiment has proven highly successful. The service is well patronized, and the patrons of this service are so well pleased that I hardly see how you can take it away from them. This is a city of 2,500 population, and the residents here believe that they are as much entitled to free delivery of mail as are the residents of larger cities and those who reside in the country. Our city carrier serves more than twice as many patrons as any of our six rural carriers and does it at but little more than one-half the expense of one rural carrier. I believe the free delivery of mail here has also resulted in an increase of receipts, although I can not furnish facts to substantiate this opinion.

Hon, Thomas S. Butlers, representing Spring City, Pa., pre-

Hon. Thomas S. Butler, representing Spring City, Pa., presents a letter from Mr. G. C. Williams, who writes:

sents a letter from Mr. G. C. Williams, who writes:

Pursuant to the Inclosed letter will say the village delivery service in Spring City is going along very fine. The people are highly pleased with it and would not want to go back to the old way, coming to the office for their mail. They have taken a deep interest in it.

Council have placed signs at the intersection of all streets. The citizens have had their houses numbered and a great number have placed receptacles for their mail.

We are deliverying over 20,000 pieces of mail monthly, serving 676 families, approximately 2,800 people, at a cost of a fraction over \$1.77 per year per family.

Whereas we have three rural routes eminating from this office serving 1,500 patrons, or 325 families, at a yearly cost of \$10.05 per family.

Surely this is a great showing in favor of village delivery, taking an economical view of it, and the citizens of this place would greatly deplore the abolishing of the service.

Hon. John R. Fare, representing Peckville, Pa., offers an in-

Hon. John R. Fare, representing Peckville, Pa., offers an interesting letter from Miss Nora L. Pickering, who writes:

teresting letter from Miss Nora L. Pickering, who writes:

I am indeed very glad to be allowed to tell you of the success of the free delivery of mail under the experimental, or village delivery law, at this office. We can not be termed a small village, as we serve a apopulation of 7,000 and cover an area 3 miles in length and 2½ in breadth, and since the establishment of delivery here—August 15, 1913—we have reached every part of this territory twice daily. By comparison we handle more mail and give better service than the average city carrier at very much less expense to the department. Many of our patrons are 2 miles from the office, and the delivery to them has been the greatest boon. The loss of it would be a calamity you can not realize. They can not be served from a rural free-delivery route, as there is not one in this section.

The gross proceeds from this office for the three quarters of the fiscal year show a gain over that of last year of \$224.05. Considering that the revenue from box rent is lessened by carriers and that parcel-post rates are so much cheaper, this increase is definite and decided.

Hon. A. Mitchell Palmer, representing Palmerton, Pa. trans-

Hon. A. MITCHELL PALMER, representing Palmerton, Pa., transmits a letter from Mr. W. H. Gruber and a resolution signed by the burgess and councilmen, which is indorsed by several hundred citizens.

Mr. Gruber writes:

Aft. Gruner writes:

I beg to assure you that it has so far been so very successful that the patrons view with alarm any prospect of it being abolished. I have informed some representative citizens of this town of the import of your communication upon which they declared themselves ready to send on a strong protest against the proposed action. * * * The receipts of this office for the month of December, 1913, were \$962.86, against which was charged the running expenses of the office, which amounted to \$396.80, which includes \$100 paid for earrier hire, netting the department \$566.06 ment \$566.06.

The resolution signed by the burgess and councilmen of Palmerton reads:

Realizing that the discontinuance of this experiment would be a decided detriment to the growth and general welfare of the borough; and Appreciating that not only the business of the post office but of the town generally has benefited by it, and that its discontinuance would be a step backward in our otherwise steady and rapid progress: Therefore be it

Resolved, That we the undersigned members of Borough Council of Palmerton, in special session assembled, authorize the circulation and presentation to the Post Office Department of a petition requesting that the delivery be continued.

Hon. John J. Casey, representing Freeland, Pa., writes:

Replying to your favor of December 29 in reference to the experimental service at Freeland, Pa., permit me to say the patrons of the Freeland post office are well pleased with the service they are receiving, and I know they are looking forward to the extension of the present service, and will be greatly disappointed if it is discontinued on July 1 as contemplated.

Hon. Andrew R. Brodbeck, representing Wrightsville, Pa.,

I find that the village-carrier delivery system now in operation at Wrightsville, Pa., has been highly satisfactory to the patrons of the office, and its discontinuance would undoubtedly be met with emphatic protest of disapproval.

From Ephrata, Pa., which is in my congressional district, there have been received encouraging reports as to the experi-

mental mail delivery. There is submitted a news item from the Ephrata Reporter, which says:

In this borough the free delivery system has been in operation for more than a year and it is proving a great success. Two men are employed making deliveries. They go the rounds of the borough twice a day, delivering and collecting mail matter. Postmaster Lightner said that since the free delivery has gone into effect the receipts have increased more than \$100 per month.

Hon. WYATT AIKEN, representing Belton, S. C., forwards a letter from W. C. Clinkscales, who says:

Yours inclosing letter of Congressman Griest is received, as to how we like experimental delivery of mail at third-class offices.

The service at this place is working finely and giving entire satisfaction. In fact, we do not see how it can be dispensed with without the people being greatly displeased. Beg to advise that Post Office Inspector Morganroth has just made an inspection of the service at this office and by reference to his report you may see how the plan is working here. Hope the service will be made permanent and extended, for we need another earrier here now and could use one to advantage.

Hon. EBEN W. MARTIN, representing Gregory, S. Dak., submits several letters which are somewhat similar to scores of letters which have been received, but four of these letters so ably state the facts that I take the liberty of printing them.

Mr. Fred Huston writes:

Mr. Fred Huston writes:

Yours received concerning the free delivery service in our town. I think this is the most satisfactory all-around convenience the department has installed. It certainly is a paying proposition, for during the year 1912 we had a rush here on account of the filing of Mellette and Todd County lands, and our postal receipts for 1913 are about the same as the year 1912. We honestly believe that this is due to the free delivery. People write more and subscribe for more papers and magazines when they can have them delivered at their door regularly. Our patrons have remarked that they could not live without the city delivery now, and to dispense with it would be a great inconvenience and disappointment to them. I talked to several of the business men here. I am inclosing letters they have written urging the continuance of this service, as they think it so necessary to the town.

Mayor F. W. Thomas says:

Since the establishment of the free delivery of mail in Gregory it has become incorporated into and made a part of the city's business life. It is as important in a town the size of Gregory as the rural free delivery is to the rural communities and has become just as necessary to the business life of Gregory as the rural delivery has become to the farmers. I feel that from my position as mayor of the city I can truthfully say that it is one of the greatest progressive movements which has been made by the postal department. From inquiry from people who have the delivery here I am satisfied that they feel that it is one of the greatest movements and improvements in mall service in years.

O. M. Burch, Esq., writes:

O. M. Burch, Esq., writes:

There are innumerable reasons why the citizens of Gregory—and, for that matter, all other towns of similar size—abould have this benefit from the department. Since becoming accustomed to having our mail delivered at our desks I have learned to appreciate it more and more as time goes by. It saves time and is highly convenient. By this method of receiving our mail I find that I am saved much time and can avoid the usual and necessary jam in the post office during mail hours, which often caused undue haste on the part of the office force, and lessens the chances and opportunity for mistakes. Why should the business men and citizens in general of Gregory be discriminated against, while the more sparsely settled districts—namely, the country people—have their mail delivered? Surely the people of a town the size of Gregory pay as much toward the maintenance of the department as the country districts. It seems, therefore, that the city people should have the same treatment, and we are asking no more than an equal right and share in the service of the department, and it is hoped that you will do your best to maintain the service in the city as it has been during the past year. Without going further into detail, will simply say that I consider the patronage which the service has received in Gregory sufficient of itself to prove the practicability of the service and the desire on the part of the people to retain it.

Mr. J. M. Hocker writes:

Mr. J. M. Hocker writes:

With reference to the free mail delivery in Gregory, beg to say that in my opinion the service has become almost indispensable. It is so convenient and practicable that it would certainly be a setback to our people to have it discontinued. I have talked with many of our townspeople on this subject, and every one of them is very much, like myself, increasingly aware of the benefits of the service and the good it is doing the town. It would be a serious mistake to do away with the service, as it is about the only real convenience the Government has instituted for the small town.

Hon. Charles H. Burke, representing Miller, S. Dak., presents a letter from Mr. F. E. Saltmarsh, who says:

Those who have mail delivered appreciate the service very much, and say they could not now get along without it. Patrons have put up mail boxes and seem to think they have a vested right in the Post office Department which they would very much dislike to relinquish. As the service has been running here less than six months, comparisons can not be made to be of any value.

Hon. SAM R. SELLS, representing Elizabethton, Tenn., expresses approval of the service, and says:

I would very much dislike to see this service discontinued now.

Hon. James Hay, representing Berryville, Va., presents a letter from Mr. B. F. Foley, who writes:

I must advise you that this service is in every way a success, and the people are very much pleased with it. As for myself, I think it a wonderful benefit and service.

Hon. C. Bascom Slemp, representing Marion, Va., submits a letter from Mr. R. A. Anderson, who says:

letter from Mr. R. A. Anderson, who says:

The service is popular and highly appreciated by our patrons. As evidence of this, box renters are giving up their boxes in order to get the benefits of the service. The service was established for 12 months and it will be a great disappointment to our people if it is discontinued. The town council has gone to considerable expense to number the houses and meet all the requirements of the department in the establishment of the service. The receipts of the post office have grown since the establishment of the service, they being larger during the last quarter than for any previous quarter in the history of the office. We hope you will use your best efforts to maintain and make permanent this service, which has become quite indispensable to our people.

Hon. Henry A. Cooper, representing Evansville, Wis., informs

No complaints of the service afforded by the experimental test in Evansville have come to me from residents of that city, and therefore I presume that it is giving satisfaction.

Hon. John M. Nelson, representing Dodgeville, Wis., has offered a most interesting statement from Mr. Emery Bray. It

reads:

In compliance with your request, I am making a report of the experimental city delivery established in this city a short time ago.

The city delivery has given the utmost satisfaction, and I never saw anything that is being so thoroughly appreciated as the mail delivery has been in this city. I will give you a list of the following benefits that have been derived from its establishment here:

(1) It has increased the receipts of the post office here, and some months run from 12 to 15 per cent more than last. For example, September, 1912, the receipts of the stamp window were \$409 and this year \$554, a difference of about \$150, while the cost for the city delivery for that month was only \$100. The receipts for the last month were \$100 more than one year ago, etc.

(2) We find that a great many more families take daily papers than before the mail delivery was established, because now they have their mail waiting for them at the door when the miner or the laboring man gets through work. Before the free mail service the mail would remain in the office until Saturday night and no interest was taken in daily papers.

in the office until Saturday night and no interest was taken in dany papers.

(3) The mail delivery has caused many local improvements, such as new cement sidewalks, tree courts, and a local pride such as never before. For a number of years the city council has been trying to get good sidewalks on certain streets without success until the delivery was started, and now they are auxious to have sidewalks, as it is necessary to get their mail delivered.

(4) Our carriers do register and money-order business, collect on C. O. D. parcels, deliver all parcel-post packages, delivery three times a day in the business section and once a day in the residence section. Everything is brought right to the door of the patrons of this office, and we hear compliments every day on the service.

(5) Collections are also made when all deliveries are being made, which is a splendid benefit to patrons of the office.

(6) I have held personal conferences with business and professional men, and we have taken up the advantages of the service from their standpoint, and they are very well pleased with the new service and all sincerely hope that Congress will see its way clear to make the service permanent in all such places as Dodgeville, especially when this office turns in a net profit of nearly \$4,000 a year to the Government.

Hon, Thomas F. Konop, representing Kewaunee, Wis., writes:

Hon. Thomas F. Konop, representing Kewaunee, Wis., writes: In reply I will state that while I was at home this summer I found that the citizens were pleased with this delivery and enthusiastic over it. Hon. John J. Esch, representing New Lisbon, Wis., also

I visited New Lisbon some months after this new service became effective and made inquiries as to its operation. I was gratified to learn that it gave universal satisfaction, and one letter carrier was able to make the necessary deliveries in both the business and residential sections. To deprive the citizens of New Lisbon of this service, after having enjoyed it for a year and a half, would be as disastrous as to deprive the patrons of any rural route of free-delivery service.

The Postal Service appropriation bill as reported from the Committee on the Post Office and Post Roads carries an aggregate of \$305,000,000 for the ensuing fiscal year. The amount recommended is greater than the aggregate required for the yearly maintenance of the State, War, Navy, and Agriculture But there is ample justification for this great Departments. appropriation.

Last year the postal receipts were \$266,619,525, and the continuing growth of the mail business, together with the development of the parcel-post service, warrants an estimate that the revenues will about equal the appropriation proposed. These revenues of the postal service are derived from direct payments to the Government by the people, and as the postal service is not operated as a means of money-making, it is therefore eminently proper that the money received in the form of postal revenues shall be appropriated and used for the public benefit.

From 1903 to 1913 the postal receipts have increased from \$134,224,443 to \$266,619,525. In 1903 the excess of expenditures was \$4,560,044, and in 1913 the excess of receipts was \$4,551,984. During these 10 years great progress has been made in postal New and modern methods have been installed; betterments. the service has been greatly extended, and to-day the United States has a postal establishment which is not outranked in magnitude or general efficiency.

A wonderful development has produced the splendid system of Railway Mail Service; the City Delivery Service; the Rural Delivery Service; and these have proved valuable adjuncts to the growth and public welfare of the Nation. Still more recently have come into existence the postal savings bank and parcel-post systems. Much to the surprise of many Members of this House, it has been announced that the postal banks have been operated at a loss of about \$1,000,000 since the establishment of the system. But as yet the workings of the parcel-post and postal-bank systems are largely experimental, and it is too early to determine the results. The postal banks have not proven popular with the great masses of our people, and the system may or may not be the boon prophesied. With the parcel-post service and its comparatively economical rates, the

new system has met public favor. Three things are foreshadowed—that in the next several years the parcel-post service will have a tremendous growth; that it will create a great increase in the number of Government employees under the supervision of the Postmaster General; and that there must be wise, sound, and businesslike administration of the service.

The development of the parcel-post service has increased the burdens of those engaged in the transportation of the mails. As an illustration, the rural mail carriers are subjected to greater responsibilities, and with increase in the weight limit of parcels many of these carriers are confronted with serious questions as to how they are to handle the articles sent by mail. Some means should be devised to fairly compensate the rural carriers for the increasing weights of mail matter which they are compelled to transport over their routes. Many of the carriers have been able to deliver the mail by using motorcycles and light vehicles, but to carry the parcels they are being compelled, in many instances, to use heavier wagons, and with the increased weight limit carriers driving one horse will be forced to use a double team and pay the expenses thereof.

Great as have been the improvements, there are still many difficulties confronting the officials of the postal service, and the organization of the department is inadequate to thoroughly cope with the many new problems. Questions affecting the operation of the postal-bank and parcel-post systems are yet to be solved and the supervisory officials must study conditions while at-tending to an ever-increasing flow of current business.

The parcel-post system has resulted in a greater demand for a simplification of the present money order or for the issuance of a postal note for the easier transmission of small sums of money by mail within the limit of \$10.

Postage rates are the subject of frequent discussion, and changes in the rates have been but infrequently made. general tendency has always been toward reductions whenever possible. Under the general authority providing for the operation of the Parcel Post Service the Postmaster General is authorized to readjust the parcel-post rates, with the consent of the Interstate Commerce Commission, and the rates have been accordingly readjusted and reduced. No authority is, however, imposed in the department for the readjustment of the rates for other kinds of mail matter, and such changes can only be made by congressional action.

In recent years there has developed a growing demand for a reduction in the first-class or letter-postage rate. There is merit in the arguments advanced, as the Government makes a profit of fully sixty or seventy millions of dollars out of the letter-mail business. I am in sympathy with the movement for a universal 1-cent postage rate, and wish it were possible for Congress to authorize such rate, but upon an examination of the figures showing the receipts and expenditures for the several classes of mail matter it is convincing that Congress would not be warranted in making a universal reduction at once.

Conditions demand, however, that some reduction in the letter rate be made, and it is imperative that the authorization be made without delay. As a feasible proposition I introduced in the Sixty-second and reintroduced in the Sixty-third Congress House bill 7473, which provides:

That upon all mail matter of the first class postage shall be charged at the rate of 2 cents per ounce, or fraction thereof, on a letter weighing 1 ounce or less, and for each additional ounce or fraction thereof there shall be charged 1 cent; but on drop or local letters postage shall be charged at the rate of 1 cent per ounce, or fraction thereof, including delivery at letter-carrier offices where the system of free delivery is established: Provided, That the postage be fully prepaid by stamps affixed to said mail matter.

There is no sound reason why a local delivery or so-called drop-letter rate of 1 cent an ounce, or fraction thereof, should not be at once authorized in cities having carrier service, as that rate now prevails at post offices which do not have carrier service. The Government now makes fully 150 per cent profit on the handling of drop letters in the cities.

The second feature of House bill 7473 makes the rate 1 cent for each additional ounce instead of 2 cents for the additional ounces when a letter weighs more than 1 ounce. For the single ounce or less the rate would continue to be 2 cents in the case of letters which have to be transported from one post office for delivery at another post office. These two features which I have proposed will give the people a reduction in the letter rate; and, as the change would not involve ten millions of dol-lars, the benefit would serve to increase the postal revenues by increased volume of mail matter sufficient to make an equitable

would be neither satisfactory nor economical, as the scheme failed in operation as a part of the postal savings bank system. But there is question as to the propriety of sending large wooden boxes of mail, and the rights of no Member would be harmfully abridged by a limitation of the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the privilege as proposed in House bill 2025, which I introduced by the House bill 2025 and the Ho in House bill 2935, which I introduced some months ago. It provides that the use of the franking privilege shall be limited to the mailing of official correspondence not exceeding 4 ounces in weight and to the distribution of copies of such speeches and documents as are printed by order of Congress

One humane feature of the bill now before the House is that which provides indemnity in the cases of post-office clerks, carriers, and rural carriers, who may be injured or killed while in the performance of their duties. For some years such relief has been extended in the case of railway-mail clerks, and it has not proven expensive. The rapid increase of labor-saving devices in the post offices and the increased dangers to carriers who must traverse the public highways both in the Ciry and Rural Services enlarges the justification for the proposed legislation. The law will provide an indemnity for the families of faithful employees who are injured or killed while on duty, and the proposition should be supported by every Member of the

Mr. MOON. Mr. Chairman, I yield 40 minutes to the gentleman from Illinois [Mr. FOWLER].

[Mr. FOWLER addressed the committee. See Appendix.]

Mr. MOON. Does the gentleman desire to use some of his

Mr. SAMUEL W. SMITH. I will, if the gentleman wishes me

Mr. MOON. I will Maryland [Mr. Lewis]. I will yield one hour to the gentleman from

Mr. LEWIS of Maryland. Mr. Chairman, in approaching the subject I propose to present to the House to-day, the telegraph and the telephone agencies of the country, it is appropriate, I think, that they should be treated not as mere ephemeral incidents of legislation, but with a view to those more fundamental truths which determine our actions in disposing of the most serious problems of government.

What is the relation of the public and the post office to the telegraph and the telephone, those great agencies of communication between the people, which now equal, if they do not eclipse, the postal system in the taxes levied upon national communication?

Do they differ from the post office in the function they perform; and if not, how do they differ from industrial activities consigned by general consent to private control? Is there something in their nature which distinguishes them from the farm and the retail store, some difference which reaches the dignity of a principle of classification, assigning one to the domain of postal action, while leaving farm and store to the field of competitive control?

Mr. Chairman, there is a science of political economy; it speaks with an authority, not to say with a thoroughness of analysis and breadth of view, which I could not claim. It speaks, too, with a responsible sense, a knowledge, of those perplexing varieties and complexities of modern society and industry. It knows that society has never governed itself well with merely a single truth or principle, whether it be laissez faire manualified individualism societies as a communication that faire, unqualified individualism, socialism, or communism; that society is not a one-idea or a one-fingered institution, but possesses aspirations and organic attributes and powers which it is its duty to utilize to promote its welfare. Now, what does it say on the subject before us, first as to the natural division defining those activities which should and those which should not, on economic and social grounds, be assigned to the control of the individual? I quote from the work of Prof. Adams, "The State and its Relation to Industrial Action":

CLASSES OF INDUSTRY.

All industries fall into three classes, according to the relation that exists between the increment of product which results from a given increment of capital or labor. These may be termed industries of constant returns, industries of diminishing returns, and industries of increasing returns. The first two classes of industries are adequately controlled by competitive action; the third class, on the other hand, requires the superior control of State power.

Omitting in the necessary brevity of this address his analyses of classes 1 and 2, of which the retail business and the farm are quoted as examples coming under the effective control of com-petition, I shall quote his statement as to class 3, which does not, but is monopolistic:

THIRD CLASS-INCREASING RETURNS.

The peculiarity of those industries belonging to the third class, which we now come to consider, lies in the fact that they conform to the law of increasing rather than to the law of constant or decreasing returns. The increment of product from an expanding enterprise is greater than 1910 its receipts were \$130,145,874, and expenditures \$107,-

the increment of capital and labor required to secure its expansion. Adopting the algebraic formula, as before, if 2x capital give 2y product, an economic application of 3x capital will give more than 3y product, an economic application of 3x capital will give more than 3y product, an economic application of 3x capital will give more than 3y product, and economic application of 3x capital will give more than 3y product, and economic application of 3x capital will give more than 3y product, and economic application in formula and application in formula and application in the section is that where the law competition is powerless to exercise a healthy regulating influence. This is true, because it is easier for an established business to extend its facilities for satisfactorily meeting a new demand than for a new industry to spring into competitive existence. Such businesses are by nature monopolies. We certainly deceive ourselves in believing that competition can secure for the public fair treatment in such cases or that laws compelling competition can ever be enforced. If it is for the interest of men to combine, no law can make them compete. For all industries, therefore, which conform to the principle of increasing returns, the only question at issue is whether society shall support an irresponsible extra-legal monopoly or a monopoly established by law and managed in the interest of the public. In this latter way may the benefits of organization in the form of monopoly be secured to the people, and in no other.

Now, sir, what is meant by the "benefits of organization in the

Now, sir, what is meant by the "benefits of organization in the form of monopoly"? Briefly, it is that the product per unit of labor and capital employed, the result per dollar expended, will be greater because, say the political economists, such a monopoly admits:

a. Unity and exclusiveness of organization;

b. Details of management being well worked out:

- c. Facility for extension by mere duplication of existing structures;
- d. A social demand for the service which is widespread and constant;

Adequate ability in authority;

- f. Service at less cost than if broken into groups, becauseg. Assured and definite demands for service admit of
 - closest calculations;
 - h. Extent of demand admits of most minute divisions of labor;
 - i. Absence of rivalry reduces to a minimum the capital and expense necessary for performance of the service; j. Speculative management is eliminated; and

k. Thus, with the public-service motive,

1. The maximum of output per unit of expenditure is rendered possible.

THE PUBLIC-SERVICE MOTIVE.

Mr. Chairman, what is meant by the private-service motive? Well, briefly quoting from the political economists again, they say that with a monopoly the degree of social service to be rendered, the output, is a question of the motive active in its finan-

Private financiering: A private business is managed to secure a profit, and, other things being equal, the higher the price secured for any service rendered, the higher will be the profit. The rule of private financiering therefore is to maintain the price of goods or services at the highest price which has no tendency to curtail profitable business. Public financiering: The rule of public financiering, on the other hand, conforms to an altogether different principle. It is the purpose of government to render services at the lowest price consistent with efficient service. Price equals cost. This is true, because the State, being the manager of the business, has no motive in acquiring riches.

Ever if private persons possessed an absolute monopoly yet.

Even if private persons possessed an absolute monopoly, yet they must fail to render the greatest public service, because the public-service motive would be absent. They would naturally conduct the monopoly with the object of profit, and usually the higher the price charged the greater the profit. An illustration of this may be given: The Chicago & Milwaukee Telephone Co., doing business between those cities for many years, charged a rate of 15 cents for 10 words, and 1 cent per additional word. After the American Telephone & Telegraph Co. secured control of the Western Union, it managed to gain control of this lesser company, and raised its rates to 25 cents and 2 cents per word. Under the low rate in 1909 the service rendered the public amounted to 103,248 telegrams. In 1912 under the 25-cent rate the number of telegrams fell to 57,089. By this raise in the rate the Bell Co. gained the salaries of two operators and two messengers, whom it was able to discharge, by reducing the service to the public one-half. But by the same proceeding it raised the productive cost per telegram from about 14 cents in 1909 to 24 cents each in 1912.

What the Bell Co. did in that case was according to the rule of private financiering. Under postal control, and the public-service motive, the 15-cent rate, while it paid expenses—and it did-would have remained to insure the maximum social service. There is no such motive unless the public or the postal

system is itself owner—

Mr. MADDEN. How does it operate in England, then?

Mr. LEWIS of Maryland. In what respect?

Mr. MADDEN. The gentleman says it has only one motive, and that is to serve the public. How did it get along there; did it make any money, and did it serve the public?

Mr. LEWIS of Maryland. I want to say that as a whole the English postal system is the most profitable in the world. In 1910 its receipts were \$120.145.874, and expenditures \$107.

815,457 in round numbers, showing a surplus of \$22,330,417. If the gentleman refers to the telegraph, then I wish to suggest that its personnel is not separated from the postal personnel; their efforts are devoted to both services.

Mr. MADDEN. I understood the gentleman was talking about

the telephone service.

Mr. LEWIS of Maryland. And the telephone service can not be fully segregated, either. The only way to judge the efficiency of the postal institution is by its total results. You can not segre-

gate the mail, telephone, and telegraph expenses satisfactorily.

But to resume with the rules of private and public financiering. I am able to give an illustration of the public or Postal Service motive. The parcel-post rates on local and the 50 and 150 mile zone in April last were 1, 3, and 4 cents a pound, respectively; and the number of shipments for two weeks in April last at these rates, from 1 pound and up, was 1,047,954, bringing a revenue of \$133,530.06, of which \$78,028.14 was profit. The Postmaster General, with the approval of the Interstate Commerce Commission, reduced the rates from 1, 3, and 4 cents to a half cent on the local and to 1 cent a pound on the others, and as a result the traffic leaped up 61 per cent in October. The rate was reduced thus from 12.7 to 8 cents per average package in these zones; and yet after allowing 8 cents a tomile to the carrying railroads, which is more than the express companies pay, the profit in October was still \$36,239.53. Mr. Chairman, it was just as natural for the Postmaster General, acting under the rule of public financiering, to make these reductions, when he found them feasible, as for the Bell management to raise its telegraph rate from 15 cents to 25 cents; and it was just as natural under the well-known laws of monopoly economics that the traffic should increase 61 per cent in the parcels as it was that the traffic in telegrams should fall 44 per cent. In the case of the parcel you have a public-service efficiency that has been raised 61 per cent, while in that of the telegram the service efficiency has been lowered nearly half.

OPERATIVE EFFICIENCY. Mr. Chairman, this brings me to the point of operative efficiency. There is a widespread conviction that public operation is inefficient; that is, that employees will not work as earnestly for the public as when supervised by the self-interest of a private employer. Doubtless this is true in some kinds of employment. But there is a broad and fundamental exception; it consists of those monopolies in which the quantity of work to be done by each employee can be systematically measured out in advance and assigned to him each day. Such, for example, is the rural and city carrier with his scheduled route and de-liveries, and so almost the whole Postal Service. Such, too, are the tasks of telephone and telegraph operators and messengers, for when the flow of traffic becomes known the working capacity of each in number of calls and of telegrams per hour may be determined in advance, and the failure of a delinquent to "make good" practically checked. So this objection of malingering does not apply to the postal institution, whatever its merits when applied to some other public employments.

That this distinction proves true in practice is seen in the case of the telephone. The product per average employee of the Bell system in 1912 was 58,000 calls, while that of the public telephone employee in Norway in 1910 was 147,000 calls

Mr. SHERLEY. Does the gentleman mean by that that he thinks a Norway operator of a Government-owned telephone is

very much superior to an operator under the Bell system?

Mr. LEWIS of Maryland. No; but I do mean that the institutional efficiency of the system in Norway, measured in terms of product and personnel units employed to obtain it, is that much greater. It is the low rates in Norway, averaging less than a half cent a call, which account for the high efficiency of its employees. If the rate is but a cent I use the phone freely. If it be a nickel or a dime I use it sparingly. Norwegians can fully employ the service, and so the plant and the personnel are utilized to the maximum and not left in idleness.

Mr. SHERLEY. I may not quarrel with that conclusion, but the gentleman started out to demonstrate the fact that the general impression that Government employees did not do

as much work as private employees was not true.

Mr. LEWIS of Maryland. Where the work can be assigned and checked-

Mr. SHERLEY. I want to know if he thinks it is true? Mr. LEWIS of Maryland. Where the work can be standardized and measured out in advance the institutional product per telephone and telegraph employee is higher for the postal systems. In fact, the Bell system ranks but ninth and our telegraph companies about the lowest in such institutional efficiency. But as this is so important a feature of the discussion, I shall take up all three—the mail piece, the telephone call, and the telegram-and submit the comparative operative experience of the different countries.

Telephone operative efficiency.

	Country.	Phone calls per em- ployee per annum.	Rank.	Postal units per em- ployee per annum.	Rank.

In the column for phone efficiency the long-distance or interurban call is included and rated as equal to four local calls in its demands upon the personnel. The column for postal efficiency is inserted to show the performance of the postal personnel. For this purpose the Postal Service unit is treated as the average mail piece and the telegram as equal in service to 10 mail pieces, while the local call is rated as equal to one-half mail piece, or unit, and the interurban as equal to two mail pieces. All kinds of employees of the telephone and post are included in the statement. While these service valuations are only assumptions, it is believed that they are approximately accurate, and certainly in no case unfair to the phone service, as may be seen in the cases of Norway, Russia, and Belgium, where the phone performances per employee reach as high as 146,854, 114,669, and 98,715, respectively.

Thus, among 16 countries our postal system ranks first, while the Bell system ranks but ninth in operative efficiency. has reference purely to the amount of institutional product per unit of labor, which is the correct functional test, I take it.

Mr. SHERLEY. I am prepared to admit you may get a higher percentage on your basis, because of a more constant demand, but on the broad proposition that the individual in private employment does not do as much work as a Govern-

ment employee I would dispute the gentleman— Mr. LEWIS of Maryland. I understand the distinguished gentleman. Where the work is not standardized and the amount of the product required, or the task, can not be specifically defined, the self-interest of a private employer may be necessary to make the laggard do his part. But the point I make is that a régime of postal monopoly in the telephone and telegraph services permits of defining the tasks; so that society, as a model employer, can give the worker proper conditions and yet so organize and direct him as to secure a greater average prod-uct than the private employer. The telegraphic institution sup-plies another illustration of this principle. I call the attention of the House to the following list of processes through which the telegram goes in the United States

HANDLING OF COMMERCIAL MESSAGES.

THE TELEGRAPH COMPANY.

Figures charges on telegrams.

Figures charges on telegrams.
 Rends each message for purpose of properly deciphering it.
 Marks on each message "time filed."
 4a. Enters each telegram on sheet "receiving clerk's record."
 Turns in cash to local cashier.
 Puts time sent, numbers, sending and receiving operators' signals on telegram.
 Sc. Checks off numbers on number sheet and initials sheet.

RECEIVING OPERATOR.

9. Receives and transcribes telegram on proper blank.
10d. Checks off number on number sheet and initials opposite the

DELIVERY CLERK.

11e. Makes wet copy of telegram.
12f. Puts delivery number on telegram.
13g. Makes out delivery sheet for messenger.
14h. Enters telegram on "delivery clerk's record."
15. Incloses telegram in envelope and addresses envelope.
16i. Examines delivery sheet to see telegram is properly receipted

for. 17j. Collects cash from messenger to cover "collect received" tele-

18k. Turns in cash to local cashier.

MESSENGER BOY.

19. Delivers telegram to proper addressee.
201. Secures receipt for telegram on delivery sheet.
21. Collects cash on "collect" telegrams.
22m. Returns delivery sheet and cash to delivery clerk.

RECEIVING OPERATOR (RELAY POINT)

23. Receives and transcribes telegram on proper blank. 24n. Checks off number on number sheet and initials sheet. SENDING OPERATOR (RELAY POINT).

25. Sends telegram.
260. Times telegram, etc.
27p. Checks off number sheet.
Here, then, are 27 acts or processes, for 16 of which (the lettered ones) an argument of elimination might well be made with the introduction of the stamp and other simplified postal

But whatever may be thought of the susceptibility to elimination of half of the above items, it is believed that the following, all accounting processes, would give way under public management to the prepaid or postage-due stamp. We find it safe to intrust nearly three hundred millions of postal revenue to such stamps now stamps now.

OPERATIONS IN THE ACCOUNTING DEPARTMENT.

CASHIER (LOCAL).

- Checks up and balances "receiving clerk's record" of messages.
 Checks up and balances "delivery clerk's record" of messages.
 Checks up and balances money-order clerk's sent-and-received 3. Checks up and balances and weekly or monthly bills of customers for messages.

 5. Turns over above four accounts to bookkeeper.

 6. Checks up receiving clerk's record, branch offices.

 7. Checks up delivery clerk's record, branch offices.

BOOKKEEPER (LOCAL).

- BOOKKEEPER (LOCAL).

 8. Records cash received, daily receiving clerk's record.

 9. Records cash received, daily delivery clerk's record.

 10. Records cash received, "sent" money orders record.

 11. Records cash received, "received" money orders record.

 12. Records cash received, receiving clerk's record, branch offices.

 13. Records ash received, delivery clerk's record, branch offices.

 14. Records all charge accounts.

 15. Records payment of charge accounts.

 16. Makes out weekly balance sheet.

CHARGE ACCOUNT CLERK.

- 16. Makes out weekly balance sheet.

 17. Makes out charge accounts (weekly and monthly).

 18. Balances with bookkeeper.

 19. Sends out bills of charge accounts.

 AUDITOR'S OFFICE (LOCAL).

 20. Balances with cashier "ceciving clerk's" record.

 21. Balances with cashier "delivery clerk's" record.

 22. Balances with cashier receiving clerk's record, branch offices.

 23. Balances with cashier receiving clerk's record, branch offices.

 24. Checks up number sheets of main and branch offices.

 25. Keeps book record of branch office receipts.

 26. Inspects "sent messages" to see that they all bear number, time, and operator's signature.

 27. Makes daily record of messages on forms supplied for "Sent paid," "Sent collect," "Received paid," "Received collect," for public, press, and Government accounts.

 28. Statement of Government messages sent paid, for Government, for general auditor.

 29. Statement of Government messages received paid, for Government, for general auditor.

 31. Statement of Government messages received collect, for Government, for general auditor.

 32. Statement of messages upon which there are other line tolls, for general auditor.

 33. Makes daily check sheets for each city (amount of tolls).

 34. Makes statement of "deadhead" messages.

 35. Makes monthly statement of uncollected messages.

 36. Sorts all messages as "cent paid."

 38. Sorts all messages as "cent paid."

 39. Sorts all messages as "cent paid."

 39. Sorts all messages as "cent paid."

 30. Sorts all messages as "cent paid."

 31. Statement of olis on each message.

 42. Figures amount of tolis on each message.

 43. Answers all check-error sheets.

 44. Makes daily statement of "sent" press matter.

 46. Makes daily statement of "received collect." press matter.

 47. Counts number of words in "sent" press matter.

 48. Counts number of words in "received collect press matter.

 49. Makes daily statement of "received collect press matter.

 40. Makes daily statement of "received collect press matter.

 41. The pressure of the pressure of the press

If it is objected that all these are very little things, let it be remembered that so, too, is the telegram; and that if it is to be loaded down with an accounting burden only to be compared with the accounting applied to a carload lot of freight in railway transportation, as the express companies have done with their packages, the 25-cent minimum of the railway and of the express company and the like minimum of the telegraph company become logical enough, even if economically indefensible for a mere electrical letter.

It is exactly accurate to say that merely affixing the stamp to the letter replaces these 47 accounting processes with the individual telegram under postal practice; that is, the Postal System realizes the first great canon of a publicly financiered monopoly. Its "details of management have been well worked out."

This is, indeed, one of the greatest advantages of the postal form of monopoly, and compared with it the operative economy of the express companies and telegraph companies is little less than a joke. Let us compare our telegraph with New Zealand. Naturally these companies do not maintain offices at points

that do not pay, and the result is that the commercial telegraph

has but 12, and yet with less than one-third the traffic per office the postal telegraph employee over there has 10.1 telegrams per day to his credit, while the American institution has but 8. The following table compiled from the experience of these

offices have a traffic of 39 telegrams per day while New Zealand

countries is now presented:

Traffic density and efficiency,

Country.	Telegran plo	ns per em- yee.	Telegrams per operative office.		
Country.	Per annum.	Per day.	Per annum.	Per day.	
New Zealand. Norway. Belgium. United States Sweden. Netherlands. Switzerland.	3,700 3,115 3,063 2,933 2,370 1,607 1,596	10.1 8.7 8.6 8.0 6.6 4.4 4.4	4, 380 2, 097 5, 451 14, 332 1, 495 4, 774 2, 454	12 6 15 39.3 4 13 7	

What boots it that our companies can work their employees longer hours, and can have three times the traffic per office by denying us six-sevenths of the local accommodation accorded in New Zealand, and other postal telegraph and telephone countries.

Mr. Chairman, let me explain the significance of these conditions. Recurring to the analysis of industries placing merchandising in Class I, with its law of constant returns; farming as Class II, because of its law of diminishing returns; and such industries as the post, the express service, and the telegraph and telephone in Class III, under the law of increasing returns; now, what do we find? That in the United States Classes I and II—the store and farm and factory, privately financed, according to their natures, and acting under circumstances of struggle and competition—are unquestionably among the most economically conducted of their kind among nations. That our Postal Service, publicly financed, in spite of our high price levels, is giving rates the lowest prevalent in the world, and possesses the very highest working efficiency, while the two examples of the third class—the telegraph and telephone monarchies like the express companies subjected unparturally monopolies, like the express companies, subjected unnaturally to the rule of private financiering—rank among the very lowest in working efficiency and among the highest in the rates exacted from the public.

THE RATES-TELEGRAPHS.

Mr. Chairman, with the single exception of Japan, our postage rates are the lowest among all countries, and these rates are now more than paying the cost of the service. This under the rule of postal monopoly and of the public financier. There is no real occasion for the lowering of our postage rates, but with respect to the electrical letter, the telegram, the following table gives the rates in other countries where the service is postalized as compared with our own, as also the degree to which such rates permit of use by the people in each country:

Rate and number of telegrams per capito

1 Each telegram. ² Fixed charge per telegram plus charge for each word.

Although we rank first in postal rates, we rank fourteenth and last as to telegraph rates and only ninth in resulting social We have but 1.1 telegrams per capita as against 8 in New Zealand, a country whose social conditions and wage levels compare with ours about as one State in our Republic compares with another.

Mr. MADDEN. I was wondering whether the gentleman attributed the lack of the use of the telegraph to the fact that telephones are in such universal use and in so much more sys-

tematic use than in any place in the Old World?

Mr. LEWIS of Maryland. Well, if you combine the interurban and long-distance telephone messages with the telegrams in the United States, both together amount to 4 per capita, as against the 8 telegrams in New Zealand. Even in low-waged Germany both together number 6 per capita. The cause of the low service is unquestionably the high American charges. Our telegraph rates run from two to four times as high as in postal-

the United States in extent, they have a State rate of 12 cents and an interstate rate of 24 cents, good for any distance, namely, a shilling against a dollar for our extreme distances. The telegram obviously corresponds with the interurban or long-distance telephone talk and not with the local call.

Mr. SHERLEY. If the gentleman will permit, a great deal of the telegraphic communication in England is right in the city;

in London you will find this is so.

Mr. LEWIS of Maryland. Yes; but that is a special condi-tion which does not obtain in New Zealand.

TOLL TELEPHONE RATES.

But, Mr. Chairman, the telephone long-distance rates are even more abnormal than the telegraphs. There has never been any competition as to them and obviously can not be. What is the result? They run from four to eight times the rates prevailing on the Continent of Europe. Here is a table giving the rates for a three-minute conversation:

Continental rates for long-distance compared with square-root formula.

Country.	25 miles.	100 miles.	300 miles.	400 miles.	500 miles.	700 miles.
Sweden	\$0.04	\$0.08	\$0.13	\$0.20	\$0.20	\$0.34
France	.07	.09	.34	.40	. 53	. 53
ItalyBelgium	.10	.19	.38	.38	.38	
DenmarkGermany	.07	.20	.54	.36	.36	. 48
Austria	.12	.31	.38	.38	.38	
Average continental		THE COST	Part Car			
Formula rate	.07	.16	.30	.36	.37	.53
Bell rate	. 25	.60	1.80	2.40	3.00	4. 2

The Bell system toll or long distance rates are based on a scale of 6 mills per mile—that is 60 cents for a hundred-mile conversation. The railways receive an average of 7½ mills a mile for carrying a ton of freight. Gentlemen may realize how weighty their conversation is over one of these wires. It weighs about a ton. [Laughter.] Doubtless the telephone managers honestly think that this rate yields them what private financiers naturally look for—the highest profit—even if it condemns the plant and personnel to comparative idleness. Only 8 per cent of the theoretical time value of our interurban lines is utilized as a result of these prohibitive rates, while in Germany the utilization equals 19 per cent. I say that we do not censure these private monopolists for seeking the highest rate of profit, although their rates are the scandal of public-service rates the world over. But have not the people a right to censure us-the Government-for neglecting to discharge the constitutional function of communication, and subjecting them to less than half services for more than double pay?

LOCAL TELEPHONE RATES.

Mr. Chairman, there are three countries only in which the average charge for a local call exceeds the letter rate. The United States is one of them. In all the others the local rate runs much lower, while in our cities the rate runs with the street-car fare, and is often twice as great

Mr. MADDEN. Will the gentleman tell us, if his figures are correct, why it happens that in England there is only 1.4 telephones and in London 2.8 telephones to every 100 people, and

that it is impossible to get a telephone after 8 o'clock at night?

Mr. LEWIS of Maryland. I will say, in answer, that in
England, up to January 1, 1912, nearly all the local telephone

services were privately managed, the interurban and one exchange in London alone being postalized. The telephone service there now is in a state of transition from private to postal management, the British postmaster general personally told me. However, England is not a fair example of either private or postal management, for neither institution there, in their conflicts with each other, have had a fair chance to do their best. It is true, however, that there are more phones per capita here than anywhere in Europe. That is because in the United States a very much larger percentage of the people are well to do, and in spite of our abnormal rates can afford the luxury of a

Mr. Chairman, I now insert a table giving the average charge per local telephone call for the different countries:

Letter and local telephone rates.

Country.	Rank.	Local rate.	Letter rate.	Letter rate ex- ceeds phone rate.

¹ Belgium, 1911.

Phone rate exeeds letter rate.

Thus the Bell system gives us a rank of fourteenth among 16 countries, although our postal rates virtually rank us first. But our telephone rates are really much more abnormal than they appear in the above table, which represents the average receipts appear in the above table, which represents the average receipts per call and not the tariffs. When they are considered, especially for the greater cities, we find that the subscriber's rate for a service limited to about 15 calls per day is \$228, or greater in amount than the combined rates of London (\$82.79), Paris (\$77.20), Berlin (\$43.20), and Stockholm (\$24.44).

Competition.

Recently this rate raised to \$125; competition presumably removed.

Baltimore and New York limited to 5,400 and 5,700 calls.

In many of our cities, such as New York and Washington, the business phone rate is \$48 for the first 600 calls, or 8 cents a call. You can send a 4-pound shipment from Baltimore to New York for 8 cents, have it delivered, and the postal system makes nearly a cent profit after paying the railway and other expenses. I now insert a table showing the measured service rates for eight American as compared with eight foreign cities:

		Per call,

1 Computed on flat rates.

The rule of the private financier in the United States means local rates about three times those under the postal management of other countries.

COMPETITION.

Mr. Chairman, the recent surrender of the Bell system to dissolution under the antitrust law, which many people believe to have been a mere coup d'état to prevent the effectuation of the Postmaster General's recommendation for postalization, has been accepted in some quarters as possibly containing some relief through the agency of competition. It can not, of course, have such a result on the interurban or long-distance service, because there is no duplication of these lines. Nor can it be now expected to lower telegraph rates in such a way. We have had some of it in the local telephone service, and it may be of interest to ascertain the results. Sir, I now present a table giving the Bell rates for 60 American cities, the letter "C" after the rate indicating the cities in which it has competition:

0.	City.	Popula- tion.	. Rate.

Note.—a denotes measured service, rate computed for 5,703 calls; b denotes Independent Co. rate; all other rates, Bell system; c denotes competition. New York includes Manhattan district only.

The above rates are taken from original sources, and collectively show that 36 cities averaging 202,941 population under no competition, pay \$89; while 24 cities averaging 305,975 population, with competition, pay only \$62. Even where competition is absent there does not appear to be any rational order of rates. Stockton, Cal., with 23,253 population, pays the same rate (\$80) as Des Moines, Iowa, with 86,368, and pays twice as much as Johnstown, Pa., with 55,482 population, and only \$24 less than Cleveland, Ohio, under competition, with 560,663 population.

Now, sir, what do we learn from this experience? Two lessons, I think. First, that even though competition does lower the rates it is ineffective, because to get the benefit of the full service the user has to have two phones and pay both rates. This is so obvious that telephone economists universally con-demn competition as a wrong both to subscribers and telephone capital. The second lesson is equally important, if not quite so The competitive networks could be operated more economically under one ownership. Accordingly, the difference between the rate in a competitive city and a monopoly city gives some measure of the excessiveness of the charge in the monopoly city, where the populations are about the same. Mr. Chairman, by way of summary of the preceding facts I present a table in which the letter, telegraph rates, local and long-distance rates, as well as the efficiency in product per employee, is stated progressively for the different countries, the relative rank of the United States being indicated by a continuous line. (The table is printed on following page.)

Gentlemen, these facts speak for themselves. They distinctly support the conclusions reached by political economists as to the relative efficiency in social service of the public and the private financier, as to a monopoly falling within the domain of the postal function.

Mr. Chairman, rates from two to six times normal is too great a price to pay for the privilege of neglecting to fully discharge our constitutional functions.

Mr. MADDEN. If the statement of the gentleman is correct, I want to ask how it is that in Great Britain there are only 17.7 per cent of messages sent by telephone, 1.8 per cent by telegraph, while 80.5 per cent of messages are sent by mall; and in the United States 58.7 per cent of messages go by telephone, four-tenths of 1 per cent by telegraph, and 40 per cent by mail?

Mr. LEWIS of Maryland. It is a question of social wealth and ability of people to have telephones. But this question naturally brings me to the future of the telephone itself.

THE BENEFITS OF POSTALIZATION.

Mr. Vail, president of the American Telephone & Telegraph Co., has said, "There is a road to every man's house; there ought to be a telephone inside."

This is, I think, a correct ideal, and the parallel is indisputable, but he neglects to observe that it was society, with its public-service motive, that built these roads and not a privately financiered monopoly. We can state without offense that a telephone financier is naturally prone to confine his investments to points yielding the desired profit, and is not inclined to apply any excess profits from such points to other points which do not promise remunerative returns. And so it is that the countryside and the farm which need the service most have received but little attention from the Telephone Trust, but have had to rely mainly for such limited service as they get upon the "farmer lines" or cooperative enterprises.

As a matter of fact, the limitations of the development of our telephonic network by private capital have been practically attained with its extension to the prosperous offices and well-to-do homes of the country. Of the present service, Mr. Vail correctly remarks in the Bell report:

Instantaneous and immediate transmission of electrical communications is as yet a convenience and luxury, although under modern methods of business and commerce it is an economical alternative to the cheaper mail service in business operations. The use of the telegraph may be a popular convenience, but it is not a necessity and is confined still to the comparatively few, and for that reason should be at the cost of the few that find benefit and profit in that use.

In effect, this means that the masses without the wealth to enjoy the luxury, or the commercial affairs to justify the payment of these abnormal rates, must go unserved. But the fathers of the Republic intended that they should be served, and the Constitution directs Congress to make provision as to the great function of communication. And why should they not be served? Does not the farmer need this communication in marketing his products? Does not the town consumer need it, too, to buy from the farmer direct? And when the plain citizen's child is sick does he not need a physician as quickly as his richer brother? The benefits to come from the application of postal rates, extension and efficiency, to electrical communications, "a phone in every man's house," are difficult to describe or even to exaggerate. Certainly all things should be done to make farm life as attractive as may be, and this is at least one of the rational and practical methods.

Relative standing of United States among principal countries with respect to postal, telegraph, and telephone charges, and efficiency of postal and telephone employees. (United States indicated by continuous line.)

If in spite of our distances and nondensity of population we can have mail piece rates among the very lowest, who, in the face of our marked postal efficiency, our experience with the parcel post and the intimate relationship of the telephone and telegraph monopolies, can not see that our Postal System could give us as low rates for the telephone and telegraph as other countries?

Mr. Chairman, I present a statement showing the financial results where the postal institutions are exercising the telephonic and telegraphic functions in connection with the mail. Financial results, receipts, and expenditures of postal systems in respect to mail, telegraph, and telephone services.

Country.	Receipts.	Expenses.	Surplus.

Total	631, 133, 621	506, 798, 404	24,335,217

Such are the results with the postal establishments completely exercising their normal functions. Who can doubt that our so-called postal deficits simply represent the deprivation of those profitable functions which the express companies and the wire agencies for 40 years have succeeded in diverting from our Postal System,

RECEIPTS AND EXPENDITURES.

Mr. Chairman, it may be of interest to ascertain what the budget of 1912 would have been had the telephone been under postal management with the telegraph function superimposed. The Bell figures are actual; the other estimates for the independents, and for the operator and messenger expenses in the transmission of the telegrams.

Bell system, receipts	\$75, 000, 00 199, 172, 15 81, 351, 98	54
Total receipts	355, 524, 14	13

Operation Current maintenance Interest, at 3 per cent on purchase Depreciation, at 5 per cent on purchase	27, 000, 000
Total expenditures	229, 246, 313
résumé.	
Total receipts Expenditures, interest, and depreciation	355, 524, 143 229, 246, 313
Not halango	100 007 000

New Zealand has eight telegrams per capita with her low The above statement assumes that we should have at least three, and that the zone minimum rates, running from 12 to 48 cents, would produce an average rate of 25 cents, the present receipt being over 40 cents. Since there would be no separate telegraph plant, the operator and messenger service would practically comprise the telegraphic expense. The table assumes the present telephone rates, and the surplus roughly indicates what could be safely accomplished in rate reductions. The most careful study convinces me that we could develop telegraph and telephone rates, like our mail rates, as low as in other countries; that is, a cent per local call, a reduction of onehalf in telegraph rates, and rates for the long-distance or toll services about one-fourth of those now prevailing.

METHODS OF ACQUISITION.

Mr. ANDERSON. I merely want to ask the gentleman if he intends to go into the method which he proposes to adopt in taking over these institutions?

Mr. LEWIS of Maryland. Of course, I think all will agree with the statement of Judge Moon, chairman of the Committee on the Post Office and Post Roads, that there is no question as to the right of the Government to acquire the telephone network. It will not be necessary to take over the telegraph lines, Both telegraphic and telephonic messages go over the same wires simultaneously where the communications have been postalized. My judgment, after a year's study, is that the telephone returned; should be condemned and appropriated and the phone network should be condemned and appropriated and the properties taken possession of by the Postmaster General, say, as of January 1, 1915, the rates to be gradually reformed as experience developed the wisest way. The interurban network

represents approximately 200,000 miles of pole line and 3,000,000 miles of wires; the local about 16,000,000 miles of wires, and 8,000,000 phones.

Mr. ANDERSON. I want to ask the gentleman whether his proposition embraces the taking over of what are ordinarily

considered as farmer lines?

Mr. LEWIS of Maryland. Not by statutory appropriation, but by agreement with the Postmaster General. The reason for leaving them to voluntary purchase is that they are mostly cooperative institutions and that their rates are now sufficiently low, less than a half cent per call. They should be allowed, of course, to articulate with the postal system. Is that sufficiently responsive to the gentleman's question?

Mr. ANDERSON. Yes. Now, I would like to ask the gentleman what he would propose to do in a city, for instance, where there was a competing line? I merely ask for information, as

want to get the gentleman's idea.

Mr. LEWIS of Maryland. I believe we should take both. We should not want competition in the telephone business; it is economically unsound and wasteful. The proposition is to take the whole telephonic network. I do not think it would be fair to act otherwise.

Mr. SHERLEY. The gentleman speaks of taking over two competing lines of telephone, because it would not be fair to take one and leave the other. Does the gentleman think the same rule would apply to taking over the telegraph companies, so as not to leave the telephone companies in competition with

Mr. LEWIS of Maryland. The gentleman raises a serious question of public ethics. A telegraph company, let us say, fails to keep up with the progress of mechanical civilization, as elsewhere, and fits itself to discharge only one function, the telegraph message, when it might have added the interurban and long-distance telephone message with proper improvements. Another company builds a network ready for both functions, which the Government, finding fit for postal uses, concludes to purchase. The telegraph company now comes forward and asks to be purchased, too, on the grounds that postal competition would injure it. That presents one question of ethics. The other question of ethics is this: Should the innocent taxpayers of the country be required to go down into their pockets for \$200,000,000 to make good the obsolescent losses of telegraph companies whose owners took their chances with the profits of the enterprise?. I am free to say that the question may be a debatable one, but my conclusion is that we would not be justified.

Mr. SHERLEY. The gentleman has asked me a question. I am inclined to agree with the latter conclusion, but I can see no reason why it should apply in one instance and not apply to the smaller fry in the other.

Mr. LEWIS of Maryland. The question is a close one, I confess. But it is the telephone institution that we propose to take, and not the telegraphs. If we were taking the telegraph, I

should advise taking competing telegraph plants.

Mr. Chairman, I come now to the financing of the acquisition which under the circumstances I can treat only in the most sparing way. In 1912 the outstanding stocks and bonds of the Bell system amounted to \$620,760,654, and according to the last census the Bell system represented 71 per cent of the total telephone capital, and it probably represents more now. This would indicate the total capitalization as being about

Mr. BUCHANAN of Illinois. Has the gentleman any information as to how much watered stock and counterfeit capital there is in that \$621,000,000 of stock of the Bell Telephone Co.?

Mr. LEWIS of Maryland. It seems there is not any water in the capitalization of the American (Bell) Telephone & Telegraph Co. Its officers make this statement with a degree of earnestness which convinces me that its stock does not represent water in any degree.

Mr. Chairman, it is proposed to finance the acquisition by the issue of 3 per cent 50-year bonds. These would not need to be issued in block. While it is designed that the properties be taken on a single day, they would have to be valued by the Interstate Commerce Commission, plant by plant, and they would be paid for as the final awards were found for each distinct company, which would take about three years; meanwhile it is proposed to pay the owners 4 per cent pendente lite, so that their sources of income may not fall them during the period of transition.

Mr. ANDERSON. If my recollection serves me right, there was a proposition to take over the telephone companies in blocks, one block at a time. Has the gentleman considered that proposition?

Mr. LEWIS of Maryland. Yes. At first that looks like the easy way, but I have concluded that it is not the wisest way, for reasons I do not now have the time to state.

THE PERSONNEL

One of the reasons is that it would have a tendency to disturb the working organization of the personnel, of which the Bell had about 140,000 in 1912 and all companies about 200,000. It is, of course, proposed to take over these employees with the properties and put them under the civil service. may think they see danger in this addition to the Government service. Let me say over half of these are girls, and that experience shows that they remain only from three to four years in the exchanges when they leave to get married, so that in four years the exchange operators have to be almost completely replenished. This is a circumstance of the greatest importance. The "automatic" or girlless phone has come, and is going into general use abroad and even here. It means that the personnel will be cut down by nearly half, since the subscriber makes his own connection in a simple and effective way. I have heard complaints about the slow service abroad; for example, Eng-

Mr. MADDEN. They only operate there in the daytime, and not at night.

Mr. LEWIS of Maryland. Well the automatic phone can be used at any time and as quickly as the subscriber finds the number, and since taking over the telephone network the English postmaster general is putting the automatic in. It is an answer to such complaints as I have heard, and answers also

the political fears of an unwieldly telephone personnel.

Mr. SAMUEL W. SMITH. I have yielded the gentleman 15 additional minutes. Will the gentleman speak about the service in Australia, a country practically the same in size as the United States, where they have government-owned service?

Mr. LEWIS of Maryland. I regret to say that the telephonic statistics are not sufficiently reported for Australia to enable me

to form any conclusion about it.

Mr. SLOAN. Mr. Chairman, I was interested in the gentleman's statement about the number of telegrams in New Zealand. Has the gentleman also figures as to the telephonic communications in that country?

Mr. LEWIS of Maryland. No. It is the same as with Australia.

Mr. SAMUEL W. SMITH. I would like to ask the gentleman if he has any information as to what view President Wilson entertains of this proposition?

Mr. SLOAN. Mr. Chairman, I object.

Mr. SAMUEL W. SMITH. I would like to make that inquiry.
Mr. SLOAN. I object to that inquiry. The important fact
is what Members of this House think of this, not what the President of the United States thinks.

Mr. LEWIS of Maryland. Assuming, gentlemen of the committee, that this step is to be taken, we ought to consider the measures necessaary to make it effective. One of the things I wish to call to the attention of the committee this afternoon is this: A history of the subject in the United States shows that some 17 times in the last generation committees of this House or of the Senate have reported favorably to Congress measures looking to the postalization of the electrical communication. Not once, not one single time, has one of these measures ever come to a vote. They have been lost on the calendar with a thousand sisters and brothers, perhaps of unequal importance. And I want to say to this House to-day that if this great agency is to be postalized, there is no escape from the necessity, as a matter of parliamentary procedure, of placing it on the Post Office appropriation bill. If a great majority in this House, with a few exceptions, were favorable to the proposition, such is the state of our parliamentary practice and procedure that it would be nearly impossible of accomplishment unless it were incorporated in the appropriation bill, which can not be be pigeonholed.

Mr. SHERLEY. Will the gentleman permit a question there? Mr. LEWIS of Maryland. Yes.

Mr. SHERLEY. Does the gentleman consider that a supply bill is the medium for carrying reforms of a magnitude such as this? And if he considers that it should apply to the postal bill, does he think it should apply to the sundry civil bill, whereby the jurisdiction of every other committee in this House would be destroyed?

Mr. LEWIS of Maryland. I am very frank to say to the gentleman that I do not consider myself as good a judge of

that subject as the gentleman himself.
Mr. SHERLEY. Yes; but the gen

Mr. SHERLEY. Yes; but the gentleman makes the statement that under the rules of this House it is absolutely impos-

sible to get the legislation that he advocates on the postalizing of telegraph and telephone lines, even though an overwhelming majority of the House favor it. I think that is an indictment of the rules that is not warranted by the rules.

Mr. LEWIS of Maryland. The rules are under so many indictments that they will suffer no particular embarrassment now. I am giving you my conviction, with the reason for it, that 17 times in the history of this Congress legislation on this subject has been favorably reported by committees, and never yet has any one of them come to a vote. I should prefer to charge the rules with the delinquency rather than charge individuals. Such favorable reports are as follows:

March 3, 1845. House Report 187, Twenty-eighth Congress, second session. Committee on Ways and Means.

July 5, 1870, House Report 114, Forty-first Congress, second session. (Washburn.) Select Committee on Postal Telegraphy.

House Report 115, Forty-first Congress, second session. (Palmer.) 1872. House Report 6, Forty-second Congress, third session. 1875. House Report 125, Forty-third Congress, second session. (Gen. Butler.) Judiciary Committee.

1881. House Report 137, Forty-sixth Congress, third session. Committee on the Post Office and Post Roads.

1883. House Report 2004, Forty-seventh Congress, second session. (Bincham.)

mittee on the Post Office and Post Roads.

1883. House Report 2004, Forty-seventh Congress, second session.

(Bingham.)

1884. House Report 1436, Forty-eighth Congress, first session. Committee on the Post Office and Post Roads.

1888. House Report 955, Fiftieth Congress, first session. (Rayner.)

Committee on Commerce.

1870. Senate Report 18, Forty-first Congress, second session. (Ramsey.) Committee on Post Offices and Post Roads.

1872. Senate Report 20, Forty-second Congress, second session.

(Ramsey.) Committee on Post Offices and Post Roads.

1872. Senate Report 223, Forty-second Congress, second session.

(Zachary Chandler.) Committee on Commerce.

1872. Senate Report 242, Forty-second Congress, third session. Committee on Post Offices and Post Roads.

1874. Senate Report 242, Forty-third Congress, first session. Committee on Post Offices and Post Roads.

1875. Senate Report 624, Forty-third Congress, second session.

1884. Senate Report 577, Forty-eighth Congress, first session.

1886. Senate Document 291, volume 11, Fifty-fourth Congress, first session.

1806. Senate Document 291, volume 11, Fifty-fourth Congress, first session.

Mr. SHERLEY. In the first place, the gentleman ought to

Mr. SHERLEY. In the first place, the gentleman ought to state that the rules of this House now are not the rules of the House that existed when these 17 instances came up that he speaks of.

Mr. CLARK of Missouri. Before the gentleman gets to that I will state that I have an arrangement with Judge Moon to yield the gentleman five minutes as compensation for the loss of time he may take in answering my question, and that is about getting bills up. Under the rules and practice of the House now, does not the gentleman believe that any bill of importance can be got up in one of the five extraordinary ways? For instance, you have Calendar Wednesday, first; second, you have the call of committees; third, you can put your bill on the Unanimous Consent Calendar; fourth, you can call it up under suspension of the rules; fifth, you can get a special rule from the Committee on Rules. Now, I will ask the gentleman if he does not believe that if there is a great sentiment on the floor of the House in favor of passing a great remedial measure or of discussing it, that the Speaker, who has absolute charge of the suspensions, would not feel compelled to recognize some gentleman to move to suspend the rules and call up the bill?

Mr. LEWIS of Maryland. Mr. Chairman, the distinguished Speaker has asked a question I am not able to answer. I have recited the history of the subject; there have been 17 favorable reports made on this subject, and none have ever come to a vote. Now, I can not tell the Members of this House the many byways and the pigeonholes and other circums'ances that may account for that result. I am glad to have the suggestion that we have recent amendments of the rules and, perhaps, especially an improved spirit of fair play in the individual Members, and that these difficulties may not be so great in the future as they have been in the past. I am glad that one so experienced as the Speaker feels so optimistic.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of Maryland. Certainly.

Mr. COOPER. The Speaker suggested that this matter might be brought up under suspension of the rules, but it requires a two thirds vote to suspend the rules, and when a bill is up for consideration under suspension of the rules, only 20 minutes on a side are allowed for debate. Of course, we could not begin to discuss a bill of this magnitude in 20 minutes. That disposes of that opportunity. As for the suggestion that opportunity might be provided by unanimous consent, it need only be said that on a matter of such great importance some gentleman in the House would be certain to object, and that disposes of opportunity No. 2.

Mr. CLARK of Missouri. I would like to ask the gentleman question.

Mr. COOPER. I was just answering the distinguished

Speaker's suggestions.

Mr. CLARK of Missouri. Take the matter of the suspension of the rules. Of course, it requires two-thirds to suspend the rules, but what is it in the book for if it does not afford any relief?

Mr. COOPER. It might upon a bill of no great importance, but it could not be expected that the House of Representatives would pass or even think of considering a bill of such vast importance as that of the gentleman from Maryland [Mr. EWIS] with only 20 minutes of debate on a side. Therefore that suggested opportunity to bring up the bill is no opportunity

Mr. CLARK of Missouri. And what is the reason the Calen-

dar for Unanimous Consent will not afford relief?

Mr. COOPER. Because with over 400 Members here there will be always one who would object. For instance, the gentleman from Illinois [Mr. Madden] would object to considering the proposition that the gentleman from Maryland is now discussing if a motion were made to bring it up by unanimous consent. That is very evident from his attitude here to-day, and that

disposes of that opportunity.

Mr. CLARK of Missouri. Then there is Calendar Wednesday. What is the reason you can not get a bill up on Calendar

Wednesday?

Mr. COOPER. Mr. Chairman, I will tell the distinguished gentleman. When we had up for consideration the bill for a revision of the laws that committee took Calendar Wednesday, and the gentleman from Missouri will not have forgotten how many Calendar Wednesdays they held.
Mr. CLARK of Missouri. Oh, I am aware of that.

Mr. COOPER. They absolutely monopolized that day for many weeks. How long is the Alaska bill going to take this time?

Mr. CLARK of Missouri. I think the Alaska bill will take one or two more Wednesdays, and I am guessing about it.

Mr. COOPER. There is no certainty that bill of the gentleman from Maryland could come up on Calendar Wednesday.

Mr. CLARK of Missouri. There is no certainty at all; but what I am trying to do is to disabuse the mind of the gentle-man from Maryland, of whom I think a great deal, and who knows, I think, more about postal matters than all of the rest of us combined, except the gentleman from Tennessee [Mr. Moon] and the other members of his committee-to disabuse his mind of the notion that one can not get a bill up for con-

sideration. I am frank to state how the present Speaker of the House feels about it. If the Speaker believes there is a pronounced sentiment in this House amounting to a majority, or anywhere approximating two-thirds, in favor of the consideration of a particular bill, whether it be a big or a little bill. I believe it is the business of the Speaker to recognize some gentleman, under suspension of the rules, to call up that bill,

Mr. SHERLEY. Mr. Chairman, I would like to ask the geneman [Mr. Lewis] a question. How can be get a rule to tleman [Mr. Lewis] a question. make this a rider on an appropriation bill except by getting, first, a majority of the Committee on Rules, and then, second, a majority of the House; and if he can get a majority of the Committee on Rules and a majority of the House, why can not he bring in a special rule to consider the bill irrespective of an

appropriation bill?

Mr. SIMS. In discussing this question as to a rider on an appropriation bill, in the general Committee on Appropriations, of which the gentleman from Kentucky [Mr. Sherley] is a member, the rule should be applied, it seems to me, with much more strictness with respect to that committee, in the case of bills reported by it than in the case of bills coming from the committee having both legislating and appropriating jurisdiction. For instance, the Committee on Military Affairs has jurisdiction of legislative propositions and also jurisdiction of an appropriation bill. Now, as to the question of the propriety or orderliness of legislation reported by a committee having appropriating functions, it seems to me we would not in this case be breaking down the very proper rule of not putting riders on appropriation bills. Inasmuch as the Committee on the Post Office and Post Roads has charge of legislation and also appropriates for it, that fact, it seems, removes from it the objection that generally applies to riders placed upon appropriation bills.

Mr. LEWIS of Maryland. Mr. Chairman, the gentleman will

excuse me from further discussion of this feature. I am quite sure the House can receive much more enlightenment from

others on that subject than I can give.

SOCIAL PRINCIPLES. PUBLIC MORALITY.

Mr. Chairman, the economists are right: there is a law of public finance; there is a law of private finance. Applied in its proper domain, each law operates with a fitness in human affairs. But we, sir, have been violating one of those laws by allowing private financiers to encroach on the public domain. The resulting injury involves more than national economics, great as that is. It involves national character. If these telephone monopolies are not to be postalized, then private franchises must continue to be granted, and in the struggle for them both private and public character must be demoralized. Compare the history of New York and Berlin as to street-railway franchises; and then that of London and San Francisco on the telephone, where a Bell Co., on the one hand, and a competitor and what is regarded as an intruder into its domainthe Home Telephone Co .- on the other, both bought up the city council, one to defend and the other to procure privileges and franchises which have been postalized in all the leading countries. Behold the consequences of our violation of sound public economics and of our neglect to discharge the national postal obligation-rates the highest in the world, and a public state of morality to shame us.

Such, sir, are the results of a business and economical survey of the field of communication by electricity. In the domain of public morals the lesson is not different. The perversion of the laws of public and private financiering, by which public governments have been disinherited of their normal functions, has led to such corruption and demoralization-of the functionaries giving and the alien claimants receiving the despoiled in--that cities like New York with its street railways, Philadelphia with its gas works, and San Francisco with its telephones, have shamed the scions of Roman corruption in their most dishonorable days. The policy of weakening these governments by alienating their functions to ambitious private finance has made them despised and attractive only to such weak political creatures as see opportunity for individual enrichment. Compare them, sir, with the proud cities of other lands, undespoiled of their rightful attributes of public service and where public position gives honor, prestige, and respect. Sir, all other countries have granted their postal systems their full rights. Why has not ours? It is notorious that since the Civil War the history of our country has not been the narrative of social institutions, but a stirring story of the gigantic achievements of individuals in the domain of private finance. think of the names of a half dozen such men quicker than you can recall the names of the contemporary Presidents of the Meanwhile the substantive powers of our national life have belonged not to the States or the Government, as representing society as constitutionally organized, but to private individuals and their personal empires, really great princes of finance with powers exceeding those of the States, and collectively directed, exceeding, too, the active resistant powers of the National Government. At some points their private activities have trenched over onto the Government domain, with the result that some of its functions have been partly diverted, and others suspended, in their interest. Such has been the master-liness of their control that even the most popular national institution, the postal system, has had to yield two of its principal functions—the parcel post and the electrical method of communication. For 40 years it was deprived of the parcel func-Now like influences are trying to withhold its function of electrical communication. Their efforts raise an issue which patriotic citizens will not longer ignore. It is: Which is now to be paramount in the country—the Government or certain ambitious financiers? [Applause.]

Mr. MOON. Mr. Chairman, does the gentleman from Michigan [Mr. Samuel W. Smith] desire to proceed?

Mr. SAMUEL W. SMITH. Yes; I desire to proceed. I yield

20 minutes to the gentleman from Rhode Island [Mr. Kennedy].

Mr. KENNEDY of Rhode Island. Mr. Chairman, as a minority member of the Committee on the Post Office and Post Roads I desire to record my disapproval of that feature in the present Post Office appropriation bill which gives the Postmaster General power to revoke the appointment of any assistant postmaster and appoint his successor at his discretion, thereby proposing to take assistant postmasters in the first and second class offices out of the civil service, thus striking a blow at the merit system.

The purpose of the merit system is obviously to obtain the best possible service for this department of the Government; to promote industry, efficiency, and economy in the public service, as well as to remove from political-party struggle the compensation for injury received in the course of employment

corrupting influence of a vast number of business positions held out and offered as spoils to the victors.

The Post Office Department does a great part of the business of the Government. In recent years, owing to the postal savings banks and the parcel post, the department has assimilated an enormous mass of new and diversified business, and all with a remarkable ease and in a manner satisfactory to the people

The handling of the increased and diversified business with such apparent facility speaks volumes in favor of the organization of the department and proves beyond peradventure that its present personnel, selected upon merit, measures up completely to all the requirements of a system whose successful operation depends upon the honesty, industry, and efficiency of the agencies in charge.

This proposition to remove assistant postmasters from the classified civil service is a step backward and deserves the universal censure and condemnation of all good citizens without regard to party affiliation. It is a gross injustice to a set of men comprising about 2,500 in number the country over who were classified by an Executive order which became effective in December, 1910, and which required that any incumbent then in office, before he should become classified, must give evidence of his qualifications for the performance of official duty. More than this, it is a blow leveled directly against the civil service, a movement in support of the semi-barbarous maxim that "to the victors belong the spoils."

For many years previous to the adoption of the act of 1883 the abuses and evils resulting from appointment to and removal from public office to serve party ends were debated in Congress. Though public-spirited men of all parties agreed upon the proposition that public offices are created for the public convenience and not for the benefit of those selected to fill them, the spoils system continued to prevail until the enactment of 1883 to regulate and improve the civil service of the United States. Since that law was enacted, appointment and promotion in the service have been made to depend upon fitness, so that the incumbent in office under the system has been enlisted for public rather than for party service.

The rider which appears in section 6 of the present bill seeks to reverse the present order in relation to one set of employees in the teeth of emphatic party declarations to the contrary.

Why select these post-office officials for this slaughter? Public opinion is strongly against it; party platforms decry it; the Chief Executive in all his utterances unequivocally assails it; the Postmaster General himself, in his recent report, proclaims that "it is highly important that only the most efficient employees should be in the service." "For this reason," he says, "the merit system should be adhered to in the Post Office Department above all others, in order to secure the very highest standard of efficiency in the conduct of its affairs."

The duties connected with the post-office administration are of a business character, and under the merit system the present, honest, efficient, and economical operation of this department, due to the industry and intelligence of every employee in the classified list, from assistant postmaster down, should meet with the approval of all patriotic Americans. No party has a corner on honesty or efficiency. These are personal attributes that exist apart from party consideration; and the door of opportunity under the merit system is open to all who possess the qualifications to enter.

Many of the assistant postmasters have been promoted from clerkships and supervisory positions. Their years of experience have acquainted them with the infinite etails of the office. Their removal, as proposed in this amendment, will necessarily cripple the system and bring down the high standard of efficiency hitherto attained in the department. lieve the merit system should be extended rather than curtailed. thus tending always to bring the department to a higher plane

But, Mr. Chairman, while I am unalterably opposed to this feature in the bill, I am glad to register my approval of other portions of it which are extremely meritorious in my opinion. The proposal to increase the compensation of rural letter carriers, whose burdens, under the parcel-post increment, will be measurably augmented, should be met with general approbation, as well as the amendment to extend to all postal employees who are injured or killed in the course of duty the benefits of com-pensation now provided by law for railway postal clerks and post-office inspectors.

The latter is an application of the principle enacted into law

in case the injury was not caused by the willful misconduct or

negligence of the employee himself.

Under the postal laws and regulations the period of leave of absence of carriers in cases of illness or disability received in the service is limited to 150 days in one calendar year, and a distinct provision is made that carriers who desire leave of absence for a longer period will be dropped from the rolls without prejudice. What relief is given to the carrier who has labored a number of years in the service if i'lness or disability re-ceived therein should make it imperative that he request leave of absence beyond the limitation period and is consequently dropped from the rolls?

None whatever is offered to him; and yet were he engaged in a different occupation, where the doctrine of "master and servant" applied, under the laws of most of the States of the Union, he would receive compensation in accordance with the nature and extent of his disability; or in the absence of a workmen's compensation act he would have the right to sue his employer at common law, a right, however, which does not

extend to him as an employee of the Government.

The effect of this proposed legislation, which carries its merit upon its face, would be to negative substantially the harsh and rigorous effect of the present laws in cases of illness or dis-

ability received in the service.

This legislation, affording as it would justifiable compensation, is in accord with the broad, enlightened, and progressive spirit that is world-wide to-day; and, besides, it is responsive to the recommendation of the First Assistant Postmaster General for the year ending June 30, 1913, "that the present law be amended so as to indemnify employees of all classes in the Postal Service."

The postman to-day is one employee in the service of the Government who is deserving of benevolent consideration. He is the daily messenger of all classes and creeds. From morn till eve he tramps his accustomed route and knows no rest until

his ever-increasing daily task is accomplished.

"He trudges along through the snow and the sleet,
With a pack that is heavy to bear;
The slush of the roadway has hampered his feet,
And the whiteness has powdered his hair.
But he stands by the gate with a smile on his face,
And his whistle is cheery and gay;
Oh, people who live in a fur-away place,
Thank God for the postman to-day!

He carries a message that comes from the heart
Of a boy who has gone from his home;
And sometimes a letter to make the tears start,
From a soul that is sad and alone.
The news of a world that is far from our sight
Is stored in his magical pack;
And he mingles the sorrow with words of delight,
For he carries a world on his back."

[Applause.]

Mr. SAMUEL W. SMITH. Mr. Chairman, how much time did the gentleman use?

The CHAIRMAN. The gentleman used 12 minutes. Mr. SAMUEL W. SMITH. Will the gentleman yield back the remainder of his time?

Mr. KENNEDY of Rhode Island. I yield back the remainder

of my time

Mr. SAMUEL W. SMITH. I yield 20 minutes to the gentle-

man from Massachusetts [Mr. TREADWAY].

Mr. TREADWAY. Mr. Chairman, on Tuesday last the gentleman from New Hampshire took occasion to make certain statements relative to business conditions in New Hampshire and New England. It is not my purpose at this time to take exception to his statements, which can readily be done, relative to the cause of Democratic success in the last presidential election, nor do I desire to contradict his statement regarding business conditions in New Hampshire. Of this latter I have very little knowledge other than the general opinion that New Hampshire conditions can not be so very different from those in other States, but I do desire to relieve the gentleman and the Democratic Party of the burden of feeling it their duty to report upon business conditions in the whole of New England. quote from his remarks:

And I venture to say that if the gentleman from Illinois could assemble the manufacturers and business men of New England and recite to them his Dr. Cook story of "America prostrate." it would provoke such laughter as would warm the heart of the most pretentious vaudeville artist of any American circuit. I believe, Mr. Chairman, on the whole that the business interests of New England are well satisfied with the achievements of this Congress to date.

So much has been said upon this floor in the course of debate within the last few weeks as to business conditions, and believing that these statements have been dealing in generalities that I have taken pains to make inquiries about the business in the district I represent, namely, that section of western

Massachusetts extending from the New York State line to the Connecticut River. About a month ago I sent out about 500 inquiries—one-half, were addressed to employers of labor and the other half to employees as represented by labor organizations. The responses to these inquiries will relieve my friend from the necessity of including in his picture of business pros-perity that portion of New England which I have the honor of representing

I did not submit inquiries to merchants, for the reason that their business is so dependent on the manufacturer and the employee that the others are naturally a barometer of the busi-

ness of the merchants.

At a conservative estimate the responses received represent the employment of 35,000 people. Some of the lines represented include paper mills, woolen mills, cotton and worsted mills, machine shops, book manufacturers, foundries, taps and dies, electrical machinery, box manufacturers, leather works, carriage robes, metal works, whips, and so forth, so that it is fair to state that it is as diversified a section in the nature of employment as represented by any member in this House.

I entered upon this inquiry in no spirit of partisanship, neither as a calamity howler, nor as a prosperity prophet, but absolutely for the purpose of securing information, and I am glad to lay the result of that information before the House at this time. As stated, the inquiry was in the form of two letters. The first letter was to the manufacturers, and was as follows:

House of Representatives, Washington, December 22, 1913.

Washington, December 22, 1913.

I am addressing you and other concerns in western Massachusetts in order to obtain information as to present condition of business. I should be pleased if you would assist me to the extent of answering in whatever detail you may see fit the following questions, it being, of course, understood that any information received will not be used in any personal way.

1. How has business compared during the past six months with the corresponding six months of last year or two years ago?

2. So far as you know, has there been any variation in that period of the rate of wages or of the cost of purchasing ordinary commodities of life, as compared with corresponding period of last two years?

3. Has there been variation in the price of your product during this period; and if so, to what do you ascribe the cause?

4. What comparison do you make with prospect of business during the next six months and corresponding period; and if any variation, to what do you ascribe it?

5. Are people generally employed in your community and at satisfactory wages; and what is the comparison in the number of your employees now and the corresponding time last year?

Thanking you in advance for furnishing the information desired, I am,

Sincerely, yours,

In answer to question 1, as to how business compared during the past six months with the corresponding period of last year or two years ago, the replies were as follows:

Ten per cent reported that business was the same, 27 per cent reported that business was better, and 63 per cent reported that business was poorer.

In answer to question 2, as to the variation in the rate of wages and the cost of purchasing the ordinary commodities of life during this same period, the replies received were as follows

Sixty per cent reported that wages were higher, 40 per cent reported that wages were the same, 60 per cent reported that commodities were higher, and 40 per cent reported that commodities were the same.

In answer to question 3, as to the variation in the price of their product during this time, replies were as follows:

Three per cent reported that prices were higher, 38 per cent reported that prices were the same, and 59 per cent reported that prices were

In answer to question 4, as to the prospects for business for the next six months, compared with prospects for the same time last year, and if any variation the cause for the same, replies were as follows:

Twelve and a half per cent reported that prospects were the same for the next six months, 12½ per cent reported that prospects were better for the next six months, and 75 per cent reported that prospects were poorer for the next six months.

The reasons given in answer to the second part of this question are rather interesting, and I will read some of them:

tion are rather interesting, and I will read some of them:

I believe the general prospect of business in my line for the coming six months correspond favorably with the six months a year ago.

Judging the outlook by our own business would say that prospects for 1914 seem to us very good. There are no great amount of workmen idle here, and so far as our business in concerned our pay rolls show a larger number than a year ago.

We enter the coming six months with more promise of good business than a year ago, and our active board members all share this feeling.

Employing the same number of people and paying same wages, but we are piling up goods to some extent.

Prospects of next six months full of uncertainty, as to the effect of the tariff, the disturbances of values, and the instinctive feeling of fear of further legislation concerning business.

Prospects of business are exceedingly poor. We ascribe it to the uncertainty as to the effect of the tariff, the new currency bill, and also the scare thrown into business over the resuming of more antitrust legislation.

The unfavorable effect of the tariff bill may be somewhat offset by the passage of the currency bill, and, while not wishing to appear pessimistic, we feel that the outlook is decidedly uncertain, with the chances largely favoring a decrease of business over former years.

While we do not believe in taking any pessimistic view of conditions and believe that occasionally we are bound to have depressions in business, yet business in general with us does not look as bright as we might wish.

We have no positive year of conversions.

business, yet business in general with us does not look as bright as we might wish.

We have no positive way of comparing prospects of business during the next six months. In this connection, will add that on December 1, 1912, we had on hand four times the volume of orders that we had on December 1, 1913. There has been a heavy decline in new orders during the last two months. For the past six weeks the universal reply of our prospective customers has been that they are marking time; in other words, waiting to see what effect the tariff will have on the situation. Business has shown a very spasmodic condition during the past six months. There has been no pressure or stability to it. We think that our business is quite indicative of general conditions, and have found the entire business situation uneven. We feel that the spotted conditions of business is very apt to continue during the coming six months, basing our judgment upon futurities in orders this year as compared to previous years.

basing our judgment upon futurities in orders this year as compared to previous years.

From present indications our business for the next six months will undoubtedly be much worse than during the past six months, owing to the fact that there are practically no new developments contemplated.

The prospect of business for the next six months is not at all encouraging in comparison with the large volume we received during the first six months of 1913. We were then tremendously busy; in fact, running two or three nights a week. We had a large number of unfilled orders on hand at all times. At the present time the outlook is not at all encouraging. We have very few orders on hand, and have the largest stock of finished goods on our shelves that we have ever had in the 40 years we have been in business, which means that we will be obliged to go on short hours in the factory for some time, until there is a decided change for the better.

Our business for the first six months of 1913 was by far the largest we have ever experienced. We are starting off very slowly this year, and it certainly does not look very promising for the first six months of 1914. We have on hand at the present time the largest amount of semifinished and finished goods we have ever carried, and it simply means that we are obliged, for the first time in many years, to run our factories on short hours.

In answer to question 5, as to whether people were generally

In answer to question 5, as to whether people were generally employed in the community, and also the comparison of number of their own employees at the present time and the corresponding time last year, the replies were as follows:

Twenty-two per cent reported the same number employed in the community, 6 per cent reported more people employed in the community, and 72 per cent reported less people employed in the community.

In answer to second part of question-

Twenty-five per cent reported same number employed in their own business, 17 per cent reported more people employed in their own business, and 58 per cent reported less people employed in their own business.

Some of the replies to this question are interesting, and I will read a few of them:

People here are generally well employed and at satisfactory wages. Our employees are more in number than a year ago.

At the present time we are employing about 5 per cent more men than same time in 1912. In 1912, however, we were operating 54 hours a week, while now we are running only 40 hours a week.

There seems to be a great many more unemployed in our vicinity than last year at this time. Our number employed has decreased 15

Per cent.

People in the community are fairly well employed, although we have reduced our working force about 20 per cent.

The number of unemployed has increased perceptibly. Number of our own employees has decreased about 10 per cent less than a year

our own employees has decreased about 10 per cent less than a year ago.

We do not believe that anywhere near the same number of people are employed here as there were a year ago at this time. As for our own business we are employing about two-thirds the number we were a year ago, and it is our understanding that in the majority of instances other manufacturers are practically in the same condition we are.

Help are not generally employed. About 75 per cent employed by us. No change in hourly rate of wages, but hours employed were reduced. We are employing about 10 per cent less people, and think this is true of other factories here. No trouble in getting help.

Have laid off a good many of our employees, and a portion of the remaining are working short time.

We have laid off about 15 per cent of our employees, but in all probability we shall have to lay off quite a large percentage more in a short time.

We have shall have to lay off quite a large percentage more in a short time.

People are not generally employed in this town or in my business to the extent of a year ago, but know of no reduction in wages.

Have reduced our force considerably, and the remaining are working on short time. No immediate prospect of getting back to the regular

schedule

The other letter, as stated, was sent out to labor organizations, and was as follows:

House of Representatives,

Washington, December 23, 1915.

Dear Sir: I am writing you and officers of other organizations in western Massachusetts in order to secure information as to the present business conditions. Will you be kind enough, at your convenience, to answer the following questions:

1. Are the members of your organization as generally employed now as during the corresponding period of the last two years? If there is any difference, greater or less, to what do you ascribe the cause?

2. Has there been any change in the rates of wages during these periods; and if so, what is the reason for the difference?

3. Do the members of your organization find the prices of the ordinary commodities of life have changed during these corresponding periods; and if so, to what do you ascribe the cause?

Thanking you in advance for furnishing me with the information desired, I am,

sired, I am, Sincerely, yours,

In answer to question 1, as to whether the members of the organizations were as generally employed now as during corresponding time last year, 72 per cent reported that members were as generally employed and 28 per cent reported that members were not as generally employed.

Some of the answers to this question were:

We are better and more in our craft are employed.

Not as generally employed; cause, curtailment of expenses of pay roll.

The year just passed was, from our point of view, one of the dullest building years for four or five years. The cause is attributed to the tariff and currency bill.

In only one instance did the unions report men were more generally employed.

In answer to question 2, as to whether there has been any change in the rate of wages during this period, and cause for same, replies were as follows: Seventy-two per cent reported that wages were higher and 28 per cent reported that wages were the same.

In a majority of cases the cause given was-

The scale of wages has increased, owing to the high cost of living.

There has been an increase in wages during the year 1913, brought about after years of effort by the unions.

In answer to question 3, as to whether the price of the ordinary commodities of life have changed during this time, they all answered that prices have advanced. Some of the reasons are as follows:

Commodities have increased; cause, supply and demand make a sliding scale; also due to trusts and combinations.

Prices have advanced greatly in every commodity, and are of an inferior quality. Cause: Monopoly of money and business interests and concentration of the money power. Food products, especially meat, are very high on account of monopoly, there really being no competition in this locality.

There has been an increase in the price of the ordinary commodities of life. We find a big increase in meats, but do not know what to ascribe the cause to.

The price of the necessities of life have certainly raised, and the members here ascribe the cause purely and simply to the trusts.

Prices of ordinary commodities of life has increased. Meat has raised 25 per cent, butter and milk 10 per cent; some think this is due to shortage of beef and the others that when the wages go up they raise the price of beef in proportion.

It will be seen that these replies are first-handed informa-

It will be seen that these replies are first-handed informa-tion, not generalities, not compiled for partisan purpose, not made up in the spirit of optimism or pessimism, but the absolute facts, from which the conclusions to be drawn are

First. Business is not as good in western Massachusetts as

during the past two years.

Second. The prospects of business are not as good as they were a vear ago.

Third. The cause of same is the effect of the Democratic tariff and the uncertainty of future Democratic legislation.

I would respectfully commend this method of inquiry regarding actual conditions at home to our Democratic friends, who are so optimistic in regard to the future business prosperity under existing and expected Democratic legislation. [Applause.]

I yield back the remainder of my time.

The CHAIRMAN. The gentleman's time has expired.

Mr. MOON. Does the gentleman from Michigan desire to occupy any further time now?

Mr. SAMUEL W. SMITH. No; I wish the gentleman from Tennessee would use some of his time.

Mr. MOON. I yield 30 minutes to the gentleman from Connecticut [Mr. Relley].

Mr. REILLY of Connecticut. Mr. Chairman, this Post Office appropriation bill contains considerable legislation, and I wish

to be recorded as in favor of all of it. We heard this morning a very excellent statement by my col-

league on the committee, the gentleman from Indiana [Mr. Cox], in relation to the civil-service feature of this bill as it affects assistant postmasters. I fully agree with his position in that matter. I believe that if we are to have a real civilservice or merit system the present law should be changed, and that the man who stands first should be the one to receive a position in competition. Until that is changed, or until post-masters themselves are placed under a civil-service rule, I believe assistant postmasters should not be under the civil service, but should be, as the postmaster is, subject to removal at the pleasure of the appointing power.

I believe that the civil service, excellent as a whole, should not be extended to all offices. I believe that confidential positions, positions for the faithful performance of the duties of which the superior is bonded, should not be under the civil service. I take my hat off to no man in defense of the civil service as a whole, applied to those positions outside of confidential ones and those for which the superior is bonded.

I believe that as a matter of self-defense, which was referred to here to-day, the postmaster should have the right to choose his assistants and I think self-defense is the proper term to apply to it. It reminds me of a story told by a friend of mine, Frank Fogarty, the noted comedian, that I believe illustrates this proposition fully. Two Milesians were boasting of the relative merits of their families. Patrick said, "I have the finest six girls that ever blessed a father or mother." Michael said, "I agree with you, but they have nothing on my six boys fine strapping big fellows, the oldest 28 and the youngest 18. You know them, and it is the pride and boast of my life that from the day they were able to walk I never had to raise my hand to one of them—except in self-defense." [Laughter.] So [Laughter.] So I believe that the chief reason why we will have to raise our hand or our foot to Republican assistant postmasters is selfdefense on the part of the Democratic appointees.

We talk about the merit system and fairness. Is it fair to ask a postmaster, Democrat or Republican, to take as his assistant a man who may be a mental sharp but a moral crook; a man who is certain to be his political opponent and possibly his personal enemy? You say he can get rid of the assistant postmaster without violating the civil-service rules. Yes; he can demote him. But what guaranty has he that he will find anyone in the office who is more desirable, so far as his official position is concerned?

This bill simply does by direction what may be done by indirection. It is the man-fashion way of doing business, and until the postmasters themselves are placed upon the civil-service basis I do not believe that the assistant postmasters should be placed there, for the reasons I have stated.

In connection with this legislation there are one or two other things to which I wish briefly to refer. The provision in this bill which asks for compensation to clerks, foot carriers, mounted carriers, rural carriers, and special messengers should be passed. The compensatory law protects certain employees of the Post Office Department to-day, namely, railway mail clerks, seagoing clerks, and post-office inspectors. I believe that to-day with the present ruch and arrived. that to-day, with the present rush and swirl of automobiles on our public highways, the letter carrier is liable to be injured as much as the railway mail clerk. He has to dodge machines, and runs the danger of being assailed or injured by vicious men or vicious animals, especially dogs, or injured going up and down rickety stairways. In many ways is the foot carrier liable to injury in the legitimate discharge of his duty.

The same thing applies particularly to rural carriers, whose horses may be frightened by automobiles, and who may be injured by falling through unsafe bridges, made so by floods or some other calamity. Even the clerk in the post office, with the new parcel post piling up boxes and packages 50 pounds in weight, may be injured by the falling of one of these bundles. A case was recited to-day where an injury of that nature took These employees are all liable to injury. As a matter of fairness. I believe that the protection given to the other set of employees should be extended to this.

The provision is that any one of these employees designated who is injured in actual performance of duty, to him shall be given full pay for a year, and if still unable to resume work, one-half pay for another 12 months. If he should die as a result of the injury, his legal representative, who may be dependent on him, shall receive \$2,000, but in no case shall any compensation be given or death benefit be given where the employee is lighte in any degree for the accident. ployee is liable in any degree for the accident. That is a compensation law which is fair and just, and I believe should become a part of the bill and a part of the law of the land in simple justice to the most faithful set of employees that this or any other Government ever had.

The principle of workmen's compensation is well established, and many of the States have enacted laws that are working satisfactorily to employer and employee. Employers, who at first feared the legislation with its increased cost, have stated freely, from time to time, that they were mistaken in their original opposition to its enactment and would oppose any effort to repeal it.

With respect to legislation of this kind, I find that the Congress has failed to keep up with the progress that has been made in the several States. It is true, Mr. Chairman, that we have a Federal workmen's compensation law, the act of May 30, 1908, providing for compensation for accidental injuries to certain employees of the United States. It is also true that, while the law has done much good, it is wholly inadequate and should be amended to cover all employees of the Government. Judging from the report of the Secretary of Commerce and Labor of February 27, 1913, it should also be amended so

as to grant very liberal compensation for permanent partial disability. The report states:

disability. The report states:

While a very considerable number of serious injuries were debarred from compensation under this act because of the restrictions of its application, the failure to recognize permanent partial disability on a different basis from disability from which complete recovery may be anticipated results in very inadequate compensation of such cases. Thus fractures of an arm or leg led to payments in amounts less than \$25, the loss of an eye in amounts varying between \$25 and \$50, and in a case of the loss of a right arm the injured workman was entitled to a payment of less than \$50, while in three cases of the loss of both legs, occurring during the third year, the average compensation was \$377.40. These small amounts were due to the fact that compensation payments (limited to usual wages) must cease when the injured employee is able to resume work, and in any case can not continue beyond 12 months.

A law that permits such a condition to exist should be speedily amended, as it seems to me, Mr. Chairman, that in respect to permanent-disability provisions it is a farce.

During the three years covered by the report there were 21,033 accidents reported in all the departments of the Government. Of the total number of accidents 670 were reported as fatal, and approximately 10 per cent of these fatalities were in occupations not subject to compensation under this or any What number of employees of the Government who other law. received injuries and were not entitled to compensation is problematic, but I judge from the report from which I quote the above figures that they are far in excess of those covered by the law.

In the Postal Service during the three years covered by the report 670 city carriers, 141 rural carriers, and 176 other employees received injuries more or less serious, but none of them were entitled under this or any other law to any compensation whatever.

In order to provide for postal employees who are not covered in the Federal compensation law the committee has inserted a paragraph in the pending bill, and I trust that our action in this respect will meet the approval of every Member of the House

A bill to supersede the present inadequate compensation law for Federal employees disabled by accident or disease has been introduced in the Senate by Mr. Keen, of Indiana, and in the House by Mr. McGillicuppy, of Maine, in the form of H. R. 5899. The latter bill is now pending before the Committee on the Judiciary, and I trust that the committee will see its way, clear to report the bill to the House at an early date,

Mr. GORMAN. Will the gentleman yield?

Mr. REILLY of Connecticut. Certainly.
Mr. GORMAN. Does the bill make any compensation where the employee is guilty of contributory negligence or where the accident is the result of the negligence of a fellow servant?

Mr. REILLY of Connecticut. The compensation is only paid where the employee is not responsible for the injury in any degree.

RETIREMENT OF SUPERANNUATED EMPLOYEES.

Mr. Chairman, I come now to a subject that I trust will receive the serious consideration of the Members of this House, in the form of remedial legislation, at a very early date—the retirement of superannuated letter carriers, clerks, and other civil-service employees. It was not until I became a member of this body that I learned that old worn-out letter carriers and other superannuated employees of the Government were not retired on part pay, but, on the contrary, were dismissed from the service when they could no longer keep up the pace. One of the first letters I received after being elected a Member of Congress was from an old postal employee, who had received an official notice from his postmaster informing him that he had been off duty the allotted number of days in the year allowed by the department and that his resignation would be accepted. The simple statement of that heart-broken man asking me to assist in having him kept on the rolls made my heart ache. He had spent 34 years of his life pounding the pavements in all kinds of weather and at all hours of the day and night, and was known and loved by the citizens of the community he served, composed of all classes and creeds and political affiliations. He had not only given the best years of life to the Government in building up the Postal Service, but was at an age and in such a condition that he could not hope to find employment of any kind. He was in such financial straits that if thrown on the world he would have to depend on the bounty of relatives or friends, or

else become a public charge.

What a cruel, cruel fate to leave a man to who had lived an honorable, upright life and was a model citizen. Why, Mr. Chairman, if this man had worked for a railroad company or a banking institution or a large corporation of any kind, and was treated in such a manner, it would be the subject of public condemnation. But being a life-long employee of the Governour hands.

ment no one seems to take more than a passing interest in him. We legislate here to curb the trusts and the railroads and corporations, and denounce them as soulless, but I believe it would be well for us to reflect and take a few leaves from the book of rules which govern them in their treatment of their employees.

I have heard men say that Government employees are not compelled to continue in the service, and that few of them die and none resign. Well, all I can say is that this same rule applies to men in any vocation in life. Large employers of labor encourage their employees to continue with them and offer many inducements as a reward for long, loyal, and faithful service. It is these encouragements that act as an incentive for men to stay with these firms. It is the loyal and faithful service of the employees that helps largely to make their business a success. It is mutual understanding, sympathy, and cooperation that makes a business profitable and likewise expand. In this House there are many, many men that are doing everything in their power to so conduct themselves and represent their people as to merit their being continued here. We do not have to stay, not one of us, and if we do not like the job we can quit. But few of us leave here of our own accord, and the majority of those who go out do so after a desperate fight. And so, Mr. Chairman, we should be reasonable and apply the golden rule in considering the welfare of these Government employees. They are human, just the same as we. They have their hopes and their ambitions and their ideals, just the same as we. They are citizens of our country and must of necessity live exemplary lives to hold the positions they do. Yes, Mr. Chairman, I dare say that we could learn much and be better men were we to pattern our lives and our conduct by the lives that many of them live.

This question of making some provision for the retirement of superannuated civil-service employees is one that we should not close our eyes on any longer. It is a problem that should be solved for the best interest of the Government service. It should be considered from a business as well as a humanitarian standpoint, and from either or both angles it should be faced and some practical solution arrived at. In the name of good common sense and in the name of humanity I make this appeal for justice to those whose sole hope for relief is in

READY TO TAKE THE JOBS.

When we come before Congress and ask for an increase of pay and better hours for these employees we are often met with the answer like that which was given me by a Member in relation to the proposed slight increase for the rural carriers, an increase from \$1,100 to \$1,150. He said: "Why, in my district hundreds of men are clamoring and waiting for a chance to take the rural carrier's job at the present pay or less."

That is no answer. That could be applied to the Member himself or to me. There are hundreds of men in my district and in yours, Mr. Chairman, who would be perfectly willing to take our jobs at the present rate of pay, and in my case, at least, I feel that they might fill it just as well. It is no answer that other people will do the work as cheaply or cheaper. It is no reason for not granting a decent wage to a faithful employee.

I believe the Government is the poorest-paying employer in the world, and I say that intending to include therein all branches of the service from the man who receives \$800 to the man who receives \$8,000. I believe that the same service with the same ability, the same intelligence, the same faithfulness given to this Government if given to a private corporation would receive in reward double the pay on an average that the Government pays to-day.

I believe, Mr. Chairman, that this legislation along the compensatory line and for retirement under civil pensions are matters that should become a law. Just so long as we retain our present merit system, so called—imperfect though it may be—I believe, with the distinguished chairman of the committee, so long will we be forced, as a matter of fairness, as a matter of business, to provide a civil pension. You can not fairly treat men who are retained under the present system longer, it may be, than the efficiency will warrant; you can not expect to have them thrown out into the street when they become unable to work. You must provide the civil pension.

It will be a matter of great economy to this Government to provide that pension, because you will not only be acting in a humanitarian sense but in a business sense in providing it, as you will take care of the superannuated employee during the remainder of his short life and at the same time be replacing him with a man more competent, who will give better service to the Government. So long as one is retained the other must come.

GROWTH OF BUREAUCRACY.

Mr. Chairman, I believe these employees in the Postal Service particularly—and it may in a way apply generally to Government employees, but I know it applies to the employees of the Post Office—are among the very best assets of this Government, and it comes with poor grace from any whipper-snapper, placed in temporary charge of these men—I do not care what his politics—to assume a bureaucratic air of superiority, that condemns every move made for the employee, and who feels the moment he gets into this temporary position of power he is not showing the real caliber of a supervisory official unless he immediately disbelieves all that is told to him by the employee and believes that his whole effort must be to get the most out of the fellow for the Government that has temporarily placed him in power.

The report that the eight-in-ten bill, so called, which the Congress in its wisdom passed at the last session, is working great injury to the service and is costing a great deal of money, is simply an emanation from lickspittle postmasters and other officials, who think that in assuming such attitude they are doing something that will prove their fitness for the job. I have in mind now a convention held last year of first-class post-masters, I think they were called, and I wish to be distinctly understood that when I refer to first-class postmasters, I do so in a sense specifying the relative standing of the office which they occupy. I do not wish to imply for a moment that it applies to the character of service given by the men themselves, because there are postmasters in first-class offices who are not by any means first-class postmasters. These postmasters con-demned the eight-in-ten law, but it was simply carrying out that bureaucratic idea that men have the moment they assume any position of authority over other mer. They did not treat that law fairly, but it remains in spite of them. I repeat, these post-office employees are without question the greatest asset the Post Office Department has.

WONDERFUL GROWTH OF POST-OFFICE SERVICE.

This is a department that is growing by leaps and bounds, and its growth was splendidly told by the distinguished chairman of the committee yesterday. Let me give a further idea of the growth of this business. Ten years ago the appropriations for the entire post-office service amounted to \$138,000,000. This present bill reported by the committee has appropriations for the First Assistant's department alone the sum of \$137,000,000, within a million dollars of the amount of the appropriation for the entire department 10 years ago. This is a service that now entails an appropriation of over \$300,000,000. It is now self-sustaining, and it is a service that is giving better hours of employment to the men and women who work in the department; a service that has given to the people of this country the parcel post, which is being greatly extended and enlarged in every sense, and yet with all these increased charges it is a department so well conducted at present that there is a surplus of almost \$4,000,000 to its credit.

When the employees of this department that have shown such increased efficiency ask for legislation that will better in a degree their position, I say such legislation should be granted. No set of Government employees are more entitled to it, and I sincerely trust that the legislation asked in this bill will be passed in this House. It will be legislation that will redound to the credit of the Congress and will be of great benefit to this army of faithful employees. [Applause.]

CARBYING EXCESSIVELY HEAVY LOADS OF MAIL.

It seems to me that the Post Office officials should devise some means to relieve letter carriers from carrying excessively heavy loads. I do not speak of emergency or extraordinary occasions, when the mail is received in large volumes, such as the Christmas rush, but of the ordinary everyday work. A visit to a post office at 7 o'clock in the morning will disclose a condition that is known to comparatively few people outside the local officials of post offices and the working force. Every carrier leaving the office for his district is loaded down with mail ranging in weight from 50 to 125 pounds and more. Some of the men fairly stagger under their burden, but there is no alternative but to go on and deliver the mail as quickly as possible to their patrons. These loads are carried amidst conditions which aggravate the physical strain. The shoulder is dragged; the spine is stiffened; the chest is restricted. The streets may be sloppy or slippery. The eye and hand must be working; the mind must be clear. Part of the physical and nervous strength must be directed to these other parts of his task.

To my mind it is brutality, and useless brutality, too. The great bulk of the weight is in second-class and parcel-post matter. I believe that the great bulk of this mail could and should be delivered by wagon or motor vehicles. When I was a boy I remember distinctly the letter carrier coming to our house loaded down and struggling along just the same as the letter carrier of to-day. The veterans of those days have to a large extent disappeared.

They have dropped out of sight and new faces, younger men, have taken their places. The old fellows have done their work and performed it well. They have reached the stage in life, however, where they could no longer stand the physical strain, and like an old dishrag they have been thrown aside and dropped out of the service as useless material. In the last decade many innovations have been installed in the Postal Service that are of great public benefit, the postal savings bank and the parcel post being the latest and most popular. In up-to-date estab-lishments where large numbers of men and women are employed new responsibilities bring about new methods of handling business if the officials are alert and progressive enough to meet new conditions. I do not know where the responsibility rests, for the antiquated methods of continuing to load down letter car-riers with burdens that tax their strength to the utmost, but I hope that the Post Office Committee will inquire into couditions that I have cited and see if some method can not be devised to place a limit on the amount of weight that letter carriers should be required to carry on any one trip. The following statement is taken from the report of a subcommittee of the Committee on Expenditures in the Post Office Department, to inquire into conditions in the New York and Brooklyn post

It is our judgment that a letter carrier should not be required to take out a weight exceeding 75 pounds. This, however, is on certain days much exceeded, the testimony showing one case of 112 pounds. We recommend that a limit of 75 pounds' weight for a carrier on any one trip be fixed, save in cases of special emergency, of which due record should be made and explanation given.

The popular theme and the one that public men talk most about seems to be conservation of our natural resources. This, indeed, is very commendable, but I believe that we should first conserve the health and strength of our workers and not permit a condition to exist that makes physical wrecks of them.

THE EIGHT-HOUR WORKDAY.

"Far better for the pockets as well as the peace of mind of employers if they would work their men only eight hours a day." Thus spoke Secretary of Commerce Redfield before the American Association for Labor Legislation at a meeting in Washington, D. C., with the American Political Science Association on December 31, 1913.

In the last annual report of the solicitor to the Secretary of the Navy appears the following comment on the eight-hour workday:

workday:

The effect of the act of June 19, requiring Government contracts to contain a provision that the employees of contractors and subcontractors should not work more than eight hours a day on the work involved has ind a decided effect in the direction of making the eight-hour workday general. That, of course, was the object of the act, and it is gratifying to see that it has operated so satisfactorily; and there seems to be little reason to doubt that with the powerful effect of the Government's practice exercised in this direction the eight-hour day will, in the not distant future, become a universal custom of the country. Just after the passage of the act rumors were prevalent that manufacturers and contractors were likely to ignore the Government's call for supplies and work and decline Government contracts. So far, however, as this office has been able to perceive, that result has not been realized. Competition has been as keen as ever and no difficulty on account of the eight-hour law has been experienced in placing contracts. "First costs" to the Government have been somewhat increased, but costs of maintenance have not been affected, as the eight-hour day for laborers and mechanics in the employ of the Government has prevailed for a number of years.

The above statements are in keeping with the spirit of the

The above statements are in keeping with the spirit of the times and are reiterations of the set policy of the Government in recognition of the eight-hour workday for all Government employees. The Postal Service is now working on an eighthour basis mider the act of August 24, 1912, which limits the hours of labor to 8 hours within a period of 10 consecutive This law was enacted by Congress for the purpose of relieving a very unsatisfactory condition which existed, wherein the day's work of postal employees was spread over long and unreasonable stretches of the day. The elasticity of the law made postmasters and supervisory officials indifferent to the working conditions of the employees, and when the bill to regu-late the hours of labor was introduced in the House it met with the most violent opposition of department officials under the Hitchcock administration, and many postmasters throughout the country, who were drawing salaries from the Government and devoting their time to other business. The wisdom of the legislation was so apparent, however, that Congress enacted it into law. This law went into effect March 4, 1913, and since that time the great majority of hold-over postmasters have done everything in their power to try and discredit it, not-withstanding the fact that few, if any of them, ever gave eight hours' service to the Government in any one day. These men

have given out interviews to the press that were entirely erroneous and without any foundation in fact, and if a clerk or carrier was to make a statement for publication to make known the true conditions and place the responsibility for bad schedules and inefficient service on the shoulders of those responsible, it would leave him liable to removal from the service. information of the Members of this House, I submit herewith three statements made at the convention of the New York State Association of Postmasters, held in Troy, N. Y., June 10 and 11, 1913.

Statement of Edwin A. Niess, assistant attorney in the office of the Attorney General for the Post Office Department:

I infer from what I have heard in this convention and elsewhere that the restriction of the services of letter carriers and clerks in post offices to 8 hours in a period of 10 consecutive hours is not producing results satisfactory to the postmasters, and in some instances is productive of complaints from patrons whose mail is delayed in delivery or dispatch on account of this provision. I may say further that it has proved expensive to the Government, and some change in the law is probable.

Statement of Postmaster Gleason, of Carthage:

Statement of Postmaster Gleason, of Carthage:

Mr. President, ladies, and gentlemen: The chairman of the program committee requested me to say something on the S-in-10-hour law and its operations in the smaller offices.

It is easier and more comfortable to speak in favor of a law already in force than to protest and work for its repeal. However, if by any word of mine the repeal of the vicious S-in-10-hour law might be hastened. I would feel much as the girl did who rode through the long tunnel with her lover. As the train came out into the light the young man carelessly remarked. "They say this tunnel cost over a million dollars." With flushed face and tumbled hair the girl, drawing a long breath, replied, "It is certainly worth it." It would be worth the effort of every postmaster whom this law touches to express his views forcibly whenever and wherever the opportunity offers.

At the outset the law was not wanted by the department nor the postmasters. At the meeting of this association held last year in Rochester the law was poposed by every postmaster present. And the great hue and cry that was made about the overwork of the clerks and carriers was, it would seem, but a petty game of politics. Conceding that there might be a grain of truth in the claim that in the largest cities the help was overworked, it has proved a swift and sure hardship to thousands of offices in order to relieve the situation in the few offices where the conditions might just as well have been relieved in some other way.

I have been postmaster in the Carthage office nearly 16 years—but the end is in sight—and in all that time the 48-hour-a-week law was the best we ever had, satisfactory both to the postmaster who aims to give the best possible service to the people and to the carriers and clerks who are willing to give an honest day's work, whether he is working for the Government or an individual, and he is a better man for so doing. A postmaster who gets into the work himself, even as to minor details, is a better official than t

to minor details, is a better official than the one who leaves it to his subordinates.

It induces shirking.

This law gives governmental aid to the shirk, the man that has no excuse for living. It is impossible to know, at least to prove, whether a carrier is giving honest time to his work or not. There is opportunity for loitering without detection, and instead of working to get everything cleaned up for the day they work with one eye on the clock. The framers of this law must have reasoned from the ideal standpoint instead of from real practice. If the same amount of mail, both in bulk and weight, was handled each day; if the trains were always on schedule time and were run conveniently for the clerks and carriers to do 8 hours' work within the 10 hours; if the holiday business could be cut out; if there were but one mail a day, this law might be all right; but there are too many "ifs" to overcome, and the whole postal department is casting about for relief.

We postmasters can appreciate the dilemma of the two men who were walking along together, one named Wood, the other Stone. Coming toward them was a young woman in a hobble skirt, looking as if her feet had been put through a napkin ring. Stone turned to Wood and Wood turned to Stone and then both turned to rubber. We are rubbering to see when this law will be repealed.

Under the 48-hour law carriers made their deliveries, had time to take care of the late afternoon mails, and made the late collections. I am sure in my office no carrier suffered from burdensome overwork or overtime, and what would be true there would be true clesewhere. With us, and probably in the large majority of offices, the biggest and most important mails are received in the early morning, and all the help is needed to handle it quickly; but under this law the help is so divided you can not have them when most needed. Later they are all there when there is not much to do, and if there is a place on top of this green earth that is exasperating it is in an office with a lot of unemp

The law is a time filter instead of a method to secure the maximum of service. As I have said, the carriers began early in the morning to deliver important mail, leaving the unimportant for the afternoon deliveries; then when the late afternoon mails come in the carriers have served their schedule time, the law must be obeyed, and the mail that should be delivered stays in the office until the next morning, thus working inconvenience with the business men.

The public is finding fault, and justly, because it is not getting the service to which it is entitled.

Just a word about "important mail." All mail is important to the one to whom it is addressed. To the man who subscribes for a weekly newspaper, to the woman who expects her fashion magazine or the last word about Lydia Pinkham's Discovery, to the child who knows the very hour his Youth's Companion reaches the home office—to all these any mail is important, and they want it when it should be delivered.

Again, you condemn the 8-in-10-hour law when a patron of the office calls on the phone or calls at the office and inquires how it is that a letter that was received at your office in the early afternoon was not delivered until nearly noon the next day. You try to explain that it is the 8-in-10-hour law. It may be that the carrier had the letter out on his afternoon trip but was unable to cover his route, as he must return to the office so as not to violate the law. Again, when some one complains that mail deposited in a collection box in the early afternoon was not collected and dispatched until the next day. These are some of my own experiences.

WAIT TILL CHRISTMAS.

WAIT TILL CHRISTMAS.

Wait TILL CHRISTMAS.

If there is a single postmaster who has not criticized the law his wall will be heard when the rush of the Christmas holiday business begins. Every postmaster knows that a 'sub' is a poor reliance where efficient help is needed. Carriers and clerks must have experience to handle the heavy Christmas mail with dispatch and accuracy. Under the present law it will be practically impossible to meet the emergency. It is safe to say that unless there is a change the post office men will not be overwhelmed with congratulations for satisfactory Christmas service.

Senator Bristow, who is working for the repeal of the law, told the Senate recently that "in order to correct a few isolated abuses we have enacted a law which requires the employment of additional clerks and carriers where they were never needed and are not needed to-day."

Last, but not least, the law is condemned because it is an expensive law, bringing about confusing conditions in the department. The fact came out in the Senate a few days ago that this bad law will cost the Government more than \$3,000,000 a year. The reason for this is so well stated by Senator Bristow that I will quote direct from him: "Say Monday is a heavy day and Friday will be a light day. Under the old system a carrier might work over half an hour on Monday and he would be permitted to deduct that from some other day during the week, putting in his 48 hours during the week instead of 8 hours each day. The result of that provision has necessitated this additional expense, even where the burden of the service is no greater now than it was then."

SHOULD BE REPEALED.

Here is a law that furnishes opportunity for shirking, a law that upsets any system of efficiency in a post office, a law that hinders the distribution and delivery of the mail at the earliest possible time, a law that works to disadvantage in cases of emergency, a law that demoralizes the condition of the entire Postal Service, a law that has already plunged the department into a debt of several millions. What shall be done with it? In behalf of the postmasters, who feel its injustice, I ask for its repeal.

A statement of Postmaster Callanan, of Schenectady:

A statement of Postmaster Callanan, of Schenectady:

Postmaster Gleason, I think you can appreciate, yourself, without my saying it, how much interest this body has in your paper and what a hearty response is shown to your sentiment. I think we all agree with you. I think this is a pretty one-sided question, too, and if there is any postmaster here who has the courage and bravery to get up here and defend this law, I would like to see him do it. I would like to see some of the Congressmen here who voted for this law. I am afraid they would soon take French leave. Nothing has been done in the history of the Postal Department which so thoroughly interferes with the service as this 8-in-10-hour law. I used to be able to deliver a very important western mail on our afternoon delivery, but now I have to deliver it the next morning. I don't think anybody could be a friend of this law. It wouldn't do any harm, Mr. Koons, to express to your superiors at Washington what the New York State postmasters think of this law. We may have been somewhat afraid to express our views last year, but we mean what we say now.

I also submit the statement of Postmaster Isador Sobel, of

I also submit the statement of Postmaster Isador Sobel, of Erie, Pa., a man who did his duty properly, adjusted the service to meet the new conditions before the law was put in force, March 4, 1913:

to meet the new conditions before the law was put in force, March 4, 1913:

I might talk to you about the City Delivery. How about the eight-inten? The eight-inten suits me to a "T," although I suppose most of you are surprised to hear me say that. It didn't take us very long to readjust our schedules, and with the addition of a very little help the eight-inten suits. In my youth I was educated that the day was 24 hours, but the Post Office Department has said to us that it has been changed to 10 hours. Frankly speaking, the second-class offices are very hard pushed with this eight-inten hour law. I think those of you who will sit in your offices for the next 8 or 10 years may see some change in this law.

My entire strength in my office in the enforcement of this law and in connection with all other matters pertaining to the work of the office has not been due to the fact that I was well versed in the technical work of the office at all, but through the discipline of my men, getting acquainted, as it were, with their shortcomings. Through the errors that occur in the office and getting in touch with the public, I became as much familiar with the work in my office as if I had passed from room to room and done the entire work. One time a postmaster at Rochester, N. Y., who had just been appointed, attended a meeting of the national association, and said that he had been attempting to put some new schemes in operation at his office, but every time he suggested anything the assistant postmaster, who had served many years, would tell him it couldn't be done. He was told to be firm and to go ahead and do whatever ne thought was right, regardless of what his assistant thought. He went home and put his schemes in operation, and saw to it that they were followed up, and before he went out of office he was running a first-class post office. I have been honored with four appointments as postmaster, not so much through political pull, because I was always a friend of my Congressman, but he said he could never find anyone

York State postmasters: Do your work just as well during the last few days of your postmastership as you have in the past.

For the information of the Members of the House, I desire to state that I was informed by an official of the Postal Service that one of the men who spoke against the eight-hour law was referred to as a big, good-natured blowhard who knew nothing whatever about the Postal Service, and spent the greater part of his time attending to his private business. I asked this official if that postmaster ever refused a salary check, and he laughed and said, "No; I don't think he ever passed up anything that once got into his hands."

I would also like to draw particular attention to the fact that this law had only been in force and effect a period of three months at the time that these criticisms were made against it. These postmasters were evidently laboring under the impression that it would be popular with the department to condemn the eighthour law, knowing, as they did, of the intense opposition to the enactment of the law by the officials under the Hitchcock administration. It was a matter of keen disappointment to the postmaster who was referred to as the big, fat, good-natured blow-hard when he received notice before that convention adjourned that a successor had been appointed in his place.

I also submit for consideration of the Members of this body two clippings from the Idaho Statesman, one under date of June 22, 1913, and the other of December 2, 1913:

two clippings from the Idaho Statesman, one under date of June 22, 1913; and the other of December 2, 1913:

Something not generally known by those who patronize the post office—and who does not—is that the man who stands at the window and deals out stamps or letters or papers and packages or advice or impudence or courtesy is himself constantly on trial, and that the holding of his job is dependent upon his record. The practice of the Post Office Department is not to reward the worthy servant, but to punish those who are slack or incompetent.

In the Boise post office, for instance, there is a regular demerit system kept by Postmaster McMillan and his assistant, Mr. Nelson, which is held a dead secret from all except the higher authorities until the fatal moment arrives, if it should arrive, when the sum of demerits accumulated shall be sufficiently large to demand the separation of the man and his job. This doesn't often occur in Boise, but it is like the sword of Damocies in that it hangs "hair-hung and wingswing," over each devoted head.

This demerit system was created through an order of the Post Office Department of five years ago and covers the whole range of post-office work. Character, efficiency, accuracy, faithfulness, regularity, and knowledge are all taken into account in these records. Determination of the latter is made the subject of yearly examinations of the employees. These examinations are now being held in all the larger post offices of the United States. One of the most interesting of these is what is called case examinations, when distributing clerks are required to show their knowledge of their distribution scheme. The examinations consist in sorting addressed cards representing all the possible separations called for by the scheme. A record of 95 per cent correct and an average of 16 cards correctly thrown per minute is required as a minimum. If the percentage of correctness is greater than this, the clerk is given two creening of correctness is greater than this, the clerk is given tw

year is drawing the maximum of \$1,200 a year, the amount that is drawn, for instance, by Ross Miner, who has been a carrier in Boise for 20 years.

"Under a former regulation the carriers were required to work only 48 hours a week, although the way in which these hours of labor were distributed throughout the week was somewhat dependent upon the exigencies of the occasion. This regulation worked out all right, but, as you know, in any considerable number of men there are always a few that are inclined to look for the best of it. There are enough of them among the clerks and carriers in the post offices of the United States to begin agitation against the 48-hour law, as it was called, so that a recent session of Congress was induced to amend the law so that no carrier or clerk is permitted to work more than eight hours in any one day. In this way the efficiency of all the offices in the United States has been impaired so far as mail delivery is concerned.

"In Boise, for instance, our heaviest mails are the Sunday and Monday arrivals. Both mails have to be delivered, in large part, on Monday, and with most of the carriers it is a physical impossibility for the carrier to handie the mail matter in his district in eight hours, although in nearly every instance this could be done in 10 hours. Throughout the week there are usually days when the work could be done, if the Sunday and Monday mails had been gotten out of the way, with less than eight hours' work dally.

"The practical result of this regulation here is that on Monday the carriers succeed in distributing the first-class letter mail and some newspapers, while perhaps Tuesday and Wednesday they manage to dispose of the packages and circulars. I am unable to say just what valid argument was used to convince Congress of the need of changing the law from not more than 48 hours a week to eight hours a day. The only actual difficulty ever experienced with the 48-hour law was in seeing that the clerks and carriers did not work over hours enough during the first p

"The former law fixed the limit at 48 hours a week," said one of the officials. "It was a satisfactory regulation. Under the present plan, however, some difficulty is met.

"For instance, the work Monday is considerably heavier than on any other day in the week on account of the Sunday's accumulation. Formerly the carriers used to spend about 10 hours doing their Monday work. An accurate record was and is now kept of the time put in by each employee. If a man puts in 10 hours on Monday he would make it up by doing less than eight hours' work on some other day.

"As it is now, if the Monday work is so heavy that a carrier can not cover his route he must let some of the work go over until the next day, and some of the people living at the outer edge of his route do not get their mail until the next day. On another day, when there is much less work to be done the eight hours must be put in just the same, and it is hard to find work for the carriers to do at such times."

Ludging from reading these articles they were given or in-

Judging from reading these articles they were given or inspired by the assistant postmaster of Boise or some high official of that office who knew the methods employed to keep the records of the employees. It will no doubt be news to the Members here that a secret system of espionage is being prac-ticed on the employees in the Postal Service, as the statement is made that it has been instituted through an order of the Post Office Department, and if such is the case it must be a relic of the former administration. One thing is plainly evident on its face and that is the utter incompetency of the assistant postmaster of Boise, or whoever gave that information to the press, as I believe he is unfit to hold a position of any kind in the Government service where he would have supervision over employees. He lacks that balance to win the confidence and cooperation necessary to successfully conduct any business, and the Postal Service would be materially benefited were he out of it. Officials of this Government should try and enforce the laws enacted by Congress and not assume to themselves through their egotism the position of official censors.

Men whom the accident of birth or fortune makes laborers are

human beings with all the feelings and aspirations, all the capacities for joy and sorrow, for pleasure and for suffering, possessed by the other men whom birth or fortune places in more happy planes of life. I believe it is of far more importance that men and women engaged in the Government service should not have their health ruined or their lives destroyed than it is that some whippersnapper of a boss, holding a temporary posi-tion of authority, should be allowed to make an unenviable name for himself.

Let us examine the records of the Post Office Department and the reports of the department officials, and what do we find? The Postal Service has conducted the largest business in its history; increased revenue over expenditures of approximately \$4,000.000, the first surplus of its kind in the Post Office Department for 30 years. Such a record is one that Postmaster General Burleson can well be proud of. This showing has been made in the face of liberal treatment of the employees and the prompt delivery and dispatch of the mail such as the public has never enjoyed before. I trust that he will hesitate before taking the advice of these hold-over officials, whose policy of retrenchment and false economy was so genuinely rebuked by the American people in the last general election.

I read with much interest the debate in the Senate in May, 1913, on the deficiency bill appropriating \$600,000 to take care of the growing needs of the Postal Service for the remainder of that fiscal year. Senator Bristow, of Kansas, and Senator Bryan, of Florida, worked themselves up to a fever over this appropriation, and charged that the eight-hour-in-ten law was responsible for creating the deficiency. The Senator from Florida offered an amendment to the law whereby compensatory The Senator from time would be given to the employees for overtime instead of paying for it in money, as the law now provides. It might be well for us to know just what was responsible for the deficiency, in order that no one will be deceived. The annual report of the Postmaster General for the fiscal year ended June 30, 1913, contains the following statement:

tains the following statement:

The growth of the parcel-post business has been phenomenal. During the first six months of its operation approximately 300,000,000 parcels were handled. The percentage of loss and damage has been relatively small, as has also been the number of complaints of delay or unsatisfactory service. The department has earnestly endeavored to avail itself of every possible means for reducing to a minimum the difficulties incident to taking over such a vast enterprise. Officers and employees have shown commendable zeal and resourcefulness in meeting every exigency that has arisen in connection with the service. The proper handling and prompt delivery of the more important classes of mail have not been impeded, and at the same time the parcel-post business has been conducted with gratifying celerity and dispatch.

It appears to me. Mr. Chaptenen, that the handling of this

It appears to me, Mr. Chairman, that the handling of this great volume of new business must have required additional help, and it is falacious to fool oneself into the belief that the business could be handled otherwise. Should a private corporation attempt by subterfuge to compel their employees to take care of such an exceptionally large amount of new business without additional help or extra pay for overtime, there is not a question of doubt in my mind or in the mind of any fairminded man but what there would be trouble. Yes, Mr. Chair- on 400-mile distances or zones.

man, and the gentleman who seemed on that occasion so solicitous of the Government as to place this burden on the postal employees, would no doubt be shouting loudest against the heartless corporation. But such is politics, and such is life, and I presume it will be so until the people do more thinking and studying of public affairs.

Prior to the holidays a few weeks ago, according to press notices, orders were issued for the closing of all the executive departments of the Government at 12 o'clock on the day before Christmas and the day before New Year's Day. I have been informed that this order also included the navy-yard em-ployees, and I am heartily glad that this was so, as it is seldom that the fellow who does the real hard work is given a share of any of the good things going. There is no fault to be found with the order if public business did not suffer and the employees could be spared. While these clerks were enjoying this extra half holiday and the full holidays of Christmas and New Year's Day, the clerks in post offices were compelled to work day and night, and the letter carriers were required to carry loads that taxed their strength to the limit. These employees did not complain, nor were they envious of their more fortunate brothers in the executive departments, as they realized that the mail had to be distributed and delivered, and they gave every ounce of energy they possessed in getting it to its proper destination as promptly as possible. I have been informed that in the Brooklyn post office ambulances were called three different times on Christmas eve to take several of the employees who collapsed to hospitals for treatment. A newspaper dispatch contains the information that a carrier in Newark, N. J., collapsed under the strain, stricken with apoplexy, and I presume that these were but incidents of like conditions that applied to the rest of the post offices in the country. As I read in the papers of the public expression of Postmaster General Burleson to the postal employees, commending them for the splendid manner in which they acquitted themselves in handling the enormous quantity of mail during the recent holiday season, it brought to mind the thought that something more substantial than expressions of thanks should be shown to a body of men who are ready at all times to do their duty and to meet any emergency to the best of their ability and with no other purpose in view than the knowledge of a duty well performed.

Mr. MOON. Mr. Chairman, I yield 30 minutes to the gentleman from Colorado [Mr. KINDEL].

Mr. KINDEL. Mr. Chairman, the subject of parcel post is

not a new one with me. Seven years ago, after having fought the railroads for their discriminatory rates for 16 years, I concluded that the thing with which to conquer the railroads and express companies would be a parcel post. I am glad that we now have a parcel post, although under its present rules it is far from being perfect.

While our Postmaster General takes great credit upon himself, I must say that I can not agree with the distinguished chairman of the Post Office and Post Roads Committee, who thinks that Mr. Burleson is the best man on earth. He may be that, but certainly he has not demonstrated to me that he is the

wisest in conducting the parcel post.

I have made an exhaustive comparison of rates, and when I have demonstrated my findings I think I will have convinced most everyone that the parcel-post rates are out of all proportion and that they are apparently made to aid the express companies and mall-order houses instead of the general public, which has been promised a parcel post and will expect to have

one which will reduce the cost of living materially.

I will demonstrate to you that you can not ship above 10 pounds and you can not ship farther than 150 miles in competition with the express rates that will be in effect after February

I will first dispose of this map, which in colors displays the territories embraced—the official, the southern, western, and other classification territories. This colored in red is the official; this in yellow is the southern; this in blue the western; and this, more particularly west of Denver, is recognized as the transcontinental.

The Interstate Commerce Commission has ruled that the express rates in our section west of the one hundred and iffth meridian should be in the ratio of 23 to 10 in comparison with the rates east of the ninetieth meridian. The parcel post could, and would in a way, remedy these discriminations if the rates were properly graduated and if a zone system on a declension basis were inaugurated. While I admire the gentleman from Maryland, Mr. Lewis, for the interest he has taken in the matter of parcel post, I can not agree with him in his theory of a rate of a half cent per pound per 100 miles, which we now have in effect. The present zone system beyond the fourth is based

To get back to the express rates from New York to Indianapolis the rate is \$2.40 per 100 pounds, while from Price, Utah, to San Francisco, Cal., the same distance, it is \$4.80 per 100 pounds, or 100 per cent higher rate. It is discriminations like this that we had hoped to overcome with the parcel post. Abilene, Kans., is in the central part of the United States, as every primary-school boy knows. The rate from Abilene to San Francisco is double that which it is from New York to Abilene. Now, talk about conservation; our section of the country is certainly being conserved with a vengeance. It is worse. It is confiscation that we suffer under the discriminatory transportation rates which are now in force.

Nowhere in transportation do I know of a case where a premium is paid for reshipping except under our present parcel For example, the express companies assess the following penalties for reshipping 100 pounds from New York to San

2 Itticioco.	
New York via Chicago to San Francisco	\$1.30
New York via Omaha to San Francisco	1.65
New York via Chevenne to San Francisco	1, 70
New York via Denver to San Francisco	2, 05
New York via Pueblo to San Francisco	2, 30
New York via Ogden to San Francisco	1. 65
New York via Elko, Nev., to San Francisco	1. 43
New York via Reno, Nev., to San Francisco	

Here I might ask why are the rates from the two Colorado points 100 per cent higher than those from the two Nevada points?

If you board a street car here at the Capitol and go as far as the Treasury Building, it will cost you 5 cents. If you then reship yourself to Georgetown on another car, it will cost you another 5 cents, or an increase of 100 per cent. If you buy a through ticket from Washington to San Francisco, it is certainly considerably less than if you bought it from Washington to Chicago and then bought another ticket from Chicago to San Francisco. This same rule applies to freight and express rates; then why should it not be the rule in parcel post?

For example, if you ship 50 pounds to the second zone, 150 miles, it is 54 cents; then if you reship it to the 300-mile zone, making another 150 miles, you pay another 54 cents; and again, if you reship from this latter point to the destination, 450 miles in all, then the total rates will be \$1.62 for 50 pounds, while the present graduate rate figures \$2.03 for 50 pounds, or 41 cents

higher than the sum of the locals,
Again, take, for example, Chattanooga, Tenn., the town of our
distinguished chairman of the Post Office Committee, or the town of Austin, Tex., the town of our distinguished Postmaster General. From Chattanooga to Wilmington, Del., the rate by parcel post on 20 pounds is 83 cents; from Chattanooga to New York the parcel-post rate on 20 pounds is \$1.22. Now, by reshipping the 20-pound package from Chattanooga at Wilmington to New York this combination of rate takes place: Chattanooga to Wilmington, 83 cents; Wilmington to New York, 24 cents; making a total of \$1.07; so you see that the sum of the locals is 15 cents less than the through rate from Chattanooga to New York. If you increase the shipment to 100 pounds—assuming that the weight limit is to be extended—you could save 95 cents by reshipping in this case. This rule holds good in all zones beyond The Austin, Tex., case will duplicate the same figures.

The express companies are manifestly very well pleased to have the parcel-post rate for short distances very low, because they will make the post office perform the service of delivery of their shipments from junction to the interior points. The mail-order houses will do likewise. Thus 100 pounds can be shipped by express to Des Moines, Iowa, and from there reshipped to near-by points by parcel post in 20 or 50-pounds lots with the saving of \$5 by reshipping on parcel post at Des Moines instead of through shipment by parcel post. The same thing can be done between any points of similar distance. therefore behooves the American public to get wise and trick the post office instead of being tricked by the post office.

Again, assuming that the parcel-post rate and weight limit were extended to 100 pounds, then on 100 one-pound packages from Washington, D. C., to Salt Lake City, Utah, which is in the eighth zone, the rate will be 12 cents per pound, or \$12. If you then ship a parcel weighing 100 pounds the rate would also be \$12, but if you were to ship 100 one-pound packages to the third zone they would cost you 6 cents each, or \$6, while the 100pound parcel in the same zone would cost you \$2.04. In the latter case you get the advantage of \$3.69, because of a wholesale shipment instead of retail shipments. In the fourth zone the rate on similar shipments is \$7 as against \$4.03. Under these circumstances, in the first, second, and third zones there would be a difference of \$3.96; in the fourth zone, \$2.97; in the fifth zone, \$1.98; in the sixth and seventh zones, 99 cents each; while in the eighth zone, as shown above, there would be no difference. Now, the graduate of rates ought and can be ar-ranged on a basis that would prevent the possibility of reship-

ping, and these other inconsistencies mentioned. In other words, there should be a penalty on parcel post reshipping as there is in all other transportation.

I have offered under my resolution. No. 179, a new graduate on an eight-zone system, under which the pound number is multiplied by the zone number, with three added for overhead charge to the result of the multiplication, which produces the answer or the rate. The parcel-post rates should be, above all things, simple and automatic, as well as equitable, and ought to be as readily calculated as our monetary system, under which 10 dimes make a dollar or 4 quarters make a dollar. My system would secure for us the long and fat hauls as well as the short and lean haul business, something which can not be accom-

plished under our present parcel-post rate system.

I have here prepared a table on which are indicated 32 shipping points. My calculations with respect to those points have resulted in figures here shown, which demonstrate that there are only few cases-those within the 150-mile radius and those in the section west of the one hundred and fifth meridian-where the parcel-post rates are less than the express rates. Under such conditions how can the parcel-post system be of advantage and a general saving to the public? Has it not become a paper tariff, and is not our Government getting money under false pretences when it accepts a package beyond a third zone, in which case the rate in all territory east of the Missouri River is usually about 100 per cent higher than the express rates on a 20-pound package?

Owing to the increased business in the near-by zones, I am reminded that I am very much in favor of increasing the pay of our rural delivery men, who are being overloaded with local-

zone delivery business.

Now, gentlemen, you must consider that the parcel post under above rates is not insured. If you desire to put it on the same basis of insurance as an express package you would have to pay 10 cents extra in each case. You can plainly see that none but a fool would patronize the parcel post in the cases shown above, yet our Postmaster General at this time is seriously considering increasing the weight limit of packages from 20 to 100 pounds and continuing present graduation of rates and zones. This would be all right if rates and zones were correct. To illustrate that they are entirely out of reason, I would take Bangor, Me., as an initial point and Denver as the destination point; the latter becomes the apex of rates. If San Francisco is taken as the initial point and Chicago as the destination, then Chicago becomes the apex point. They tell us that the mailcarrying rates have something to do with this condition-that is, that they must be regulated before the parcel post can be changed. I ask how is the parcel post affected by the railroad rates when you can reship just beyond the zone line and save 95 cents on a package of 100 pounds, as I have illustrated above? At present the parcel post is simply a plaything in the hands of express companies, and it will continue to be so if we go on at this rate. If anybody here thinks I am not right, I want him to come up and I will prove to him that what I say is correct.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Colorado yield

to the gentleman from Wisconsin? Mr. KINDEL. Certainly.

Mr. STAFFORD. As I understand the gentleman, he is using the express rates as they have recently been determined by the Interstate Commerce Commission-the rates that will go into effect shortly?

Mr. KINDEL. Yes; on February 1.

Mr. STAFFORD. These rates are materially lower than the present parcel-post rates, are they not?

Mr. KINDEL. Yes; only in the case of the short distances up to the third zone and on packages weighing less than 10 pounds are the parcel-post rates lower than the express rates.

Mr. STAFFORD. I understand the Interstate Commerce Commission, which has had this subject under consideration for more than two years past-Mr. KINDEL. Yes, sir-

Mr. STAFFORD. Determined those rates independent entirely of the parcel-post rates under the law passed about a year and a half ago?

Mr. KINDEL. They simply concurred with the Postmaster General's proposed rates by their rubber stamp of approval, without investigating. Since last March I have been busying myself with the Interstate Commerce Commission and Post Office officials, endeavoring to convince them of the fallacy of the present system of zones and rates.

Mr. STAFFORD. You do not mean to convey the impression that the Interstate Commerce Commission merely rubber stamped the rates adjudicated by them, so far as the express companies were concerned?

Mr. KINDEL. No, sir.

Mr. STAFFORD. That was a matter of investigation of more than two years' standing.

Mr. KINDEL. Yes; and cost about \$225,000. I mean to say that the rates of the Postmaster General were concurred in by a rubber stamp, so to speak, by the Interstate Commerce Com-

Mr. STAFFORD. And I presume that your argument leads naturally to the further step that you wish the postal authorities to enter into competition now with the revised express rates so as to meet the rates determined upon by the Interstate Commerce Commission for the express companies'

Mr. KINDEL. That is exactly what I want to do, and theythe Post Office officials-can not do it with the rates they now have in effect. Beyond a 600-mile distance they have flat 400mile zones, and, as I have said, the zones cease at Salt Lake when New York is the initial point, and at Denver when Bangor, Me., is the initial point. Why should Denver pay as high a rate on parcel post from Bangor, Me., as San Francisco or Salt Lake City, which are from 700 to 1,500 miles longer haul? I do not believe in flat rate on parcel post. I think that only one kind of matter, namely, letters-that is, intelligence-should be carried on flat rate, but when it comes to merchandise and traffic, as in the parcel post, the rates should be commensurate with the service.

Mr. STAFFORD. I know that the gentleman has given a very great study to this question of the zone system. I assume he would extend the application of the zone system to periodicals and to all character of postal matter that bears the general character of merchandise.

Mr. KINDEL. Yes; that is true. The fault that I find with the new rule that is to go into effect on March 1 is that the rate on books shall be 4 cents for 8 ounces and 12 cents for 9 ounces, say, from New York to San Francisco or Salt Lake.

Mr. STAFFORD. Of course, under the new rule of the Post-

master General the rate for books remains as to all those under 8 ounces 1 cent for every 2 ounces and for 8 ounces 4 cents; but on the weights above 8 ounces the parcel-post rates are applied under the order of the Postmaster General.

Mr. KINDEL. Sixteen ounces costs 12 cents from here to San Francisco; that is the rule of the various zones-4 to 12 centsbut there should be a distinctive order made there. One of the things that I complain of in the parcel post to-day is that they have increased the weight from 11 to 50 pounds in the first and second zones, but they have not increased the size of the package. England or Germany can ship an 11-pound package over here under 72-inch measurement, while our citizens must crowd 50 pounds into a 72-inch size package in our domestic parcel post, which in many cases can not be done.

We talk of how the parcel post will cheapen the cost of living by making it possible for the farmer to ship directly to the consumer, but I will show you that many of the farmer's products can not be shipped by parcel post in 50-pound lots because the 72-inch package can not contain 50 pounds. I have had prepared for me by the Bureau of Standards a table of weights under 72inch measurement. I find that a cubic foot contains but 31 pounds of apples, 27 pounds of blueberries, 11 pounds of grass seed, 35 pounds of bolted corn meal, 32 pounds of cotton seed, 18 pounds of onion sets, 14 pounds of peanuts, and so on.

Mr. MONDELL. W Mr. KINDEL. Yes Will the gentleman yield?

Mr. MONDELL. Has the gentleman met the situation in his own State, as I have in mine, that on many of our mountain roads the parcel-post rate for the first and second zones is so much below the current freight rate, and that, therefore, packages of flour and canned goods and groceries are being unloaded on the parcel-post carriers in vast quantities?

Mr. KINDEL. Yes.

Mr. MONDELL. How does the gentleman think we are going to meet that situation?

Mr. KINDEL. I have contended from the first that those near-by zone rates are entirely too low. If they can prove their assertions that they are making money on that basis, then I say that the only thing to do is to follow up with the other distances and make them correspondingly low so as not to throw the big and paying business to the express companies as is now being done. certainly will not get any of the long and profitable haul busi-

ness under the present rates. It is out of all reason to expect it.
Mr. CRAMTON. As I understand your contention, it is not so much that as a whole we fail to compete in rates with the express companies, but that our rates are so arranged as to zones that we let them keep the business that they want and

we take the business that they do not want.

Mr. KINDEL. Exactly. You understand the express companies have an office in each railroad town of any size. Now, if they can unload, as they are doing to-day, at these points and then do their distributing by parcel post, then the Post Office

Department is getting the worst of it. That is what I complain of. The shipment by express can have the stamps put on before it goes to the express office, and when it reaches the junction point or post-office station can be reshipped by parcel post to the detriment of the parcel post. It is hard to explain a matter of this kind in a speech.

Now, I want to say, for time is fleeting, that the Interstate Commerce Commission, with Mr. Lane as the commissioner, engineered the making of the tariff on express rates, which I regard as the greatest and most scientific tariff that has ever come to my notice. It is wonderfully accurate and automatic. The only objection I have to the present express rates is that when the territory of the fourth zone in express tariff is reached the rates are at the ratio of 23 to 10 as against the eastern territory.

My great appreciation of the work of the four men, Mr. Lane, Mr. Marble, since deceased, Mr. Ryan, and Mr. Dunlap, led me to introduce my resolution, No. 175, asking that a year's salary be paid to Mrs. Marble, who is the widow of Mr. Marble, formerly secretary to Commissioner Lane, and afterwards his successor as Interstate Commerce Commissioner, and who practically killed himself by overwork in the service.

The present personnel of the Interstate Commerce Commission, working under this same excellent express tariff, say that the opposite is true when applied to the parcel post. Who can say which is right, and under what kind of rates are we to work?

Here is what I have said to my people in Denver. I showed them first that where the parcel post and express rates meet in the second zone the parcel post has a slight advantage.

From Denver to Norton, Kans., a distance of about 300 miles. the uninsured parcel-post rate is \$2.04, as against \$2 insured express rates per 100 pounds. From Denver to Chicago the parcel-post rate on 100 pounds would be \$6.02, while the express rate is \$4.20. On a 20-pound parcel between Denver and Chicago the rate is \$1.22, while the express rate is \$1. Between Denver and New York the parcel-post rate on 100 pounds would be \$10.01 and the express rate \$5.70, and on a 20-pound parcel between Denver and New York the parcel-post rate would be \$2.10, while the express rate is \$1.30.

Now, remember that under these rates I have mentioned parcel-post shipments are not insured. An extra charge of 5 cents is made if you insure a package valued at \$25, or 10 cents for a package valued at \$50. So the whole fabric is wrong, and ought to be righted, instead of compounding and perpetuat-

ing the errors that we here show.

The Postmaster General is now contemplating extending weight limit to 100 pounds. See what will happen under present graduate.

Express and parcel-post rates effective Feb. 1, 1914.

In addition to being higher than the express, these parcel-post

rates do not include insurance.

One of the important matters to be considered in parcel post is that the express companies allow a 25 per cent discount on all shipments of food products except candy, which is considered a luxury. This is not true of the parcel post. Under it everything eatable goes at the current merchandise rate. Now, under what I have shown here, how is the parcel post going to be of any avail to the general public, except on parcels weighing from 1 to 10 pounds and in only near-by zones? This could be easily remedied, but I will not be able to go into that further now.

The CHAIRMAN. The time of the gentleman from Colorado

has expired.

Mr. KINDEL. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. KINDEL. In further extension of my remarks, I have prepared comparative tables of freight, express, and parcelpost rates, to be inserted herewith.

I consider the present graduate of parcel-post rates a worse botch than the one that preceded it, which I exposed in a speech on October 2, 1913, to the chagrin of the parcel-post and Inter-

state Commerce officials.

I necessarily have to repeat much, for that is a vice peculiar to speeches which seek to hammer a fact into every conceivable shape. Further, I make no pretense to literary accuracy; truth is my whole aim and object. Therefore, I again say what excuse is there for this great Government, in the land of the brave and the free, for compounding and perpetuating error in the much-hoped-for parcel post, which every fair-minded citizen believed would be the means of reducing the cost of living.

Take any of the tables in which I make comparisons of ex-ress and parcel-post rates. I find that the parcel-post rates press and parcel-post rates. figure exactly 25 per cent higher on the average than the express rates. These tables are all based on 20-pound shipments. By perusing the tables anyone can see that the Government need not expect any business over 5 pounds or beyond the 150-mile zone and that the post office becomes the burden carrier or messenger boy for the express companies and the mail-order houses. If the express companies had been given a commission to fix the parcel-post rates, could they have made them more to their liking and advantage than they are to-day? Why did the Interstate Commerce Commission make the express rates west of the one hundred and fifth meridian 130 per cent higher than those in effect east of the ninetieth meridian? Why did the Interstate Commerce Commission make the express rate of 64 cents on 20 pounds from New York to Chicago and at the same time concur with the rubber stamp in Postmaster General Burleson's parcel-post rate of \$1.22 on 20 pounds from New York to Chicago? In addition to that, the express companies are allowed to give 25 per cent reduction on all eatables except candy, which would make the express rate on a 20-pound package 48 cents, while by parcel post it would be \$1.22. Of what avail is such a paper tariff in the parcel post to the public? Why continue to mislead and do that which we condemn in others? Is it not simply a case of getting money under false others? Is it not simply a case of getting money under false pretenses? Since Congress is in the mood of investigating everything, had it not better inquire into these matters?

After all, is not this apparent discrimination the result of

cause and effect? There are 21 Members of the House of Representatives on the Interstate Commerce Committee, and not one Democrat of whom resides west of the ninetieth meridian, and every one of them is a lawyer, not a shipper, merchant, or granger among them. When complaining of this matter in the operating.

Democratic caucus, I said, among many other things, that there was not a man on the Interstate Commerce Committee who knew the difference between a bill of lading and a waybill, and I was hooted at for making this statement, but no correction or change in the personnel was made. I now repeat there is not a man among them who can reconcile the present parcel post with the express tariff. The same can be said of the Post Office and Post Roads Committee, every one of them living east of the Missouri River.

The chairman of the latter committee, Mr. Moon, of Tennessee. who was the dispenser of time in debate, took two hours to relieve himself of a speech, but gave me only 30 minutes to present my findings. Since I failed to interest the committees, I now appeal to the House and the public generally.

I have taken the matter up with several Cabinet officers and the honored President himself, and while I have a great regard for the President, who is unquestionably an authority on syntax and etymology, he admittedly knows little or nothing about the science of transportation.

This is not the first time I have made known the inconsistencies and injustices to the powers that be. Besides, this being my fourth speech on the subject, I have almost daily talked to the various heads and subheads for the past nine months. Some changes have followed, but not one of them in a logical or scientific way.

Until the President realizes his mistake and sends the blundering Postmaster General Burleson and Chairman Clark, of the Interstate Commerce Commission, one of them to punch cows in Texas and one to punch railroad tickets in Iowa, we can not hope for any improvement.

Chairman Clark champions the railroads by saying the railroads must have more pay because of the parcel-post traffic, which continues to increase so rapidly (?). I say wait 60 days and with an X ray you will not find a parcel over 5 pounds weight going over 150 miles distance.

To my constituents I would say, in conclusion, I have done my best and am glad to say that through my efforts, which have cost me a fortune and the best years of my life, the first-class freight rate from Chicago to Denver has been reduced from \$2.32 per 100 to \$1.80 per 100 pounds, and countless other reductions.

The first suit in the United States against the express companies was brought by me, with the result that the rate was reduced from New York to Denver from \$8.50 to \$8 per 100 pounds. Not being satisfied with this 50-cent victory, I brought a second suit against the express companies before the Interstate Commerce Commission, in consequence of which several hundred commercial bodies have been encouraged to bring suits since, with the result that we now have an express rate from New York to Denver of \$5.70 instead of \$8.50 per 100 pounds.

I am assured by the Post Office officials that the parcel post will right itself in time, but I say that it will be accomplished only when patriotic and efficient men apply themselves to the task of righting it. As for me, I shall continue, like radium, to work in my own way for the benefit of mankind, especially the suffering poor.

The Post Office should, and can, be made the enlarger of the common life by utilizing it as the instrument of trade and industry instead of a "gold brick."

Then why continue to bamboozle the American public, whose expectation after investigation will be turned to consternation, followed by retribution?

The Kindel parcel-post graduate is offered as a substitute for the irreconcilable and unscientific one under which we are now

Here I show from above Post Office figures that our Govern-express companies charge, including delivery. Had we not betment is paying more to the railroads for haulage than the ter make contract with express companies to do our hauling?

	From New York to—											
The second of the second secon	Newark, N. J.	Philadelphia, Pa.	Boston, Mass.	Pittsburgh, Pa.	Grand Rapids, Mich.	Des Moines, Iowa.	Denver, Colo.	Salt Lake, Utah, \$1.71 (San Fran- cisco, \$2.24).				
	Zones.											
	1	2	3	4	5	6	7	8				
20 pounds, parcel post	\$0.24 .08 .31	\$0.24 .18 .38	\$0.44 .33 .36	\$0.83 .63 .46	\$1.22 1.03 .62	\$1.61 1.43 .82	\$2.01 1.83 1.30	\$2.40 2.23 1.71				

In addition to the above, fruits and nuts are carried from California to New York by express at a rate of 4 cents per pound, while the parcel-post rate is 12 cents per pound. In other words, you can ship 10 pounds of fruit or nuts by express from California to New York and intermediate points for 40 cents, or 100 pounds for \$4, while by parcel post the rate would be \$1.20 for 10 pounds, or \$12 for 100 pounds. It must be remembered that the railroads receive only one-half of the gross receipts of the express companies. In this case, then, the railroads get from the express companies 2 cents per pound, and, according to the above Post Office report, they charge the Government 11 cents per pound, or almost 600 per cent higher rates for the same service that they give the express companies. And yet we talk of being an intelligent and progressive Nation,

who are going to reduce the cost of living by the parcel

post.

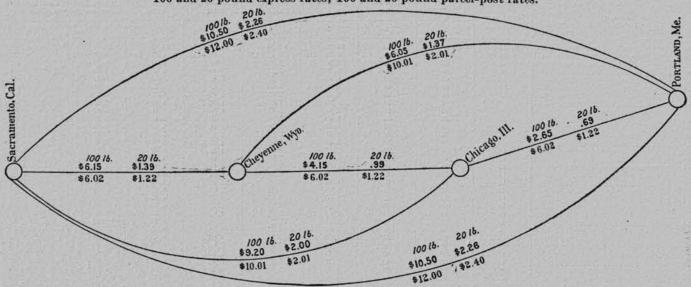

And to think of it! We pay nearly \$2,000,000 per year to support this Interstate Commerce Commission when any boy with a rubber stamp would have better judgment than to indorse such an idiotic proposition as our present parcel post.

Notwithstanding the above claim of cost of service, our Government does carry packages from Europe to any part of the United States at the following rates:

Germany, 4h pounds	\$0.33
Germany, 11 pounds	. 81
Italy, 7 pounds	. 39
Great Britain, 11 pounds	· 79
dreat billam, if pounds	. 10

Kindel's Exhibit of parcel post and express rates passed on and approved by Interstate Commerce Commission.

100 and 20 pound express rates; 100 and 20 pound parcel-post rates.

Express rates carry \$50 insurance.

All eatables, except candy, take 25 per cent lower rate than merchandise.

Parcel-post rates are without insurance.

Eatables are not allowed lower rates.

Weight of package increased to 50 pounds in the first and second zones, but size of package still remains 72 inches, the size of a gentleman's medium-sized hatbox.

How long will the American people be fooled by the present parcel-post "gold brick"?

Has anybody heard protests from express companies and mail-order houses?

Express rates appear above the line, parcel post below the line.

Parcel-post rates and excights, inaugurated by Postmaster General Burleson, objected to by George J. Kindel.

Notice how the rate advances 1 cent per pound between zones after second zone on the first pound, and then how the rate increases 19 cents on 10 pounds, 39 cents on 20 pounds, 59 cents on 30 pounds, 79 cents on 40 pounds, and 99 cents on 50 pounds, etc., instead of 1 cent per pound as in the first instance.

The 5, 15, 25, 35, and so on, figures in zone 1 column indicate what can be saved in reshipping 150 miles into the next zone after the second.

Kindel's parcel-post graduate. Copyrighted and presented to the people of the United States.

Pounds.	Local zone.	First zone, 150 miles.	Second zone, 150 to 350 miles.	Third zone, 350 to 600 miles.	Fourth zone, 600 to 900 miles.	Fifth zone, 900 to 1,250 miles.	Sixth zone, 1,250 to 1,650 miles.	Seventh zone, 1,650 to 2,100 miles.	Eighth zone, 2,100 miles and over.

This graduate can be extended to any weight without discriminations by multiplying the pounds by the zone and adding 3, the overhead charge, except in the local zone, where the rate is found by dividing the weight in pounds by 2 and adding 3. Thus the rate on 10 pounds in the local zone is 10+2=5+3=8. Fractions are disregarded. The rate on 10 pounds to the the eighth zone is 10×8=80+3=83.

WHAT SOME THINK OF KINDEL'S AND THE PRESENT PARCEL-POST GRADUATE.

[Comments on the Kindel graduate of parcel post by Mr. Frank H. Mc-Cune, of Portland, Oreg., expert traffic man and many times a pleader before the Interstate Commerce Commission.]

Mr. McCune says:

I think your schedule plan excellent of increasing the haulage cost uniformly from zone to zone, plus the terminal cost. It is in accord with natural transportation laws.

[Letter from Mr. H. H. Buckwalter, of Denver, Colo.]

JANUARY 18, 1914.

Hon. Geo. J. Kindel, House of Representatives, Washington, D. C.

Dear Sir: This is the first real, scientific dope on post charges I have seen. It is not only perfect but educational. A glance at the system shows the lack of system in the present schedule. I positively can't see how the post-office people arrived at the figures now in use. Maybe they used a dream book, because the schedule is certainly a nightmare. I'm for your plan now and forever.

Yours, truly,

H. H. Buckwalter.

UNITED STATES SENATE,

Washington, D. C., January 22, 1914.

Hon. George J. Kindel, House of Representatives, Washington, D. C.

Dear Mr. Kindel: I wish to acknowledge receipt of House joint resolution 179, introduced by yourself on December 20, 1913, to establish a fair and relative parcel-post graduate. From the little study I have been able to give the figures submitted by you I have no reason to believe they are unreasonable, and I hope I shall have a chance to vote upon your resolution, with what amendments I may feel are necessary after further examination. There is no question but that it provides rates much better than the present ones.

Thanking you for sending the same to me, I remain, Yours, truly,

REED SMOOT.

THE DANIELS & FISHER STORES Co., Denver, Colo., January 19, 1914.

Hon. George J. Kindel, Congressman First District Colorado, Washington, D. C.

Washington, D. C.

My Dear Mr. Kindel: I received your letter of January 13.

I am glad to see you are going after the parcel-post game the way you are, as it is of material benefit to us here in Colorado, especially in our wholesale departments where good and cheap service to our wholesale customers means so much; in fact, we have a great many cases now where the parcel-post rate is much cheaper than the freight rate, and it is bound to help us whip the freight rates into line.

I am afraid, however, that the express rates going into effect February I will materially affect the tonnage moving via parcel post. It so figures out on our stuff that after the 1st of February every package over 4 pounds we will switch back to express again, as the express rate will then be cheaper than the parcel post. The Washington authorities ought to keep this matter pretty well in mind, or the sudden drop in parcel-post tonnage will scare them to death.

Very truly, yours,

A. B. Trott.

BUENA VISTA, COLO., January 18, 1914.

Hon. George J. Kindel, Washington, D. C.

My Dear Congressman: Your parcel-post graduate at hand. It surely will be an improvement on the one we now have. I hope for its adoption.

for its adoption.

Why was the weight limit to the second zone extended to 50 pounds without an allowance being made for increased size in package?

Why should Europeans be granted a 72-inch measurement on 11 pounds while we must crowd 50 pounds into the same size package?

At the present moment it is hope deferred to see the express companies eclipsed by our parcel post.

With best wishes.

Yours, very truly,

W. M. TEETER.

Every State having two Senators, I selected two cities in each State that were on railroad and enjoyed both express and post office, with the following result.

The rates are on 20 pounds, the present weight limit beyond the second zone.

Express rates are shown in roman figures and parcel-post rates in Italic.]

KINDEL'S EXHIBIT OF I.C.C. GOLD BRICK 2016s PARCEL POST RATES

Parcel post rates appear above the line, express rates below the line.

something for the members of the house to ponder over.
Post Office Department,
Fourth Assistant Postmaster General,
Washington, January 27, 1914.

Hon. George J. Kindel, House of Representatives.

MY DEAR MR. KINDEL: In compliance with your telephonic request, I beg to submit below a list of the parcel-post units that contain 100 or more post offices, together with the number of stations, rural routes, and statute miles in each respective unit:

Parcel-post unit number.	Number of offices.	Stations.	Rural routes.	Area in square miles.
716	108	11	30	898. 49
767	155	507	34	905. 29

1673	123			944. 21

This data is up to January 15, 1914, except that relating to rural routes, which is to June 1, 1913.

Sincerely, yours,

Jas. I. Blakslee,

JAS. I. BLAKSLEE, Fourth Assistant Postmaster General.

Mr. MOON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. Hay, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the Post Office appropriation bill (H. R. 11338) and had come to no resolution thereon.

LEAVE OF ABSENCE.

Mr. Helm, by unanimous consent, was given leave of absence indefinitely, on account of illness.

COMMITTEE ON ROADS.

Mr. SHACKLEFORD. Mr. Speaker, as chairman of the Committee on Roads, I have filed a report to-day, and I ask unanimous consent that I may file an additional or supplemental report within five days.

The SPEAKER. The gentleman from Missouri, chairman of the Committee on Roads, announces that he has filed a report to-day, and asks unanimous consent for leave to file a supplemental report in five days. Is there objection?

There was no objection.

POST OFFICE APPROPRIATION BILL.

Mr. SAMUEL W. SMITH. Mr. Speaker, I ask unanimous consent to print the report of the minority on the Post Office appropriation bill in the RECORD. It should have been printed this morning, but by mistake it was omitted.

The SPEAKER. The gentleman from Michigan asks unanimous expent that the report of the minority by printed in the

The SPEAKER. The gentleman from Michigan asks unanimous consent that the report of the minority be printed in the RECORD. Is there objection?

There was no objection.

The report is as follows:

[House Report 165, part 2, Sixty-third Congress, second session.]

Mr. Samuel W. Smith, from the Committee on the Post Office and Post Roads, submitted the following views of the minority, to accompany H. R. 11338:

The undersigned minority members of the Committee on the Post Office and Post Roads are opposed unqualifiedly to the proposed section 6 of the Post Office appropriation bill, removing assistant postmasters from the classified service, thus restoring them to the spoils system.

The undersigned minority members of the Committee on the Post Office and Post Roads are opposed unqualifiedly to the proposed section 6 of the Post Office appropriation bill, removing assistant postmasters from the classified service, thus restoring them to the spoils section 6 of the bill reads:

"SEC. 6. That hereafter any assistant postmaster who may be required by law or by authority or direction of the Postmaster General, to execute a bond to the Postmaster General to secure faithful performance of official duty may be appointed by said Postmaster General, who may require such bond, without regard to the provisions of an act of Control of the Control of

outside of the classified service the entire internal-revenue force of trained clerks, storekeepers, gaugers, etc., can be supplanted by partisan appointees.

In the currency law also the principle of civil service was again ignored and the employees under the Federal Reserve Board will be legalized partisan spoils, the Baltimore platform to the contrary notwithstanding, President Wilson approved the deficiency appropriation bill containing a rider providing that deputy marshals and deputy collectors of internal revenue and their subordinates should be removed from the classified service. The President failed to veto this attack by his party associates upon the merit system.

The determined assaults upon the civil service, evidenced by overt acts, give credence to the suggestion that the price of administration legislation is a place at the follitical pie counter. It is within the power of the President, even now, without resort to a veto, to have the obnoxious section 6 of the post-office bill eliminated.

We regret exceedingly that partisan politics has been injected into the great supply bill for the postal department by this attempt to cripple the service in one of its most important branches for the purpose apparently of getting offices with which to pay political debts.

We feel it to be our bounden duty to the Postal Service, a service probably nearer the people than any other, to emphasize our objections to a proposition that violates every principle of good faith toward the people—that repudiates every promise and profession that the civil service would be honestly administered. Hence we make this minority report, hopeful that the President himself, late vice president of the National Civil Service Reform League, will intervene for the protection

of the Postal Service, or that enough Democrats who have the good of the service at heart may join with the Republican side of the House to accomplish the defeat of a proposition so unworthy.

SAMUEL W. SMITH,
H. STEENERSON,
MARTIN B. MADDEN,
AMBROSE KENNEDY,
W. W. GRIEST,

APPENDIX.

DEMOCRATIC ATTACKS UPON THE CIVIL SERVICE.

THE SEVEN-YEAR TENURE PLAN.

This was proposed by a Democratic House in the legislative appropriation bill and was vetoed by President Taft. The effect of the plan is stated in the President's veto briefly, as follows:

"The effect of this section is to leave it to the discretion of the head of the department in the case of each classified employee at the end of his term of seven years to say whether that employee, no matter how high his standing, shall continue or whether another shall be selected from the eligible list submitted, in accordance with law and regulation, by the Civil Service Commission."

THE INCOME-TAX COLLECTION PROVISION.

In the office of the Commissioner of Internal Revenue at Washington, D. C., there shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, one additional deputy commissioner, at a salary of \$4,000 per annum; two heads of divisions, whose compensation shall not exceed \$2,500 per annum; and such other clerks, messengers, and employees, and to rent such quarters and to purchase such supplies as may be necessary: Provided, That for a period of two years from and after the passage of this act the force of agents, deputy collectors, inspectors, and other employees, not including the clerical force below the grade of chief of division employed in the Bureau of Internal Revenue in the city of Washington, D. C., authorized by this section of this act, shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, under such rules and regulations as may be fixed by the Secretary of the Treasury to insure faithful and competent service, and with such compensation as the Commissioner of Internal Revenue may fix, with the approval of the Secretary of the Treasury, within the Himitations herein prescribed: Provided further, That the force authorized to carry out the provisions of Section II of this act, when not employed as herein provided, shall be employed on general internal-revenue work.

PROVISION TAKING DEPUTY MARSHALS AND DEPUTY COLLECTORS OF INTER-

PROVISION TAKING DEPUTY MARSHALS AND DEPUTY COLLECTORS OF INTERNAL REVENUE OUT OF THE CLASSIFIED SERVICE.

Hereafter any deputy cellector of internal revenue or deputy marshal who may be required by law or by authority or direction of the collector of internal revenue or the United States marshal to execute a bond to the collector of internal revenue or United States marshal to secure faithful performance of official duty may be appointed by the said collector or marshal, who may require such bond without regard to the provisions of an act of Congress entitled "An act to regulate and improve the civil service of the United States," approved January 16, 1883, and amendments thereto, or any rule or regulation made in pursuance thereof, and the officer requiring said bond shall have power to revoke the appointment of any subordinate officer or employee and appoint his successor at his discretion without regard to the act, amendments, rules, or regulations aforesaid.

THE PRESIDENT'S MEMORANDUM.

I am convinced, after a careful examination of the facts, that the offices of deputy collector and deputy marshal were never intended to be included under the ordinary provisions of the civil-service law. The control of the whole method and spirit of the administration of the provision in this bill which concerns the appointment of these officers is no less entirely in my hands now than it was before the bill became law; my warm advocacy and support both of the principle and of the bona fide practice of civil-service reform is known to the whole country, and there is no danger that the spoils principle will creep in with my approval or countrance.

BALTIMORE DEMOCRATIC PLATFORM, 1912.

The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be the standard of appointment and promotion, rather than service rendered to a political party.

PRESIDENT WILSON IN HIS PREELECTION CAMPAIGN PLATFORM.

I am a hearty believer in the principles of civil-service reform, and shall take pleasure at all times in doing what I can to promote those principles in practice.

PROVISION RELATING TO EMPLOYEES AUTHORIZED BY THE CURRENCY LAW. SEC. 11. The Federal reserve board shall be authorized and empow-

(1) To employees as may be deemed necessary to conduct the business of the board. All salaries and fees shall be fixed in advance by said board, and shall be paid in the same manner as the salaries of the members of said board. All such attorneys, experts, assistants, clerks, and other employees shall be appointed without regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance thereof: Provided, That nothing herein shall prevent the President from placing said employees in the classified service.

HOUR OF MEETING TO-MORROW.

Mr. MOON. Mr. Speaker, I ask unanimous consent that when the House adjourn to-day it adjourn to meet at 11 o'clock

to-morrow morning.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 o'clock. Is there objection?

Mr. PAYNE. I object.

ADJOURNMENT.

Mr. MOON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 7 minutes p. m.) the House adjourned until to-morrow, Saturday, January 17, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were

taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on examination and survey of the waterways from Orangeburg to Charleston, S. C., including cutoff or canal from Edisto River to Ashley River, with a view to providing a more direct route between said cities than that afforded by existing channels (H. Doc. No. 606); to

the Committee on Rivers and Harbors and ordered to be printed.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of harbor at Norfolk and Portsmouth and approaches thereto, and channel to Newport News, with a view to securing increased width of channel and providing additional anchorage area (H. Doc. No. 605); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Alloway Creek, N. J., above Quinton (H. Doc. No. 604); to the Committee on Rivers and Harbors and ordered to

be printed, with illustration.

4. A letter from the Secretary of the Treasury, transmitting a copy of a communication of the Postmaster General, submitting estimates of deficiencies in appropriations for the Postal Service, payable from the postal revenues, for the fiscal year ending June 30, 1914 (H. Doc. No. 600); to the Committee on Appropriations and ordered to be printed.

5. A letter from the Secretary of the Treasury, transmitting a copy of a communication of the Postmaster General submitting estimates of special appropriations for the Post Office Department for the purpose of equipping and furnishing the new Washington, D. C., post-office building, to cover the expense of moving, etc. (H. Doc. No. 599); to the Committee on Appropriations and ordered to be printed.

6. A letter from the Secretary of War, transmitting, with letter from the Chief of Engineers, reports on preliminary ex-

amination and plan and estimate of cost of improvement of Santee River, S. C. (H. Doc. No. 603); to the Committee on Rivers and Harbors and ordered to be printed.

7. A letter from the Secretary of War, transmitting, with letter from the Chief of Engineers, reports on preliminary examination and survey of Mill Creek, Middlesex County, Va. (H. Doc. No. 602); to the Committee on Rivers and Harbors and ordered to be printed with illustrations. and ordered to be printed, with illustrations.

A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Pere Marquette River, Mich., from deep water in the harbor of Ludington, following the south branch of said river to the State road and iron bridge and thence to the city of Scottville (H. Doc. No. 601); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

9. A letter from the Assistant Secretary of the Treasury, transmitting a request that the estimates for the Division of Appointments, Secretary's Office, Treasury Department, for the fiscal year 1915 be amended by dropping therefrom one clerk at \$1,200 per annum, instead of one clerk at \$1,800 per annum (H. Doc. No. 598); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. LEWIS of Maryland, from the Committee on Labor, to which was referred the bill (H. R. 10735) to create a bureau of labor safety in the Department of Labor, reported the same without amendment, accompanied by a report (No. 167); which said bill and report were referred to the Committee of the Whole House on the State of the Union.

Mr. SHACKLEFORD, from the Committee on Roads, to which was referred the bill (H. R. 11686) to provide that the United States shall, in certain cases, aid the States and sub-divisions thereof in the construction and maintenance of rural post roads, reported the same without amendment, accompanied by a report (No. 168); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

By Mr. WILLIS: Petition of Mrs. J. J. Kranter and 18 other members of Broken Sword Missionary Auxiliary of the Methodist Episcopal Church, of Bucyrus, Ohio, favoring the adoption of a constitutional amendment prohibiting polygamy; to the Committee on the Judiciary.

SENATE.

SATURDAY, January 17, 1914.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. ACCOUNTS FOR AUDITOR FOR DISTRICT SUPREME COURT.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Attorney General, transmitting, in response to a resolution of December 23, 1913, a report on the receipts and disbursements of all moneys received by the auditor for the Supreme Court of the District of Columbia since his incumbency in office, and so forth. The communication and accompanying paper will be referred first to the Committee on Printing, as the Chair does not remember the Senator who introduced the resolution.

VESSEL BRIG "JUNO" (H. DOC. NO. 609).

The VICE PRESIDENT laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law filed under the act of January 20, 1885, in the French spollation claims set out in the annexed findings by the court relating to the vessel brig Juno, William H. Nichols, master, which, with the accompanying paper, was referred to the Committee on Claims and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented memorials of Anthony Wayne Branch, American Continental League, of Philadelphia; of General Sullivan Branch, American Continental League, of Pittsburgh; and of Andrew Jackson Branch, American Continental League, of Shenandoah, all in the State of Pennsylvania, remonstrating against any appropriation by Congress for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

Mr. BORAH presented the petition of E. H. Rettig, of Opportunity, Wash., with reference to the needs of those engaged in agricultural pursuits, and praying for the enactment of legislation to provide for the establishment, operation, management, and control of an agricultural capital or central clearing house for the scientific distribution and marketing of agricultural products, and for other purposes, which was referred to the Committee on Agriculture and Forestry.

Mr. BRADY. I present resolutions adopted by the Upper Snake River Valley Good Roads Association at a regularly called meeting on December 3, 1913, at Rexburg, Idaho, favoring the enactment of legislation making an appropriation sufficient to cover the expense of building a public highway through the Targhee National Forest Reserve from a point near Ashton, Idaho, to the present western entrance to the Yellowstone National Park. I ask that the resolutions be printed in the RECORD and referred to the Committee on Agriculture and

There being no objection, the resolutions were referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

The following resolutions were passed by the Upper Snake River Valley Good Roads Association at a regularly called meeting on the 3d day of December, 1913, at Rexburg, Idaho:

Resolution.

Resolution.

Whereas the greatest natural wonder in America to-day, and the place most people desire to visit for a summer outing, is the Yellowstone National Park; and

Whereas the Legislature of the State of Idaho has created a State highway leading to the Yellowstone National Park, to be known as the Boise-Yellowstone Highway, and have appropriated the sum of \$10,000 to pay the expense of surveying and locating the same; and Whereas said highway, after paralleling the right of way of the Oregon Short Line Railway through Bonneville, Jefferson, Madison, and Fremont Counties, must necessarily follow said railway through the Targhee National Forest to the said park, this being the most feasible and practicable route; and
Whereas it will be necessary to expend considerable sums of money to improve the present poorly constructed wagon road through said national forest reserve, which is the main obstacle to those traveling by automobile or other conveyance to reach the Nation's wonderland; that said counties have at considerable expense built fairly well-constructed wagon roads through said yellowstone Highway in connection with the State of Idaho, if the Federal Government will appropriate a sufficient sum to properly build a good wagon road through said forest reserve; that the Federal Government exercises full control of and collects all the revenue produced in said forest reserve, and the same should be used in the building of said wagon road through said forest reserve for the use and benefit of the people of the United States who desire to visit said park; and

Whereas the Upper Snake River Valley Good Roads Association, an organization including the counties of Bonneville, Jefferson, Madison, and Fremont, and having a large cash contributing membership, including the county commissioners of said counties, does hereby pledge its support, financial and otherwise, to the duly constituted Federal, State, and municipal authorities: Therefore be it

*Resolved, That we do hereby request the Congress of the United

C. C. DIETRICH, Secretary.

Mr. WEEKS presented a petition of the Board of Trade of Quincy, Mass., praying for the enactment of legislation provid-ing for the acquisition of the Chesapeake & Delaware Canal, which was referred to the Committee on Commerce.

Mr. SMITH of Michigan presented a memorial of sundry citizens of Cedar Lake, Mich., and a memorial of sundry citizens of Mendon, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented resolutions adopted by the board of directors of the Grand Rapids Association of Commerce, of Michigan, favoring the execution of the proposed park-commission plan for the development of the city of Washington, which were referred to the Committee on the District of Columbia.

Mr. SHIVELY presented a petition of the Retail Merchants' Association, of Evansville, Ind., praying for the enactment of legislation to authorize the Secretary of the Treasury to employ consulting architects in connection with the work of the Supervising Architect's Office, which was referred to the Committee on Public Buildings and Grounds.

He also presented a resolution adopted by the Indiana Division, Farmers' Educational and Cooperative Union of America, praying for the enactment of legislation providing for the further extension of the parcel-post system, etc., which was referred to the Committee on Appropriations.

Mr. TOWNSEND presented resolutions of the Trades and Labor Council of Escanaba, Mich., praying that an investigation be made into the conditions existing in the mining districts of Michigan, which were referred to the Committee on Education and Labor.

He also presented a memorial of sundry citizens of Durand, Mich., and a memorial of sundry citizens of Vassar, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented resolutions of the Grand Rapids Association of Commerce, of Michigan, favoring the adoption of the proposed park system for the city of Washington, which were referred to the Committee on the District of Columbia.

Mr. BURTON presented a petition of sundry citizens of Toledo, Ohio, praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

JOE JOUBERT.

Mr. CLARK of Wyoming. From the Committee on Public Lands I report back favorably, with amendments, the bill (H. R. 3638) providing for the issuance of patent to Joe Joubert, and I submit a report (No. 157) thereon. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill.

The VICE PRESIDENT. Is there objection to the present

consideration of the bill?

Mr. CHAMBERLAIN. Mr. President, I rise to a parliamentary inquiry. Is this one of the unanimous-consent requests that under the rule adopted yesterday requires a roll call before we can act on it?

Mr. CLARK of Wyoming. No. The VICE PRESIDENT. It is not.

Mr. CHAMBERLAIN. I had hoped that it was not. The VICE PRESIDENT. The Chair hears no objection to the request of the Senator from Wyoming, and the bill is before

the Senate as in Committee of the Whole.

The amendments of the Committee on Public Lands were, in line 3, after the word "for," to strike out "the west half of the northwest quarter" and insert "lots one (1) and two (2) in," and in line 5, before the word "west," to strike out "sixty-eight" and insert "eighty-eight," so as to make the bill read:

Be it enacted, etc., That patent be issued to Joe Joubert for lots one (1) and two (2), in section 7, township 39 worth, range 88 west, and the east half of the northeast quarter section 12, township 39 north, range 89 west of the sixth principal meridian, Douglas (Wyoming) land district, which tract was included in homestead entry Douglas 02699 made by said Joubert.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed,

ELLA O. RICHARDSON.

Mr. RANSDELL, from the Committee on Public Lands, to which was referred the bill (S. 388) for the relief of Ella O. Richardson, reported it without amendment, and submitted a report (No. 158) thereon.

AGRICULTURAL COOPERATION AND RURAL CREDIT.

Mr. CHILTON, from the Committee on Printing, to which was referred the resolution (S. Res. 245) submitted by Mr. Gore on the 16th instant, reported favorably thereon, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That there be printed for the use of the Senate document room 1,000 additional copies of Senate Document No. 214, Agricultural Cooperation and Rural Credit in Europe.

MISSISSIPPI RIVER FLOODS (S. DOC. NO. 366).

Mr. CHILTON. I am directed by the Committee on Printing, to which was referred an article taken from the report of the Mississippi River Commission for 1912 giving a description of the flood of 1912 of the Mississippi River, and so forth, submitted by the Senator from Mississippi [Mr. VARDAMAN] on December 22, 1913, to report it favorably, with the request that the article be printed as a public document.

The VICE PRESIDENT. Without objection, that action will

ADDRESS BY J. C. SCHMIDLAPP (S. DOC. NO. 367).

Mr. CHILTON. I am directed by the Committee on Printing, to which was referred an address delivered by Mr. J. C. Schmidlapp at a joint meeting of the Optimists' Club and the Commercial Club of Cincinnati, Ohio, giving some impressions of the economic conditions in Germany, submitted by the Senator from Ohio [Mr. Burron] on December 23, 1913, to report it favorably, with the request that it be printed as a Senate document.

The VICE PRESIDENT. Without objection, it is so ordered.

TELEPHONE SERVICE IN THE DISTRICT (S. DOC. NO. 368).

Mr. CHILTON. I am directed by the Committee on Printing, to which was referred a communication from the Public Utilities Commission of the District of Columbia, transmitting information relative to telephone service in the District, to report it |

favorably, with the request that it, together with the accompanying papers, be printed as a public document.

The VICE PRESIDENT. Without objection, the communication and accompanying papers will be printed as a public docu-

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. OLIVER:

A bill (S. 4042) granting an increase of pension to George R. Hall (with accompanying papers); to the Committee on Pen-

By Mr. MYERS:

A bill (S. 4043) granting an increase of pension to Henry C. Williamson; to the Committee on Pensions.

By Mr. HOLLIS:

A bill (S. 4044) to correct the military record of Samuel C. Rowe; and

A bill (S. 4045) to correct the military record of John Chick; to the Committee on Military Affairs.

By Mr. BORAH (by request):
A bill (S. 4046) to provide for the establishment, operation, management, and control of an agricultural capital or central clearing house for the scientific distribution and marketing of agricultural products, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. JONES:

A bill (S. 4047) granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, tele-graph, and electric-transmission lines across the Vancouver Military Reservation, in the State of Washington, and repealing an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric-transmission lines across the Vancouver Military Reservation in the State of Washington," approved August 9, 1912; to the Committee on Military Affairs.

Mr. JONES. With reference to this measure, I desire to say, that it covers the proposition involved in Senate bill 821, and in

that it covers the proposition involved in Senate bill \$21, and in view of that I ask that Senate bill \$21 be taken from the calendar and referred to the Committee on Military Affairs.

The VICE PRESIDENT. The bill will be read by title.

The SECRETARY. A bill (S. \$21) authorizing the Secretary of War to relieve the Washington-Oregon Corporation, as far as he may deem advisable in the public interests, from certain conditions in an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for conditions in an act entitled. An act granting to the washing-ton-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric-transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912.

The VICE PRESIDENT. The Chair hears no objection, and

the bill will be taken from the calendar and rereferred.

By Mr. JONES:

A bill (S. 4048) to provide for the repayment of certain fees, commissions, excess payments, and purchase moneys, paid under the public laws; to the Committee on Public Lands.

By Mr. HUGHES:

A bill (S. 4049) for the relief of the Paterson & Hudson River Railroad Co.; to the Committee on Claims.

A bill (S. 4050) granting a pension to Rose V. Stoops; to the Committee on Pensions. By Mr. SHIVELY:

A bill (S. 4051) to correct the military record of John Davis (with accompanying paper); to the Committee on Military Affairs

By Mr. SIMMONS: A bill (S. 4052) for the erection of a monument to Nathaniel Macon; to the Committee on the Library.

(By request.) A bill (S. 4053) for the relief of the Atlantic Coast Line Railroad Co.; to the Committee on Claims.

By Mr. CHILTON:

A bill (S. 4054) to provide for the bringing of suits against the United States; to the Committee on the Judiciary.

AMENDMENTS TO DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. MARTINE of New Jersey (by request) submitted an amendment proposing to pay the balance due to depositors in the Freedmen's Savings & Trust Co., intended to be proposed by him to the District of Columbia appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. LODGE submitted an amendment proposing to appropriate \$5,000 for the removal of dead and down timber from the woods and streams of Rock Creek Park in the District of Columbia, etc., intended to be proposed by him to the District of Columbia appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. TOWNSEND submitted an amendment intended to be proposed by him to the omnibus claims bill, which was ordered to be printed and, with the accompanying papers, referred to the Committee on Claims.

COMPENSATION OF STAR-ROUTE CONTRACTORS.

Mr. BRADY submitted the following resolution (S. Res. 246), which was read and referred to the Committee on Post Offices and Post Roads:

Resolved, That the Postmaster General is hereby directed to inform the Senate as to what provisions have been made for increasing the compensation of star-route contractors, made necessary because of increased weight of the mails as a result of the establishment of the parcel post; the names and addresses of such contractors in Idaho; the amount of additional compensation claimed by them; and the amount which it is proposed to pay them.

COOPERATIVE AGRICULTURAL EXTENSION WORK.

Mr. SMITH of Georgia. Mr. President, I gave notice several days ago that I would desire to present this morning to the Senate the bill S. 2091. In view of the condition of the business of the Senate I will wish this morning not only to present some views in support of that measure, but also to ask that it be taken up for consideration. It was reached on yesterday on the calendar and passed over for the day. I brought it to the attention of a number of Senators and suggested to them that this morning might be a very suitable time to pass finally upon the measure. Perhaps I might now ask unanimous consent that the bill be taken up for consideration.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3091) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture.

Mr. SMITH of Georgia. Mr. President, at the last Congress a bill upon this subject was introduced and reported favorably by a majority of the Committee on Agriculture and Forestry. A similar bill was reported favorably by the Committee on Agriculture of the House, and it passed the House. Senators who were Members of the last Congress will remember that when the House bill came up for consideration in the Senate the Senate adopted a substitute. The House declined to recede from its disagreement, conferees were appointed, and the conferees The Senate conferees did not report the discould not agree.

agreement to the Senate.

The present bill is upon the same line as the bill then before the Senate, with some modifications which I think quite materially improve the bill. The pending bill contemplates the conduct of agricultural extension work from the colleges of agriculture under the immediate direction of the colleges of agriculture, but requires that the plans each year shall be sub-mitted by the representatives of the college of agriculture of each State to the Department of Agriculture in Washington City and shall receive the approval of the Department of Agriculture before the appropriation carried by the bill can be received by the State for the work done in the line of agricultural extension. This bill far better than the former bill seeks to bring about cooperation between the State colleges, the experiment stations, and the Department of Agriculture in the conduct of agricultural extension work from the colleges of agriculture.

We are all familiar with the fact that something over 50 years ago the Morrill bill was passed, and as a result of the appropriation carried by that bill in each State there is now a college of agriculture. About 25 years later the Hatch bill was passed, and now in each State there is an agricultural experiment station established as the result of the appropriation carried in the Hatch bill. Other appropriations have also been made to further support these institutions. The experiment stations are conducted exclusively, I think, from Government funds. The agricultural colleges have been largely supported by State appropriations, and now probably threefourths of the money spent upon the agricultural colleges comes from State appropriations.

Mr. BORAH. Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Idaho?

Mr. SMITH of Georgia. I do.

Mr. BORAH. I wish to ask the Senator if this is the bill we

had before us at the last session?

Mr. SMITH of Georgia. I just stated that it is upon the same line as that bill, with certain improvements, which I mentioned a few moments ago.

Mr. BORAH. Is it the Senator's intention to dispose of the bill to-day?

Mr. SMITH of Georgia. Yes; I hope so.

Mr. STERLING. Mr. President-

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from South Dakota?

Mr. SMITH of Georgia. I yield.

Mr. STERLING. The Senator from Georgia has just stated that he hopes to dispose of the bill to-day. My attention has been called to the bill and I am very much interested in it, but I have not yet had time to examine its provisions as closely as I should like. I wonder if the Senator would insist on disposing of the bill to-day or whether he would be willing to let it go over for a short time.

Mr. SMITH of Georgia. I would greatly prefer to dispose of it to-day, but as the consideration of the bill proceeds I would not wish to press that view upon a Senator who still felt that he could not consent to act upon it to-day. Its provisions are simple. It carries an appropriation of \$10,000 a year to each State, beginning the 1st of next January.

Mr. CLARK of Wyoming. Mr. President— The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Wyoming?

Mr. SMITH of Georgia. I do.

Mr. CLARK of Wyoming. I want to call the attention of the Senator from Georgia to an inquiry I made at the time the bill was under consideration by the Senate before. The statement that he has just made recalls it to my own mind. He uses the words "each State." Under present conditions we have a Territory of the United States that to my notion at least is more in need of this particular legislation than any of the States of the Union, to wit, the Territory of Hawaii. It is recognized, I think, in all quarters that the recent tariff legislation has placed the agricultural interests of the Territory of Hawaii, which are very, very important and of tremendous money value, in rather a chaotic if not an unsatisfactory condition.

The Territory of Hawaii now, I understand, receives aid under the Morrill Act, and my contention at that time and now is that if an extension of the Morrill Act is made it should be made to any community or place where the Morrill Act now applies. I will ask the Senator if it is the intention of the committee-assuming that it might have been an oversight in this bill-to limit the bill to the States or whether the Territories now receiving the benefit of the Morrill Act will be included?

Mr. SMITH of Georgia. If the Senator from Wyoming will prepare an amendment including any Territory which receives the benefit of the Morrill Act, so far as I am personally con-

cerned I will accept it.

Mr. CLARK of Wyoming. I will say to the Senator that in looking over the bill I had inserted as proposed amendments wherever the word "State" occurs the words "or Territories," but thinking that would rather disfigure the bill, I propose to add at the end this:

The word "State," wherever the same appears herein, shall be held to include any Territory which is now or may be hereafter included under or have the benefit of the act of Congress approved July 2, 1862—

And so on. I want to ask the Senator would that be agreeable to him?

Mr. SMITH of Georgia. I think it will; but the total of \$480,000 should be increased \$10,000, on account of each Territory added. I have just said that the bill carries an appropriation of \$10,000 to each State, beginning the 1st of next January. At the end of 12 months thereafter it carries an appropriation of \$300,000, to be divided among the States according to rural population, with the condition that no State shall receive the benefit of the fund that does not appropriate to the cause an amount equal to the amount which the State would receive from this Federal appropriation. The appropriation of \$300,000 each year continues and increases \$300,000 each year for nine years until it reaches the sum of \$3,000,000.

Mr. President, when I was diverted from the line of thought which I was presenting I was calling to the attention of the Senate the fact that our agricultural colleges and our agricultural stations have been in operation for quite a number of years. We have spent upon them something like \$70,000,000. We spend now about \$4,000,000 each year. We spend about \$15,000,000 annually upon the Agricultural Department for

purely agricultural work.

While it is true that in the colleges of agriculture there are young men receiving an education and being trained as experts upon agricultural lines, it is also true that the number of students who reach those colleges in proportion to the number engaged in agriculture is almost negligible. The colleges of agriculture do the greater part of their work along the line of scientific investigation, and the experiment stations exclusively upon the line of investigation. They study problems connected with the farm and connected with farm life; they study soils and analyze them. They determine the plant food found in particular soils. They analyze plants and determine the plant food required by particular plants. They ascertain where a particular soil used for a particular plant lacks an element of food necessary to bring to the plant its highest perfection. They analyze fertilizers and determine what class of changed cultivation can make available the plant food in a particular piece of soil and what fertilizer is necessary to stimulate that soil so as to produce for the plant a plant food which will bring from the plant the best return to the man cultivating the plant. They study plant diseases. They study seed problems; by experimentation they determine a seed that will resist a particular disease from which in certain localities a particular plant suffers.

They study animal life and the character of food calculated to produce the best results. They study animal diseases—how to cure them and how to avoid them. They investigate orchards and find how to stop the ravages of diseases upon them. They test in localities the best class of orchards for a particular kind of product in a particular section. They are continuously working out the problems of the farm and of farm They have a vast amount of valuable information which they have gathered, and they are day by day demonstrating new truths of great value to the agricultural interests of our I believe it a perfectly safe proposition to say that if the truths known in experiment stations and the agricultural colleges, and also those known in the Agricultural Department, were put into application upon the farms of this country, with no increased cost of production, but with probably a lessened cost of production, we could double the agricultural production of the country

The Agricultural Department is studying the same problems in a broad way. The experiment stations and the State colleges study these problems with reference to their particular States and localize their work in the States where they are found, while the Agricultural Department studies the problems broadly with reference to the entire Nation, handling more particularly problems that apply to a number of States than problems that apply to a particular State.

We have this expenditure of money, wisely expended, and this vast amount of information, continually accumulating, that is

not bringing back the returns which it should. It is not bringing the returns to the farmer and to the Nation because it is not used.

Agriculture is an art as well as a science. It must be taught by practical illustration rather than on paper. Experience has shown that it can not be taught simply by the distribution of literature. It can be taught in the colleges to a few, but not to the great body of those engaged in agriculture.

The object of this bill is to authorize the colleges of agriculture, under the plan which it provides, to send out their skilled teachers, who in each locality, alongside the farmer's home, on the farmer's own land, enlisting his cooperation, will take tracks of land and cultivate them in the way which has

take tracts of land and cultivate them in the way which has been shown by scientific experimentation to be the best way. These trained leaders will show how to select seed, analyze the piece of soil, show the plant food it lacks, show the plant food required by the plant to be used, show how to make available in a particular piece of soil for plant-food purposes the plant food it contains, personally direct the cultivation of the particular piece of soil, and a demonstration right in the midst of the farmers' homes of the truths which have been developed by research and by study. They will over and over again do the same thing on all the varied lines of agricultural

Is this the way to carry these truths worked out at agricultural colleges and experiment stations to the farmers? Will this mode of procedure accomplish the results so much to be desired? Is it practicable to carry the work of the agricultural colleges and experiment stations to the grown farmers, enlisting them in an effort to use the knowledge possessed and show

them practically how to use it?

This problem is not one for the simple application of logic. It has already been tried. We have tried it to a limited extent in our own country, and it has been tried with great success abroad. Dr. Knapp is authority for the statement that the only way successfully to carry the truths of the colleges and the experiment stations and the department to the farmers of the country is by practical demonstration alongside the farmers' Dr. True is authority for the same statement, and the presidents of all the State agricultural colleges of the United States have concurred in the view that the way to carry these truths into practical use is by farm-extension work from the colleges through trained demonstrators who, at the homes of the

farmers, will practically teach the truths that have been developed by these years of study and investigation.

Dr. Knapp has tried it to a limited extent, beginning in Texas,

with a cooperative-farm demonstration on a single piece of land. The check that has been made to the ravages of the boll weevil has largely been due to the demonstration farm showing how to cultivate the cotton with greater speed and with choicer seed and by diversification. Farm demonstration along the line this bill contemplates has helped largely to aid the people of those ravaged sections to resist the pest of the boll weevil.

The boys' corn clubs are a part of the demonstration work of the Agricultural Department. How much they have accomplished! In my own State the average production of corn a few years ago was 13 bushels to the acre. It has risen certainly above 16 bushels and probably to 19 bushels, and last year 88 corn-club boys, under farm-demonstration instruction, raised over 100 bushels to the acre. In South Carolina a farm-demonstration teacher directed the work of a corn-club boy, who broke the world's record, producing 242 bushels of corn on 1 acre.

The girls' tomato canning clubs have been stimulated upon

the same lines. The president of the Agricultural College of New Hampshire bore testimony before us of a boy from the college of agriculture who went into a section of his State and, by demonstrations in quite a large area, saved the apple orchards, showing farmers the little scale which was ruining their trees and how to get rid of it, so that quite a section of land which had gone back to a very small price and on which they were cutting down their old apple trees changed back to the former plan of apple culture and the land increased, according to his statement, in two years over 500 per cent in value.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. SMITH of Georgia. Yes.

Mr. GALLINGER. I am greatly interested in the discussion of this question. I believe it is one of the most important that we have had before the Senate for a long time. I wish to ask the Senator from Georgia, for information, as to the cost in-curred by those boys who raised such an enormous quantity of corn on an acre. Can the Senator tell approximately what was the added cost of accomplishing that result? Mr. SMITH of Georgia. In the instance where there was a

yield of 242 bushels to the acre I am not able to say, but the net profit was enormously more in spite of the added cost than was the case before. In the experiments in Georgia, which I have watched much more carefully than in other States, I would say that the results were brought about less by the added cost of fertilizer than by the better preparation of the soil-Mr. GALLINGER. That is what I supposed.

Mr. SMITH of Georgia. By deeper plowing, greater care to pulverize the soil, greater care to mix into the soil leguminous matter and vegetable matter that would make the plant food already in the soil thoroughly available.

Mr. GALLINGER. It was really along the line of what we

frequently denominate intensive farming, I assume.

Mr. SMITH of Georgia. Intensive and more intelligent farming.

Mr. GALLINGER. And more intelligent farming. I will say to the Senator that I was pleased to hear him allude to the movement that is now on foot in my own State, as well as in other New England States, to bring back the apple orchards

other New England States, to bring back the apple orenards to a condition where they will again be profitable to the farmers. The fact is that in New England the farmers have allowed their apple orchards to fall into decay. They have paid little attention to them by way of pruning, and none at all by spraying, so that the diseases incident to those trees progressed until the apple trees were practically destroyed, became useless, and were cut down in great quantities for the purpose of fuel. college of agriculture has taken that matter up; the young men are going out and teaching the farmers the truths concerning which they ought to have information, and they are going back, not only to the planting of new orchards but are intelligently taking care of the old orchards. In that way we are producing some of the best apples that any State of the Union is giving to our people, and an export trade is being developed that is of great interest to our people and of great advantage to them.

I ask pardon for interrupting the Senator, but the question

he is discussing, to my mind, is of the utmost importance to the agricultural interests of our country, and I trust that he will be successful in passing his bill through the Senate at as early an

hour as possible.

Mr. OVERMAN. Will the Senator yield to me to make a short interesting statement as to canning?

Mr. SMITH of Georgia. Certainly.

Mr. OVERMAN. About three weeks ago I was called to the Marble Room by an official of the Department of Agriculture and introduced to a little 12-year-old girl. He told me she had made \$1,000 from a half acre of ground raising and canning tomatoes

Mr. SMOOT. Mr. President-

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. Yes.

Mr. SMOOT. In that connection I wish to say that at about the same time of which the Senator from North Carolina [Mr. OVERMAN] speaks and in the same place I was introduced to a young boy from the State of Utah who had raised upon 1 acre of land 785 bushels of potatoes. I want to say, also, that there was not a single cent of expense attached to the raising of the potatoes upon that 1 acre of farm outside of the close attention given to it by the boy. It was an acre of land adjoining 10 acres which were planted in potatoes by the boy's father. The average yield on the full 10 acres was not quite so much as on the 1 acre cultivated by the boy, which certainly proves beyond a question that the boy had given especial attention to the weeding and to the deep plowing and to the perfect irrigation upon that 1 acre of land, and there was not a cent of cash, so far as cash outlay was concerned, placed upon that 1 acre.

Mr. SMITH of Georgia. I thank the Senators for these illustrations that they bring from their own States. I had thought to mention a claim by a boy in my own State, who showed me a couple of years ago, at a fair in south Georgia, some potatoes that were a part of between 700 and 800 bushels that he raised on an acre, but it sounded so big that I was almost afraid to repeat it. Since, however, the Senator from Utah brings the same account from his State, I mention the report from my own. They were sweet potatoes in our State,

however, and not Irish potatoes.

Mr. SMOOT. Irish potatoes were raised in our State.
Mr. BURTON. Mr. President, the Senator has been interrupted considerably in his remarks; but I wish to ask certain questions as to the proposed appropriation, in order that it may be clearly understood what is the amount contemplated and

what is its distribution.

As I read the bill, the initial sum is to be \$480,000 per year, with the thought that there should be \$10,000 for each State. The following year there is to be an additional appropriation of \$300,000, and the same addition in each succeeding year for 9 years, making in all 10 years, so that at the end of 10 years the total appropriation would be \$480,000 plus 10 times \$300,000, or \$3,480,000. In lines 20 and 21 it is possible there is no ambiguity, though at first, as I read them, those lines seem to contemplate an addition of \$3,000,000 per year for each succeeding year. Do I understand it means that, in addition to the \$3,480,000, a further sum of \$3,000,000 per annum shall be appropriated at the end of 10 years, making \$6,480,000?

Mr. SMITH of Georgia. No; that is not my understanding.

The continued appropriation thereafter is to be \$3,000,000 each

Mr. ROOT. I think the use of the word "additional," in line 21, page 3, might introduce some ambiguity.

Mr. GALLINGER. Yes.

Mr. BURTON. I did not think it altogether clear, and for

that reason I desired to raise the question.

Mr. SMITH of Georgia. If the Senator would not object to taking up the critical suggestions with regard to particular lines of the bill after I finish my more general remarks upon the bill, it would be helpful to me rather than to take them up now.

Mr. BURTON. Would the Senator prefer not to be inter-

rupted upon this subject?

Mr. SMITH of Georgia. I would prefer not to be interrupted now for a critical discussion of the bill, because I think we ought to go over it critically later on and see what verbal

changes might perhaps properly be made.

Mr. BURTON. Very well. While I am on my feet, since other Senators have spoken of their States, I wish to say something of the State of Ohio, which is usually facile princeps (easily chief) in almost every branch of endeavor and so readily at the fore that it needs no exploitation either in the Senate or elsewhere. That has been especially true with regard to this recent movement for the raising of increased quantities of corn and vegetables.

Mr. ROOT. Does the Senator mean that Ohio would not take

its quota under this bill? [Laughter.]

Mr. BURTON. That is a different question. I should be very glad to accept such appropriations as belong to the State according to its deserts, which would give it a very considerable

In the corn-growing movement trainloads of the corn growers came here last month from Ohio, ambitious, intelligent lads—I do not know the exact number, but I think between 1,000 and 2,000—and they showed a most remarkable record of results achieved in the State. At a later time I was invited out from this Chamber to meet half a dozen young girls from Geauga County, one of the oldest counties in the State, who had made a remarkable record in raising tomatoes and in canning them. They were young women—young girls of education and cultivation-who had been attracted by this movement to add to the agricultural resources of the State.

As I understand, the object of this bill is to bring home to the farmer the results of agricultural education; to awaken an interest, as far as possible, in every rural home in this country; to extend all over the States the instruction which heretofore has been largely theoretical and confined to the halls of the colleges. Demonstrators may go to the different counties and townships and spread the benefits of agricultural education. I must say that, from that standpoint, I very heartily approve it.

Mr. OVERMAN. Mr. President, there is one matter I should like to bring to the Senator's attention. As I understand, in the agricultural appropriation bill I introduced an amendment appropriating \$150,000 for demonstration work, which was adopted

in the Senate. This is in addition to that, is it?

Mr. SMITH of Georgia. Entirely. I wish to give one other illustration to the Senate, brought out before our committee, of the great service that can be rendered by carrying this demonstration work home to the farmer. It was brought to the attention of the committee by the president of the Agricultural College of Wisconsin, who told us of an experience which the president of the College of Agriculture of Illinois had.

There was a section of Illinois in which the corn raised for quite a number of years had dropped down to between 14 and 15 bushels to the acre. The president of the college sent his experts there and analyzed the soil, and after some study and some experimentation found that with no additional work, but with a different plan of culture and a dollar and a half to the acre of phosphorus, the yield of that corn could be brought back to between 50 and 60 bushels to the acre, it actually costing only a dollar and a half an acre to make the change. planted a 5-acre field under his demonstrator, following the results of his scientific investigation and carrying out exactly the plan which his study and investigation showed him was wise, and the field brought about 60 bushels to the acre. farmers from that section were invited in to see what had been done, to see what was the result, that they might have the actual demonstration before their eyes of what they could do with a little more intelligent work and an expenditure of a dollar and a half an acre.

Then he went on to tell me of the remark of an old farmer. who came up to Dr. Hopkins and said: "Doctor, I am 70 years I have raised a family of six children. struggling barely to feed and clothe them. I could not send them to college. I wanted to. If I had just known 30 years ago what you have shown us to-day, that instead of having 14 or 15 bushels of corn to the acre I could get 60, my boys would have gone through college and would have been educated. I

am so sorry you did not come sooner."

I mention this to illustrate the fact that not only can we bring a better financial return of general benefit to the country, but this improved line of work will bring benefits far beyond mere financial returns. It will bring benefits in the line of more prosperous farmers, better schools in the country, better roads, and largely increasing farm population coming with the pros-perity and happiness that better conditions bring to farm life.

Will the Senator add to that, as I hope he feels Mr. ROOT. he can, that it will tend to bring also the benefits of better busi-

ness-business cooperation among farmers? Mr. SMITH of Georgia. Undoubtedly. Mr. BRISTOW. Mr. President—

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. Certainly. Mr. BRISTOW. I am very much interested in the Senator's discussion; but I have been communicated with a good deal by the farmers of my own State, and some of them think these demonstrators do not know much about their business, and they rather resent their visits to the farms as being a kind of a nuisance instead of a benefit. I have heard farmers say that if they would work on the farm awhile themselves and get some practical knowledge they would be more useful in undertaking to teach the farmers; that they came out there with a lot of theories that would not work well, and that the actual experience of the farmer who has worked his farm intelligently and

read his agricultural papers year after year gives him a better knowledge than the demonstrator himself has. The incompetency of some of these demonstrators has resulted in a good deal of criticism of the bill in certain sections of my own State. I should like to have the Senator deal with that phase of the subject.

Mr. SMITH of Georgia. I will. That prejudice we must overcome. We found it in my own State. I can recall one place, a few miles from Atlanta, where a demonstration was made five years ago revolutionary of the farmer's conception of plowing and preparation of the soil, where the farmers came by and heartily joined in the merriest laughter at the expense of the man directing the change; and yet I am gratified to say that the change doubled the production of cotton and more than doubled the production on 4 acres of corn; and now around that whole section where the farm demonstrator was ridiculed on account of the lack of knowledge of those who ridiculed him they have adopted the improved methods and are getting the resulting benefits.

This plan of demonstration has been tried abroad. For 30 years Belgium has had her trained demonstrators going through the farming sections of Belgium, carrying the knowledge of the college and experiment station to the farmer on his farm; and the department of agriculture of Belgium reports an increased average production per acre of over 60 per cent, with a less

eost of production.

In Denmark they have their traveling teacher or leader, whose business it is to carry to the farm the knowledge that research has obtained, and also to direct cooperation among the farmers of Denmark in marketing their crops, in better business methods, and in better systems of farm bookkeeping. The benefits that have come to the agriculturist, the farmer of Denmark, are testified to by the large increase of profits from his farm and the general improvement of farm life over the entire section.

Perhaps no country has given more thought to this subject than Germany. Those profound people, those great thinkers, when they determined a number of years ago to build up the power of their nation by the improvement of the individual citizen, by the better preparedness of the individual man to do what opened up to him in life, whether as an artisan or otherwise, did not overlook the farmer. More than 25 years ago Germany began a system along the line of what we propose in this bill, and the German Wanderlehrer went from community to community, and in each locality carried the knowledge gathered at their colleges of agriculture and experiment stations and Jemonstrated it at the farmer's home. Not only so, but the German Wanderlehrins, in petticoats, went to the farm homes and carried their knowledge of household problems, of domestic science, and of hyglene, and added vastly to the skill of the German woman on the farm.

Farm life is isolated. The farmer has not the opportunity by contact with his fellows to grasp all the progress that is going on around him with the readiness that is offered to men

in the cities and which is absolutely essential.

It has been found by experience that experimentation in agriculture is expensive. It is not in the line of the ordinary farmer to conduct it. It is a work of governmental responsibility. It is a work that concerns the welfare of all the people. It must be done by the Government, by the States or the Nation, or by both.

After having worked out truths through experimentation, the object of this bill is to carry to the farmers systematically and thoroughly that which is now being carried in a desultory way. A number of the States are doing it to a greater or less extent. The Department of Agriculture is doing it in spots.

The purpose of this bill is to coordinate the work of the States and the Department of Agriculture, to use the agricultural land-grant colleges to start it by the aid of the National Government, and, under plans prepared to suit each State, but approved by the Department of Agriculture here, and through the State colleges, to carry the tested information to the spots where experience has shown us it will do the work.

I believe we all realize the importance of the farm to the Nation. Not only for our food, but for the raw material that enters into nearly all of our industries, we rely upon the farm.

I believe there are lines that can be properly followed, directed, and partly supported through legislation which we may pass, practical and not extremely expensive, that will greatly add to the fertility of the soil and to the net profits of our agricultural work, and will greatly improve the general conditions of farm life. I wish to name them—five in number. First, the study of market problems in the Agricultural Department, stimulating throughout the country the better preparation of foodstuffs and other agricultural products for market, helping point

the place where best it can be marketed, helping to cooperate with local organizations of consumers to bring closer together the producer and the consumer. I am glad to say we have already begun a work on that line under an appropriation made last year. It is progressing nicely, and I feel sure that it will receive the support of Congress with liberal appropriations, and that in a few years it will help largely to save what a former Secretary of Agriculture referred to in this way: Secretary Wilson declared about two years ago that for what the farmer received 50 cents the average consumer in the United States paid a dollar, and then he pertinently inquired what becomes of that other 50 cents. The result of his investigation was that but a small part of it went for transportation and a large part of it went to waste.

The second proposition is the one covered by this bill, agricultural extension work, the work of carrying the knowledge of the colleges and the experiment stations to the farmer and of enlisting the complete use by the farmer of this knowledge. Dr. Knapp has said that to fully accomplish the result you must have a trained leader in each small locality, one at least for every county, because he must make sufficient demonstrations and interest a sufficient number of people in his demonstrations at overcome the predisposed opposition. Then this wise and most useful man, who I think rendered a great service to the people of the whole country in connection with his work in the Agricultural Department, added that the intelligent thought of the world was realizing that no problem of education was complete that did not undertake through a system of rural teachers to carry into use existing scientific truths and those still to be acquired, continuously, to the home of the farmer, and impart it through practical demonstration.

Third, the parcel post we have adopted. It will be improved, and it should be a great means of facilitating the exchange of commodities from the farm to the consumer and back to the

farm when the farmer is the purchaser.

As to the fourth item, we should direct our attention to the subject of good roads, and not alone with national advice and with some appropriations for great highways, but looking toward bringing up the average country road, and that better standard of efficiency which can be accomplished at small expense but with continuous attention.

Fifth, the problem that we are soon to have before us, that of rural credits. I believe it is practicable to adopt and so encourage a system of organizations which in their loans to the farmer upon limited areas of land will shape the payments so that the interest will not be paid annually, but annually a part of the principal will be paid and at the termination of the contract the

loan, principal and interest, will both be paid.

. President, I believe there are practical and sane ways in which we can aid the farming classes of this country, not in a sense of paternalism, not in a sense of taking from them their own responsibilities, but to stimulate them as individuals to a better condition of preparedness as individuals to carry individual responsibility and thrust open the door of hope to many a struggling farmer and encourage many a tenant farmer to become the owner of the land he tills. If western Europe could increase 60 per cent the products of her soil by agricultural extension work, I think we have the organization already at hand to do better work in our own country. I do not doubt that through this farm demonstration work in the course of a few years the net profits of the farmers of this country can be doubled, and it will mean more than the mere additional gain of farm products and form profits. It will mean better farm homes; it will mean better country schools; it will mean a continual increase of rural population, prosperous, patriotic, and

Mr. BRISTOW. Mr. President---

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Kansas?

Mr. SMITH of Georgia. Yes.

Mr. BRISTOW. I join the Senator in his hope that we may extend all the benefits we can to the farmer and give him the advantage of all the scientific information that is available, but I am of the impression that one of the most important things, so far as legislation relating to agricultural interests is concerned, is to provide him with a market for what he now has as well as to enable him to raise more of his products.

Mr. SMITH of Georgia. I will be glad to hear the criticism upon the particular line the Senator from New York [Mr. Root] suggested, the possibility or necessity for an amendment of

some paragraph to make clearer its meaning.

Mr. CUMMINS. Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Iowa?
Mr. SMITH of Georgia. Yes.

Mr. CUMMINS. Naturally I am very much interested in this subject, inasmuch as I come from a State which, generally speaking, has an agricultural product of greater value than any other State in the Union. I should like to ask the Senator from Georgia whether he has a table which shows the distribution of the appropriation according to the last census that would indicate how much each State will receive?

Mr. SMITH of Georgia. I have it not with me. find it as an exhibit to the report of the Agricultural Committee of the House. I did not include it in the report of the Committee on Agriculture and Forestry of the Senate. I sought to put into the report of the committee of the Senate matters not contained in the report of the House committee

Mr. CUMMINS. The inquiry is preliminary to another. What is the meaning or definition of the term "rural popula-

Mr. SMITH of Georgia. It says "as shown by the last census report," and I understand that the census reports include towns of 2,500 population and less as rural. The bill takes the census report on rural population as the basis of rural population, and the census report, as I understand it, classifies towns of perhaps less than 2,500 inhabitants as rural,

Mr. CUMMINS. It is, then, the purpose to accept the interpretation or application of those words found in the last census report?

Mr. SMITH of Georgia. That is the provision of the bill. Mr. CUMMINS. Does the Senator from Georgia believe that is a fair interpretation or meaning of the term? If we are trying to provide a standard for the distribution of this appropriation, could we not find a standard that would do more perfect justice to the rural population than to include towns of 2,500 inhabitants and less?

Mr. SMITH of Georgia. It is necessary, of course, to use some figure as to population gathered together in determining what you will consider rural. The Census Office have adopted 2,500, and furnished us a census on that basis. Even if some of us might have thought that a little under 2,500 would have been wiser, we did not have the population furnished us sufficiently in that way. I think the argument in favor of 2,500 is that if you will go to the smaller towns, while you will find the men in them engaged in various lines of occupation, most of their investments are in farms; that nearly all the population of the smaller towns are at least semiagricultural, and have their farm investments and run their farms in cooperation with their general work. I suppose that the Census Office fixed 2,500 population as a result of investigation, concluding that they must place it arbitrarily somewhere, and they thought that was the best point of demarkation between the people who were more largely interested in farm work than they were in other lines of work.

Mr. CUMMINS. Why not adopt another standard, that is also furnished by the census report, namely, the area of land in each State under practical cultivation? It is intended to make that land more productive. It seems to me the benefits of the bill if distributed according to the lands under cultivation in each State would be more fairly, more equitably divided than though the population including towns of 2,500 people is accepted as the standard.

Mr. SMITH of Georgia. I will give this reason why the change suggested by the Senator from Iowa would not be desirable: We are sending men out to handle the people according to population, largely. The extent of their work will depend more upon the number of people to be reached than the mere number of acres. You might have a State where the system of cultivation was one under which one man handled a large number of acres. You might have another State in which the system was one under which a man handled a very few acres. Therefore, population rather than acreage would seem to be the fair plan of division.

Mr. CUMMINS. If that will do, why not, then, accept still another furnished by the census report, namely, the population actually engaged in agricultural pursuits or farming? I do not think it is fair to divide the appropriation in this way. I think that States which have a large population in towns of 2,500 and less, having comparatively little interest in agriculture, will receive an undue proportion of this gratuity or benevolence granted by the General Government in the aid of better soil production.

Mr. ROOT.

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New York?

Mr. SMITH of Georgia. Yes, sir.

reference to the question put by the Senator from Iows IMr. CUMMINS].

The people who really need this instruction are the small landholders, not the large landholders, and the people whom we should most desire to help are the small holders and not the large holders. It is the small farmer who is getting along just on the edge of poverty, with the little farm, who needs the kind of instruction and the encouragement which this bill will furnish, and not the man who has his thousand acres and who has at his own command, without any help, all the literature and all the instruction and high-priced assistance and superintendence for himself.

I wish while I am up to say something about the inclusion of the small town, the village itself. The village of less than 2,500 is essentially a farming community. Its life is the farming production about it. Its activity is but a facility for the farming community. The men who compose the village are living upon the product of the farm and are really engaged in the activities which are necessary to its production and marketing of the production. You are not getting far from the farm laborer when you go into a village of less than 2,500. In my own State this method of distribution will exclude the greater part of the population, but I do not believe that any better method can be reached than the one which is prescribed in the bill.

Mr. SMITH of Georgia. I will state that the presidents of colleges and the Secretary of Agriculture and men in the Department of Agriculture who have been studying this problem for several years suggested to us this plan of distribution as the result of their observation. They thought the plan was the plan that would serve most. It came from no particular State, but from all of them, as I understand it, as a result of their observation. I had not heard it suggested that there was a better plan until the Senator from Iowa suggested it. I have not looked at the figures to see how it distributes them, although I know that they were published in a report made by the Committee on Agriculture of the House.

Mr. CUMMINS. Mr. President, I shall address the Senate at some future time upon this particular subject and present the effect of the distribution according to the rule adopted in the bill. I think it a very unwise as well as unfair rule.

The observation made by the Senator from New York [Mr. Roor] in one respect is true. This bill is intended partially, possibly largely, for the benefit of the small farmer, but the conclusion which is to be drawn from that fact is not the conclusion found in the bill.

If the small farmer is to be benefited fully, then you must adopt the rule of persons engaged in agriculture. I agree that possibly the rule of area would not take sufficient account of the small farmer, but the rule of population engaged in agriculture gives to the small farmer the very consideration which the Senator from New York says he ought to receive.

There is a distinct wrong, viewed from my standpoint, in taking the standard adopted by the Census Bureau in its classification. It is all right for the purposes of the census, but it is not right for the purposes of distributing an appropriation of this sort. There are very many places in the United States having populations of 2,500 and under which have no relation at all to agriculture—I do not intend to be invidious enough to point them out just now, but every Senator here knows where they are—where a large part of the population of the State is gathered together in communities of 2,500 or less, communities which are not engaged in agriculture and have no interest in agriculture except to consume the products of agriculture.

It is not, as it seems to me, a just provision for this great interest to divide the largess of the Government in that way.

I want to ask the Senator from Georgia another question. It seems to me that section 2 of the bill gives undue emphasis and importance to field demonstration. It would appear from that to be the intent of Congress that the money should be practically all expended, so far as it is expended in agriculture, upon field demonstration. We have had a good deal of experience in this in my State, as I know the Senator from Georgia has had in his. I do not undervalue the great benefit that the farmer will derive from field demonstrations. Necessarily, however, there can be comparatively few of such demonstrations; I mean few compared with all the farmers of a county. We have derived greater benefit from short courses in the various communities, usually led by a professor or an instructor employed by the agricultural college. I would not want anything to go into this bill that would seem to discourage that method of instruction in the science of farming. I do not intend to compare the value of the field demonstration with the neighborhood Mr. ROOT. I want to make a suggestion in support of the short course, which is really nothing but a temporary college method of distribution which is included in the bill and with course; but I feel very sure that we ought to stimulate and

ought to encourage the short course held in the various localities of the State and at which all the farmers with their wives and their children can gather from time to time in order to study

these various subjects.

I do not mean to say that this bill excludes in terms that kind of instruction in the science of agriculture, but there is so much prominence and so much emphasis given to the field demonstration that the agricultural college and the Department of Agriculture might infer that this money ought to be expended in that way, and the Secretary of Agriculture might refuse to approve a plan that involved as one of its considerable features the neighborhood short course. I wanted to suggest to the Senator from Georgia that any doubt with reference to that could be eliminated by changing the phraseology a trifle in the second section.

I ask another question which the Senator from Georgia can answer at his leisure. These questions are not asked in hos-

tility to the bill, for I am in favor of the bill.

Mr. SMITH of Georgia. I remember very well that the Senator from Iowa was a warm advocate of the measure from the time it was introduced into the Senate.

Mr. CUMMINS. The only objection I have to the bill is

that the appropriation is not sufficiently large.

Mr. SMITH of Georgia. I really think that we ought to double the first appropriation. We started two years ago by asking for an appropriation of \$300,000. Instead of now start-We started two years ago by ing at \$300,000, having lost those two years, I should be glad to see it started at \$600,000 and increased only for eight years instead of nine years. I am not, however, going to press that unless some other Senator feels that it should be done.

Mr. CUMMINS. We should endeavor to bring the benefits of this work to the people generally, to arrest one thing which is this work to the people generally, to arrest one thing now in progress in this country and to which comparatively little attention is paid here, namely, the robbing of the soil. This country is destroying the fertility of its soil. We do not produce as much in the United States per acre as we did years ago. The reason that we do not do so is because we are taking every year from the soil elements that we are not restoring to the soil. Presently our land will be as barren as any that can be seen elsewhere

Mr. SMITH of Georgia. If the Senator from Iowa will allow

Mr. CUMMINS. I will pass from that. I touched on that subject accidentally.

Mr. SMITH of Georgia. If the Senator from Iowa will allow me just a moment, turning to section 2, he will find the language

Cooperative agricultural extension work shall consist of the giving of

There the word "instruction" comes firstand practical demonstrations in agriculture.

Mr. CUMMINS. I understand that.

Mr. SMITH of Georgia. In the latter place it says, "through field demonstrations, publications, and otherwise." I think that the words "field demonstrations" are used to emphasize the fact that this system of instruction, which is not now general, shall become general, and not to eliminate other lines of instruction which are already general.

Mr. CUMMINS. Mr. President, I had in my memory the language used in the Lever bill of the last session. I know that there were some things in that bill which the Senator did not intend to include in this bill, but I think the language of that bill is a little broader and gives a little better idea of what is

to be done than does this one.

Mr. SMITH of Georgia. That bill came nearer coinciding to my own language than this one does, as I came nearer drawing it than I did this.

Mr. CUMMINS. The other point which I desire to mention to the Senator from Georgia is the proviso in section 3, which

Provided further. That no payment out of the additional appropriations herein provided shall be made in any year to any State until an equal sum has been appropriated for that year by the legislature of such State, or provided by State, country, college, or local authority for the maintenance of cooperative agricultural extension work.

Is it the idea of the Senator from Georgia that if a particular community were to furnish a sum that would be fairly adequate for that community, then the State could secure a part or all of this additional appropriation, or would a county or college or local authority be required to furnish the full one-half?

Mr. SMITH of Georgia. My own view was that the State

handled uniformly throughout the State. It would be difficult properly to put the teachers into the State unless it were uniformly done, and I think that a State ought to produce in some way its full half. The real purpose was to require the full half to come from the State, so that the college of agriculture would have in its work double the amount of the national appropriation to handle its men throughout the State.

Mr. CUMMINS. I agree with the Senator from Georgia, and my question is whether this proviso ought not to be so changed as to make it perfectly clear that the college which is to distribute or use the fund should not have in its possession, through an appropriation by the State legislature or in some other way, the equivalent of the appropriation coming to that State from

the General Government.

Mr. SMITH of Georgia. It seems to me very clear that that certainly was what we meant.

Mr. CUMMINS. How could a county give to the fund a part which would entitle that county

Mr. SMITH of Georgia. It could not do so.

Mr. CUMMINS. What is the use of having the provision in

Mr. SMITH of Georgia. There were members of the committee who wanted that broad provision, that the counties might raise a part of it. It was thought that in some States the fund would be raised by county contributions to the general fund. Some counties might not contribute and the people of the community might raise it. It was to give a broad op-portunity in the State to raise the fund in any way they could; but it was contemplated that the State, either as a State or by subdivisions or by individuals, must put up with the agricultural college a sum equal to the amount appropriated by the National Government or the part proposed to be appropriated under the pending bill should not go to that State.

Mr. CUMMINS. What the Senator from Georgia means, I take it, is that the agricultural college must have at its disposal, derived from the State in some form or from some source within the State, a sum equal to the appropriation made by the

General Government.

Mr. SMITH of Georgia. That is it.

Mr. CUMMINS. I fear that the language used here might give rise to some misunderstanding about that.

Mr. SMITH of Georgia. I do not see how under this language they could get the money unless from some source in the State the equivalent fund was put up. Mr. BACON. Mr. President-

The VICE PRESIDENT. Does the Senator from Georgia yield to his colleague?

Mr. SMITH of Georgia. Yes. Mr. BACON. Mr. President, there is a matter about which will not undertake to offer an amendment, but I desire to call it to the attention of my colleague and to make a suggestion in regard thereto. It is in section 2 and reads in this way:

SEC. 2. That cooperative agricultural extension work shall consist of the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities.

Of course, I understand the purpose of that. It is to extend these benefits and these opportunities to those who have not the advantages of the colleges, and possibly it is not intended to exclude those who have the advantages of the colleges from these additional advantages.

There is a condition of affairs in our State which when I call it to the attention of my colleague I am sure he will recognize, as I know he is familiar with it. The Agricultural College of Georgia, as my colleague knows, is now a part of our State university, and it has been very largely added to and extended by appropriations from the State. It is a most valuable and important institution and is doing a great work in our State. We have two classes of students there. There are the young men who go there and take regular courses, in which they have the advantage not only of the technical instruction in agriculture, but all the advantages of the university. Of course, those young men are not in a condition to receive any advantages from this demonstration work; but, as my colleague will recall, we have also another class of students there. In order to give the farming population the advantage of the instruction we have a special course consisting of a term of only a few weeks-possibly a month or six weeks-which is so adjusted that farmers, not only young men but mature men, can, at a time when their crops are not needing special attention, attend this special course. There are hundreds of farmers in Georgia who, in the month of August, I think, or possibly in September, at a time ought to furnish in some way its entire part. If it were appropriated by the legislature for the whole State, well and good; if it were made up in other ways by the State, well and good. It would be very difficult to handle it successfully unless it were dents in the ordinary sense, but still they are students. They

are enrolled and have the advantage of this instruction. might happen that under this phraseology, as it is a matter of an appropriation, none of the money could properly be expended in demonstration work upon the farms of any one of the farmers who go there and actually become students for a short course of weeks.

I do not see what advantage there is in putting this language in here. Why should we not simply in a general way state the object without by such language possibly excluding from the benefit of the bill some who ought to have the opportunity for this demonstration work? The very men—the regular farmers, not young men—who go there to attend these courses and other than for months at a time are the advanced class of and stay there for weeks at a time are the advanced class of farmers who want this demonstration work. They are the very men who will seek it, to whom it will be of the greatest ad-vantage, and who will benefit the most by it, because they are so deeply interested in the subject that they actually leave their farms and go there and at the university town remain a month or six weeks in securing direct practical instruction in the State agricultural college.

You will notice that the words are very broad. The provision ys "persons not attending or resident." These farmers do attend, and they attend in large numbers, and are, I repeat, of a class which would possibly most desire to have on their farms this demonstration work; yet, it being a matter of appropriation and expenditure, it might be held by an auditor that that was not within the scope of the bill.

Mr. SMITH of Georgia. If there could be any possibility of such a construction being put upon the bill, all interested in it would desire to have it avoided.

Mr. BACON. I am quite sure of that.

Mr. SMITH of Georgia. I do not see any objection myself to just omitting the words "attending or" and leaving it "to persons not resident in said colleges"; but I should want to submit that for consideration,
Mr. BACON. This is a regular course.

Mr. SMITH of Georgia. Suppose a farmer attended the regular course and went back and was on his farm. If it would exclude the demonstration on his farm, it would be a mistake. He would be the very man whose farm it would be desirable to use, because he would help the demonstrator see that the demon-

stration was made perfectly on his farm.

Mr. WILLIAMS. Why not say, "or not regularly matricu-

lated as students at "?

Mr. BACON. I do not see what is to be lost by striking out, in the seventeenth line, after the word "economics," all of that line and line 18.

Mr. SMITH of Georgia. Would not simply omitting the two words "attending or" be sufficient, so that it would read, "to persons not resident in said colleges"?

Mr. BACON. I think so.

Mr. WILLIAMS. If it were made to read, "or not regularly matriculated as students at," that would avoid the difficulty. The danger is that if you struck out all of that language, pos sibly this money might be appropriated merely in the further extension of work going on at the college now.

Mr. SMITH of Georgia. The purpose was to exclude the use

of any of this money at colleges.

Mr. WILLIAMS. Yes.

Mr. SMITH of Georgia. The purpose was to force the use of all this money in the country, where the farmers live, with the farmers who really needed it most, who did not go to the college and who could not be persuaded to go to the college, and some of whom, like the ones referred to by the Senator from Kansas [Mr. Bristow] in his State, do not now believe in scientific agriculture, so that they might have the benefits of the demonstration which would convert them.

Mr. BACON. Why not, instead of the language used, then, after the word "persons," insert the words "engaged in practical agriculture," and strike out all other description? That

might cover it, might it not?

Mr. SMOOT. No; I think if we adopted those words the object of the bill would be defeated.

Mr. BACON. I do not want to do that. Mr. SMOOT. The junior Senator from Georgia has certainly stated the case exactly as I understand it; that is, that words should be used for the purpose of compelling the expenditure of the money away from the colleges, so that it must be used in demonstration work in the different communities in which the work is needed.

Mr. BACON. I think striking out the words "attending or"

will cover it.

Mr. SMOOT. I think, myself, that will cover all the objections the senior Senator from Georgia has.

Mr. BRADY. Mr. President, it seems to me the language at present in the bill is entirely apt, and really conveys the meaning that the Committee on Agriculture and Forestry intended to have conveyed. As I understand, it was the intention to have this money spent in communities and places where the people were not attending the colleges or were not resident members of the college. If they are not attending the college they would be entitled to this instruction. I believe it would be a very good idea to leave it just as it is, and at the same

time I believe the ground will be thoroughly covered.

Mr. SMITH of Georgia. The truth about it is that the real object this bill had in view was to prevent the diversion of the money to the college. It was to force it away from the college, and to the country. This language is in the present tense—"to persons not attending or resident in said colleges." That is to say, if they are now attending and are there, it could only be spent there for them. That was the view of the framers. It was to exclude the expenditure at the college and to force it

to be spent out in the country.

Mr. BRADY. In demonstration work for the farmer.

Mr. BACON. Yes; but that is not the language of the bill. If it were stated as my colleague states it, it would be a different thing; but it expressly says that this demonstration work shall not be extended to anyone attending these course

Mr. ROBINSON. Mr. President, will the Senator yield to me

for just a moment?

Mr. BACON. Yes.

Mr. ROBINSON. Practically all of these agricultural colleges are now doing demonstration work. All of them have farms upon which the demonstration work is being conducted, and any person who is attending an agricultural college is not in need of the instruction which is contemplated by this bill. When the suggestion was first made by the senior Senator from Georgia I thought it was quite forceful, but upon further consideration of the matter I believe it might defeat one of the primary purposes of the bill to adopt the amendment which has been suggested.

There is no necessity for agricultural-extension work to persons who are so situated as to be able to attend agricultural colleges. I believe the primary purpose of this bill is to carry the information which is gathered at those colleges and at the experiment stations to the farmers who are deprived of the opportunity to attend the demonstrations which are made either at the experiment station or at the agricultural college.

All of the agricultural colleges with which I am familiar are doing demonstration work, so that one who has the advantage of training in those colleges does not need the demonstration work. The primary purpose of this bill is to give the information which the colleges accumulate to those who have

no opportunity of attending the colleges.

I do not know of an agricultural college in the United States They all have farms. that does not do demonstration work. One of the primary things they do is to give instruction in practical farming; and if this work is going to be conducted on a cooperative plan between the Department of Agriculture and the agricultural colleges, the inevitable result will be, if this amendment be adopted, or if any amendment be adopted along the lines suggested by the senior Senator from Georgia, that the entire appropriation will be diverted to the use of the colleges, or the greater part of it will be.

The primary purpose of the bill, as I understand, is to reach those who can not be reached by the colleges and the experiment stations throughout the United States. During the last few years there has been a great revival and awakening in agriculture. I express it as my opinion that the work done already by the Department of Agriculture in the matter of demonstration has been of incalculable value to the farmers of the United States, and it is of primary importance in the adoption of this bill that every dollar of this fund shall be used for those who can not or who do not avail themselves of the privileges of the agricultural schools.

If the Senator will permit me just one further statement, I believe this bill is of far-reaching importance. Its provisions have been well considered, and it ought to be adopted without any amendment giving the colleges the power to apply this fund to experiments conducted on farms owned by those who

are attending the colleges.

One of the reasons why I reach that conclusion is this: Those who are attending the colleges will be very prompt to apply for the use of this fund on their farms, and I fear the result will be that the great part of it will be used in making demonstrations for persons who already have the opportunity of acquiring the information which is sought to be carried to the farmers by this bill, and that the primary purpose of the billthat is, to awaken those who are indifferent, to give inspiration

to the farmers who do not realize the value and importance of scientific agriculture-will be lost if this language should be eliminated from the bill.

Mr. VARDAMAN. Mr. President-

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Mississippi?

Mr. BACON. I do.

Mr. VARDAMAN. If the Senator will pardon me, I was absent at a meeting of the Committee on Privileges and Elections this morning, and did not have the pleasure of listening to the address of the junior Senator from Georgia, nor have I heard the amendment proposed by the senior Senator from Georgia and referred to by the Senator from Arkansas. should like to have that amendment read.

Mr. BACON. There has been none offered. I am simply calling attention to what I consider to be phraseology which is open to criticism and about which, possibly, there should be an amendment. I have not yet offered any amendment.

Mr. VARDAMAN. I thought the Senator had offered an amendment, and I simply wanted to follow his amendment.

Mr. BACON. I have not. I will state, for the benefit of the Senator from Mississippi, that the language to which I called attention is in the second section, which I will again read:

That cooperative agricultural-extension work shall consist of the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities.

I had called the attention of the Senate to the fact that in my State there are two classes of men who attend the agricultural college, which is now a part of the State university, and with which I have some familiarity from the fact that I am one of its trustees.

One class is the class properly to be excluded, and which is intended by this bill to be excluded, to wit, the young men who go there and take a regular course. They are students; they are matriculated in the college, and in my State they not only have the advantage of the agricultural college but they have the advantage of the university, so far as they can give any time to instruction other than purely technical agricultural instruction.

We have another class of men, however, who attend the agri-cultural college and to whom it is extremely important, I think, to extend the advantages of this bill. They are not young men; they are grown men, matured men. They are farmers, men who are engaged in the actual business of agriculture and for whom there is, in our agricultural college, a special course

every year of a month or six weeks.

We have large numbers of farmers, hundreds of them in my State, who go there and spend that month or six weeks for the purpose of having special instruction along certain lines in They are men who can not give up their regular agriculture. vocation for the purpose of going and getting this instruction, but who go there during this short period, which is generally fixed for a time when their crops do not demand their exclusive attention. As I said before, when the Senator from Mississippi was not in the Chamber, they are men advanced in their ideas as to agriculture, men who are anxious to learn, men who are anxious to get the benefit of all this agricultural education, and they are the very men upon whose farms this demonstration work would be most desirable and most valuable. Yet, according to the language of this bill, if it were strictly construed, as it may be by an auditor, they would be excluded from ever having demonstration work done upon their farms, by reason of the fact that they did spend a few weeks at this college attending, in the language of the bill, the instruction there to be given.

All that has been said by the Senator from Arkansas, so far as the purpose of it is concerned, is certainly something with which we would all agree. We want so to frame this bill that none of the money can be used in the agricultural colleges. None of us differ as to that. Everything the Senator says applies properly to the students who are engaged in the regular course of study at these colleges; but it does not apply, and can not be made to apply, and none of the reasoning suggested by the Senator from Arkansas can be made to apply, to these farmers who spend a few weeks there and attend only for a

Demonstration work is not something which can be done in a month. I hope the Senator from Arkansas will recognize the correctness of that suggestion. Demonstration work is something which begins with the planting, and continues through the cultivation, and up to the gathering of the crop. The farmers who go there for a month have no opportunity to have the advantage of the demonstration that is carried on upon a farm, except as to some particular process. They have no oppor-

tunity to have the advantages of the general demonstration as to the preparation, planting, and cultivation of a crop.

The regular students, who are there for nine months in the year, of course, have; but the man who leaves his farm when his cotton is laid by, as it is called in the South, and takes the month of time between the laying by of his cotton and the beginning of the opening of the cotton to go and receive this particular instruction at this farm, has no opportunity in that time to have the advantage of the demonstration which is made at the agricultural college. That demonstration began six months before, and it is to continue several months afterwards, and while he is there all he can have any advantage of is some demonstration as to a particular process-not any general demonstration.

Mr. ROBINSON. Will the Senator yield for just one state-

ment?

Mr. BACON. Certainly.

Mr. ROBINSON. That is true largely, or at least in part; and it is also true that any farmer who is sufficiently wideawake and active to attend an agricultural college is likely to avail himself of the advantages of demonstrations which are made at the college, even though he be not present during the entire course of the demonstration.

The purpose of this bill is to reach the farmer who is not awake, who is so situated, for one reason or another, that he can not attend the colleges. It is to differentiate, if you please, between the work done at the college and the carrying of that work to the minds of the farmers themselves who have no opportunity of attending the colleges. Now, if you permit the farmer who attends the college to have these demonstrations on his farm, the great probability is that practically all the demonstration will be carried on upon the farms of those who are attending the colleges, and the man who is asleep will remain The work will not be carried to him; the instruction will not be given to him, because the man who is attending the college will solicit the demonstration to be made on his farm, and the college, appreciating the fact that he is awake, will be disposed to cooperate with him. The result will be, I fear, to defeat the primary purpose of the bill, which is to awaken the farmers throughout the country to the necessity of acquiring scientific information concerning agriculture.

Mr. BACON. The Senator has emphasized what he previously said, which I think we properly appreciate, so far as his purpose is concerned. I entirely disagree with him as to one matter, however, and that is that the purpose of this bill is to limit the appropriation to those who are sluggards and asleep. I think it is to be extended to those who are wide-awake and progressive and who wish to accomplish great things. I quite agree that it is to be differentiated from the work that is to

be done at the colleges.

Here is a man, however, who is so interested in his business that although he has been actively engaged on it all the six or eight months during the preparation and planting and early cultivation of his crop, in a time of comparative rest between the laying by of his crop, as we term it, and the beginning of the harvesting of it, he is going not simply to devote himself to pleasure but to go to the university where this college is located for the purpose of getting still further information.

I repeat, Mr. President, these auditors are very bright men.

Here is an appropriation, and under the language of this proposed law this particular man-the man who above all others ought to have the advantage of it-will be excluded. I do not think we differ at all, except as to the one suggestion made by the Senator from Arkansas that these progressive men ought not to be excluded. We do not differ at all as to the purpose to exclude from it those who are the regular students or the regular officers of colleges.

Mr. ROBINSON. If the Senator will yield, I think-The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which

is Senate bill 48.

RAILROADS IN ALASKA.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. BACON. I am probably responsible for the hour having expired without Senate bill 3091 being acted upon. I hope the Senator from Oregon will consent that the unfinished business may be laid aside until we may dispose of it, if possible.

Mr. CHAMBERLAIN. I desire to state in this connection that I am simply going to ask for a unanimous-consent agreement for a time when we will vote on this bill, on which I think there will be no discussion, and I will then be glad to lay the bill aside informally.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Hollis Hughes Smith, Ga. Oliver Overman Perkins Pittman Poindexter Reed Robinson Saulsbury Shafroth Sheppard Shields Shively Smoot Sterling Johnson Kern Lane Bankhead Sterling
Stone
Swanson
Thomas
Thompson
Townsend
Vardaman
Walsh
Weeks
Williams Brady Brandegee Bristow Lea Lippitt McCumber McLean Martine, N. J. Bryan Burton Chamberlain Chilton Dillingham Shively Simmons Gallinger Norris

The VICE PRESIDENT. Fifty-one Senators have answered

to the roll call. There is a quorum now present.

Mr. CHAMBERLAIN. Yesterday I suggested a form of unanimous-consent agreement with reference to the time when the pending Alaska railroad bill, so called, shall be voted on. I yield the floor for a moment to the Senator from Mississippi [Mr. WILLIAMS], and then I desire to offer a substitute agreement, which I present after talking with a number of Senators

who may want to discuss the subject.

Mr. WILLIAMS. Mr. President, upon day before yesterday said something about an official of one of the railways in Alaska who had been before the subcommittee of which I was chairman during the discussion of the income-tax bill. At that time I could not remember his name. His name is Mr. Falcon Joslin, as was suggested by the Senator from Minnesota [Mr. Nelsch] at the time. Nor could I then remember what railroad he is connected with. He is president of the Tanana Valley Railroad Co., with headquarters at Fairbanks, Alaska, and is not connected with the Guggenheim roads at all.

Mr. CHAMBERLAIN. I desire to state in this connection that Mr. Joslin has always been a friend of the proposed bill and has taken great interest in the development of Alaska.

Now, Mr. President, I desire to offer the following unanimous-consent agreement in lieu of the one which was offered yesterday

The VICE PRESIDENT. It will be read.

The Secretary read as follows:

The Secretary read as follows:

It is agreed by unanimous consent that on Thursday, January 22, 1914, immediately upon the conclusion of routine morning business, the Senate will proceed to the consideration of Senate bill 48, to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and any amendments that may be offered; and that at not later than 4 o'clock p. m. on that legislative day the Senate will proceed to vote upon any amendment that may be pending, any amendments that may be offered, and that in the debate no Senator shall speak more than 15 minutes on the bill itself and not more than 15 minutes on any amendment thereto; and that a final vote upon the bill and all pending amendments shall be taken on the legislative day of Thursday, January 22, 1914, before adjournment on that day.

The VICE PRESIDENT. Is there objection to the proposed

unanimous-consent agreement?

Mr. GALLINGER. I observe the words "and that no Senator shall speak more than 15 minutes," and so forth.

Mr. CHAMBERLAIN. That is, after 4 o'clock on the day.

Mr. GALLINGER. After 4 o'clock on that day?

Mr. CHAMBERLAIN. Yes, sir.

Mr. GALLINGER. And the Senator makes it the legislative day instead of the calendar day?

Mr. CHAMBERLAIN. At the request of one of the Senators

I have made it the legislative day.

Mr. THOMAS. I did not catch the reading of the proposed agreement completely. I should like to inquire whether it requires that we shall begin to vote at any particular hour?

Mr. CHAMBERLAIN. At 4 o'clock. We begin to vote at 4

o'clock on Thursday.

Mr. BACON. What does that mean, that we begin to vote at

The VICE PRESIDENT. It does not so read. Mr. CHAMBERLAIN. We intended to have it read "not later than 4 o'clock."

The VICE PRESIDENT. The Secretary will read it again. The Secretary read as follows:

It is agreed by unanimous consent that on Thursday, January 22, 1914, immediately upon the conclusion of routine morning business, the Senate will proceed to the consideration of Senate bill 48, to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and any amendments that may be offered, and that at not later than 4 o'clock p. m. on that legislative day the Senate will proceed to vote upon any amendment that may be pending, any amendments that may be offered, and that in the debate no Senator shall speak more than 15 minutes on the bill itself and not more than 15 minutes on any amendment thereto, and that a final vote upon the bill and all pending amendments shall be taken on the legislative day of Thursday, January 22, 1914, before adjournment on that day.

Mr. BACON. It seems to me there is some little ambiguity, to say nothing of inconsistency, in the agreement as framed. It can very readily be corrected by striking out certain words and simply making 4 o'clock the period at which the limited debate shall begin

Mr. CHAMBERLAIN. That is the intention of the agree-

ment.

Mr. BACON. It says we shall begin to vote at that time, We do not want to be put in that position. The subsequent phraseology, to vote on the bill and pending amendments, provides for everything that is needed in that regard. So, if the 4 o'clock limit is agreeable and if it is so framed that the 4 o'clock limit shall apply to the time when 15 minutes' debate shall thereafter be enforced, it is all right; and I, for myself, have no objection to it.

Mr. CHAMBERLAIN. I will state to the Senator that that was my intention, and I followed almost literally the agreement that was adopted without any objection in reference to the currency bill. That was the purpose, I will say to the Senator; and if he can suggest any elimination of words that will better carry out that purpose, I shall be glad, so far as I am concerned, to have the agreement changed in that regard.

Mr. BACON. It is very easily fixed. I suggest to the Senator that some of the words be stricken out, so that it will read

It is agreed by unanimous consent that on Thursday, January 22, 1914, immediately upon the conclusion of routine morning business, the Senate will proceed to the consideration of Senate bill 48, to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, and any amendments that may be offered; and that after 4 o'clock p. m. on that day no Senator shall speak more than 15 minutes on the bill itself, and not more than 15 minutes on any amendment thereto; and that a final vote upon the bill and all pending amendments shall be taken on the legislative day of Thursday, January 22, 1914, before adjournment on that day. ment on that day

That covers the entire ground.

Mr. CHAMBERLAIN. I am perfectly willing to accept those changes in the proposed agreement. The modification really carries out the purpose that I think the original proposition did, but it may be a little more clearly expressed.

The VICE PRESIDENT. Is there objection to the unanimous-consent agreement as proposed? The Chair hears none,

and the unanimous-consent agreement is entered into.

Mr. PITTMAN. With the consent of the Senate, I give notice that on Thursday morning, at the close of the morning business, I will address the Senate on the pending Alaska bill.

COOPERATIVE AGRICULTURAL EXTENSION WORK

Mr. SMITH of Georgia. I ask that the Senate now proceed to the consideration of Senate bill 3091.

The VICE PRESIDENT. Is there objection?

Mr. STERLING. There is objection to the immediate consideration of the bill.

Mr. SMITH of Georgia. I did not hear the Senator from South Dakota.

The VICE PRESIDENT. The Chair did not hear whether the Senator from South Dakota was objecting to the further consideration of the bill.

Mr. STERLING. I object to the further consideration, if it

shuts off all question and inquiry.

Mr. SMITH of Georgia. It does not at all. I simply asked unanimous consent to take up the bill again and to proceed with its consideration.

Mr. BACON. Before the Senator proceeds, I wish to state, with regard to the suggestion made by me, that I have but one

Mr. SMITH of Georgia. Has the consent of the Senate been given?

I thought it had. Mr. BACON.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3091) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture.

Mr. BACON. I want to say that I had but one purpose, and that was to safeguard against the possibility of certain very worthy men among our farmers being excluded from the benefit of the bill; but there seems to be among those immediately in charge of it confidence that it will not exclude them. As I said in the beginning, I do not myself propose to offer any amendment. I think possibly the fact that the matter has been

debated and that confidence has been expressed will prevent the construction being put upon it which I have presented. Mr. SMITH of Georgia. I think not only they will receive the benefit of it when at home, but any demonstrator will be very fortunate to have their cooperation and assistance. I do not think they could possibly be excluded from deriving the benefits of the demonstrations when they have left the college and have gone to their homes.

Mr. GALLINGER. Mr. President, I simply wish to make an inquiry. On page 4, commencing at line 9, the proviso reads:

Provided further, That no payment out of the additional appropriations herein provided shall be made in any year to any State until an equal sum has been appropriated for that year by the legislature of such State, or provided by State, country, college, or local authority for the maintenance of cooperative agricultural extension work.

I will ask the Senator if there would be any objection to striking out the word "or" before "local authority" and adding "or individual contribution"?

Mr. SMITH of Georgia. I do not think so.

Mr. GALLINGER. Our agricultural college was largely founded by contributions from an individual, and if the State did not feel like making this appropriation, small appropriation as it is, we might have some rich man, some farmer perhaps, who felt that the State ought not to be discriminated against, and who would make the contribution.

Mr. SMITH of Georgia. I would be glad myself to join with the Senator from New Hampshire in the suggestion of an amend-ment by striking out the word "or," in line 13, before the word "local," and adding, after the word "authority," "or in-dividual contribution." I move that amendment.

The VICE PRESIDENT. Is there objection to the amendment? The Chair hears none, and the amendment is adopted.

Mr. STERLING. Mr. President, I do not propose to enter upon any discussion of the bill. I did not anticipate that the bill would be brought on for full discussion and final disposition to-day; but there are one or two features of the bill to which the Senator from Georgia has not referred and to which no reference has been made in the statements of any of the Senators, to which I wish to call attention.

I am in receipt this morning of a communication from the agronomist at our State agricultural college. He incloses with his letter an article which he proposes to publish in regard to the bill, and he suggests some objections to the bill. I should like to call the attention of the Senator from Georgia and the attention of other Senators to a particular paragraph or paragraphs in his proposed article:

An educational antifederalist-

He says

would amend the title of the Lever bill by striking out the word "cooperative" and making the amended title read as follows: "A bill to provide for agricultural extension work in the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto."

He proceeds in this proposed article:

Furthermore, the text of the bill would be so amended as to harmonize with the amended title. Under such a new reading the Federal Department of Agriculture would not be empowered to "cooperate" in the educational affairs of the States in any such wholesale way. It should not so "cooperate"; and if it is further empowered to do so, in addition to the power in that direction which it already has, the ultimate effect will be wasteful, bureaucratic, pernicious.

Then follows this paragraph:

Whatever modicum of good can come or is coming out of Federal interference with State educational affairs under the general heading, "Cooperation," is secured largely at the expense of duplicating efforts already inaugurated by the States, thus causing friction and bitterness and consequent waste of effort, and, furthermore, at the expense of destroying the initiative of the people, who should conduct their own affairs.

I have not had time since the receipt of the communication this morning to read the entire article, but in glancing over it I have marked certain paragraphs. One toward the conclusion of the article is as follows:

The writer has a right to urge that this article be not construed as any attack upon the Federal Department of Agriculture or any of its excellent workers. It is an attempt to outline, if possible, the fact that the initiative in local and State educational affairs should come from local and State communities. It is to urge upon the authorities of a supposedly anti-Federal administration that they give evidence of good faith by urging Congress to amend the proposed Smith-Lever bill by striking out the word "cooperative" in the title and amend the text to correspond thereto.

I will say to the Senator from Georgia that not having examined the entire article and being without opportunity to study the subject in connection with the article, I am unable to judge whether these objections to the bill are valid or not, and hence I had hoped that there might be time for further consideration.

I want to call attention to a statement made in an address by Prof. Davenport, dean of the college of agriculture and director of the agricultural experiment station at the State University of Illinois, his address being made in November and before the Association of State Agricultural Colleges here in Washington. He takes the same view with reference to cooperation and holds to the position that the Federal Government has in the matter of agriculture and agricultural education a great field, but that there is a separate field which should be occupied by the State colleges themselves, and that the interference of one with the other causes duplication, a waste of effort, and friction. Says Mr. Davenport:

To the Federal department belong all matters requiring national administrative authority—

He specifies them-

such as import and export regulations, live-stock and meat inspection, and international relations in general; also the control of matters requiring interstate regulations, such as contagious or infectious diseases of animals and plants, together with investigations preparatory to or arising out of such control.

Problems covering a wide expanse of country, such as the weather service, come preeminently within the province of the department and without argument. We should have no weather service without a national department for its administration, for no cooperative scheme that could be devised between the States could establish it, because of the inherent weakness of cooperation and the necessity for definite organization in order to accomplish specific ends.

Without reading further along that line, I will call attention to what he says about the functions of local institutions:

To the State institutions belong the study of local questions, the meeting and mastering of local situations, and the appeal to the local constituency by such studies and demonstrations of either local or general truths as shall best advance the agriculture of their respective localities, and this, again, they must be able to do without the cumbersome machinery of enforced cooperation with anybody.

The department should work with large agricultural questions in the abstract and with groups of people rather than with individuals, except when necessary to the discharge of its national functions. The State institutions, on the other hand, live and work largely in a world of the concrete, and especially with and through individuals, many of whom are their graduates, who should be stimulated to solve their own problems and not habituated to stand helplessly waiting for outside assistance.

It occurs to me, Mr. President, that there is considerable force in what is stated by Dr. Hume, the State agronomist of South Dakota, and what is said by Dean Davenport, of the University of Illinois; and, as I have stated, I have heard no mention of this particular phase of this subject since the discussion began.

Mr. SMITH of Georgia. Mr. President, in the bill which was introduced two years ago we did not use the term "cooperation" and we did not provide for any authority whatever in the Department of Agriculture in any way to advise with the local colleges in this work. The changes made have been due to the conviction we have reached that the attitude of Dean Davenport as to this particular measure is not sound. I suppose I was fully as much inclined to the view he expressed, and am still generally as much inclined to that view as is anyone upon the floor of this Chamber. I would very much oppose any interference that would give national control in any way to our local systems of education; but I have brought myself to agree to the change from the original bill which I introduced to the present bill containing the features differing from the original bill to which Dean Davenport and the gentlemen connected with the agricultural colleges of South Dakota object, because I really think those changed provisions will render this bill more

The Department of Agriculture has been engaged most effectively in demonstration work. They have men who are trained in agricultural extension work. It has only been done in spots, but where done it has been most valuable. While some of the States have engaged in it, others have not, and we concluded that it was advisable to take the plans gotten up by the different States for the work, subject to the approval of the Department of Agriculture, because such a course would help perfect and systematize the work in its origin and be of great benefit to those engaged in it.

Mr. VARDAMAN. Mr. President—
The PRESIDING OFFICER (Mr. THORNTON in the chair).
Does the Senator from Georgia yield to the Senator from Mississippi?

Mr. SMITH of Georgia. I do.

Mr. VARDAMAN. I am very greatly interested in the work sought to be done by this measure.

Mr. SMITH of Georgia. One moment, if the Senator will allow me. I should like to finish answering the Senator from South Dakota.

Mr. VARDAMAN. I was going to ask the Senator from Georgia a question.

Mr. SMITH of Georgia. Very well.

Mr. VARDAMAN. There are two institutions in the State of Mississippi-the Agricultural and Mechanical College, of Starksville, where boys and men are instructed, and the Industrial Institute and College at Columbus, established for the education of women. I have not had an opportunity to examine this bill as I should like to consider it, and I rise to ask the Senator from Georgia if the appropriation carried therein applies only to agricultural and mechanical colleges?

Mr. SMITH of Georgia. I should like to finish answering the Senator from South Dakota [Mr. Sterling] and then I will come to the question of the Senator from Mississippi.

Mr. VARDAMAN. I beg the Senator's pardon. wish to interrupt the course of his argument, but I am deeply concerned in the subject matter of this measure.

Mr. SMITH of Georgia. I will come back to the Senator's question in a few moments and answer it with pleasure.

Mr. VARDAMAN. Very well.

Mr. SMITH of Georgia. Replying further to the Senator from South Dakota [Mr. STERLING], I wish to call his attention to the fact that this bill limits the employment of the force and the conduct of this work exclusively to the colleges of agriculture. The Department of Agriculture here will not employ a man, will not control the work, and will have no connection with the actual work done, but the State college will conduct the work. The only part the Department of Agriculture has is that when the representatives of the college get up their plan for the ensuing year it is submitted to the department here for its approval. That being obtained, the relation of the department to it ceases and the work is conducted exclusively by the land-grant colleges.

Mr. STERLING. Mr. President

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from South Dakota?

Mr. SMITH of Georgia. I do.

Mr. STERLING. Does the Senator from Georgia refer to the language of the bill which provides that the work shall be carried on by the agricultural colleges?

Mr. SMITH of Georgia. Yes.

Mr. STERLING. That is the very language.

Mr. SMITH of Georgia. Oh, yes. It is found in two or three aces. It is found in every place. There is not a suggestion places. It is found in every place. There is not a suggestion anywhere in the bill except that the land-grant college is to

Mr. ROBINSON. Will the Senator from Georgia yield to me for a question?

The PRESIDING OFFICER. Does the Senator from Georgia

yield to the Senator from Arkansas?

Mr. SMITH of Georgia. Allow me to first answer the Senator from Mississippi before I am drawn away from the point he

The bill provides that the money shall go to the land-grant Where there are two or more of them the legislature of the State can select the college to handle the funds.

Mr. VARDAMAN. As I was about to remark, Mr. President, that in the State of Mississippi there is an institution established for the purpose of affording industrial education to women, and I am afraid that under the provisions of this bill that institution would not share in its benefactions. that it is quite as important-indeed more so-that the character of instruction to be given under this plan is needed quite as much among the women of the country as it is among the men. We all understand the far-reaching influence of the home, and we all realize the advantages of instruction in home economics. Unless the bill is so framed that its provisions can be made to apply to institutions designed for the education of women, I think it ought to be amended so that they may share in the appropriation. I shall look further into the matter, and if the bill does not cover that I wish to offer an amendment to do so in order that it shall.

Mr. SMITH of Georgia. Mr. President, the bill covers no contribution to either of the colleges mentioned by the Senator from Mississippi-not a dollar of this money can be spent in those colleges; not a dollar of it can be used in any of the colleges. The bill simply provides a plan by which the ac-cumulated scientific information acquired by the experiment stations and by the agricultural colleges may be carried to the home of the farmer through a trained representative and be demonstrated and taught in the country at the farmer's home.

Mr. VARDAMAN. Is not that done through the cooperation of agents of agricultural departments and the educational institutions of the State?

Mr. SMITH of Georgia. It is done by the agents of colleges of agriculture in the States. The Agricultural Department here does not select them. The college in the Senator's State designated by the legislature of his State selects the men to do the

work, and the work is to be done in cooperation with the men on the farm and with the women on the farm.

Mr. VARDAMAN. That quite answers my question.

Mr. SMITH of Georgia. Yes. Whichever college makes the selection, I hope that that college will not only select men but that it will have women traveling. I called attention this morning to the fact-

Mr. VARDAMAN. I did not have the pleasure of hearing the Senator this morning. As I have said, I was absent at a

committee meeting.

Mr. SMITH of Georgia. The country which does this work, perhaps, most perfectly, or more perfectly than any other country, is Germany. Germany has not only her man teacher traveling but has her woman teacher out in the homes carrying instruction in home economics and domestic science to the women on the farm. The legislature of the Senator's own State can name the college, where more than one receives the benefit of the land grant, which shall administer the fund.

Mr. SMOOT rose.

Mr. ROBINSON. Mr. President-

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Arkansas;

Mr. SMITH of Georgia. I think the Senator from Utah first

interrupted, but I yield to both Senators,
Mr. SMOOT. I thought the Senator from Georgia was

Mr. ROBINSON. Mr. President-

The PRESIDING OFFICER. The Senator from Arkansas is

recognized by the Chair.

Mr. ROBINSON. I merely desire to say to the Senator from South Dakota [Mr. STERLING] that instead of duplicating demonstration work this bill will prevent duplication. That, to my mind, is one of the strongest arguments in favor of the bill. The theory of the bill is that the general plan of the work shall be planned out between the Department of Agriculture and the land-grant agricultural colleges in the respective States. stead of encouraging a duplication of work of the character contemplated by the bill, I repeat it will prevent it.

The second objection suggested by the document presented by the Senator from South Dakota is that the bill constitutes an unwarranted Federal interference in local matters. I have no sympathy with that suggestion. In my judgment, one of the strongest and best features of the bill i the fact that while the Federal Government is expending money for the purposes con-templated by the bill it still retains a general supervision, if you please, over the manner of expenditure. When the Federal Government is called upon to expend money for any purpose, criticism does not lie because the Government reserves the right to see that the money is expended for the beneficial purposes contemplated by the appropriation itself.

Instead of constituting a valid criticism of the bill, in my judgment, the two points urged by the memorandum presented by the Senator from South Dakota comprise two of the most valuable features of the bill. While under this bill the Federal Government lets the work be done largely under the actual control of the agricultural colleges, it does reserve the right to co-operate with those colleges, through the Department of Agriculture, to determine the plans by which the work shall proceed. In doing that it will prevent duplication, and it will see that the moneys are properly expended.

Mr. SMOOT. Mr. President, I had intended to speak at some length on this bill, but really I am so interested in seeing it pass the Senate at the earliest date possible that I am going to withhold the remarks I had expected to make. I will content myself with saying that I am heartily in favor of the provisions of this bill. Its beneficial results can not be overestimated. It means everything to this Nation; but I do feel that it could go still further and achieve still more beneficial results to the American home.

I believe in the scientific education of our farmers. what has been accomplished along that line in the past, and I can in some degree appreciate what can be accomplished in the future; but I believe that it is of just as much importance that our girls and housewives be taught how to take care of that which is produced upon the farm as it is to teach the farmer how to produce crops from the soil. When we stop to think that there are \$10,000,000,000 spent annually in the United States for food, shelter, and clothing, and that 90 per cent of that \$10,000,000,000 is handled and spent by the women of this country, we can appreciate how important it is to begin to think seriously of how to educate the girls and the women of this country as to the value of a dollar.

Mr. President, the pending bill provides for aid "in diffusing among the people of the United States useful and practical information on subjects relating to agriculture and home economics." In section 2 it is provided:

That cooperative agricultural extension work shall consist of the giving of instruction and practical demonstrations in agriculture and home economics.

There is no Senator here who does not know that in every agricultural college in the United States home economics are taught, but the instruction is so limited and the amount of means that can be spared for this work from their annual appropriation is so small that the results are not what they

Mr. President, I have introduced a bill in the Senate, being Senate bill 280, providing for an appropriation of \$10,000 annually to each of the agricultural colleges in the States and Territories, to be used for research work in home economics. The bill which we have now under consideration provides for demonstration work, but it does not provide for collecting the information necessary to be carried to the homes of the people and for the development and teaching of home economics. had intended offering this bill as an amendment to the bill at present under consideration; but Dr. True has advised me that he thought it would better serve both purposes if the pending bill were allowed to pass without further amendment and go to the House, where a similar bill has already been reported. The junior Senator from Georgia, as he informed me, was perfectly willing that the bill to which I have referred should be offered as an amendment; but I would not do a thing that would jeopardize the bill which we have under consideration, for I am, as I have said, heartly in favor of it. I believe, however, that when the questions involved in Senate bill 280 are brought to the attention of Congress they will—
Mr. SIMMONS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from North Carolina?

Mr. SMOOT. I will as soon as I finish the sentence. When that bill is brought to the attention of Congress I have no doubt that it will be passed, for it has in view, in my opinion, the solution of one of the greatest subjects before the American people to-day.

Mr. SIMMONS. Mr. President, I do not quite understand

what the Senator meant by his statement a few moments ago. Does the Senator mean that any amendment made by the Senate to the pending bill will jeopardize the passage of the bill? I am inclined myself to offer amendments to it.

Mr. SMOOT. An amendment, of course, that does not really affect the object of the bill or add to its purpose would not jeopardize it in any way in the House; but a similar bill has been reported and is upon the calendar of the House. The bill introduced by me is an extension, as it were, along the lines of another agricultural system, and Dr. True thought—

Mr. VARDAMAN. Mr. President——
The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Mississippi?

Mr. SMOOT. In just a moment.
Mr. VARDAMAN. I merely want to ask the Senator under what title or name does the bill appear in the other House?

Mr. SMOOT. It is exactly the same bill as introduced here and is known as the Lever-Smith bill. That is the bill to which I had reference.

Mr. VARDAMAN. I simply wanted to know if that was the identical bill.

That was the bill to which I referred. I am informed, I will say to the Senator from North Carolina, that that bill has been reported to the House and is now upon the calendar of the House, and I do not wish to jeopardize the immediate passage of it in the House by introducing another bill, which I believe will pass upon its merits. As soon as it is brought to the attention of the House, I believe they will see the wisdom of it.

Mr. SIMMONS and Mr. WILLIAMS addressed the Chair.

Mr. SIMMONS: Mr. President, I think I have the floor. The PRESIDING OFFICER. The Senator from North Caro-

lina has the floor.

Mr. SMOOT. I yielded to the Senator from North Carolina. Mr. SIMMONS. I am glad to have the explanation of the Senator. I did not like the intimation contained in the Senator's previous statement that we must not amend a bill here for fear that it may jeopardize it in the other House. I wish to offer some amendments, but I am as much in favor of the general principles of the bill as is the Senator and I will do nothing to jeopardize or imperil its passage by any amendment that I intend to propose. I have no intention of offering an amendment that will change the fundamentals of the bill.

Mr. SMOOT. I will say to the Senator that I did not want to offer an amendment that would jeopardize the bill in any

way, but I did not say that we must not offer amendments. Of course, the Senator will recognize the difference.

Mr. WILLIAMS. Mr. President—
The PRESIDING OFFICER. Has the Senator from Utah yielded the floor; and if not, does he yield to the Senator from Mississippi?

Mr. SMOOT. I yield to the Senator from Mississippi.

Mr. WILLIAMS. I wanted to say a word or two in connection with what the Senator has just said. The State of Mississippi has the honor of having been the first State of the Union to establish a woman's university. We believe that at a certain stage of progress the pathway for the education of men and women diverges, and that there are certain things which after that time women ought peculiarly to learn and certain other things which men ought peculiarly to learn. Home economics is preeminently a question for the consideration and education of women. Our agricultural and mechanical college is not coeducative, nor is our women's industrial institute and college coeducative. It is not a land-grant college; it is a State college, and I suggest that the Senator from Utah amend his bill before he offers it finally so that in those States where the women have a separate industrial institute the money may go to them in order that, instead of going to teach home economics to boys at agricultural colleges, it may be applied to teach home economics to women at women's colleges, because they are the ones through whom the information is to be best filtered to the home itself. I hope that the Senator will so amend his bill as that in the case of my State and other States, if there are others in the same situation, the legislature may designate the women's

Mr. SMOOT. Mr. President, I follow the course that has always been followed in all the supplementary acts to the Morrill Act, passed over 50 years ago. Congress up to the present time has never made an appropriation for educational purposes unless it has confined the appropriation to agricultural colleges receiving benefits from the Morrill Act or acts supplementary thereto. That is the reason I have followed that plan, but I recognize the force of the suggestion of the Senator from Mississippi.

Mr. WILLIAMS. I understand that; but the money would be worse than wasted if you merely taught boys home economics.

Mr. SMOOT. If the Senator will read the bill closely, he will find that the bill provides for the collection and dissemination of information on this subject not only to rural districts but to the homes in the cities, and I believe myself, Mr. President, that to-day

Mr. WILLIAMS. Does the bill of the Senator contemplate purely research work and the dissemination of information?

Mr. SMOOT. Merely research work and dissemination of in-

Mr. WILLIAMS. No teaching in colleges at all?

Mr. SMOOT. Not at all. It provides for research work and dissemination. I want through the passage of the bill to reach all the homes in the United States, the same as is done in France and in Germany, so that when a home needs instruc-tion—and almost every home in the United States does need instruction-it can receive it, and have a demonstration in the home as to how to cook bread, how to cook meat, how to prevent waste, and how to take care of and manage a home.

WILLIAMS. Does the Senator's bill also involve home

sanitation in any way?

Mr. SMOOT. It does. Mr. President, I will content myself now simply by saying that I shall ask the Senate at an early day to grant me the privilege of speaking upon this most important subject, for I believe that the results which will flow from it will be even more beneficial than the magnificent results which are bound to flow from the passage of the bill which we now have under consideration.

Mr. SIMMONS. Mr. President, I desire to offer an amendment. On page 3, line 19, I move to strike out "\$300,000" and insert "\$500,000"; and on page 3, line 21, to strike out "\$3,000,000" and insert "\$5,000,000."

I do not desire to enter into any discussion of the amendment further than to say that I am heartily in sympathy with the objects of the bill, but I think the amount provided to carry out its provisions is wholly inadequate. If we are going to help the farmer, we ought to do it upon a comprehensive scale, and we ought to appropriate an amount sufficient to carry this demonstration work to every community in the United States within the next nine years. Of course, in the beginning the amount, even as increased by my proposed amendment, would be very inadequate, but at the end of 10 years the amount would be, on an average, about \$100,000 to each State. While I do not think that is adequate to accomplish the purpose we have in view, it would be very much better than the amount provided

in the bill, and I hope the proposition to increase this appro-

m the bill, and I hope the proposition to increase this appropriation will meet with the approval of the Senate.

Mr. VARDAMAN. Mr. President, I do not wish to do anything that is going to interfere in any way with the expeditious passage of the bill, but I agree most heartily with the Senator from North Carolina that the best investment this Government can make is in the improvement of the minds of the men and women in the rural districts of America.

We all understand that upon the country home depends the permanency of American institutions. They form the source of all enduring prosperity, and every dollar invested in this way brings a thousandfold in return for the investment.

I, for one, desire to register my approval of the measure, and to say that if more money could be expended in the improvement of the agricultural interests, if more money could be spent in arousing the American farmer to the importance of the part he plays in the economy of this Government, and less for building ships and maintaining armies, greater benefit and advantage would result to the entire country.

I hope the amendment may be adopted, unless the Senators who have charge of the bill should feel that its adoption will in some way impede its progress through the Senate and its becoming a law.

The PRESIDING OFFICER. The Secretary will state the amendment proposed by the Senator from North Carolina.

The Secretary. On page 3, line 19, it is proposed to strike out "\$300,000" and to insert in lieu thereof "\$500,000," and in line 21 it is proposed to strike out "\$3,000,000" and to insert in lieu thereof "\$5,000,000."

Mr. BRISTOW. Mr. President, I do not intend to oppose this measure, but I do not believe it is so important as seems to be indicated by the remarks of some of the Senators.

As I said a short time since, the bill is not very popular with the farmers of Kansas, judging from the correspondence I have received from them. For myself, I believe it would be better to appropriate money to establish agricultural schools or branches of the present agricultural colleges in the various counties of the States and to aid in establishing industrial branches in our high schools in the various county-seat towns. By such a policy as that the children of our farming regions would be educated in scientific agriculture, and when they returned from school to their homes to do the work upon the farms they would instinctively and naturally apply to their daily work the ideas received in the schools. I think the results of that would be very much more satisfactory than to pursue such a line of education as suggested in the bill, and I regret that the legislation has not taken that course.

I am not in sympathy with the spirit of the discussion that has been had here this afternoon, because it has proceeded to a certain extent, it seems to me, upon the hypothesis that the farmer is an ignorant man, who knows little about his business, and that it is necessary to send people around to show him things he ought to knew in regard to his daily vocation. has been the general tone of the debate. My observation has been that the farmer is just as intelligent and just as well in-formed as to his own business as is the merchant or any other man in any other vocation, and many farmers are really better informed in regard to the business of farming than are the demonstrators who go around to teach them. At least, that is the experience in the State which I in part represent.

I am not going to oppose this measure, because its purpose is good, though I do not think it is the wisest legislation we could have for the farmer. I think, as a rule, that in regard to his business, and indeed in regard to other matters, including the current affairs of life, he is better and more thoroughly informed than is the average business man. He can discuss with equal intelligence any question that affects the welfare of the country. He can discuss these questions just as intelligently as the man of any other vocation. He does not need anybody to instruct him any more than the merchant needs somebody to instruct him as to how to take care of his store. We are proceeding upon an entirely wrong hypothesis in the discussion of

this legislation.

Mr. SIMMONS. Mr. President-

I yield to the Senator from North Carolina. I should like to inquire of the Senator from Mr. BRISTOW. Mr. SIMMONS. Kansas if there has been up to this time any demonstration work of consequence in his State?

Mr. BRISTOW. I think so. Our agricultural college there conducts the demonstration work, and I think it is doing a great deal of good. I think the gentlemen who are in control of it are enthusiastic and earnest, but the farmer does not take to it so well as he does the instruction of his children along scientific lines. He rather resents it. At least, the Farmers' Union, a farmers' organization in our State, has passed resolutions

against this bill, because the farmers think it is proceeding upon the hypothesis that they do not know anything about their

Mr. SIMMONS. Have they been sending the demonstrators out to the fields, and having demonstrations in the fields?

Mr. BRISTOW. To a certain extent; yes.
Mr. SIMMONS. Have the men who have gone out to do the

Mr. BRISTOW. No.
Mr. SIMMONS. Have they been graduates of the college? Mr. BRISTOW. They may have been graduates, but they have been the usual demonstrators who go about and instruct the farmers

Mr. SIMMONS. If the Senator will pardon me. I ask these questions because in my State we have had a great deal of this demonstration work, and I find the farmers very enthusi-

Mr. BRISTOW. I have talked with other Senators, and they make the same report. It may be somewhat different in my State with our farmers. The most popular branch of agricultural education we have had in Kansas has been the contests that have been carried on by boys and girls in the production of prize crops. That has been very useful, because the young minds are eager for new ideas, they grasp them readily and put them into practical operation, and with the experience of the father, with the conditions of climate and soil that exist in

the immediate vicinity, a line of experimental work becomes very useful and very interesting to these young people.

Mr. SIMMONS. The boys' clubs and the girls' clubs in my State have accomplished wonderful things. A few days ago a couple of boys from my State were in my office. I think one of them had raised about 190 bushels of corn to the acre and the other about 160 bushels. But it is not the boys any more than the fathers and the mothers of the boys who are enthusiastic about this work in my State. I thought probably it was done in my State on a different plan than that on which it has been done in the State of Kansas, and that might account for the

different reception it has had.

The work in my State is done first, I think, under the supervision of the General Government. The counties contribute one half of the expense and the General Government the other half. just as is the principle of this bill. This bill, as I understand, is only an extension of certain work now being done by the department. It simply provides a larger fund for the work than

is now available to the department.

There is a State agent in my State. He is a very high-class farmer, a man of broad intelligence. He selects the county demonstrators, the county paying half the expenses. He does not necessarily select a college-bred man. Generally he selects a practical farmer, and before that farmer begins his demonstration work he undergoes a process of instruction in his work under the general direction of the State agent, so that he brings to his aid in the work not only his practical knowledge as an actual farmer but the knowledge he has gained through the literature of the department and through the instruction of the general agent of the department, who is a man thoroughly familiar with farm work.

The result of that demonstration work in North Carolina has been, I think-that is the general consensus of opinion there—that it has already added very largely to the productiveness of our farms, especially our corn and our cotton farms and to some extent our tobacco farms and our wheat farms. yield per acre has been largely increased. In fact, I that, taking all of these four staple crops-corn, cotton, tobacco, and wheat—the yield per acre has been largely increased in my State in the last few years. The farmers are disposed to attribute this better cultivation and these better results to some extent—not altogether, of course, but to some extent—to the scientific and practical information they have received through the farm demonstrations that are being conducted all over the State. They are not being conducted in every county, it is true, but they are being conducted in a large number of the counties of the State.

Mr. BRISTOW. I do not wish to be understood to say that I do not believe good has come from these demonstrations, but I do not believe it is the best way to promote the interests of scientific agriculture.

Mr. VARDAMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Mississippi?
Mr. BRISTOW. In just a moment. I think that by the establishment of departments of domestic science and agriculture in the various high schools throughout the States where you primarily instruct the youth in the science of agriculture and in domestic science, we would get a better result, and that

in the course of time we would have a much better system. I think that this, while useful, is the superficial way of promot-

ing the development of agricultural education.

Mr. VARDAMAN. Mr. President—

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Mississippi?

Mr. BRISTOW. I do.

Mr. VARDAMAN. I do not want to take the Senator from the floor nor to interrupt him unnecessarily, but his remarks regarding the relative value of the instruction to the youth and that received by the more mature man or woman recall a very interesting conversation I had a few days ago with one of the most progressive farmers in my State, who attended the Agricultural and Mechanical College in his boyhood. I wish to say in this connection that the Agricultural and Mechanical College in Mississippi is one of the best in America. After remaining there two or three years this gentleman became a very prosperous planter or farmer, and after two or three years of experience on his farm he returned to the college and with the demon-strators he remained five or six weeks. He told me that the information he received from the demonstration work was really of more practical benefit to him in the management of his plantation than the instruction he received during the entire freshman session in which the science of agriculture was a part of the course.

The value of an idea or a thought is incalculable. Its influence is far-reaching, not only upon the farmer, upon the merchant, and upon the lawyer, but it sometimes helps the statesman. There is no doubt in the world, however, that the man who is daily engaged in this work, who goes out and meets men from other parts of the country who have had their thoughts put into practical operation, who have had their ideas materialized into corn, oats, wheat, or cotton, is greatly benefited. There can not be a dollar judiciously invested by the Federal Government or the State government to promote this sort of education that will not bring the largest return, because upon the prosperity of the farmer the prosperity of all other business and the general welfare of the Republic depends.

Mr. BRISTOW. I thoroughly agree with the Senator's last observation; and, of course, I was interested in the incident he related; but I want to repeat the suggestion I made a short time ago, and that is, that the farmers of the country are not only interested in the means of producing crops so as to get the largest return, but they are also interested in legislation that will provide for them a good market for their surplus. While I think legislation of this character is good, I think without an effort on our part to open up markets for our surplus products, instead of opening up markets for the surplus products of other countries, this educational feature will not bring the results which it otherwise ought to bring.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from North Carolina [Mr. SIMMONS].

Mr. SMITH of Georgia. Mr. President, before a vote is taken on the amendment I wish to call the attention of the Senate to the status in which this bill is in the House. It is on a special calendar, which, as I understand, precludes action except upon the bill just as it stands. If we make so important an amendment as that proposed by the Senator from North Carolina, then, as I understand, the bill will have to be referred in the House to the committee, and the progress that has been made in the House on the measure will be largely There are Senators who have served in the House who are familiar with the rules of the House-I am not-who tell me that is the case.

I think it would be unfortunate to make that kind of an amendment at this stage. So far as I am concerned, I should be glad to see the amount \$500,000 instead of \$300,000, if the Senate were willing to pass it and the House to accept it; but I think it would be a mistake to make the amendment at this stage.

Mr. SIMMONS. Mr. President, I understand the Senator from Georgia admits the merit of the amendment; but he opposes it because he anticipates the House may find itself in a position, not with reference to the Senate bill, but with reference to the House bill, where it will not be able to amend the

It does not seem to me the Senate ought to act upon such considerations as that. We are supposed to perfect our legislation without any reference to the situation in the House. think it would be a bad precedent to establish to say that we are not to amend a measure here in a particular in which we think it ought to be amended for the reason, not that the amendment may not meet with the approval of the House but that

there is a parliamentary situation in the House that will not permit it to consider the bill as amended.

I suggest to the Senator that if the House is in such a situation as that, it can adopt its bill and send it over here, and we will amend it when it comes over here. We ought to adopt our bill, however, and send it over to the House, and let the House accept it or not, exactly as it sees fit.

Mr. ROOT. Mr. President-

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from New York?

Mr. SIMMONS. Certainly.

Mr. ROOT. I think the question of amount may very well be a question of time. I am warmly in favor of this bill. I should like to see it become a law as early as possible, in order that the work of creating an organization under it may begin. That is the great trouble. It is easy for us to vote money, but it is going to be a great and difficult work to build up the

organizations that are to give effect to the bill.

There is no use of picking up men in the street and sending them around when they do not know anything. Such a course would bring the whole system of education into disrepute. have had some reference to-day, here in the Senate, to incidents which illustrate that. The sooner the work begins of getting together the personnel and making the organizations to do this work the better; and we can not make up by increased money

for the injury which delay will do.

Furthermore, I do not think the sum ought to be increased now. I do not believe the officers who are charged with the performance of the duties under the bill can usefully employ at first any greater sum than the bill now carries, because they will have to get their personnel; they will have to get their organizations. The appropriation of too much money at the beginning will merely tend toward useless extravagance.

Mr. SIMMONS. Does the Senator think it is going to take them nine years to get their organizations?

Mr. ROOT. It will take them more than nine years to perfect their organizations. I think the appropriation which is in the bill now goes as far as we can usefully go without having our allotment of money in advance of the personnel through

which the money can be used.

Mr. SIMMONS. Mr. President, I have noticed that when it is proposed to appropriate money for the benefit of the farmers of this country the Senate becomes exceedingly economical

and penurious.

The Senator says, and he says correctly, that one of the chief things is to secure competent men to do this work. think that is one of the troubles with the demonstration work up to this time. The fund at the disposal of the Agricultural Department, part of which, I understand, has been made up of private donations, has been so very small, so utterly inadequate, that they have not been able to pay the agents employed to do this work sufficient money to secure the best talent. know that has been the situation in my State, and I rather suspect that is at the bottom of the trouble in the State of the Senator from Kansas.

What we want is to get the very best talent engaged in this work. Unless we can get that we are not going to get the best results. In order to get the best results we shall have to pay good salaries, much larger salaries than have been here-

tofore paid.

If the United States is going to help the farmer, if it is going to bring instruction to the door of every farmer in this country, and if one farmer is entitled to have the benefit of this instruction at the expense of the United States Government, every farmer in the United States is equally entitled to have the benefit of it—if, therefore, we are going to give instruction in modern methods of soil cultivation to the millions of farmers scattered throughout the United States, it does seem to me that \$310,000 a year is a pitiable sum for us to appropriate for that purpose. It is a trifling sum, Mr. President, and I can that purpose. It is a triffing sum, Mr. President, and I can not see why if we are going to undertake this work we should not in the very beginning lay it out upon broad, comprehensive lines and appropriate a sum of money sufficient to meet the situation and to bring the benefit of this knowledge, admitted by all Senators to be of the greatest importance, to the individual farmer in every community in this country.

Mr. THOMAS. Mr. President-

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Colorado?

Mr. SIMMONS. I do.
Mr. THOMAS. I merely wish to inquire if the bill does not provide that the State shall duplicate this amount by an appropriation before it becomes effective? Mr. SIMMONS. Yes.

Mr. THOMAS. If so, then is not the amount appropriated, when the condition is complied with, \$600,000 a year.

Mr. SIMMONS. It is \$600,000 a year, to be distributed among 48 States in the Union.

Mr. THOMAS. It is to be distributed among 48 States; but

they will have that amount to begin with. Mr. SIMMONS. And \$600,000 to enlighten the millions of farmers in such work is, I say, a sum that is pitiable, and it is

Mr. THOMAS. It may be pitiful, but it seems to me to be sufficient to initiate the enterprise, and in view of the fact it means a considerable burden upon some of the States it is a large amount. For example, the State which I represent in part here is one whose present burdens are such as to make the amount required by the Government to be appropriated quite a considerable item. Some other States, of course, are much more capable of carrying the burden. By some it will not be felt at all; but when we consider that of the 48 States there are

a very large number whose finances are not in any satisfactory condition, it is a sufficient amount to begin this work with. Mr. SIMMONS. The State of the Senator from Colorado is

not a distinctively agricultural State.

Mr. THOMAS. Oh, Mr. President, the State which I in part represent, I will say to the Senator, is one of the great agricultural States of the Union.

Mr. SIMMONS. I know it is becoming one of the great agricultural States, but it will not become one until we get enough

water on the ground in order to raise crops.

Mr. THOMAS. The agricultural products of my State exceed its mineral products over five times, and in some lines of production we lead all the other States in the Union; for example, in the production of beet sugar ours is the first State in the Union. Colorado is one of the great agricultural States, and it is becoming more so all the time.

I am heartily in sympathy with this bill and I want to see it enacted. I believe, as was stated here by some other Senator, perhaps it was stated more than once, that we ought to appropriate money for things of this sort rather than for battleships that become utterly useless before they are completed, and rather than make other appropriations for which there is really no positive need or justification.

Mr. DU PONT. Mr. President-

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Delaware?

Mr. SIMMONS. I do. Mr. DU PONT. I should like to ask the Senator from North Carolina whether, if his amendment is carried, there will be a greater amount payable to each State each year than the \$10,000 now provided in the bill?

Mr. SIMMONS. My amendment only goes to the additional This additional sum is to be distributed among the States

according to the agricultural population.

Mr. DU PONT. In section 3 of the bill, in the sixth line, the sum of \$480,000 each year is appropriated, "\$10,000 of which shall be paid annually in the manner hereinafter provided to each State.'

Mr. SIMMONS. That is the fixed appropriation. My amendment only goes to the additional appropriation, not to the fixed

Mr. DU PONT. That is what I wished to ascertain.

Mr. SIMMONS. Mr. President, I recognize the fact that there are some States which are less agricultural than other States. I did not mean to say that Colorado is not a State in which agriculture had not reached a very high state of per-They do some magnificent farming there. meant to say was that it is not to the same extent an agricultural State as some other States, that agriculture is not the dominant industry. I may be mistaken about that, but I do not think I am. However, in that State, under this bill, if the number of its farms is limited the amount that it is to receive of this additional appropriation will be likewise limited; that is to say, a small agricultural State would have to pay, in order to get the benefit of this additional sum, the same proportion that a large agricultural State would have to pay. It would be no hardship upon the small agricultural State, because it would not be entitled to participate except in proportion to its agricultural population, while the larger agricultural State would participate in proportion to its population. In other words, it would only be a question whether the State was willing to put up the same amount that the Government put up for every unit engaged in agriculture in its boundaries.

I do not see the force of the argument that by reason of increasing the amount a small State would not be able to put up its pro rata part. I think the Senator will find that the farmers of this country are sufficiently interested, and I think he

will find when this work is put in practical operation and its benefit shown the farmers will promote it to such an extent that there will be no difficulty about their being heard when their legislature meets and in forcing a contribution by the State equal to the contribution of the Government, even if that contribution were much larger than my amendment pro-

Mr. President, I can not sympathize with the argument of the Senator from New York [Ar. Roor] that this matter will be jeopardized by a little delay. It seems to me that both Houses are in a parliamentary position for speedy action upon the bill. If the House does not accept our amendment, but, on the contrary, passes its bill and sends it over here, then we can amend that; if the House does accept our amendment, then it can pass our bill; but whichever course may be pursued by the House when this bill goes to it, there will be no delay. I can see no reason for the assertion or the argument that there will be any delay because the bill is amended. We are right at the beginning of a new session. We have months before us. I do not think that for the purpose of getting this bill through next week we ought to forego such amendments as the Senate, in its judgment, thinks are necessary to make it a more just and a more equitable measure to the great interests involved.

Mr. CUMMINS. Mr. President—
The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Iowa?

Mr. SIMMONS. Certainly.

Mr. CUMMINS. I desire to make a suggestion to the Senator from North Carolina in view of the objection to his amendment made by the Senator from New York [Mr. Root]. say in the beginning that I am in favor of the amendment proposed by the Senator from North Carolina. We have here \$10,000 given to each State for the first year. That is all. That does not require, of course, a similar sum to be expended by the State.

Mr. SIMMONS. It does not.

Mr. CUMMINS. Now, suppose every penny of that were paid out to farm demonstrators, and they were paid a salary of

\$1,200 a year, that would give something like eight to a State.

Mr. SIMMONS. About eight.

Mr. CUMMINS. Would there be any difficulty in getting eight competent men in North Carolina within a year to do that

Mr. SIMMONS. Certainly not, if you paid them anything like

reasonable salary.

Mr. CUMMINS. The next year, if we divided it numerically, according to the number of States, and that is good enough for an approximation, there would be added to each State about \$6,000, and the State would add \$6,000. Twelve and ten make twenty-two. Twenty-two thousand dollars is all that would be expended during the second year.

Mr. SIMMONS. Yes.

Mr. CUMMINS. Can anybody think that there will be any difficulty in getting competent people to carry out the provisions of this act, at least enough competent people, so that a great deal more than \$22,000 will be consumed? I see nothing in the suggestion that we can not get ready.

Mr. SIMMONS. I think we have over 20 at work in my State now, but they are paid largely by the counties, and the salaries

paid are wholly inadequate.

Mr. CUMMINS. This contribution is given so gradually that there will be no trouble whatever in each State getting ready to get all the instructors who will more than consume the amount that will be at their disposal, as it seems to me.

Mr. SIMMONS. To supplement the argument of the Senator wish to state that I have been advised by the Agricultural Department that they get better results when they give each demonstrator a small territory. On one occasion, when I suggested three small counties for one demonstrator, they said that that territory was too large, that a good-sized county, thickly populated, would be about as much as one demonstrator could attend to, and that two small counties were about as much as one demonstrator could attend to. So to cover my State we would need not less than 50 demonstrators.

Mr. President, I do not care to pursue the argument further. Mr. LANE. Mr. President, I will detain the Senate just a moment. This bill, it seems to me, proposes to attempt to teach the farmer how to farm better than he does now, and also it is designed, it seems, to give him practical information on the subject of agriculture and home economics; in other words, it proposes to enable him to raise a larger amount from the same quantity of land and with the same amount of cultivation than is now the case. It seems to me that that is not exactly what the farmer needs at this time. I believe him to be fairly well posted. I believe him to be fully as well posted on matters of general interest and general information as the average citizen throughout the country, and that perhaps the farming class are the best posted of any citizens in this country.

The evil which now besets the farmers, it strikes me-and that is my opinion; I am giving it to you for what it is worth-is not his ignorance us to how to raise sufficient crops from the soil. He seems to be, however, in a difficult position in respect to his ability to market his crops. If you teach him, in other words, to raise larger crops than he does now and to live at smaller expense, in doing so I do not believe it will alleviate his condition so much as if you were to provide that he should be placed in a position wherein he could market his crops economically and receive the value for them or a greater portion of the cost than is now paid by the consumer of those crops.

I saw an article the other day written by some one who stated the rate received by the farmer for what he raises. It was stated that in many instances he receives only one-tenth of the price which the consumer pays for the product, and in some cases the consumer pays as much as one hundred times as great an amount as the price the farmer receives for the produce. At any rate, there is a great difference. I do not remember who wrote the article.

I will say that the trouble in the part of the country in which I live is not in the fact that the farmer is not intelligent. He is the most intelligent member of our community, and the people who would be sent out to teach him, I think, perhaps might not be as well fitted to give him information as he would be to impart it to them. But his crying need now is that the representatives of the Government shall assist him in reaching a market for his produce at the least cost possible in fairness to the carrier and in fairness to the men who handle the crops after they are produced.

Right here I wish to suggest a provision. It is that a portion of this money, in addition to being expended in giving useful and practical information on subjects relating to agriculture and home economics, in line 5, on page 1, shall be expended in pointing out to the farmer the proper method of marketing his crops, according to the best judgment and in the best manner.

Mr. SMITH of Georgia. Will the Senator from Oregon allow

me to ask him a question?

Mr. LANE. Certainly.

Mr. SMITH of Georgia. We have already passed a bill making an appropriation, through which we have organized a market division in the Agricultural Department which is engaged in the work of studying the problems of marketing the crops. We started it last July. Our next estimate of the Agricultural Department increases the appropriation from \$50,000 to \$195,000

The theory of this bill is that it goes hand in hand with the appropriations to the Agricultural Department creating and maintaining a market division. The Department of Agriculture is to continue the study and prepare the facts, as far as possible, on the subject of marketing. It is expected that the farm demonstrators from the colleges will familiarize themselves with all the facts gathered by the Department of Agriculture and that they will be instrumental in helping stimulate cooperation among the farmers themselves and helping them prepare and utilize the services rendered them by the department through the market division.

Mr. LANE. Do you think that would be helping them?

SMITH of Georgia. Yes. I will state to the Senator that I presented to the Senate two years ago two measuresone for the market division and one for extension work. agree fully with the Senator that the market problem is just as important as the productive problem. I think they go hand in

Mr. LANE. I will say, in conclusion, it strikes me that that is the more important subject. My attention was also attracted by the fact that, while I live in a State which is largely devoted to agriculture and farming of all kinds and fruit raising, I do not remember to have received one letter from the farming community urging my support of this bill or in any way commenting upon it.

Mr. BRISTOW. Mr. President, I want to supplement what the Senator from Oregon [Mr. Lane] has said. I think by far the most important legislation that we could enact in regard to the farming interest would be to provide markets and in some way correct the methods of toll taking that are indulged in by middlemen on products after they leave the farm until they are

finally consumed.

We had the spectacle last fall of eggs that were bought from the farmers along in April, May, and June for from 15 cents to 22 cents a dozen being sold in November and December for 50 cents a dozen; and still we would pass legislation to help springtime will be even less than it is now. But what good are you doing the man who consumes the eggs or, indeed, the farmer in the end? The evil of agriculture is not the lack of intelligence on the part of the farmer in getting his land to yield the crop; it is in the handicap that he is under in marketing his crop or finding a market for it.

Mr. VARDAMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Mississippi?

Mr. BRISTOW. I do.

Mr. VARDAMAN. Does the Senator think the farmer is

now suffering from an overproduction?

Mr. BRISTOW. I am not stating that he is suffering from overproduction, but I am saying that what the farming interest of the United States needs most is a market that is a live, active market.

Mr. VARDAMAN. Why not help him in the bill? Mr. BRISTOW. That is what the Senator from Oregon has suggested.

The difficulty is, if the Senator will permit me to refer to what in some quarters is rather an uncomfortable subject, that during the last 9 or 10 months instead of undertaking to enlarge the markets of the American farmer we have been enlarging the markets of the farmers of other countries by throwing our market places wide open to them.

Mr. REED. Mr. President—
The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Missouri?

Mr. BRISTOW. I do.

Mr. REED. If the Senator from Kansas will be so kind, I should like to have him detail to us a plan by which we can enlarge the markets of the American farmer, and if he has a feasible plan, I shall be very pleased, indeed, to cooperate with him in getting it adopted.

Mr. GALLINGER. Mr. President-Mr. REED. I hope the Senator from New Hampshire has not

risen to propose the old, obsolete fake of the home market.

Mr. GALLINGER. The Senator from New Hampshire is not responsible for words he has not spoken. I rose, Mr. President, to ask the Senator from Kansas whether he has observed the fact that either two or three great shiploads of corn have recently come into the United States from a foreign country?

Mr. BRISTOW. I am advised by the public press that not

Mr. BRISTOW. I am advised by the public press that not 1, 2, or 3 shiploads, but 13 shiploads are on the way from Argentina to New York, and that 5,000,000 bushels have been contracted for by the Corn Syrup Co., which is said to be a subsidiary organization of the Standard Oil Co. This corn is to be used in the making of corn sirup. That is, this product is to be made from corn grown in Argentina instead of in the United States.

Mr. REED: Mr. President—
Mr. BRISTOW. If the Senator from Missouri will permit me to answer the question, I will say that first I would protect the American farmer in his home market, and then by a series

of reciprocity treaties I would enlarge his market across the seas.
Mr. REED. Now, will the Senator kindly allow me?
The PRESIDING OFFICER. Does the Senator from Kansas

yield to the Senator from Missouri?

Mr. BRISTOW. I do. Mr. REED. I am interested in this question. There is, of course, the old home-market argument, but the people of the United States eat only a certain amount, and you can not make them eat any more by statute, hence you can not materially increase the home consumption. You could prohibit them from eatcrease the home consumption. You could prohibit them from eating corn raised elsewhere, which might be all right for the gentlemen who raise the corn, but it might be a little hard on the man who has to buy it to eat it. If there are 13 shiploads of corn coming here, in one form or another, it will finally find its way to the stomachs of the American people. The man who will stand up and protest against the opportunity for people to buy their foodstuffs wherever they can buy them, when food is almost at a prohibitive price, thinks more of the votes of a few farmers of his district than he thinks of the welfare of the American people as a whole.

Mr. BRISTOW. I desire to say, if the Senator will permit

me, I supposed he rose to ask another question.

Mr. REED. I was coming to the point. The Senator says that we could, by a plan for reciprocity treaties, enlarge the markets for American grain. Does the Senator know of any country the government of which is so benighted, so lost to the welfare of its own people, that it is willing to prohibit them from buying their corn and wheat from other countries and force them to buy our corn at a higher price than they can get corn elsewhere? If he does, I should like to have the names of the countries

Mr. BRISTOW. The Senator refers to the suggestion I made the farmer produce more eggs so that the price along in the I that we should give our own farmers the advantage of their own market, and offers a covert criticism to the remark by saying that anyone who objects to the importation of farm products into the United States to compete with the farm products that we grow here is showing a lack of interest in the general American-consuming public.

But, if the Senator will study the question from a practical point of view, he will learn that while the meat that is imported from Argentina costs the packers who import it less than the meat that is produced in Kansas City or in Chicago from the American-grown cattle, it does not sell for any less when it reaches the New York market. It sells for the same.

Mr. REED. Mr. President, of course it is true that if 2 pounds of meat are offered of the same quality from the same block at the same time they will sell for the same price, but the fact that both pounds of meat are there to supply the

market reduces the price of both.

Mr. BRISTOW. That theoretically is true, but, as a matter

of fact, it does not do it.

Mr. REED. If it has not done it up to this hour, it is bound to do it in the course of time when the competition is fully established. If competition does not exist, if there is an international trust on beef, that question of course must be met, but I should like to have something beside bald assertions to demonstrate that the importation of 13 shiploads of corn into this country has no effect upon the supply and demand.

I call the Senator's attention to the fact that if the shipment of meat from abroad has not lowered the price one penny, then it has not injured the American farmer one penny. If not lowered the price of corn a penny to the consumer, it has not lowered the price of corn to the American producer. can not allege in one breath that the price remains steadfastly the same to the consumer and in the next breath say that the producer has been injured.

Mr. BRISTOW. The Senator's logic, of course, is very conclusive, but it does not harmonize with facts. The truth is that the price of American cattle has gone down, while the price of meat on the block that the consumer buys has not. Now, that is

a fact which argument can not destroy.

Mr. REED. What about the price—
The PRESIDING OFFICER. Does the Senator from Kansas yield further to the Senator from Missouri? Mr. BRISTOW. I do.

Mr. REED. What about the price that is paid by the re-

Mr. BRISTOW. I suppose the retailer is paying the packers just the same that he has always paid.

Mr. REED. Does the Senator know or does the Senator sup-

Mr. BRISTOW. I do not know whether the retailer is making more profit or not, or whether all the profit is confined to the packers. What I know is that the consuming public is paying the same price for its steaks, while the packers are paying less for the cattle from which they make the steaks.

Mr. REED. Now, Mr. President, if the Senator will pardon

The PRESIDING OFFICER. Does the Senator from Kansas yield further to the Senator from Missouri?

Mr. BRISTOW. I do.

Mr. REED. When we come to deal with facts and put facts before the country, we ought to do so with some degree of accuracy. The Senator makes the assertion that the price of meat has gone down to the farmer and has not gone down to the consumer a particle, and he does not know what the price is to the retailer. If the price has gone down to the retailer, then, certainly, if the retailer is getting the same price from the consumer, he is making more profit, and it certainly is benefiting somebody.

If, on the other hand, the prices are absolutely the same to the consumer, with no increased profit to the retailer, then we have an interesting proposition, for that means that we have a Meat Trust in this country; and I undertake to say that if we have that we ought to direct our attention to it, instead of floundering around here and protesting against the people ever having

any chance at a reduction by buying something from abroad.

Mr. BRISTOW. I will say to the Senator that I have a bill before the Committee on Interstate Commerce—

Mr. VARDAMAN. Mr. President—

The PRESIDING OFFICER. Does the Senato: from Mis-

Souri yield to the Senator from Mississippi?

Mr. BRISTOW. In just one moment. I will say to the Senator from Missouri that I have a bill before the Interstate Commerce Committee now pending which I think would have a curative effect-at any rate, that is my opinion-in regard to the Meat Trust, and I hope the committee will deal with it at this session of Congress.

Mr. VARDAMAN. I rise to a parliamentary inquiry, Mr. President. What is before the Senate?

The PRESIDING OFFICER. The consideration of Senate.

bill 3091.

Mr. VARDAMAN. I thought it was ancient history. Mr. BRISTOW. This is not ancient history; it is modern history, as the Sena or from Mississippi will find out if he will examine the current news of the day.

Now, I want to ask the Senator from Missouri a question. Does he think that the Corn Syrup Co., which the papers tell us h. . contracted for 5,000,000 bushels of corn from Argentina, will sell its sirup to the American people any cheaper than it would if it had bought that corn from the farmers of Illinois or Ohio or Maryland?

Mr. REED. I think, Mr. President, that it is indubitably true, barring combinations and monopolies-

Mr. BRISTOW.. Oh, well-

Mr. REED. Just let me conclude-that a greater supply has a constant tendency to reduce prices if there has not been a corresponding increase in demand; that the man who has two or three places from which he can supply his demand will get better prices than if he has but one; that a country that has two or three source: of supply will get better prices than if it has but one.

Now, I can not answer as to what this particular sirup mill will do, but if that mill is going to consume a given quantity of corn a year and other mills are going to consume quantities of corn, if a part of that corn is obtained from outside of the United States at a lower price, the result in the end will be a reduction of the price of their product to the American people, always providing that there is not a monopoly; and the way to stop a monopoly is not by stopping the source of supply, but by destroying the monopoly by direct action.

Mr. BRISTOW. I, of course, can not take issue with the Senator when he says that barring combinations and monopolies the price depends largely upon the supply and demand, but my complaint has been that because of combinations and monopolies the placing of the farmer's products upon the free list has resulted in advantage to the monopoly, disadvantage to the farmer, and no advantage whatever to the consuming public.

The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from North Carolina [Mr. SIMMONS].

Mr. REED. Mr. President, I merely want to make this observation: I have been sitting in the Senate here now for a number of months seeking to avoid being drowned in the river of tears which is pouring from the eyes of my friends on the other side over the wrongs and injuries of the poor American farmer. am going to take a few minutes now to swim out of that stream of sorrow. One of two propositions is true: Either competition of American grains with the grains of South America in the markets of the United States will reduce the price of those grains or it will not. If it does reduce the price of those grains, then the 100,000,000 American citizens who consume grains are bound to receive the benefit first or last. Monopoly or no monopoly, combination or no combination, the people will get the benefit, because it is impossible that all forms of foodstuffs that are manufactured from grain shall come within the control of any one or any dozen combinations. If the sirup company which appears to not be a sweet morsel to the Senator from Kansas [Mr. Bristow]-should buy a million or ten million bushels of corn abroad, and thus lessen its consumption of corn grown here at home, the 10,000,000 bushels it would have consumed of American corn will be left upon the market. Being left upon the market, it will increase the supply, and having increased the supply, there will be a reduction of price to the manufacture: or user of corn, and inevitably a reduction to the ultimate consumer. If, on the other hand, the price in this country is not affected, it must be because of this: While that 10,000,000 bushels of corn is flowing in from Argentina or from some other South American countries to our Atlantic ports we are shipping great quantities of corn abroad; instead of the South American corn going to Liverpool and meeting us in competition there, the lines of trade have been merely shifted, and our corn, which can more advantageously or easily reach Liverpool, has gone there direct, and the Argentine corn has come to take its place, with some saving in freight rates. If, on the other hand, as the Senator contends, there is no reduction in the price of corn to the ultimate consumer, there can be no reduction in the price of corn to the producer, for the very reason that I offered a few moments ago.

Mr. President, upon the question of the poor American farmer, I wish to say that I come from an agricultural State, the best agricultural State there is in the Union; a State with more diversity in its products than any other State is blessed with.

I know that the State pride of other Senators will lead them to challenge that statement, but if it were a matter of discussion I would undertake to make it good. The farmers of Missouri are more prosperous to-day than they have ever been in the history of the State. There is no clamor among them for pro-They have the best soil or as good soil as there is in the world; they have splendid railway facilities. the competition in this country to-day, which is the only competition any American farmer need fear—the competition of the American farmer who I'ves in the same county and the competition of the American farmer who lives in other American States. There they must meet men of the highest intelligence; they must compete with men who possess modern machinery and ample capital; they must compete with men who have every advantage which they possess. That is the competition that they have always had to meet. Any American farmer who can meet the competition of the great army of other American farmers can meet the competition of any man beneath God's bending sky. He has always done it in the past; he will always do it in the future. He is compelled to do it whether he wills it He must meet competition not only at home but abroad. He has always met the competition at home and abroad.

The attempt to say that there has been discrimination against the American farmer does not commend itself to the judgment of men who know the facts. The claim so often made that there has been discrimination in the tariff law against the American farmer falls flat when it is laid down alongside the facts in the There is not an article in the entire tariff law, from first to last, upon which a reduction of the tariff was made that does not benefit the American farmer in common with every other American citizen. Even though the reduction was on an article used exclusively by manufacturing plants, yet that benefit flows back to the American farmer the same as it comes to the American mechanic, the preacher, or the doctor, or the banker. In the long list every reduction goes for the benefit of all American consumers.

The repeated statement coming from the other side of the Chamber that we took the tariff off the farmers' goods and that we took nothing off that which the farmer consumes is a statement which is not only false, but is known to be false by the men who continue repeating it.

Mr. GALLINGER. Mr. President-

Mr. REED. It is not a question of difference of opinion, but it is a question of fact; and yet we have heard it here upon the floor of this Chamber for months and months at a time

Mr. GALLINGER. Mr. President—
The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from New Hampshire?

Mr. REED. Yes.

Mr. GALLINGER. I rise to say that that is a pretty serious accusation the Senator is making against Members on this side of the Chamber, that they are stating falsehoods, and that they know them to be false. For my part I repudiate it, and I call the attention of the Senator to a rule of the Senate that I think will forbid such a statement.

Mr. REED. The Senator from New Hampshire is oversen-

sitive to-day

Mr. GALLINGER. Not at all; but the Senator from New Hampshire regrets that the Senator from Missouri is so im-

prudent as to make that statement.

Well, Mr. President, I have often had occasion to think, as I pass along the weary trail of this life, that if I could just lift my eyes to that high plane which is occupied by the Senator from New Hampshire and occasionally bathe myself in the sweet light that is shed from his soul, I, of course, would be ready to walk with the archangels.

Mr. GALLINGER. Mr. President, that is an unnecessary allusion. It was interesting the first time the Senator made it in this Chamber, and perhaps it is interesting to some now, but the Senator from New Hampshire claims no such beatific virtue as the Senator from Missouri grants him. I think that the exigencies of this debate do not really require an attack of that kind.

Mr. REED. I thought the remarks of the Senator from New Hampshire injected into mine, in which he accused me of improper conduct, were as far from having any basis as anything I repeat that any man of intelligence who says that the reductions made in the tariff do not inure to the benefit of the farmer makes a statement which, if he makes it as a statement of fact, is untrue, and as an intelligent man he must know it is untrue

Mr. GALLINGER. The Senator from Missouri has modified his statement now, but even with that modification he comes very near transgressing the rule of the Senate.

Mr. President, while I am on my feet, if the Senator will permit me, I wish to say that the Senator is making an appeal that the consumers of the country have benefited by tariff legis-Will the Senator inform us of any article that has been reduced in price to the consumers of the country since the tariff was revised?

Mr. REED. Yes; men's clothing.

Mr. GALLINGER. We all know that is not true.

Mr. REED. Well, if the Senator talks about parliamentary retorts and parliamentary conduct, that is a direct challenge of

the truthfulness of my statement.
Mr. GALLINGER. Not at all. The Senator may believe that, but the rest of us do not; at least, those of us who are

on this side of the Chamber do not.

Mr. REED. I take it, Mr. President, the Senator has not bought a suit of clothes recently. [Laughter.] I know that I got one from my tailor and I got it for \$5 less than the usual price, and he told me it was the difference in the cost of the oth. That is all I know. I have only bought one suit.
Mr. GALLINGER. Well, Mr. President, does not the Senator

know that there is not a difference of \$5 in the price of cloth

in a suit of clothes?

Mr. REED. I think there certainly is in the kind of clothes buy. There may not be in the kind the Senator buys.

Mr. GALLINGER. That may be-

Mr. REED. The Senator asked me to name some articles which are cheaper. I will mention ladies' gloves. There has been a marked reduction in ladies' gloves. Mr. GALLINGER. I have been told to the contrary by those

who buy them.

Mr. REED. The Senator's informants did not know where to

Mr. GALLINGER. Well, they did not go to the Senator's expensive shops evidently, if the Senator wears clothing so superior to that of the rest of us.

Mr. REED. Oh, I do not know. Not being possessed of that character of shrewdness which has made the Senator's State one of the wealthiest in the Union, I possibly have been paying

a higher price, but I am sure I never obtained better values.

Mr. President, the interruption of the Senator led me away from the theme I was discussing. I affirmed that the reduction generally of the articles upon the tariff list did inure to the benefit of the farmer. I want to discuss that for a moment; but before I do so I wish to go back again to the proposition I have repeatedly made, that if there has been no reduction in the price of the articles upon which the tariff was reduced, then the American manufacturer has suffered nothing. If prices have remained the same under the low tariff as under the high tariff, if they have remained the same under the Underwood bill as they were under the Aldrich bill, then let us have done with this weeping and wailing and gnashing of teeth over the wrongs and injuries which have been perpetrated against the American manufacturer, for, if prices have remained just as they were before we changed the tariff rate, then the manufacturer is able to sell his goods at exactly the same price as formerly. So that, if the Senator from New Hampshire is correct in his statement that there has been no reduction in prices to the American people, there can have been no reduction in prices to the American manufacturer; and if there has been no reduction in prices to the American manufacturer, then let us have done with the cry that the new tariff law has injured and ruined and destroyed the American manufacturer, because he stands just where he stood before and is extorting the same prices and receiving the same profits. If, on the other hand, there has been a reduction or is to be a reduction, let us see whether the American farmer can get any benefit.

We reduced the tariff upon woolen goods, including clothing. The American farmer uses woolen goods the same as any other citizen. We reduced the tariff upon blankets. The American farmer uses blankets the same as all other classes of citizens. We reduced the tariff upon steel and iron in its various forms. The American farmer uses those products in common with every other citizen of the Republic. We reduced the tariff We reduced the tariff upon bagging. The American farmer uses bags in common with every other citizen and much more than the average citizen. We reduced the tariff upon cotton goods, and the American farmer uses cotton goods just as extensively as any other class of people in this Republic. We reduced the tariff upon leather and upon the various products of leather. The American farmer uses them the same as other citizens of the Republic use the products of leather.

Mr. OLIVER. Mr. President

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. REED. I will yield when I have concluded this sentence. So I might go down the entire list, including every schedule in the tariff bill, and show that the American farmer is a direct consumer as often as is any other class of our people, except as to those particular commodities which are used in the processes of manufacture, and then he is a consumer of the manufactured article. Hence, if there is any reduction, he re-ceives the benefit of that reduction. An attempt, therefore, to say that the American farmer does not receive the benefit of tariff reduction upon all the articles in the entire schedule the same as any other citizen is a false claim, and is known to be false by those who make it.

Mr. OLIVER. Mr. President, if the Senator will yield to me I should like

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. REED. Certainly.

Mr. OLIVER. I should like to ask the Senator whether the American farmer to-day is purchasing any or all of these articles, such as cotton goods, woolen goods, blankets, leather, and so forth, at any lower price than that for which he was purchasing them a year ago when the exorbitant Payne tariff law was in force?

Mr. REED. Then, I want to ask the Senator a counter question.

Mr. OLIVER. I should rather have the Senator answer my question first.

Mr. REED. I will answer; but will the Senator tell me whether the manufacturers are selling these articles any cheaper, and, if they are not, then how have they been injured, and what becomes of your cry that the smoke will die out of the chimneys; that the fires will become black in the furnaces, and desolation and woe will sweep over that part of country where there are manufactories?

Mr. OLIVER. If the Senator will yield, I should like to call his attention to the fact that he has not answered my question.

Mr. REED. Very well; I will answer it. I have not undertaken to go through the lists of the retail and wholesale prices of goods; but, standing upon the floor and speaking from my own experience and knowledge, I have called attention to two articles which have been reduced in price. I will say, however, that the question is utterly immaterial, for if the prices have not been reduced then the manufacturer has not suffered. I believe they have been reduced, and I believe that further reductions are bound to come. They can not be brought about in minute; but inevitably they will result, or else the tariff is still so high as to be prohibitive, and if it is so high as to be prohibitive, surely the manufacturer ought to quit complaining and go to work.

Mr. OLIVER. I presume, Mr. President, the Senator will not contend that the tariff is prohibitive upon the numerous articles which he and his party have placed upon the free list?
Mr. REED. I hope the tariff is nowhere prohibitive; I hope

it is competitive; but if it is competitive a reduction in the price is inevitable to some extent. If there has been no reduction, it is some evidence that it is prohibitive; but if it is prohibitive, or if there has been no reduction, then certainly the manufacturers of this country can not be heard to complain, for they have not been hurt.

Mr. President, I repeat what I said a moment ago, that it seems to me that there are two classes of people to consider in this country. The two classes are the producers and the consumers. This cry about the farmer sounds a good deal to me like the Macedonian cry which so many candidates utter just before an election. They are wanting the farmers to come over and help them a good deal more than they are desirous of helping the farmers.

Mr. GALLINGER. Mr. President, I assume that an American consumer who eats a loaf of bread and only needs one loaf can not well eat an American loaf and a foreign loaf at the same He would get into trouble if he tried to do so. is that if we open our markets to foreign countries and they are enabled to send their goods in here at a lower rate of duty, we will have a surplus in this country. The Senator from Missouri admits that, and then says that the farmers will have to sell their surplus at a lower cost, so that, according to his view, it does not make much difference what becomes of the American

Mr. President, we have had a profitable trade with Canada heretofore, Canada purchasing much more from us than we did from her, a condition which greatly troubled some of our tariff reformers in past years. I find now that the Underwood tariff law has been a life-saver for Canada. Up to October the balance of trade was running steadily against her, and most seri-

ous consequences were feared; but the moment the wall along the border went down Canadian goods rushed into this country, with the result that in a single month exports trebled, all of the increase coming to this country save for a small amount of wheat, which went to England.

Mr. REED. Exports of what?

Mr. GALLINGER. Of Canadian products.

Mr. REED. That is very vague, indefinite, and uncertain.

Mr. GALLINGER. Yes.

Mr. REED. If they sent to us a few million bushels of wheat and our mills ground that wheat and American labor got the benefit of it, and possibly the American consumer some of it, and the greater part of it was sent abroad, it certainly would not have any effect, except to furnish employment for American labor.

Mr. GALLINGER. The imports included not only Canadian wheat but all the products of Canadian farms, and to some extent of Canadian factories. Of course, a very large amount is made up of beef which came into this country, which may have reduced, and I understand did reduce, the value of cattle on the American farms, but the American consumer did not get any benefit from that. The Senator throws up his hands, and well he may, because the truth is that beef has been increasing in price rather than decreasing in price since the passage of the wonderful Democratic tariff bill, which was going to reduce the high cost of living.

Mr. REED. Let me call the Senator's attention to the fact

that beef had been increasing in price for some years before the

enactment of the tariff law,

Mr. GALLINGER. Yes; it had; but the Senator and his party were going to stop that increase and give us a decrease.

Mr. REED. Very well.

Mr. GALLINGER. That was the promise of the Baltimore

Mr. REED. We promised not to reduce prices—no political party ever promised to reduce prices. We did promise to give American citizen a chance to buy in a reasonably free market. We did denounce the high cost of living.

Mr. GALLINGER. Yes.

Mr. REED. We did say we would do what we could to We have taken the first step in pulling down that wall behind which the American manufacturer was able to plunder the American people, and beyond which the American people could not go for relief from the exactions of monopoly.

We are about to enter upon some legislation that will produce still greater calamity howl. We are about to strengthen the trust laws in this country, so that combinations in restraint of trade will be brought to book and properly punished. When we have done so against the protest of our friends upon the other side, when we have pulled the wagon through to the end with every one of these balking horses sitting back on his haunches and digging his hoofs into the ground and trying to stop progress, if any good has resulted they will deny us the credit. If we have not produced an absolute industrial revolution and brought prices down, they will denounce us; and if prices have gone down, they will then rise in the name of the American manufacturer and American farmer and protest to all the gods at once that we have brought calamity upon the country by reducing prices.

Mr. GALLINGER. The Senator's delicate reference to the

Republican Party, made in my time, is appreciated, and now I

If the Democratic Party did not, in its Baltimore platform, say that the reduction of the tariff would reduce the high cost of living, I am unable to read the English language correctly. That was the promise. It was repeated and reiterated on every stump from Maine to California, and the American people were led to believe that the Democratic Party could accomplish that result. The Democratic Party has failed to do it, and it is idle for the Senator from Missouri to contend to the contrary.

Mr. President, I do not know exactly what brand of clothing the Senator from Missouri wears. Evidently it is better than that which I wear, because the Senator intimated that. If the Senator has a tailor, however, who says that he now furnishes a suit \$5 cheaper, because of the difference in the price of cloth, the Senator had better investigate the facts and correct his tailor in his mathematics.

Mr. REED. That would be the last thing I would do, as long as the price was coming down. [Laughter.]
Mr. GALLINGER. Mr. President, some of the rest of us have bought clothing, probably not of so fine a quality as that worn by the Senator from Missouri, but some of us have tailors who are inclined to tell the truth about their business. I happen to have one I have employed for over 40 years, and he is a most excellent man. He tells me he is not going to make

clothing any cheaper because of the tariff, because he can not afford to do it, and that the difference in the price of cloth is negligible, and that if he should undertake to make clothing cheaper because of the difference in the price of cloth, it would be a mere trifle at best, which I understand to be the fact.

Mr. REED. Will the Senator pardon a further interruption?

Mr. GALLINGER. Certainly.

Mr. REED. If the reduction to the tailor is a mere trifle, so inconsequential that he can not carry it on to his customer, then is it not also a trifle to the man from whom the tailor bought the goods?

Mr. GALLINGER. Five cents a yard is a pretty good profit on cloth. If we open our markets to English cloth and German cloth and French cloth and Canadian cloth, of course, when men buy expensive clothing, which is usually of English or German manufacture, they are going to leave the American cloth on the American market, and the American woolen mills will suffer the consequence, as they are suffering it to-day. Twenty-five per cent of the looms of the woolen mills of the United States are idle at this moment. I do not know how

many more will be idle six months from the present time.

Mr. REED. May I ask the Senator if 25 per cent of the looms are not always idle, or nearly always idle? Do they not

carry a surplus in every mill in this country?

Mr. GALLINGER. There are some looms that are idle all

Mr. REED. Certainly.

Mr. GALLINGER. But this is a much larger proportion than is usually idle at this season of the year.

I do not know that anything is to be gained by continuing this discussion. The Senator from Missouri believes that the Democratic Party has conferred a great boon upon the American people in this legislation that the Democratic Party gave the country. I have believed to the contrary, and I believe to the contrary now. I do not think my sincerity or my honesty of purpose or of belief should be called in question because I hold

The Senator says we are flooding the Senate Chamber and the country with crocodile tears over what the Democratic Party has done for the country. I have not seen any tears. There has been more pathos in the voice of the Senator from Missouri, which always borders on tears, than I have heard on this side of the Chamber at any time during the discussion of this question.

Time will tell whether or not the Democratic Party has conferred a boon on the country. For my part, I am quite willing to wait and see the result of this legislation. I believe it will prove disastrous; I believe it is to-day proving disastrous; but if what I fear does not come to pass, if the country prospers under this legislation, no one will rejoice more than Republicans will rejoice.

I do not believe there is a Republican in this land who wants to see hard times or a panic; but, notwithstanding that fact, there is no reason why Republicans should not contend for the principles in which they believe and the doctrines of the party to which they belong without being accused of ulterior motives or of bringing disaster to the industries or the happiness of the American people.

I am quite willing to let the matter rest there. purpose of saying anything that would excite the unkind feelings of the Senator from Missouri. The Senator from Missouri started out by saying that I rose to talk about "that moss-grown idea of the home market." I did not intend to do that; but I will say now that a market in which 92 or 93 per cent of the products of the American mills and the American farms is consumed by their own people is a market that we ought to protect under all circumstances. We ought not to open it to the products of the underpaid labor of Europe or of Asia to the detriment of the people we try to represent.

Mr. REED. Has the Senator concluded?

Mr. GALLINGER. I have concluded for the present; yes. Mr. REED. The Senator has gone back once more to the old, musty ghost—if I may apply the adjective musty to a ghost—of the underpaid labor of Asia. The complaint he has been making, however, is of the shipment into this country of goods of some kind, which he does not name, from Canada-a country 90 per cent of whose citizens speak our language, a large proportion of them being emigrants from the United States; a country like ours in every respect; a country where farm wages are higher than they are in the United States; and where horses and cattle, as has been demonstrated on this floor, are for the most part higher than they are in the United States. That is the competition that he says has come to us, and not competition from the pauper hordes of Asia. If any

competition from the pauper hordes of Asia has come to us since the enactment of the tariff bill, will the Senator please tell us what it is?

Mr. GALLINGER. I did not say "the pauper hordes of Asia" or of Europe; I said "the underpaid labor.".
Mr. REED. Very well; I will accept the amendment.

Mr. GALLINGER. If the beautiful suit which the Senator is wearing, which he says is superior to that which I wear, is of English or German cloth, as I apprehend it may be, that is one article that has come in under the tariff law. I do not agree with the Senator, however, as to Canadian wages.

Mr. REED. Mr. President, may I relieve the Senator's mind? The suit I am wearing, which I bought from a cheap tailor in my own town, I bought two years ago. I do not know where it was made. I never inquire whether his goods happen to be made in Germany or France or where; but I assume the Senator from New Hampshire always does inquire with care, for I am sure he could not be induced to patronize anything but home industries.

Mr. GALLINGER. The reason I alluded to the Senator's suit is that he observed to me that I probably had not pur-chased a suit recently, and I inferred that he had, because he

told us he got it \$5 cheaper than he used to get it.

Mr. REED. It may astonish the Senator to know that I have another suit. [Laughter in the galleries.]

The VICE PRESIDENT. The galleries will please observe

Mr. GALLINGER. Concerning the importations from Canada, of course they are largely of cattle, horses, and so forth. It may interest the Senator from Missouri to know that under the tariff law which the Democratic Party has given us, if a citizen of the United States drives a steer to the international boundary to get it into Canada he has to pay \$10 for the privi-lege, while if a Canadian drives a steer to the international boundary we fling the gate wide open and he comes in without paying any duty at all. That is one of the beauties of this tariff law, as far as our relations with Canada are concerned.

Mr. REED. Will the Senator pardon me further?

Mr. GALLINGER. Yes.

Mr. REED. It would look as though the American consumers were being benefited both ways. Our cattle can not be taken away; they must be kept at home and be consumed; and the Canadian cattle can come in for our people to use.

Mr. GALLINGER. Yes; to make our cattle of less value to the American farmer, but the beef no lower in price to the

American consumer.

Mr. REED. The Senator overlooks the very practical fact that most of the cattle that are imported into this country from Canada are young cattle that have been grassed up there upon the almost illimitable prairies and then brought down here to be fed United States corn, and that the farmer, by being allowed to get his calves in that way and turn them into money, has been very greatly benefited.

Mr. GALLINGER. Senators representing western districts

tell me that the Senator from Missouri has made a remarkable discovery in this matter. I am not informed as to it, and I do not care to discuss it. I simply call attention to the discrimination that the existing tariff law makes in behalf of Canada

and against the United States.

I shall conclude what I have to say on this subject by saying that the Senator and I will both wait, I have no doubt with some patience, and perhaps with hope, that the tariff law which the Senator so eloquently and somewhat violently defends will work out to the welfare of the American people. Let us hope so.

Mr. BRISTOW. Mr. President, I do not desire to indulge in any further tariff debate; but the Senator from Missouri stated that any man who said that the tariff had not benefited the farmer, and that he had suffered loss from it, stated what he knew to be false.

Mr. REED. Mr. President, will the Senator pardon me just one interruption? The Senator is not quoting me accurately. I did not make that statement. I made the statement that those people who said that the benefits of the reductions brought about by the tariff did not flow to the farmer as they did to other individuals were making a statement which was not true and which they knew was not true.

Mr. BRISTOW. I had just made the statement that the reduction in the duty on cattle had resulted in a reduction of the price of cattle to the farmer, but that it had not resulted in a reduction of the price of meat to the consumer.

Mr. REED. Will the Senator permit me a further interrup-tion? My remark had no relation whatever to the Senator's observation which he has just repeated. I was dealing with the general question. I would not have the Senator from Kansas understand that I for a moment meant to apply that remark

to him individually or to anything he had said. There was nothing personal in my remark.

Mr. BRISTOW. With that statement from the Senator, I

have nothing further to say.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from North Carolina [Mr. SIMMONS]. Mr. BACON. Mr. President, I move that the Senate proceed to the consideration of executive business.

Mr. SMITH of Georgia. Before that motion is made, Mr. President, if the Senator will withhold it for a moment—

Mr. BACON: Certainly.
Mr. SMITH of Georgia. I move that this bill be made the special order immediately following the disposition of the

Alaska railroad bill.

Mr. ASHURST. Mr. President, some time ago I asked unanimous consent that the Senate proceed to the consideration of the weman-suffrage amendment, and the Senator from Georgia assured me that when the currency bill and the Alaska railroad bill were disposed of-he did not say he would consent, but he assured me that there would be no further objec-

Mr. SMITH of Georgia. This bill will take only a very short

Mr. ASHURST. Then, with that understanding—Mr. SMITH of Georgia. I do not expect, personally, to inter-

pose an objection.

Mr. CLARK of Wyoming. Mr. President, I did not under-

stand what the request was.

Mr. SMITH of Georgia. My motion was that this bill be made the special order immediately after the Alaska railroad bill. Ordinarily, I would seek to get it up Monday, but I shall be out of the city Monday, Tuesday, and Wednesday.

Mr. CLARK of Wyoming. Does the Senator make that as a

motion?

Mr. SMITH of Georgia. Yes.
Mr. CLARK of Wyoming. Of course if it is made as a motion, I suppose there is nothing to do except to take a vote upon it. If it is made as a request for unanimous consent, I shall object to the unanimous-consent agreement.

Mr. SMITH of Georgia. I was under the impression that

Mr. SMITH of Georgia. I was under the impression that that time probably would be agreeable to all of us. It will give us until about next Saturday.

Mr. CLARK of Wyoming. It is not a question of time; it is a question of indulging in the practice of piling up orders, one behind the other.

Mr. SMITH of Georgia. This bill having been so nearly completed to-day, it seemed to me that if we could fix a time to dispose of it now it would be in the economy of time.

Mr. CLARK of Wyoming. I have not any question but that the Senator can easily take it up at the time he suggests, but I do not like to see a formal order entered when there is a special order already before the Senate.

Mr. SMITH of Georgia. I have agreed with several of my friends that I would make the motion, and not try to press the bill this evening; so I think I ought to make the motion still, and I hope it will be carried, to make this bill the special

order at the conclusion of the Alaska railroad bill.

Mr. CUMMINS. Mr. President, a parliamentary inquiry. Has an order been entered, or a unanimous-consent agreement made, with regard to the time of voting upon the Alaska railroad bill?

The VICE PRESIDENT. Yes; the legislative day of next

Thursday.

The motion of the Senator from Georgia [Mr. SMITH] is that the pending bill be made the special order immediately follow-

ing the disposition of the unfinished business.

Mr. CUMMINS. Another parliamentary inquiry: Does that mean, may I ask the Senator from Georgia, that at that time the bill will be again taken up for consideration? I suppose that is what it means.

The VICE PRESIDENT. That is all a special order means. Mr. SMITH of Georgia. It will require a two-thirds vote to make this bill the special order. That will require a call of the yeas and nays, and I shall not insist upon it. Instead, I wish to give notice that immediately upon the conclusion of the consideration of the Alaska railroad bill I shall move to take up this bill, and endeavor to keep it before the Senate until we reach a final vote upon it.

Mr. CLARK of Wyoming. That is better. I do not think the Senator will find any difficulty in that course.

EXECUTIVE SESSION.

Mr. BACON. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the

consideration of executive business. After 10 minutes spent in

executive session the doors were reopened, and (at 5 o'clock p. m.) the Senate adjourned until Monday, January 19, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 17, 1914. SURVEYOR GENERAL.

Frank H. Gould, of San Francisco, Cal., to be suveyor general of California, vice Edward H. Archer, whose term will expire February 10, 1914.

UNITED STATES MARSHAL,

James B. Holohan, of California, to be United States marshal, northern district of California, vice Charles T. Elliott, removed.

PROMOTIONS IN THE ARMY.

MEDICAL DEPARTMENT.

Col. William C. Gorgas, Medical Corps, to be Surgeon General, with the rank of brigadier general, for the period of four years beginning January 16, 1914, with rank from that date, vice Brig. Gen. George H. Torney, who died December 27, 1913.

APPOINTMENTS IN THE ARMY.

MEDICAL RESERVE CORPS.

To be first lieutenants with rank from January 15, 1914.

William Grosvenor Bissell, of New York. Herbert Eddes Brown, of Texas. John Graham Davis, of Iowa. Henry Stewart Fruitnight, of New York. Axel Emanuel Hedback, of Minnesota. Iverson Howard Jewell, of Arkansas. Harry Carl Nichols, of Nebraska. Edwin Jacob Schisler, of Missouri.

Robert Boyden Underwood, of Tennessee. Jesse LeVan Wagner, of Pennsylvania.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Commander Andrew T. Long to be a captain in the Navy from the 20th day of December, 1913.

Lieut. Commanders Provoost Babin and Gilbert S. Galbraith to be commanders in the Navy from the 1st day of July, 1913. Lieuts, Ivan E. Bass and William S. Pye to be lieutenant com-

manders in the Navy from the 1st day of July, 1913.

Lieuts. (Junior Grade) William L. Beck and David A. Scott to be lieutenants in the Navy from the 1st day of July, 1913.

Ensign Aquilla G. Dibrell to be a lieutenant (junior grade) in the Navy from the 6th day of June, 1913.

Passed Asst. Surg. Walter S. Hoen to be a surgeon in the

Navy from the 14th day of November, 1913.

The following-named assistant surgeons to be passed assistant surgeons in the Navy from the 28th day of March, 1913:

Andrew B. Davidson, Duncan C. Walton, and Willard J. Riddick.

Asst. Surg. William H. Halsey to be a passed assistant surgeon in the Navy from the 1st of October, 1913.

Asst. Surgs. John J. O'Malley and Robert F. Sheehan to be passed assistant surgeons in the Navy from the 5th day of Octo-

The following-named citizens to be assistant paymasters in

the Navy from the 15th day of January, 1914:

Josiah Merritt, a citizen of California, King Terrell, a citizen of New Jersey, Charles G. Holland, a citizen of Georgia, Hiram P. Tudor, a citizen of Missouri, Richard C. Reed, a citizen of South Carolina, Andrew Mowat, a citizen of Rhode Island, and George C. Simmons, a citizen of Michigan.

POSTMASTERS.

In compliance with the request of the Senate of January 13, 1914. Senate resolution of January 12, 1914, advising and consenting to the appointment of A. W. Howell to be postmaster at Frost, Tex., and James Norton to be postmaster at Hackensack, N. J., are herewith returned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate January 17, 1914. (Omitted from RECORD of January 17, 1914.)

COLLECTOR OF INTERNAL REVENUE.

Lewis T. Carpenter, of Arizona, to be collector of internal revenue.

POSTMASTER.

IOWA.

Wallace M. Higbee, Fairbank, Iowa.

HOUSE OF REPRESENTATIVES.

SATURDAY, January 17, 1914.

The House met at 12 o'clock noon. The Chaplain, Re . Henry N. Couden, D. D., offered the fol-

lowing prayer:

We invoke Thy blessing, Almighty God, our heavenly Father, upon this great body of representative men. Impart unto them health of body, a sound mind, a sensitive conscience, a warm, sympathetic, patriotic heart, that its proceedings my be in consonance with the laws which Thou hast ordained and redound to the good of the people here represented. And Thine be the praise, through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and

approved.

IMMIGRATION.

Mr. ASWELL. Mr. Speaker, I ask unanimous consent to e =tend my remarks in the RECORD on the subject of the pending immigration bill.

The SPEAKER. Is there objection?

There was no objection.

CHANGE OF REFERENCE.

Mr. LINTHIGUM. Mr. Speaker, I ask unanimous consent that the Committee on the Library be discharged from further consideration of the bill (H. R. 11174) providing for the appropriation of a sum of money for the erection at Fort McHenry of a monument and flagstaff to Francis Scott Key and a me-morial hall to the defenders of the Nation in the War of 1812, and the erection of a monument upon the North Point battle field, and for the necessary alterations in the buildings and grounds in connection therewith, and that the same be referred

grounds in connection therewith, and that the same be referred to the Committee on Appropriations.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to have some explanation from the gentleman from Maryland before giving consent to this change of reference.

Mr. LINTHICUM. Mr. Speaker, this bill was referred to the Committee on the Library. It was to purchase a site and erect a memorial building. The Committee on the Library has no jurisdiction, because the building is to be erected on Government property. It ought to be referred to the Committee on Appropriations. It is merely taking the bill away from the Committee on the Library, with the consent of that committee, and referring it to the Committee on Appropriations.

Mr. STAFFORD. I understand it has the full approval of the Committee on the Library?

the Committee on the Library?

Mr. LINTHICUM. It has the approval of the chairman. talked to the chairman and he said that the committee had taken up the matter and found that it was not within their jurisdiction.

The SPEAKER. Without objection, it will be so ordered.

There was no objection.

LAURA F. STIMSON.

Mr. LLOYD. Mr. Speaker, I present the following privileged resolution from the Committee on Accounts, which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 366 (H. Rept. 170).

Resolved, That the Clerk of the House be, and he is hereby, authorized to pay, out of the contingent fund of the House, to Laura F. Stimson, widow of E. D. Stimson, late an employee of the House in the folding room, a sum equal to six months' salary, amounting to \$450, and an additional amount, not exceeding \$250, for the funeral expenses of the said E. D. Stimson.

Mr. LLOYD. Mr. Speaker, this simply provides the usual mount that we pay on the occasion of the death of an employee. Mr. Stimson was employed in the folding room.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

JOHN A. BARNES.

Mr. LLOYD. Mr. Speaker, I also present the following privileged resolution from the Committee on Accounts, which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 352 (H. Rept. 171).

Resolved, That the Clerk of the House is hereby authorized and directed to pay, out of the contingent fund of the House, to the legal representative of John A. Barnes, deceased, late an employee of the House in the folding room, a sum equal to six months' salary, amounting to \$450, and an additional amount not exceeding \$290 for the funeral expenses of the said John A. Barnes.

With the following committee amendments:

Line 6, strike out the figures "\$290" and insert in lieu thereof "\$250," so that it will read:
"An additional amount not exceeding \$250 for funeral expenses of the said John A. Barnes."

Mr. LLOYD. Mr. Speaker, this is on account of the death of another employee in the folding room.

Mr. STAFFORD. Mr. Speaker, I notice in the reading of the resolution that this amount is to be paid to the legal representative of the deceased employee. Do we pay these stated amounts regardless of whether the deceased person leaves any direct relatives or not?

Mr. LLOYD. That is the rule; yes.
Mr. STAFFORD. At present we have under consideration the Post Office appropriation bill, and we propose in that to pay certain sums to the dependent relatives. I was curious to ascertain from the chairman of the committee whether the committee made any difference between paying the sum to the relatives and to the legal representative, who is the administrator? Mr. LLOYD. It seldom occurs that a resolution of this kind is

offered, because in nearly every instance the deceased employee has a wife. In that case we always provide that payment shall go to the wife. If there is some one specially dependent upon the deceased, if he has no wife, then we provide for the pay-ment to that dependent person. In this particular case, as in a few others in the past, there is no particular person specially dependent upon the deceased.

Mr. STAFFORD. Does the gentleman think it is good policy of the Government to pay a gratuity to the legal represent-atives where there are no dependent persons living, that may go to the payment of his debts or in the usual course of ad-

ministration for other purposes?

Mr. LLOYD. This is a gratuity in a sense and it is not a gratuity in another sense. This is an allowance that we make to the family of a deceased person, without reference specially to whether the individual has anyone immediately dependent upon him.

Mr. STAFFORD. Of course no one can have any objection to paying the funeral expenses of every deceased employee, but to pay six months' salary to the legal representatives that may even escheat to the estate or go to his administrator for the payment of expenses I do not see why the National Government should indulge in that policy.

Mr. LLOYD. In this case I can assure the gentleman it will go to his creditors, and that probably the estate will not be

sufficient to pay the debts he owes.

The SPEAKER. The question is on the amendment, which the Clerk will report.

The Clerk read as follows:

Line 6 of the resolution, strike out the figures " $290\,\text{"}$ and insert in lieu thereof " 250."

The question was taken, and the amendment was agreed to. The question was taken, and the resolution as amended was agreed to.

ADDITIONAL TELEPHONE OPERATOR.

Mr. LLOYD. Mr. Speaker, I offer the following privileged resolution from the Committee on Accounts.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 357 (H. Rept. 172).

Resolved, That the Clerk of the House be, and he is hereby, authorized to appoint one additional telephone operator at a salary of \$75 per month for the remainder of the present session, the same to be paid out of the contingent fund of the House.

Mr. LLOYD. Mr. Speaker, this provides for an additional employee. We have never had this additional employee in the past; but owing to the fact the membership of the House has increased very greatly we find that the telephone force are very much hampered in the discharge of their duties, and the Clerk and the chief telephone operator both assure us that we specially need additional help, and the Committee on Ac-counts thought it was the proper thing to provide this additional assistance.

Mr. STAFFORD. As I understand it, this employee is to be attached to the main exchange of the Capitol telephone service?

The SPEAKER. The question is on agreeing to the resolution. The question was taken, and the resolution was agreed to.

ASSISTANT TO JOURNAL CLERK.

Mr. LLOYD. Mr. Speaker, I offer the following privileged resolution.

The SPEAKER. The Clerk will report the resolution. The Clerk read as follows:

House resolution 354 (H. Rept. 169).

Resolved. That the Clerk of the House be, and he is hereby, authorized to appoint a messenger to the Journal clerk, who shall be paid out of the contingent fund of the House at the rate of \$1,600 per annum until otherwise provided.

The committee amendments were read, as follows:

Line 2, after the letter "a," insert the word "special," and after the word "messenger" strike out the words "to the "and insert the words "who shall also serve as assistant"; and in line 4 strike out the figures "1,600" and insert in lieu thereof the figures "1,800," so that the resolution as amended will read as follows: "Resolved, That the Clerk of the House be, and he is hereby, authorized to appoint a special messenger who shall also serve as assistant Journal clerk, and who shall be paid out of the contingent fund of the House at the rate of \$1,800 per annum until otherwise provided."

Mr. LLOVD. Mr. Speckar, at the present time the Journal

Mr. LLOYD. Mr. Speaker, at the present time the Journal clerk of the House has no assistance of any character. There is no one specially provided whose duty it is to carry bills from the Journal clerk's table to the Journal clerk's office, or from Journal clerk's office to the enrolling clerk's office, and at the present time that service has to be rendered by pages on the floor. It sometimes happens that it is necessary for the Journal clerk to be away from his place for a few minutes, or possibly a few hours, and at the present time there is no other officer who is authorized to take his place and perform the duties of the office when he is away temporarily. Now, under the Republican régime there was an assistant Journal clerk-

Mr. MANN. And stenographer.

Mr. LLOYD. And this in part restores the position that was held under the Republican regime, though the salary is not so great and the duties are fixed a little differently from the duties which were performed by the assistant Journal clerk then.

Mr. MANN. I did not catch the amendment, my attention being diverted. Does this office still retain the title of mes-

Mr. LLOYD. Special messenger, with the duties of—I will read it—"special messenger, who shall also serve as assistant Journal clerk."

Mr. MANN. Would it not be better to call him assistant Journal clerk? If we start in creating special messengers whose salary is \$1,800 we commence a rather dangerous prac-

tice, I think

Mr. LLOYD. Not if you give him the additional duty. The necessity for using the word "messenger" is this: That in addition to the work he is expected to do as messenger he is also to serve as assistant Journal clerk. If he is appointed to messenger duty, he will have enough to do in connection with the other duties he is performing. He is assigned to that kind of duty, and if it is specified in the resolution, he will expect perform also the duties of the Journal clerk in the absence of the Journal clerk and the duties of assistant Journal clerk during the presence of the Journal clerk.

Mr. MANN. It seems a strange thing to appoint a special messenger and then say that he shall perform the duties of

assistant Journal clerk.

Mr. LLOYD. Oh, I beg the gentleman's pardon. We have some special messengers in the House at the present time who receive salaries as high as \$2,000 each.

Mr. MANN. We have nominally some special messengers who are really minority or majority employees on the floor of the

House receiving that rate of pay.

Mr. LLOYD. And we also have a special messenger in the folding room who receives \$2,000 a year.

Mr. MANN. I do not know how that came in, but I suppose

it was originally some political appointment.

Mr. LLOYD. Neither one of us knows, I suppose.

Mr. MANN. But it certainly is anomalous to appoint a man as a special messenger and require him also to perform the duty of Journal clerk. The Journal clerk is one of the principal officers of the House. I think he ought to have additional help. We formerly gave the Journal clerk an assistant and a stenographer. When they were taken away I thought it was an error natural on the part of a new party, coming into power, who did not have full knowledge of the work to be done. We can afford to give the Journal clerk the proper officials and the proper assistants. It seems to be anomalous to say you will appoint a messenger to perform the duties of a much higher officer. We

need some additional help in the House.

For instance, I noticed in the Record the other day, but did not call attention to it because I was absent, that on the first day of this session the Committee on Enrolled Bills presented to the President the currency bill for his approval, whereas, of course, we know that that is not so, although the Record, of course, we know that that is not so, although the Record, and I suppose the Journal, will say hereafter that the currency bill was approved by the President of the United States in December, but was not presented to him for approval until the 12th day of January. That is somebody's mistake—a thing which ought not to occur. But it probably comes about because of the fact that the employees are pressed with work so that they do not give the proper and diligent attention to noticing

The SPEAKER. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on agreeing to the resolution as amended.

The resolution was agreed to.

HEARINGS, COMMITTEE ON THE MERCHANT MARINE AND FISHERIES.

Mr. HARDY. Mr. Speaker, I ask unanimous consent, in behalf of the Committee on the Merchant Marine and Fisheries, to consider a resolution authorizing certain printing to be done The SPEAKER. The gentleman will send it to the desk, and

the Clerk will report it.

The Clerk read as follows: House resolution 376.

Resolved, That the Committee on the Merchant Marine and Fisheries be, and is hereby, authorized to have printed 2,500 copies of volumes 1, 2, and 3 and 3,400 copies of volume 4 of the proceedings of the Committee on the Merchant Marine and Fisheries in the investigation of shipping combinations under House resolution 587 of the Sixty-second Congress, second session.

The SPEAKER. Is there objection to the present considera-

tion of the resolution?

Mr. MANN. Reserving the right to object, Mr. Speaker, can

the gentleman say what it will cost?

Mr. BARNHART. Mr. Speaker, reserving the right to object, would like to ask the gentleman what objection he would have to letting the resolution take the regular course and go to

the Committee on Printing?

Mr. HARDY. I would not have any objection; but the Government Printer is now printing those volumes at the Government Printing Office under the authority they have for printing a thousand copies under a resolution heretofore adopted, and these additional copies could be printed at but little additional

We find that there is a great demand for these documents. I am sure that the number that I have asked to have printed will be demanded, and perhaps more, because of the fact that the proceedings which are to be printed cover the investigation of the committee into the alleged Shipping Trust, and every shipping line in the whole United States was called upon for reports. All of these shipping lines will perhaps want these volumes, and particularly the fourth volume, which embraces a summary of the important facts brought out by the committee. In addition to that, these volumes contain the consular reports from our representatives abroad touching the subject of our investigation, and they are sources of information on that question that will be wanted by universities and colleges and students of our merchant marine and the freight and transportation questions all over the country. Of course, I can not give you an estimate of the cost.

Mr. BARNHART. Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman from Texas yield?

Mr. HARDY. Yes.

Mr. BARNHART. The members of the Committee on Printing are in Washington. We could consider the resolution within the next two or three days. It does seem to me that these matters should take their regular course. I think, from the statement of the gentleman, that there will be no difficulty

about having the resolution favorably reported.

Mr. FINLEY. Mr. Speaker, will the gentleman yield?

Mr. HARDY. Yes.
Mr. FINLEY. Mr. Speaker, I would like to ask the gentleman from Texas this question: Does he not think that makeletes of this sort ought to go to the committee that has jurisdiction of them rather than that he should ask that action be taken by unanimous consent without consideration by a committee?

I am not a member of the Committee on Printing, but for many years I was, and I found that it worked for economy to have these matters considered by the committee having juris-

diction of the subject matter.

Mr. HARDY. Let me make a suggestion along that line. Could your committee have a hearing on Monday so as to determine this matter? I understand there is much economy in having the whole work done at once and not by piecemeal.

Mr. BARNHART. It could.

Mr. HARDY. Then I ask that the matter be referred to the Committee on Printing.

The SPEAKER. The Chair refers the matter to the Committee on Printing.

PUBLIC PRINTING.

Mr. BARNHART. Mr. Speaker, I ask unanimous consent to proceed for two or three minutes as introductory to a request for unanimous consent.

The SPEAKER. The gentleman asks unanimous consent to proceed for three minutes as an introduction to a request for unanimous consent. Is there objection?

Mr. MANN. What is the subject? Mr. BARNHART. The printing bill. The SPEAKER. Is there objection?

There was no objection.

Mr. BARNHART. Mr. Speaker, for a good many years past Members of both the House and the Senate have devoted a great deal of time to hearings for the preparation of a printing bill, providing for a revision of the present printing laws and the rules governing the printing for the House of Representatives and the Senate.

During the last Congress, as I recall it, the Senate passed a bill, but owing to the fact that the House was overwhelmed with business the Printing Committee was not able to get its bill up for consideration, and it went over, and is reintroduced in the

present term.

The bill provides for a revision of the laws governing the apportionment of the printing to the membership of the House, and is, therefore, I believe, of vital importance to every Member. It is of vital importance to the Treasury of the United States, and it is of vital importance to the people of the United States who want to secure the sort of public documents that they might want, of most interest and worth in the respective districts in which they live. Therefore, I am going to ask unanimous consent that House bill 6539, the same being known as the printing bill just described, be considered in order for consideration at any time when the same does not conflict with the consideration of general appropriation bills or special orders established under the rules.

Mr. MANN. Will the gentleman yield for a question? Mr. BARNHART. I will.

Mr. MANN. Is this bill on the calendar? Mr. BARNHART. Yes; it is on the calendar. Mr. MANN. Has it been reported?

Mr. BARNHART. I am not sure as to that. The bill has been introduced.

Mr. MANN. Oh, I know; but it is not customary for the House to give unanimous consent for the consideration of bills until they are reported.

Mr. BARNHART. I understand that, and if the gentleman

has objection to it I can only permit it to take its place.

Mr. MANN. I do not feel like consenting to an order for the consideration of a bill in the House at any time when it has not yet been reported. I asked the gentleman whether it had been reported, and although he is chairman of the committee he does

Mr. BARNHART. Yes; I do know that it has not been for-

mally reported.

Mr. MANN. Well, then, I object.

The SPEAKER. The gentleman from Illinois objects.

POST OFFICE APPROPRIATION BILL.

Mr. MOON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Post Office appropriation bill (H. R. 11338).

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 11338) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes, with Mr. Hay in the chair.

Does the gentleman from Michigan [Mr.

SAMUEL W. SMITH] desire to proceed?

Mr. SAMUEL W. SMITH. I yield one hour to the gentleman from Illinois [Mr. Madden].

The CHAIRMAN. The gentleman from Illinois is recognized

Mr. MADDEN. Mr. Chairman, what I shall have to say will probably not interest the House much, but I want to call attention to the fact that the constantly increasing activities of the American people are, perhaps, better reflected through the Post Office appropriation bill than through any other instrumentality.

This bill carries an appropriation of \$305,270,000 for the payment of the expenses of the Postal Service of the United States for the current year. It affects every citizen in the Union. It covers the payment of men who enter every household. more patriotic lot of men were never engaged in any service in any country in the world than the men who are engaged in

I want to try to explain, if I can, in a measure, some of the provisions of the bill. For example, legislation has been

enacted providing for the automatic promotion and classification of every employee in the post-office service except the supervisory employees. These are the men who direct the activities of the service, the men by whose experience the Postal Service is made efficient and popular with the people. They are a deserving class; they are the only men who have had no consideration given to them. It seems to me that the time has come when the Congress of the United States should consider them among the men who are worthy of some legislation ameliorating the conditions under which they work.

The classification law, as it relates to post-office clerks, provides that all men shall be automatically promoted at the rate of \$100 a year until they reach a salary of \$1,100; and this bill provides for the promotion of 75 per cent of the men from the

\$1,100 to the \$1,200 grade.

I have long believed it to be a mistake to leave this class out of the automatic-promotion provision of the law. The fact that they are only promoted at the whim of the postmaster, whosoever he may be, sometimes does injustice to those worthy men. The belief was, when this provision was made for the promotion of only a percentage of the men from \$1,100 to \$1,200, that it would be an inducement to the men to do better work and thereby merit the promotion. But, however you may attempt to safeguard the situation, it is almost sure to follow that some favoritism will creep in in the promotion of men where one man has the say as to who shall be promoted. I believe that simple justice demands that the automatic-promotion provision of the law should apply to this class as to all other class

We have another provision in the law which provides for men to be promoted to a special grade from \$1,200 to \$1,300, and this promotion is altogether within the jurisdiction of the postmaster, and perhaps it is wise that as to this particular class that should be so, because the purpose in creating the grade was to encourage men in the Postal Service to become expert distributors. No man is supposed to reach the \$1,300 grade unless he be an expert distributer, but it is within the jurisdiction of the postmaster to say in this case whether the man is an expert distributor or not, and it is within his power to exercise favoritism as to who or who shall not be promoted

to the \$1,300 grade.

This bill provides for the promotion of a thousand men from the \$1,200 to the \$1,300 grade, and leaves it within the jurisdiction of the postmasters all over the United States to say

what man or what men shall be promoted to the grade.

I am rather inclined to think that the authority should be left to the postmaster in cases of this kind, because without that authority there would be no inducement to men to study the schemes which are intended to be learned in order that they may become expert distributors, and the Postal Service is efficient in a large degree to the extent of the number of expert

distributors we have engaged in the service.

We have a provision in this bill which fixes the compensation of watchmen and laborers-350 at \$840 a year and 1,450 at \$720 a year. The man who draws \$720 per annum does exactly the same work as the man who draws \$840 per annum, and it has always seemed to me to be very unjust to make two classes of these men. Most of the men employed in this service live in large cities, and the cost of living in the cities is much higher than it is in the rural districts, and \$340 per annum for the work that they perform is none too high. I hope that during the consideration of this bill under the five-minute rule we will be able to find a way to make but one class, and to pay that one class the maximum of \$840 per annum.

We have a system of pneumatic tubes in a good many large cities of America, by means of which we transmit the mails from the post office to the station, and this tube system has become obsolete, in my judgment. It is not large enough to do the work that it was intended to perform. The size of the tube used is about 8 inches in diameter, and the size of the package that can be transmitted through the tube is an ordinary bundle

of letters as tied up by the carrier.

The expense of redistribution at the end of the tube is enormous in the city of Chicago, where I have made a special investigation of it. We are paying \$17,000 a mile for rent per annum for the use of the tube, and we are spending \$60,000 for redistribution of the mail at the end of the tube. We are able to transmit but a very small percentage of the mail through the tubes, and if the Government is to continue the practice of using pneumatic tubes for the transmission of the mails it will have to increase the size of the tubes so that we can transmit five or six bags in one tube instead of one package, or five or six packages, as the case may be. If the tube was large enough we could transmit the mail at the rate of about 4 cents a mile unit. For example, if we had six bags of mail in one receptacle go through the tube, it would not cost to exceed 4 cents a mile

for the transmission of those bags, whereas now the movement of the mails over the surface by screened wagon and automobile costs all the way from 38 cents to 60 cents per mile. I commend the consideration of this question to those who are responsible for the economical and expeditious movement of the mail.

Mr. SELDOMRIDGE. Mr. Chairman, will the gentleman

yield?

eld?
Mr. MADDEN. Surely.
Mr. SELDOMRIDGE. Is it practical, or does the gentleman

know whether it is practical, to put the mail in large bags?

Mr. MADDEN. Oh, yes. Five or six bags can be placed in one receptacle without any trouble.

Mr. GOULDEN. Mr. Chairman, will the gentleman yield? Mr. MADDEN. Certainly. Mr. GOULDEN. What would be the additional cost over an What would be the additional cost over and above the \$17,000 per mile now charged to install and maintain a large tube?

Mr. MADDEN. Oh, the tubes ought to be built by the Gov-

ernment itself.

Mr. GOULDEN. I agree with that. And they can be built in New York and Mr. MADDEN.

Chicago and like cities, to cover every phase of the mail movement for not to exceed, I think, \$10,000,000.

Mr. GOULDEN. May I ask the gentleman from Illinois whether his committee has given any consideration to that?

Mr. MADDEN. We have. There is a commission appointed through the activities of the Post Office Committee, and I believe that commission is about ready to report, and we will then be able to have definite and scientific information upon which to base some future action.

Mr. GOULDEN. Has the gentleman at his command now

the number of miles over which these tubes are being operated

in the entire country?

Mr. MADDEN. We have only 9 miles in Chicago. I forget the mileage in New York, and a small number in Boston. Mr. GOULDEN. There is not much more mileage in New

York than in Chicago?

Mr. MADDEN. No; but we ought to have a great deal more mileage and it ought to be constructed along scientific lines, or we ought to do away with the mileage that we already have.

Mr. Chairman, last year the House passed, on the recommendation of the Post Office Committee, a provision authorizing the payment of \$2,000 to the relatives or legal representatives of any railway mail clerk who might be killed in the performance of his duty, and it also provided for the payment of a full year's salary in case of disability as the result of accident to these men, and for an additional year at half pay. It provided also for the protection of the supervisory force in the Railway Mail Service. This, I think, was a very salutary meas-It was a move in the right direction, for the men in the Railway Mail Service are performing a very hazardous em-

I come now, Mr. Chairman, to the question involved in section 6 of the bill which is now before the House. It provides that assistant postmasters shall be taken from under the protection of the classified service. I think this is a backward movement. The 2,400 men acting as assistant postmasters throughout the United States are occupying these places as the result of examination as to their efficiency and experience. I think it quite safe to say that more than 95 per cent of these men entered the service at the lowest grade, that because of their long service and activity they have accumulated knowledge and experi-ence to especially fit them for the places which they now occupy. The United States Government is a great business institution. There ought not to be any politics in its management. The men in charge of the various activities of the Government should be in charge of those activities because of their knowledge and experience and fitness.

The men who are now acting as assistant postmasters are so acting because of their knowledge and experience and fitness, It would be a great calamity, it seems to me, to enact this provision of the law recommended by the Committee on the Post Office and Post Roads. I think it quite safe to say that in the great post office in the city of Chicago, with 6,750 men, most of the men holding places of high responsibility and trust are men who were appointed to the service during Mr. Cleveland's administration as President. Nobody ever questions their right to their political belief. No one ever has, so far as I know. think it is safe to say also that no man ever inquired into the politics of a man applying for a position in that great office; that all men come into the service as a result of examination under the civil-service rules, and all men have been promoted without qualification from place to place and from grade to grade, without any question being raised as to their politics.

Mr. GOULDEN. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Certainly. Mr. GOULDEN. The gentleman has made the statement that these twenty-four hundred men were all put there on account of their qualifications, after an examination under the civil-

service rules? Is that correct?

Mr. MADDEN. That is true.

Mr. GOULDEN. I have heard it stated on this side of the House, I think, that they were not subject to any civil-service examination whatever, and that it was simply a matter of favoritism.

Mr. MADDEN. Oh, no. I think the gentleman is not as well informed as he usually is or he would not make that statement

Mr. GOULDEN. I have only quoted what I have heard stated and I am asking the gentleman for information, as he is usually

well informed.

Mr. MADDEN. I will give it to the best of my ability, and I am not here to denounce the attitude of any man here; I am not here to change any man's belief; I am not making the talk I am making now based on politics. I think every man has a right to his political belief, but if we have a civil-service law we ought to live up to it strictly; and I am here to say that every man qualified to take the examination, and does take it successfully, if he be a citizen of the United States, a man of good moral character, with the ability that is required to perform the duties to which he aspires, regardless of what his politics may be or what his nationality or color or creed, ought to be permitted to serve, and he ought to be protected in his right to serve the Government so long as he behaves himself

and does his duty properly. [Applause.]

Mr. GOULDEN. Will the gentleman pardon another question? I am going to say that, although on this side of the House, I am in sympathy with the gentleman on this proposi-

tion.

Mr. MADDEN. I think the gentleman has always been in

sympathy; we harmonize very well.

Mr. GOULDEN. On some things. I would like to ask the gentleman, however, when these assistant postmasters, and what number of them, were placed under the direction of the

Mr. MADDEN. They were placed under the civil service in

1910 some time; I am not sure about the date.
Mr. GOULDEN. By whose authority?
Mr. MADDEN. By order of the President of the United States.

Mr. GOULDEN. One more question, if the gentleman will pardon me. Does the gentleman know-and I am only asking for information, for I have heard the charge made that 95 per cent were Republicans-does the gentleman have any knowledge on the subject as to what proportion are members of his

own party?

Mr. MADDEN. I really could not say. I want to be frank in replying to the gentleman, but I do not know the politics of any man in the service. I have never asked a man who came to me in my official capacity for any assistance what his politics was. I do not care what a man's politics is. If he is a good citizen, if he is capable of performing the duties he is charged with performing, if he passes the examination for entrance into the public service and is qualified to perform the duties of the office, I believe he ought to be protected in his right to the office.

Mr. GOULDEN. I am entirely in accord with my distinguished friend from Illinois. If, however, there were two men applying to me of equal qualifications, and one of them was a Democrat and the other a Republican, I fear the Democrat

would get the preference.

Mr. MADDEN. I think that would be natural enough and yet would not be discrimination. I can subscribe to that doctrine myself. Now, this bill also provides that all letter carriers, all rural carriers, all clerks, and special delivery messengers are to be provided with an indemnity against accident or death. If any of these classes of men or boys should be killed while in the performance of their duties, the Postmaster General would be required to pay to their legal representatives \$2,000. If they are injured so as to be disabled from performing their duties, the Postmaster General would be required to pay the salary for one year at full pay and for another year at half pay. only class of men not covered by this provision is the supervisory officers of the Post Office Department, and I could never understand why they should not be considered sufficiently worthy to be placed under the protection of this provision. They are the only class of men in the service who are not classified, the only men in the service who have not had their compensation increased since 1884, the only men in the service who have not been accorded the privileges granted in this indemnity clause of

the bill. This bill provides for an increase in the compensation of the rural carriers from \$1,100 to \$1,150 per annum for the standard route of 24 miles, and for an increase of \$22.50 a mile over the standard route of 24 miles, not to exceed \$25 in all, which would make it possible for a man receiving the maximum pay to get \$1,175, whereas they now get but \$1,100. The bill also provides that rural carriers on less than the standard route of 24 miles shall receive an increase of 10 per cent to their present compensation. That will add to the expense of the Rural Route Service of the United States about \$3,000,000 per annum, and will do what the committee believes to be but simple justice to

a very worthy, hard-worked force of men.
Mr. FRANCIS. Mr. Chairman, will the gentleman indulge a

question?

Mr. MADDEN. Certainly.

Mr. FRANCIS. Does not the gentleman think that the character of the roads over which these rural mails are carried has more to do with what should be paid to the rural carrier than anything else? There is a great difference between a man driving over a pike or pavement and a man driving over a mud road. There is no comparison between the two.

Mr. MADDEN. If we went into that field, we would have to

send an inspector out with each carrier to see if the road over which he carried the mail was the kind of a road that justified a larger compensation than over some other road, and we can

mot very well do it.

Mr. FRANCIS. As a matter of fact, are not the roads already classified now, and does not the department have to know that a road is such and such before a rural route can be

established?

Mr. MADDEN. Of course they must have a report, but not with a view to finding out the character of the road particularly. The report is required principally with a view to finding out the population that lives there or would be served on the route.

Mr. FRANCIS. Is not the one as easy of ascertainment as

the other? Might not the road be a turnpike?

Mr. MADDEN. It might be a good road to-day, and six months later it might be a bad one.

Mr. FRANCIS. They could inspect it and see if it is bad.
Mr. MADDEN. When my good friend SHACKLEFORD has his
bill passed, providing for Federal cooperation in road building, I do not think the gentleman will have a right to complain that

the roads are not all boulevards.

Now, Mr. Chairman, there is one provision in this bill, known as section 14, which I do not approve of. It is the provision authorizing the Postmaster General to assess the employees of the Post Office Department for the purpose of creating an in-surance fund out of which may be paid the losses created by defalcation of any member of the working force of the department. This, it seems to me, would be a very vicious thing to do. It is vicious. It is unjust to the men. It is not justified by the conditions that prevail. The losses are already guarded against now by insurance, and what I think should happen is that every man who is required to give a bond for the faithful performance of his duty should have the premium of that bond paid for out of the Treasury of the United States, so that the man himself might be able to draw all the salary that he is supposed to be entitled to draw. But to assess one man for a possible loss created by the action of another man is not justified, and this section of the bill ought not to receive the favorable consideration of the House.

There is another provision in the bill, known as section 16, which I think is very wise, and that is the provision which authorizes the Postmaster General to pay subcontractors where the contractor fails to make his payments. Up to the present time a man might be able to take a contract from the Government of the United States to move the mails by screen wagon or other service and employ other people to do that work and fail to make his payments to the men he employed, and still there might be no remedy for those men. This provision simply applies the remedy which will enable men who perform faithful service for a dishonest contractor to get their pay.

Mr. McKENZIE. Mr. Chairman, will my colleague yield?

Mr. McKenzie. Mr. Charman, whi his contaged Mr. McKenzie. These amounts are to be paid out of any money that may be due to the principal contractor?

Mr. MADDEN. Oh, yes; not to exceed the amount of the contract

Mr. BUCHANAN of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes; I yield. Mr. BUCHANAN of Illinois. Does the gentleman think we ought to follow that principle a little further and have the

Government insure workingmen who are injured in the service of the subcontractor, and who secure a judgment against a subcontractor and sometimes are not able to collect it, owing to the fact that the subcontractor has not sufficient property to justify it?

Mr. MADDEN. Well, I think, to the extent of the amount due, the Government might well become responsible for the payment of the same, either in the case of injury or in a case

where a man has been unable to collect from the contractor.

Mr. BUCHANAN of Illinois. I mean in cases where judg-

ments are secured and the contractors are unable to pay the judgments on account of not having property.

Mr. MADDEN. I would not agree that the Government should assume the responsibility beyond the amount that it had contracted to pay to the contractor.

Mr. BUCHANAN of Illinois. The Government should require the subcontractor to give a bond and hold the bondsmen lighter.

the subcontractor to give a bond and hold the bondsmen liable, so far as that is concerned—and it would not come out of the Treasury of the Government-just as a builder would have a contractor give a bond for the construction of his building or other obligation that it might be necessary to meet.

Mr. MADDEN. I would not want the Government to be charged with the responsibility of meeting a greater obligation than is provided in the contract, and I would not want the Government to be charged with the obligation of paying something that it did not owe the contractor. I would not want the Government to be charged with the responsibility of paying a judgment rendered against the contractor if the amount due the contractor was less than the amount of the judgment. It would not be fair.

Mr. BUCHANAN of Illinois. The gentleman said he would not want the subcontractor to be at a loss on account of the

failure of the principal contractor.

Mr. MADDEN. Only to the extent of the amount due. Mr. BUCHANAN of Illinois. That is what I speak of.

Mr. MADDEN. The same thing would apply in either case, but it should only cover the amount due.

Mr. WILLIS. Mr. Chairman, will the gentleman yield for a

Mr. MADDEN. Surely.
Mr. WILLIS. I wish to make an inquiry about section 12.
The gentleman has a copy of the bill before him?

Mr. MADDEN. Yes. Mr. WILLIS. It is the one that relates to the control over the maintenance and equipment of buildings. As I understand, under the present law the construction, maintenance, and equip-

under the present law the construction, maintenance, and equipment of public buildings is entirely under the control of the Treasury Department.

Mr. MADDEN. Yes.

Mr. WILLIS. And it is proposed here that where buildings are to be jointly used by the Treasury Department and by the Post Office Department or by the Post Office Department and any other department of the Government there shall be joint invisibilities between the Postmaster General and the Secretary jurisdiction between the Postmaster General and the Secretary of the Treasury. Does not the gentleman think that would lead to confusion in the transaction of the public business?

Mr. MADDEN. My opinion is that where a public building is used altogether for post-office purposes the selection of the site, the erection of the building, and the equipment and main-tenance of that building should be entirely within the jurisdic-

tion of the Postmaster General.

Mr. WILLIS. Does the gentleman say that the erection of the building should be under the supervision of the Postmaster General?

Mr. MADDEN. Yes.
Mr. WILLIS. Does the gentleman think the office of the Supervising Architect should be transferred bodily to the Post Office Department?

Mr. MADDEN. I think that some assistant of the Supervising Architect should be designated to help out in the matter of the construction of strictly post-office buildings, and that the Postmaster General should be given entire jurisdiction, with the assistance, of course, of the Supervising Architect.

Mr. WILLIS. The gentleman has not quite covered the other

Mr. MADDEN. I know. I am going to cover it.
Mr. WILLIS. All right.
Mr. MADDEN. I think perhaps where the building is used for court purposes and for customs purposes and all other governmental activities, and where the post office is only a very small part of the activities for which the building is erected, it would be unwise to make joint jurisdiction. And yet I think it would be for the more efficient management of the Postal Service if the Postmaster General were permitted to make

such changes in that part of the building occupied for postal purposes as would meet the needs of the case. For example, if the Postmaster General should conclude to-day, after careful investigation, that certain changes were necessary in order to economize in the transaction of the business of his office, he would not be able to make those changes without going to the Secretary of the Treasury and getting his permission, and I do not think he ought to be required to do that. If he wants a chair or a desk now, he must go to the Secretary of the Treasury to get it. I think really that the Post Office ought to stand by itself. To-day it does not. To-day we have a false notion of what the situation is.

The receipts of the Post Office Department may be stated to be \$300,000,000, and the expenses may be stated to be \$296,000,-000. That would show a surplus of \$4,000,000. But the fact is that the Post Office Department ought to be charged with interest on the cost of the sites and buildings, or charged rent, and let the figures show just exactly what it does cost to oper-

ate the Post Office Department.

Mr. WILLIS. I agree, in part, with the statement of the

gentleman.

Mr. MADDEN. You can not do that very well without placing these matters under the jurisdiction of the Postmaster General. Mr. WILLIS. Another thing to which I wish to call the at-

tention of the gentleman specifically is the language of the latter part of the section, which reads:

And all sites for Federal buildings to be used in part for post-office purposes shall be selected jointly by the Postmaster General and the Secretary of the Treasury, who shall be jointly charged with the direction and control of the equipping and maintenance of such buildings.

Now, when it comes to the appointment of a custodian and to the furnishing of the necessary supplies, does not the gentleman think it is a poor business method for two Cabinet officers to have jurisdiction over that?

Mr. MADDEN. I think they ought not to have two men in

charge of the maintenance of the building.

Mr. WILLIS. That is what it provides.

Mr. MADDEN. I know that, but I do think this, that the Postmaster General ought to have supervision, with the Secretary of the Treasury, in the selection of the sites. Why? Because the location of the site may have a lot to do with the expense of operating the post office. Why? Under the postal laws every railroad company hauling the mails is required to deliver them to the post office if it is within a certain distance of their terminal; whereas if the Government selects a post office a long distance away from the terminal of the railroad the Government is required to hire wagons to haul the mails. Now, for example, in the city of Chicago we are having some trouble about the selection of a post-office site. Some people want the site located where about 60 per cent of the mail comes, close by the terminal station, so that there will be no charge for wagon service. We are paying \$184,000 a year for screen-wagon service there, and we will probably be obliged to pay more in the near future. If we could save 60 per cent of that \$184,000 by locating the site of the post office close to the terminals of these railroads, we would be able to capitalize that and pay more money for the site and yet save money to the Government.

Mr. WILLIS. As a matter of fact, as the thing works out in practice now, do not the Treasury Department officials always confer with the Post Office Department when they are selecting

a site for post-office buildings?

Mr. MADDEN. They always confer with them, but they rarely accept their advice.

Mr. WILLIS. If the gentleman knows that to be a fact I

will accept it.

Mr. MADDEN. That is the fact out my way.

Mr. WILLIS. It is not the fact out my way. It seems to me the authority should be vested in one officer instead of being scattered. Now, will the gentleman yield for another question?

Mr. MADDEN. Certainly. Mr. WILLIS. Will be again state specifically just what change it makes in the pay of the rural carriers?

Mr. PAYNE. Before the gentleman gets off from that point, I want to ask him if it is not a fact that the postmaster is appointed, as a general thing, custodian of the building?

Mr. MADDEN. No; the collector of customs is the custodian

Mr. PAYNE. It is almost universally the fact that the post-

Mr. PAINE. It is almost universally the fact that the post-master is appointed custodian without pay.

Mr. MADDEN. I do not know what they do in small places.

Mr. WILLIS. The responsibility is with the Treasury De-partment, and if it is divided we do not know where it will be.

Mr. MADDEN. Now, in answer to the question by the gen-tleman from Ohlo as to the change in the salary of the rural

carrier, let me say that the pay of a carrier on a 24-mile

standard route is now \$1,100. This bill recommends the payment of \$1,150 for such a carrier and recommends an addition of \$22.50 per mile over 24 miles, not to exceed \$25 altogether. making it \$1,175 to any man carrying more than the standard 24-mile route, and for a man carrying less than the standard route of 24 miles it recommends an increase of 10 per cent in

Mr. WILLIS. That increase in pay is a just provision of the law. Now, will the gentleman state for the information of myself and others how the present law will be changed by section 7, relating to the compensation for injuries or death incurred

in the line of duty?

Mr. MADDEN. The law prior to this recommendation only covered railway mail clerks and railway supervisory officers. This will include the city carrier and clerk and the rural car-

rier and the special-delivery messenger.

Mr. WILLIS. If the gentleman will yield once more, I will not trespass further. The gentleman remembers that a good deal of controversy arose about the authority of the Postmaster General to use aeroplanes in delivering the mail. I notice on page 13, at the bottom of the page, a proviso, and I want to get the gentleman's interpretation of that, because he is thoroughly cognizant of the postal laws. It says:

Provided, That out of this appropriation the Postmaster General Is authorized to provide difficult or emergency mail service in Alaska, including the establishment and equipment of relay stations, in such manner as he may think advisable, without advertising therefor.

Does the gentleman think that is broad enough to give the Postmaster General authority to use aeroplanes?

Mr. MADDEN. No; it does not. We had a specific provision

for that, and it was defeated by the House.

Mr. WILLIS. I know that it was.
Mr. MADDEN. This was not intended to do that, and it was only intended for relay stations where there would be difficulty in getting a team to go beyond a certain point.

Mr. WILLIS. Then, what does this mean:

Out of this appropriation the Postmaster General is authorized to provide difficult or emergency mail service in Alaska.

If the Postmaster General thought it would be more convenient and economical to use aeroplanes in the transportation of mails from one mountain to another, would not he have the authority to do so under this provision?

Mr. MADDEN. I would not think that he had.

Mr. WILLIS. I thank the gentleman for his courtesy. Mr. MADDEN. Mr. Chairman, I think it is not only important that the assistant postmasters should be protected by the civil-service law, but that all men who enter the service should be encouraged to hope that they will be allowed to remain in the service as long as they behave themselves and perform their duties. The one thing which will make for the efficiency of the Postal Service is continued assurance that merit will prevail. A man enters the service in his early manhood. He does so with the firm determination to make it a life work. He learns what there is to be learned and applies himself diligently to the task assigned him; he works with a feeling that he is a member of the great army of men who are serving their country. He becomes an expert in the line in which he is engaged; a specialist—this is an age of specialists. It is through specialists that we get the best results. The Post office Department is highly specialized, for every man in it is required to learn and perform his part scientifically. Each man is always required to be at his best. We should encourage them to be faithful by giving them assurance of permanency of tenure. He should realize that nothing but failure to perform his duty will interfere with the permanency of his position. This is the best way to make the post office serve the people. It is a great arm of the Government. It reaches every home; every man, woman, and child is interested in its work. The men who carry the mails do so in rain or sunshine, in storms or fair weather; they are patriotic, deserving, conscientious, and worthy of the best consideration that can be given to them. By all means I say let merit guide in the management of this great arm of the Government service.

Mr. SAMUEL W. SMITH. Mr. Chairman, how much time

has the gentleman from Illinois consumed?

The CHAIRMAN (Mr. Oldfield). Forty-five minutes.

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 10 minutes

to the gentleman from Pennsylvania [Mr. Kelly].
Mr. KELLY of Pennsylvania. Mr. Chairman, I have had so many requests and communications from persons and associations in my district that I feel I should say a few words in regard to section 6 in this bill and the proposition to take the assistant postmasters from the civil-service list. I want to read a paragraph from resolutions adopted by the East Pittsburgh Branch, National Association of Post Office Clerks. It touches

one phase of the matter that seems most important to me. This branch resolved:

That the law enacted September 30, 1910, placing assistant post-masters under civil service is a wise and just law, inasmuch as it secures the most worthy men for that position, and also affords the post-office clerks their only chance for advancement under the civil-service employment.

I also wish to print resolutions received from the organization of carriers of the same office in East Pittsburgh, calling attention to the same proposition. These are samples of the resolutions I have received from many sources.

I want to answer the question of the gentleman from New York [Mr. PAYNE], propounded a moment or two ago to the gentleman from Illinois [Mr. MADDEN], regarding the situation at present, and to do so from an official statement. I think it answers clearly the question as to whether or not those at present employed as assistant postmasters have been covered into the civil service through competitive examination. comes from an official source and states:

comes from an official source and states:

The order by which these positions of assistant postmaster were classified was different from all previous orders of this character in that it provided before any incumbent then in office, who had not passed a civil-service examination, should become classified he must prove to the satisfaction of the Post Office Department that he was capable of performing the duties of the office in an efficient and satisfactory manner.

This was a test never before applied to a class of employees covered into the classified service by an Executive order. The result has been that only those who could and did successfully meet the test have been retained and classified.

All the positions in first and second class post offices are now classified except that of postmaster.

The present incumbents did not all reach their present position without examination and years of practical post-office service; many of them have been promoted from the initial and intervening grades of clerkship and supervisory positions and are fully conversant with eduties of every position in the office. Those who are classified have long since ceased to be active in politics, and are complying strictly with the departmental mandate against political activity or offensive partisanship. Their time is exclusively devoted to post-office service, and no part of it is given to political management or committee work.

So that of the 2,400 assistant postmasters almost all of them

So that of the 2,400 assistant postmasters almost all of them have been placed in the classified service as the result of a test which demonstrated their ability and efficiency.

Mr. GOULDEN. Mr. Chairman, will the gentleman yield? Mr. KELLY of Pennsylvania. Certainly.

Mr. GOULDEN. Can the gentleman tell the committee how many of the old assistant postmasters then in the service of the Government were retained under this order of President

Mr. KELLY of Pennsylvania. All but about 100 of the 2,400 assistant postmasters now have a competitive status. That is the answer given here in an official bulletin of the Civil Service

Mr. DECKER. Mr. Chairman, will the gentleman yield?

Mr. KELLY of Pennsylvania. Certainly.
Mr. DECKER. I believe the gentleman read that before these assistant postmasters could be covered into the classified service they had to convince the Postmaster General—and I believe he was a Republican at the time—that they were qualified. Would the gentleman mind stating to us what method was used to convince the aforesaid Postmaster General that these men were qualified?

Mr. KELLY of Pennsylvania. I could not answer exactly as to the method, except that ability and efficiency must be clearly

shown.

Mr. DECKER. The gentleman would not state that they took an examination?

Mr. KELLY of Pennsylvania. They had an examination to prove efficiency and ability, and it was required that they satisfy the examiners as to their possession of the necessary qualifica-

Mr. DECKER. Does the gentleman know that to be the fact-that they took an examination?

Mr. KELLY of Pennsylvania. I have just read from the National Civil Service Reform League statement, headed by such men as Charles W. Eliot and Judge George Gray.

Mr. DECKER. That did not say that they took an examina-

Mr. KELLY of Pennsylvania. It states that they hold their

positions under competitive status; yes

Mr. DECKER. Are not the facts of the case these, that these men were covered into the civil service on the recommendation of their postmaster? I know that was the case in the largest post office in my district. The man there never did take an examination.

Mr. KELLY of Pennsylvania. I would say to the gentleman that the order which put these assistant postmasters under the classified service was different from any other order ever issued, and put a different phase upon it, so far as ability and efficiency were concerned.

Mr. DECKER. Let me ask why it should have been different. Why did not they make them take an examination just the same as the other fellows? Why should they make a different rule in respect to these assistant postmasters who had received their appointments on the ground that they were good Republicans? Why did they not require them to go into permanent life tenure under the same rule as the rural carrier and the mail distributor and every other employee of the Post Office Department?

Mr. KELLY of Pennsylvania. Mr. Chairman, in saying that it was different I mean that it went farther. It went farther in the direction of the merit system and the civil-service idea than any other Executive order ever issued. It went farther than any other order in that they were compelled to give full satisfaction as to ability and efficiency before they could be classified, and at the present time twenty-three hundred out of twenty-four hundred are on the competitive basis as the result of that requirement.

Mr. DECKER. Will the gentleman yield further? Mr. KELLY of Pennsylvania. Yes.

Mr. DECKER. I would like to ask this question: When these assistant postmasters were covered into the civil service, and thereby given life positions, does the gentleman know of any reason why the gates should not have been thrown open and an opportunity given to other efficient and qualified men to compete for these positions, following the same rule that applies to other men who have obtained their positions under the civil service?

Mr. KELLY of Pennsylvania. There was exactly that proposition involved, and the requirement of the order implied that

very procedure.

Mr. DECKER. I would like to have the gentleman's au-

thority for stating that.

Mr. KELLY of Pennsylvania. The experience of those who have been in the service for 10 or 15 years and have performed their duties satisfactorily, of course, overbalances anything else in regard to considerations of ability.

Mr. DECKER. Does the gentleman mean to state as a fact, and if so, I would like to have his authority, that the gates were thrown open and other men were allowed to compete with these

assistant postmasters?

Mr. KELLY of Pennsylvania. I contend that on the ground that out of the number of assistant postmasters at the present time, 2,300 of them are now on the basis of having met all qualifications on a competitive basis.

Mr. DECKER. In other words, the gentleman means to say that 2,300 out of 2,400 men who received positions as the result of political preferment have been covered into life jobs:

Mr. KELLY of Pennsylvania. No; I mean nothing of the I mean that at the present time, counting those who have been appointed since, counting vacancies filled and those retired because they were inefficient and their places taken by efficient assistants, 2,000 of the 2,400 now are on that basis, and I desire to put that statement from the official bulletin in the Record. I want to make this point—
Mr. KAHN. Will the gentleman yield for a question?

Mr. KELLY of Pennsylvania. For a question only, as I have but 10 minutes.

Mr. KAHN. Is it not a fact that when the civil-service law was originally extended there was a Democratic President in office, Mr. Cleveland; and is it not a fact that he put the ægis of the civil service over Democratic officeholders of his administration, and they were not removed and could not be removed under the succeeding Republican administration; and was not that the first instance where men were covered into the civil service in large numbers by an Executive order?

Mr. KELLY of Pennsylvania. That is absolutely true, and it was without regard to any test of efficiency or ability or any-

thing else.

Mr. SHERLEY. Will the gentleman yield for a question?
Mr. KELLY of Pennsylvania. For a question only.
Mr. SHERLEY. Is that to show the civil service is simply for the purpose of protecting and saving political employees of an outgoing administration?

Mr. KELLY of Pennsylvania. No; it is for the purpose of basing postal results on business efficiency and merit, and that is what is being demanded in this country more and more every I want to advance a point in reference to this general question, and that is that these assistant postmasterships as well as other administrative offices of that kind are created for one purpose only, and that is for the public service and benefit of the people of this Nation.

The CHAIRMAN. The time of the gentleman from Penn-

sylvania has expired.

Mr. KELLY of Pennsylvania. I would like to ask unanimous consent to extend my remarks, including the resolutions

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. there objection? [After a pause.] The Chair hears none.

The resolutions are as follows:

Resolutions of the United National Association of Post-Office Clerks, Branch 1263, East Pittsburgh, Pa.

Branch 1263, East Pittsburgh, Pa.

At a meeting held January 7, 1914, by East Pittsburgh, Pa., Branch 1263, U. N. A. P. O. C., the following resolutions were adopted:
Whereas the law enacted and passed September 30, 1910, making civil service rather than the service rendered to a political party the standard of appointment and promotion; and
Whereas an attempt has been made in the House of Representatives to annul the civil-service status of assistant postmasters by an amendment to the appropriation bill December 17, 1913; it is hereby

Resolved, By this branch assembled, that the law enacted September 30, 1910, placing assistant postmasters under civil service is a wise and just law, inasmuch as it secures the most worthy men for that position and also affords the post-office clerks their only chance for advancement under the civil-service employment; and be it further

Resolved, That we object to the amendment to the Post Office appropriation bill of December 17, 1913; and be it further

Resolved, That a copy of these resolutions be sent to the Hon.

Boise Penrose, Hon. George T. Oliver, Hon. M. Clyde Kelly, our Representatives at Washington, D. C., imploring and beseeching them to do all in their power to defeat the bill in its present amended form; that a copy be sent to the Post Office Clerk, the official organ of the U. N. A. P. O. C.; and that a copy be placed on the minutes of our branch.

FRANK H. ZISCHKAU, RUSSELL L. CALE, HARRY R. CAMPPELL, Committee. HENRY WAGNER, President. F. J. DITTMER, Secretary.

Resolutions of Branch 1473, National Association of Letter Carriers, East Pittsburgh, Pa.

Whereas a second attempt has been made in the House of Representa-tives to annul the civil-service status of assistant postmasters by an amendment added to the Post Office appropriation bill, December 17, 1913: Therefore be it

Resolved, That we, the members of Branch No. 1473, National Association of Letters Carriers, vigorously protest against any amendment or changes that would in any way weaken their standing as civil-service employees; and be it further Resolved, That merit and ability shall be the standard of appointment and promotion rather than service rendered to a political party; and it is further Resolved, That a copy of these resolutions be sent to our Congressman, Scantor, and the secretary of the National Association of Assistant Postmasters.

Postmasters.

R. B. FIGARD, W. A. WALFORD, W. C. SHIREY, Committee.

Statement of National Civil Service Reform League.

Statement of National Civil Service Reform League.

The assistant postmasters were classified over three years ago by President Taft in an Executive order, in which he required that every assistant postmaster should satisfy the department as to his efficiency and qualifications before he be given a competitive classified status. All but about 100 of the 2,400 assistant postmasters in these offices now have such a status. Many of them have been appointed since the issue of this order, either through promotion, transfer, or original examination. The post offices, therefore, are now supplied with a thoroughly trained expert force from the assistant postmasters on down.

This organization is vitally important to the efficient management of the postal business, particularly in view of the development of the postal savings banks and the parcel post system. The postmasters in these offices are not themselves postal experts—at least at the time of appointment—and have to depend on the permanent expert staff under them for the management of the office. If the assistant postmasters are removed from the classified service, they will become political job holders, changing with every change in the postmastership. The appointments of the assistants will be governed to a large degree by political considerations, and it is a notorious fact that postmasters are forced under such a system to accept inferior persons as their assistants for political or less worthy reasons, and that they are, in fact, not free to make their own selection.

With assistant postmasters chosen on the merit basis alone, on the other hand, the tone and efficiency of the entire Postal Service have been elevated. The opportunity to advance to an assistant postmastership has improved the character of the applicants for the minor positions and served as an incentive to all employees to prove by efficient service their fitness for advancement. So beneficial has been the classification of the assistant postmasters that Postmaster General Burleson is strongly

Mr. KELLY of Pennsylvania. I deny the proposition that these offices are instituted for the purpose of perpetuating any party in power. If, then, public offices exist only for the service of the people, it follows that they must be administered not only with honesty but with trained knowledge and ability. Especially is this true in this time, when the functions of Government are growing in extent and complexity.

The just and impartial administration of the civil service is the only way to assure trained knowledge and ability, as it is the only way to destroy the spoils system that degrades and oppresses the people.

This rider means a backward step, it means new poison to our political life, more office-seeking mania, and more power to the spoils-hungry politician. It means less efficiency in the public service, less respect for Government, and less independence for every legislator in this body.

It has no place in this appropriation bill, and the attempt to incorporate it in this legislation is unwarranted from every It is a covert and unfair blow at the civil-service system, which has proven its worth and which is approved by a vast majority of the American people. So fully approved has it been that there is a widespread demand that the entire Postal Service be placed under civil-service requirements so that every postal official, including postmasters, shall be taken out of politics. But, in spite of that public demand, we are forced to consider this rider with its directly opposite tendencies.

I took occasion to protest against such assaults on the merit system in other bills passed during this Congress, and I am convinced that these riders are not simply isolated evidences of intention, but that they are a part of a policy. I warn you again that the people will stand for no such policy, which can have but one purpose and that the building of an official autocracy strong enough to maintain itself in defiance of public opinion.

Every sign of the times points in the opposite direction. The people propose to run this Government. If they can not do it through one party, they will do it through another. They propose to run it themselves. I hope that every Member who believes in fundamental Democracy, who opposes the use of public funds and public offices to defraud the people, and who values his dignity and independence as a Representative will vote against this rider.

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 15 minutes to the gentleman from Missouri [Mr. Borland].

Mr. BORLAND. Mr. Chairman, I am very strongly opposed to this provision of the Post Office appropriation bill removing assistant postmasters from the protection of the civil service. It does not belong on an appropriation bill. It is not a mere repeal of an Executive order which covered these men into the civil service, but it is a substantive piece of legislation which excepts them for all time from the operation of the civilservice law. It does not even leave it optional with the President to place them under the civil service.

It could not be put upon a Post Office appropriation bill without some sort of a rule overriding the established practices of this House, a method that we Democrats have denounced repeatedly when we were in the minority as an arbitrary exercise of gag rule. I am here to oppose the putting of that legislation upon an appropriation bill in that form; but, in the second place, I oppose the legislation itself. I stand with President Wilson and the Postmaster General on this question. I think it is a return, a bold and indefensible return, to the spoils system. [Applause on the Republican side.] What the people of the United States are demanding to-day is an extension of the United States are demanding to-day is an extension of the doctrine of merit and efficiency in the public service and not a curtailment of that doctrine. I listened for some time to the forceful, ruggedly honest chairman of the Post Office Committee, and a great many things that he said would meet the agreement of Democrats. There is no doubt that when an administration comes into power it is entitled to have its own advisers in the Cabinet; it is entitled to have its own diplomatic representatives abroad, to put men in the service who represent and carry out the policies of the Government, the policy of the party in power as distinct from its mere administrative work, representing and reflecting the views of the administration representing and reflecting the views of the administration. There is no parallel between that and the duties of assistant postmasters, nor can it be said there is any parallel with the legislative body of the Nation, the House and the Senate, which negistative body of the Nation, the House and the Senate, which must reflect the changing political views of the people, and reflect it as correctly and as up to date as is possible in a free government to reflect it. Those men who represent the people, who come directly from the people, who vote taxes, charges, and impositions on the people, make the laws for the people and expend the people's money, must reflect directly the political sentiment of the Nation. But the Post Office Department is a great business institution. It is one of the largest, one of the most complicated, and at the same time one of the most suc-cessful business institutions ever established and carried on in the civilized world.

There is not a business institution of its magnitude anywhere, extending its ramifications over the territory of a great Nation of 3,000 miles in extent, reaching from the great, busy, throbbing hearts of industry of a million or three million people in a metropolis down to the humblest farm home away back among the hills, or at the top of Bitter Creek, and putting the mail into the hand of the humblest farmer in the land, the farthest removed from the centers of trade and of commerce.

The ramifications of that service have become one of the great business problems of this Nation. To it applies distinctively and with a peculiar force the necessity of a merit system and a

permanent tenure of office.

Why, these assistant postmasters occur only in cities of a sufficient size to have an important branch of the Postal Service. It would be bad enough to leave those men subject to political appointment and political change if the service had not grown to the extent that it has grown; but in late years we have imposed new activities upon the Postal Department, with the consent and at the insistent demand of the American people-activities of the most complicated and technical business charac-We have imposed upon them the duties of the postal savings bank, and now we are barely beyond the threshold of the great activities of the parcel post, an activity which alone has engaged, as I understand, in this country, when it was handled by the express companies, the skill and the experience and technical ability of many men each drawing more than \$10,000 salary. So that if the great express companies have found the need to employ men of great experience and capacity, so much more will the great Post Office Department find the same need.

Mr. BARNHART. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Missouri yield? Mr. BORLAND. I have only a brief time, but I will yield

to a question from the gentleman.

Mr. BARNHART. Does the gentleman from Missouri know of any business institution in this world that provides in its organization that the manager thereof shall have nothing whatever to say about his help; that he shall have no voice in select-

Mr. BORLAND. Well, I see the force of that question. is an argument against the whole civil service. Undoubtedly that question is asked to bring out the idea that the postmasters who are appointed will have the selection of those assistant postmasters. I expect, however, that there are very few men of so limited a political experience in this House as to really believe that that would be the case. The postmasters will not have the selection of these men.

Mr. RUCKER. Who will?

Mr. BORLAND. The postmasters did not have it under the régime of the Republicans that we have so roundly denounced. It has been my experience and observation that not only was the postmaster named by some political officer in authority for political purposes and named without any special regard to his experience in that post-office business, but that same authority named also the assistant postmaster, and without consultation with the postmaster. And not only that, but it has frequently happened, I will say to my friend from Indiana [Mr. BARN-HART], that the assistant postmaster was named from the faction of the party that did not happen to land the postmaster. I have known of cases-and I have no doubt my friend has, too-where they not only did not work in harmony, but where they did not trust each other personally, and I have always regarded it as a political blunder, if no worse, to put those men under political appointment.

Mr. BARNHART and Mr. BOWDLE rose.

The CHAIRMAN. To whom does the gentleman yield?
Mr. BORLAND. I have not much time, but I will yield
once more to the gentleman from Indiana [Mr. BARNHABT].

Mr. BARNHART. Does the gentleman know of any business institution that will tolerate clashes constantly between its heads of departments, as is indicated here between a postmaster and a deputy postmaster? Would that be tolerated by any board of directors in any business institution?

Mr. BORLAND. Unquestionably not.

Mr. BOWDLE. Now will the gentleman yield?
Mr. BORLAND. Yes; I will yield to the gentleman.
Mr. BOWDLE. Is it not true that the difficulty about the gentleman's question is just this: That he is trying to assimilate a privately owned enterprise to a great national institution, and that, as a matter of fact, the civil-service law was adopted in order to prevent an enormous political evil arising from the struggle of two contending parties for those offices, and that. therefore, there is no reasonable comparison between the two?

Mr. BORLAND. Yes. And the logic of the gentleman's

question would go to the full extent of naming 700 new men in the Kansas City post office every time the political com-plexion of the Government changes. I am going to meet the plexion of the Government changes. I am going to meet the gentleman more than half way. I think the time is rapidly approaching when the common sense and hard business judgment of the American people will demand that the postmasters themselves be placed under the civil service [applause], and that all men who are charged with any administrative and technical

duties on the part of the Government shall be placed in their positions on the basis of merit and permanency in office.

Mr. RUCKER. Will the gentleman yield? Mr. BORLAND. Yes.

Mr. RUCKER. Do you think the examinations held for assistant postmasters or for postmasters secure the best material for

Mr. BORLAND. No; I do not think they do.

Mr. RUCKER. Do you not believe the man charged with the responsibility can come as near selecting a man who is qualified, who will give satisfaction to all the patrons of the office, as a mere civil-service examination conducted on lines that have no bearing whatever upon the duties of the office?

Mr. BORLAND. The gentleman knows that if the ideal situation existed which he presents, there would be no necessity for any civil-service regulations. The civil service exists for the purpose of meeting a part of the deficiencies of human nature. The gentleman knows that the ideal situation presented by his question never exists, never did exist, and never can exist.

it did exist, there would be no necessity for the civil service.

Mr. RUCKER. It exists in every town in this country to-day.

The man who could not select that kind of an assistant ought

not to be in a position to name him.

Mr. COOPER. Will the gentleman yield?

Mr. BORLAND. Yes. Mr. COOPER. Is it not true that under the policy or practice suggested by the question of the gentleman from Missouri [Mr. Rucker] assistant postmasters were appointed in this The Member of Congress wanted it understood that if John Smith was appointed postmaster it was done upon the express condition that John Brown should be the assistant postmaster, and that in many cases the postmaster had to agree to that before he could get the appointment, and in that way the Congressman fixed up a part of his own machine.

Mr. RUCKER. That is exactly what I would do in every case, and I have no apology for it.

Mr. BORLAND. It would be bad enough under the old conditions; but under the altered conditions, since the Post Office Department has become distinctly a business institution, there is no justification whatever for appointing these men for political purposes. Now, we have a condition of affairs where the postmaster himself is subject to political appointment. Positions ranging all the way from \$180 a year to \$8,000 a year are given to men who do not present and are not asked to present any evidence of their experience or ability in the post-office business.

Mr. MOON. Is not the gentleman mistaken about that?

Mr. BORLAND. No; I think not.

Mr. MOON. You say that from \$180 up they are appointed and confirmed by the Senate?

Mr. BORLAND. No; I did not say that they were appointed

or confirmed by the Senate.

Mr. MOON. What did you say?

Mr. BORLAND. I said those places were given to men who did not present and were not asked to present any evidence of previous experience in the post office.

Mr. MOON. They are all subject to examination, and above \$180 they are subject to a civil-service examination.

\$180 they are subject to examination by the inspector.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. Can the gentleman from Michigan let me have five minutes more

Mr. SAMUEL W. SMITH. Yes. The CHAIRMAN. The gentler The gentleman from Missouri is recog-

nized for five minutes.

Mr. BORLAND. It is true that there is an examination being prepared, which was to begin on the 10th of January of this year, so that nobody knows what the result of it is. By it fourth-class postmasters are to be examined, to what extent I do not know, and neither does the gentleman; but we will assume that as to fourth-class postmasters there is going to be some experience qualification. The gentleman from Tennessee can give no reason why these fourth-class postmasters should be under civil service and assistant postmasters not. But as to postmasters who have assistants-

Mr. RUCKER. First and second class.
Mr. BORLAND. As to first and second class postmasters it still remains true that experience in the postal business is not one of the qualifications expected of them.

Mr. RUCKER rose.

Mr. BORLAND. I am sorry I can not yield any more. I have had to ask for more time as it is. Now, if these men go into these great offices, some of them paying \$6,000 and \$8,000, which is more than the salaries of the First, Second, Third, and Fourth Assistant Postmasters General of the United States, if

they go into these offices without any previous training in this great, complicated business they will have to rely then upon their assistant postmasters, who are presumably at least experienced, whether they have any other qualifications or not. Presumably an assistant postmaster has the experience necessary to run that office to the satisfaction of that community. Is this experienced assistant to be thrown out, and are both places to be made political appointments? I object to any such idea. It is unjust to the great army of postal clerks and carriers, for it takes away their right to aspire to promotion to an assistant postmastership. I do not even believe those men are appointed in all cases for party service. I believe they are often appointed for service to some political officeholder who has the recommendation of their appointment.

Mr. RUCKER. The gentleman ought not to go that far.

Mr. BORLAND. I will go that far.

There is no more reason why the gentleman should desire to retain that right of recommendation than that he should appoint officers in the Army or chemists in the Agricultural Department.

Mr. RUCKER. The gentleman goes entirely too far. Mr. BORLAND. I say that they are appointed not neces sarily for party services, distinguished as such, nor because their views upon party questions are sound, and would appeal to the mass of the voters in their district if they were candidates for an elective office; but they are appointed because they have been politically useful to the man who recommends their appointment. Why, they may not have been serving the party. They may have been serving only a faction. They may have served only a political boss or leader. [Applause.] I object to either the postmaster or the assistant postmaster being made the official whip cracker over the heads of the men in the classified service, in the interest of either party, faction, or boss. [Applause.]

Mr. Chairman, I ask unanimous consent to extend my remarks by inserting in the RECORD a letter from the Postmaster General.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to extend his remarks by inserting in the Record a letter from the Postmaster General. Is there objection?

There was no objection. The letter is as follows:

DECEMBER 20, 1913.

Hon. John A. Moon,
Chairman Committee on the Post Office and Post Roads,
House of Representatives.

Chairman Committee on the Post Office and Post Roads,
House of Representatives.

My Dear Judge Moon: I am somewhat disturbed by a paragraph in this morning's paper to the effect that your committee has voted to put into the Post Office appropriation bill for the next iscal year a provision removing the position of assistant postmaster from the classified service. I think the enactment of such a provision would be subversive of the best interests of the Postal Service, and certainly it would militate against the effectiveness of the policy outlined in the last annual report of the department.

There are at this time 2,464 post offices of the first and second classes in which the positions of assistant postmaster are classified. All save about 100 of the persons occupying these positions are now within the classified service. In these 100 cases the benefits and rights of classification have been withheld from the incumbents, because they have failed to satisfy this department as to their capacity for efficient service.

In the interest of the most efficient and effective Postal Service it is vitally necessary that the positions of assistant postmaster be filled by persons specially qualified to discharge the duties thereof, and I feel that no person should hold the position of assistant postmaster whose capacity and efficiency has not been properly and thoroughly tested. Among the qualifications necessary for this position are practical knowledge of and experience in post-office work, coupled with administrative ability. The present administration has been rigidly enforcing the policy of filling these positions either by the promotion of competent employees already in the office or by the transfer of experienced employees from some other branch of the Postal Service. Only in rare instances are postmasters permitted to fill the position otherwise, and then only by selection from a certification of eligibles resulting from an open competitive civil-service examination.

In connection with this subject I wish to dir

"It is hoped that by thus maintaining a high standard of efficiency for postmasters and keeping paramount the interest of the Postal Service in making appointments that the way will be made clear for the eventual classification of all presidential postmasters." (Page 43.)

"The Post Office system is essentially a business institution. It touches every home, comes in contact with every commercial institution and with those engaged in every line of industrial enterprise throughout the country, and in the nature of things it is highly important that only the most efficient employees should be in its service. For this reason the merit system should be adhered to in the Post Office Department above all others in order to secure the very highest standard of efficiency in the conduct of its affairs." (Page 43.)

I have received no official advice as to the accuracy of the newspaper report referred to, and therefore my anxiety and deep interest in the Postal Service must be the excuse for this letter. I trust, however,

that in its wisdom your committee will not see fit to recommend the enactment of the legislation referred to.

Very sincerely,

A. S. BURLESON, A. S. Burleson, Postmaster General.

Mr. BORLAND. I yield back the remainder of my time. The CHAIRMAN. The gentleman yields back three minutes.

Mr. MOON. Mr. Chairman, I yield to the gentleman from Missouri [Mr. Rucker] two minutes.

Mr. RUCKER. Mr. Chairman, I want to say that my distinguished colleague [Mr. Borland] comes from Kansas City, where they have bosses. Out in the country, where I live, every man is a free man, we have no bosses. I have named a number of postmasters in my district, and I challenge my colleague to name one of them who is not as good a man as you or I am. [Applause.] I challenge him to name one of them who is not as loyal a party man as he or I. True, they are my friends or they would not have obtained my indorsement, but they are also the friends of the President in the White House, the friends of Democratic Senators, the friends of Democratic principles, for the supremacy of which they have battled for

Mr. BORLAND. Will the gentleman yield?
Mr. RUCKER. I will, although I have only two minutes.
Mr. BORLAND. Does the gentleman want to retain the right to name those postmasters?

Mr. RUCKER. Unquestionably I do.

Mr. BORLAND. You regard it as a valuable right, do you?
Mr. RUCKER. Yes; because I believe I can select a man
in every town in my district who will give better satisfaction
as a postmaster than any mere civil-service examiners can My colleague seems to think that no one is qualified select. to distribute mail and sell postage stamps unless he can name all the principal cities in South America and the rivers in Africa. [Laughter.] It is absurd. How did all these men, so eminently qualified and for whom my colleague pleads, get their experience? There are Democrats growing up in the country everywhere who are entitled under a Democratic administration to recognition; and if that means going back to the spoils system, then I am a spoilsman and I have no apology to make for it. [Applause.]

Mr. MOON. Mr. Chairman, I yield to the gentleman from New York [Mr. GOULDEN].

Mr. GOULDEN. Mr. Chairman, the bill H. R. 11338, now under consideration, making appropriations for the Post Office Department for the fiscal year beginning July 1, 1914, is an admirable measure.

The increases provided for making advances in the carriers' and clerks' lists are more than in previous years, but not sufficient to do justice to a most deserving class of men. Seventyfive per cent of the \$1,100 class in the large cities will go to \$1,200 under this bill.

Considering the high cost of living and the arduous work performed by these faithful public servants, the pay of all classes

is too small.

This is especially so when the rapid increases of the rural free delivery carriers are considered. This, too, in view of the fact that the city offices show a handsome profit yearly while the others a big deficit.

While in favor of giving every citizen mail and parcel-post advantages, I am pleading for a class of hard-working, faithful

men who need and should have better pay.

Section 6, intended to take assistant postmasters out of the civil service, is, to my mind, a step backward, and not justified under our enlightened and progressive Government, especially so under Democratic administration.

President Taft, for what he thought good and sufficient reasons, three years ago placed these twenty-four hundred men under the protection of the civil service. Now, if it is deemed wise and necessary after this trial to return them to the exempt class, President Wilson can do so by an Executive order

For this reason, and the further one of placing riders on appropriation bills, I am opposed to this section. If the President does not wish to assume the responsibility of rescinding the order of his predecessor, there must be good and valid reasons for his action.

If Congress wishes to make the change, let it be done on its merits in the usual way of changing or making new laws.

I have received a number of protests against the adoption of this section from both individuals and organizations. To save

of this section from both individuals and organizations. To save time and space I will insert but one, that of the New York Post Office Clerk's Association, and with that will close the matter. Whereas the Committee on the Post Office and Post Roads of the House of Representatives have placed in the Post Office appropriation bill now pending before that committee a clause withdrawing assistant postmasters in first and second class post offices from the protection of the civil-service law; and

Whereas such action on the part of the committee, if enacted into law, will be the means of removing from office a large number of efficient employees who have been promoted to that position on merit after years of faithful work in the Postal Service; and Whereas the enactment of such a law will be a long step backward in the upbuilding of the civil service in the Post Office Department, the Postal Service, and the public service in general: Therefore be it

Resolved, That we, the New York Post Office Clerks' Association, in regular meeting assembled on Sunday, December 28, do protest against the enactment into law of such an unjust measure; and be it further Resolved, That the Representatives in Congress from the metropolitan district of New York be forwarded a copy of these resolutions, and that they be requested to vote and work against the passage of the amendment above mentioned.

Mr. MOON. Mr. Chairman, I yield to the gentleman from New York [Mr. GOLDFOGLE].

[Mr. GOLDFOGLE addressed the committee. See Appendix.]

Mr. MOON. Mr. Chairman, I yield five minutes to the gentleman from South Carolina [Mr. BYRNES].

Mr. BYRNES of South Carolina. Mr. Chairman, I wish to direct the attention of members of the House to section 9 of this bill, which relates to the compensation of rural carriers. While this section ostensibly provides an increase of salary for all carriers, as matter of fact under its provisions the salary of one class of carriers instead of being increased will be materially decreased, and where there is an increase it is not a proportionate increase, but certain classes of carriers will

receive a greater proportionate increase than others

In order to confirm this construction of the provisions of this section I wrote the Postmaster General asking that furnished with a statement of the cost of the Rural Delivery Service under the schedule now existing and the cost under the schedule proposed in this bill. The statement I have received from the Postmaster General I wish to include as part of my remarks. Under this statement it will be seen that the total compensation of carriers engaged in triweekly service will be reduced \$29,451.10. The salaries of the triweekly carrier with a 24-mile route will be reduced \$41, and every carrier in this service, regardless of length of route, will receive less, and this in spite of the 'recognized fact that the parcel-post law has placed upon them increased labors. For the increased labor they will receive a decreased salary.

As to the carriers engaged in the daily service this statement shows that carriers whose routes are from 16 to 24 miles will receive an increase of \$75, while the salary of carriers with a 24-mile route is increased but \$50. The salary of the carrier

traveling a 25-mile route is increased \$72.50.

I can not conceive of any good reason why the carrier of a 23-mile route should be increased \$75 and the salary of the carrier of a 25-mile route increased \$72.50, while the salary of

the carrier of a 24-mile route is increased only \$50.

The Postmaster General, in his annual report, informs us that the postal service is now for the first time since 1883 self-supporting, and that for the fiscal year ending June 30, 1913, there is an actual surplus of \$3,841,906.78. I have no doubt that the increased revenue is due, in some measure at least, to the success of the parcel post. On account of this service the Postmaster General has asked for increased appropriations for Railway Mail Service and star-route service, and the provisions of this bill indicate that the committee intended to grant some increase to the rural carriers. Even if it were so worded as to carry a proportionate increase to all carriers I submit that the increase would not be commensurate with the increased service demanded of the carriers. service now demands greater expense, greater labor, and longer

The time has passed when the carrier could travel his route riding a motor cycle. Nowadays he is a movable express office and has more use for a two-horse wagon than a motor cycle, and this service is destined to increase instead of decrease. If the request of the carriers for an allowance to cover expenses can not be granted, we should at least increase the salary of the carrier traveling a standard route of 24 miles from \$1,100 to \$1,200 per annum, and for each mile above 24 add \$30 per year, and for each mile below the standard deduct a like Such a provision would be more equitable than the schedule in section 9 of this bill, which proposes to help one class more than others. These gentlemen are not at war with each other. One class of carriers does not wish to profit at the expense of another class, but they believe in and ask for a proportionate increase for all carriers.

I now wish to direct your attention to the estimate of the total cost of the Rural Delivery Service under the present and proposed schedules. The Post Office Department, according to the report of this committee, estimated for carriers, Rural De-

livery Service, for the year 1915, the sum of \$48,650,000, and this amount is carried in the bill; but the estimate of the department did not include the increase of salary for carriers provided for in the bill, and the statement I have from the department shows that this increase of salaries will amount to \$2,868,976. The total appropriation for this service includes an increase of \$1,000,000 for new work, but this increase in salaries, amounting to practically \$3,000,000, will mean a deficit of \$2,000,000 in this department unless the total amount is increased. Such a deficit will result in a curtailment of the Rural Delivery Service because of the lack of funds. This will be of some interest to those of you who hope to have rural routes established in your districts. The benefits of this rural service are so appreciated by the American people that it is their desire to see it extended instead of curtailed.

Give the carriers a living wage. Make the increase proportionate and provide for such increase in the total appropriation, so that the Rural Delivery Service will not be crippled.

Mr. MOON. Does the gentleman mean to say that there will be a deficit under the section as now provided?

Mr. BYRNES of South Carolina. Under the section as now

Mr. MOON. The gentleman means after the increase in pay is granted?

Mr. BYRNES of South Carolina. Yes. Mr. MOON. That is not done yet, the gentleman understands. That is subject to the rule.

Mr. BYRNES of South Carolina. If the increase in pay of \$2,886,000 is granted, then there is a deficit in the department, so far as rural free delivery is concerned, and we know what chance we will have of the establishment of any new rural routes next year.

The CHAIRMAN. The time of the gentleman from South

Carolina has expired.

By unanimous consent Mr. BYRNES of South Carolina was granted leave to extend his remarks in the RECORD, as fol-

Statement showing cost for Rural Delivery Service under present and proposed schedules.

Net increase, \$2,868,976.

Mr. MOON. Mr. Chairman, I yield 30 minutes to the gentle

man from Missouri [Mr. LLOYD].

Mr. LLOYD. Mr. Chairman, the pending appropriation bill carries the largest amount ever carried in any bill that has ever been presented to the Congress of the United States, an amount so large that as far back as 1900 we said it was impossible that such increase in expenditures could arise. In the year 1900, only 13 years ago, the amount carried by the Post Office appro-priation bill was \$102,000,000. This bill carries \$306,000,000, or three times as much. The appropriations for Postal Service in 13 years, therefore, have trebled. This is a most astounding fact, when you come to consider what this may mean in the near future. If there is the same proportionate increase in expenditure on account of the Postal Service in the next 15 years as there has been in the last 13 years, the amount carried by the then bill will be more than \$1,000,000,000. It is astonishing to know how rapidly we are progressing in the Postal Service. It is surprising to contemplate what we have done in recent years in advancing this splendid service. No business institution in the land, none on earth, as far as I know, compares with this institution, the Postal Service of the United States. We paid in 1900, \$19,000,000 to the postmasters who had charge of the various post offices in the United States. We propose in this bill to expend next year \$30,750,000 for a like service. The salaries of the postmasters alone have increased 60 per cent in 13 years. The City Delivery Service, so important to the business success of the land, has made a marvelous growth, as shown by the number of employees necessary to carry on its work. In 1900 we expended \$14,250,000 for that service, while we propose in this bill to expend for next year \$38,000,000, or very nearly three times as much as was expended for like service 13 years ago. The Railway Mail Service, having reference now to the railway mail clerks who render service on the trains in the United States, received in 1900 nearly \$9,000,000 for their service, while it is proposed in this bill to pay them \$30,000,000 for like service, an increase of more than three times the amount that was paid in 1900. The clerks of the post office in 1900 received \$12,500,000 for their service. It is proposed in this bill that there shall be expended next year for that service \$45,000,000, or nearly four times as much as was paid 13 years ago.

In 1900 we expended for rural service \$425,000. Notice the amount—\$425,000. We now propose in this bill to expend for next year \$48,650,000, or one hundred times as much as we paid 13 years ago. In 1900 we expended \$425,000 for experimental We are now expending as a part of the permanent appropriation this vast sum of money for this splendid One remarkable difference that is observed in expenditure is with reference to the transportation on the railroads. In 1900 we expended for that service \$37,000,000, and it is proposed by this bill to expend \$60,500,000, or less than

60 per cent more than in the year 1900.

The impression has gone to the country, as you know, that we are expending an enormous sum beyond that which should be expended to the railroad companies for carrying the mails, and yet I call your attention to the fact that the expenditure for the carrying of the mails is nothing like keeping pace with the other expenditures of the Postal Service. I do not say this as having any bearing on the question as to whether the railroad companies are to-day receiving too much or too little for the services they perform.

There is one branch of the Postal Service that is not appreciated in the country, in my judgment, as it deserves. I have reference to the inspection branch. I may be mistaken, but in my judgment there is no money expended by the Postal Department from which we get better returns than for the services that are performed by the inspectors of the United States. I shall not take the time in the few moments that I have at my command to go into their work and explain in detail the splendid service they render to the American people. This bill increases the number of inspectors from 390 to 420. This is necessary because of the fact that the inspection service has more work to perform than those now employed in it can perform, and it is necessary to enlarge the force in order that they may perform the work that devolves upon them.

The most remarkable thing, however, in connection with the Postal Service is the branch of the service with which most persons have but little familiarity and hear the least. I have reference to the monetary branch, that branch of the service which is controlled by the Third Assistant Postmaster Gen-There passes through that office the demands for \$250,-000,000 worth of postage stamps every year. The Third Assistant Postmaster General controls the Money-Order Division, and in that division last year there was done \$625,000,000 worth of domestic business. The international work that was done in sending orders to other countries amounted to over \$110,000,000.

The Third Assistant Postmaster General has charge also of the postal savings banks of the United States, and they have on deposit at the present time about \$35,000,000, so that this officer has charge of the most gigantic business of any man living to-day in the United States or elsewhere. The present Postmaster General was exceedingly fortunate in selecting for Third Assistant Postmaster General a man of splendid business qualifications, large experience in public affairs, and a man who has performed his duties as an officer in a manner that has not been surpassed heretofore. No more competent official could

have been chosen. [Applause.]

I have been interested especially recently in an investigation of the subject of railway mail pay, one of the most difficult propositions that has been presented to the American Congress at any time. The present system of pay is one of the most difficult to understand of any system of business that can be I will warrant you that I am safe in making the statement that I can go to any promiscuous audience in the country and inquire if there is a man within that audience who can explain the present system of railway mail pay, and I will hardly find an individual in an assemblage of one thousand who can rise in his place and satisfactorily explain the present system of railway mail pay. There was appointed a short time ago, as you are all aware, a commission to investigate the system of railway mail pay and ascertain if possible whether we could not devise a simpler and better system than that which is now in vogue, and whether we can not ascertain in some practical way whether the railroad companies are receiving sufficient compensation for the services they render or are receiving too much for carrying the mails. This commission has had numerous hearings from various sources with reference to this subject. have been exhaustive both from the part of the Post Office Department and from the railways and experts of the country.

If you have not read those hearings, if you are interested at all in the subject of railway mail pay, I feel sure that you will find in them that which will give you information which you have not heretofore received. It is not my purpose to go into the work of that commission and to indicate in advance what in my judgment may be some of the recommendations which it may make, but I am hopeful that the report which it shall submit in the near future will be one that will give information that has never yet been given by any report of any commission appointed on that subject. This subject of railway mail pay, the question of how much we pay, is the most difficult question to answer. Suppose one of your constituents asks you how much we pay to-day for carrying the mails. You can only answer in a general way. You say we pay \$60,000,000 for carrying the mails, but that does not answer the question. He asks you how much you pay for carrying passengers of the country on the railway mail train. Your answer is very readily made in a way that he can well understand when you say 2 cents, 2½ cents, or 3 cents a mile, as the case may be. He asks you, however, the more important question for you to determine, what we pay for carrying the mails of the country, and unless you go into a learned dissertation you will make no answer more direct than to say that we are paying \$60,000,000 for that

My own judgment is that we need to get down to some kind of a simple system of ascertainment of pay. We ought to get some kind of a basis, so that every individual Member of Congress may say to his constituents what we pay, so that our constituents themselves may determine whether that is too much or

Different systems have been suggested of determining railway mail pay. We have to-day what we call the weight system. But it is so complex in its ascertainment that no individual anywhere, unless he has some expert knowledge along the lines of investigation, can understand how it is obtained. We say that we pay so much per pound for carrying the mails. How much per pound do we pay? Is there an individual Member present who can answer? No; you can not answer that question directly, because we do not pay the same amount on all roads of the country. We have different prices for different ascertainthe country. We ments of weight.

That accounts, too, very largely for the fact that the railway mail pay has not increased as rapidly as have other expenditures in the Postal Department, because the more mail that is

carried the less per pound we pay.

I intimated a moment ago that I was hopeful that the commission might be able to report, and that Congress in the near future might adopt, some kind of a system that may be explained, so that the people can understand and so that the Congressman himself may be in a position to explain it to his constituents when they inquire. Different schemes have been suggested, as I intimated a moment ago, for a change. The Post Office Department, during the last régime, suggested that we should change from the weight basis to a space basis, and that we ought to pay for the amount of mail carried on the basis of the space we use in carrying the mails rather than for the weight that is carried; insisting that the weight is an in-consequential question in the determination of what the railroad should receive, but that the space occupied in the train is the more important question to be determined, and that on that basis a railroad should receive its pay rather than on account of the weight of the mail carried.

There were numerous hearings held and vast statistical information gathered by the Post Office Department, and it is to be found in what is known as Report No. 105, from which publication the then Postmaster General, Mr. Hitchcock, reached the conclusion that if the space system were adopted, there would be a saving to the American people at once of \$9,000,000. The railroad companies came back at once and insisted in the hearings before the Postal Commission that they are not receiving enough pay, and that they have not hitherto received enough pay by at least \$15,000,000 annually. Here is the Post Office Department on the one hand insisting that there ought to be a reduction of \$9,000,000, while the railroad companies insist

that there should be an increase of \$15,000,000.

Now, is there any one present who has carefully investigated this question and can determine with accuracy just what should be paid to the railroad companies for carrying the mails? It has been suggested that we might determine the pay by paying so much per mile for every car that may be used. Here, for example, is a mail car starting out from Washington. so much for the first mile, and then so much for each additional mile that that car may travel; and the suggestion is to let the distance traveled by the car determine what should be paid for the carriage of the car, based upon an allowance of so

many cents per mile.

That system, if worked out, would be a practical system that you can explain. Suppose that a full post-office car of 60 feet in length starts out on its journey, and under the law it is to receive 20 cents per mile for every mile it travels. You and everyone else can make a computation of the amount that must be paid to the railroad companies for the carriage of that carload of mail. But suppose there is only one-half a car of mail to be carried on the train, and all the space that is needed is 30 feet instead of 60 feet, then you might pay 10 cents per mile for carrying that half a car of mail; and if that were the basis of pay, every man and woman in the country could understand what was the basis on which we pay for the carriage of the mails.

This plan, if carried into execution, it seems to me, would be a practical one. I am inclined to try to work out some kind of a scheme by which we should pay for the cars used, and pay so much per mile for the distance the car travels.

Mr. SELDOMRIDGE. Mr. Chairman, will the gentleman par-

don an interruption there?

The CHAIRMAN. Will the gentleman yield?

Mr. SELDOMRIDGE. I am interested in what the gentleman says about this matter of railway mail pay. It is a question that has puzzled me a great deal. How would the gentleman overcome that situation which might arise on the many branch roads of the country where the mail car is not a separate entity, as it is on the regular lines of travel, but is simply a compartment of a coach or baggage car?

Mr. LLOYD. If it requires enough space to constitute a quarter of a car, I would provide for the payment on the same basis. If not, I should think arrangements should be made to pay so much per pouch for every particular pouch that is car-

Mr. STAFFORD. Mr. Chairman, as I understand the gentle-man's presentation, he has limited it entirely to the space used in the so-called railway post-office cars and compartment cars, and not to the so-called storage cars that carry the heavy bulk mail throughout the country. Or does the gentleman intend to convey the impression that we should pay on the basis of the space occupied, regardless of weight, whether in railway

post-office cars or storage cars?

Mr. LLOYD. I was only trying to express to you just in a general way, without reference to stating any definite plan, that in my judgment we ought to get down to some kind of a practical basis, so that all of us can understand just what we are paying. That raises a very nice question-whether we shall pay the same amount for the transportation of a storage car as we pay for the transportation of the ordinary railway mail car. That is a question to be worked out. My candid judgment is that there should not be so much paid for carrying a storage through car as should be paid for the transportation of the ordinary railway mail car, where the railway mail employees are in the car and distributing the mail.

Mr. STAFFORD. But, as the gentleman knows, from the study he has given to this subject, the ordinary loaded storage car carries a weight of mail averaging from 12 to 15 tons, whereas the average weight of the mail in a full-sized railway

post-office car averages from 2½ to 3 tons.

Mr. LLOYD. If the weight ought to be taken into consideration, then the storage car should receive more pay for the actual transportation than an ordinary railway post-office car; but, as I was saying, that is one of the things to be worked out. I was answering on the theory that the same number of pounds of mail were carried in the storage car that are carried in the regular railway post-office car. If the weight in both cases were equal, I should say that the storage car ought not to receive as much compensation for its transportation as the railway mail car.

But there are numbers of difficulties in connection with this matter. I am not aiming to present those difficulties to-day, nor am I undertaking to present a plan. The sole purpose of this suggestion is to indicate to you that, in my judgment, it is possible to reach some kind of a practical solution of the matter, so that when it is adjusted we will know what we are paying for carrying the mails and every individual in the land can have some idea as to whether the compensation is reasonable

or unreasonable.

The Interstate Commerce Commission have investigated the subject, and have ascertained that we pay about 22½ cents per mile for every mile that a passenger coach is carried. should we pay any more for carrying a mail coach than we pay for carrying a passenger coach? Why, will you answer me, may we not be required to pay as much for carrying a mail car as for carrying a passenger car? They are both about the same size; they are pretty nearly of the same length. If they are of the same length, the same size, and the same weight, why should not the railroad company receive the same price for transporting them? But that raises another question which the Interstate Commerce Commission have very seriously considered. Ought we to pay to the railroad companies a sufficient amount, so that they may make the same kind of profit for carrying the mails that they make for carrying freight or passengers? There are numbers of individuals in the land who believe that the railway companies ought not to place themselves on the same basis in carrying the mails that they do in carrying passengers, because they have a protection from the United States Government that they do not have in carrying passengers. More than that, they enjoy the right of eminent domain, the right to take your property from you without your consent, and that right comes to the railroad company by reason of the laws of the land. There are those who believe that because of the extraordinary privileges that are given to the railroad companies they ought to do something in return, and that they ought not to demand the same compensation for carrying the mails that they would demand for carrying passengers or freight.

Mr. McKENZIE. Will the gentleman yield?

Mr. LLOYD. Yes,
Mr. McKENZIE. The 22½ cents a mile that the gentleman spoke of as applied to passenger coaches is the actual cost of moving the car, is it not?

Mr. LLOYD. No; the 22½ cents is what the people of the

United States actually pay for the transportation of the car.

The people of the United States to-day are paying 221 cents, on an average, for the transportation of every passenger car in the United States 1 mile.

Mr. McKENZIE. That is based on the supposed actual cost of moving it, is it not, without any profit or revenue?

Mr. LLOYD. No; that is the actual amount that they re-

ceive, from which they may make a profit or a loss

Mr. HOWARD. Have you made any estimate of the value of the franchises that the railroad companies of this country enjoy, which they have received absolutely free-as free as the air?

Mr. LLOYD. That is one of the things that goes into the question of determination as to whether the railroad companies should receive the same compensation for carrying the mail that they receive for carrying passengers or freight.

Mr. HOWARD. As a matter of fact, those franchises which were granted to them gratis are worth millions upon millions of

dollars.

Mr. LLOYD. In some instances that is true, and in other cases they have been required to pay for the property; but where they have been required to pay for the property have acquired a right which you have not. They have authority to build a railroad right through your dwelling house and destroy it. They have the right to take the most valuable property you have, and you have nothing to say in return except this: "I must receive reasonable compensation for the property which you take from me." It is my purpose to speak of one or two other branches of postal legislation. I am especially interested in the extension of the delivery of mail. At the present time we deliver the mail in large cities at the door of every individual, and we deliver the mail in the country at the door of every farmer who is accessible to town, but in a town of 2,000, 2,500, or 3,000-I care not how large a territory over which it may spread-we do not deliver any mail. My judgment is that we ought to take that into consideration; that these people in the smaller towns of the country have as much right to have the mail delivered at their doors, if they want it, as has the farmer or the men who live in the city.

I introduced a bill following this line several years ago, and I have made two or three speeches on the floor of the House in which I have advocated it. I am glad to know that there is a provision in the bill of \$200,000 for further experiments along

the line. [Applause.]

Mr. MOON. Mr. Chairman, in looking over my remarks in the House a day or two ago I find that I stated that for the next fiscal year approximately 600,000,000 packages would be carried through the parcel post, yielding sixty millions of money. I am afraid the language would indicate that I intended that there would be \$60,000,000 profit. Of course, that was an estimate as to the gross amount. The net amount that would arise from that source it is impossible to ascertain, because we do not know what part of the expense of handling and carrying ought to be charged to the parcel post.

Again, in the same remarks I submitted an estimate of the deficit that might arise in the event that we undertook to establish 1-cent postage for first-class matter. My estimate, roughly made, was to the effect that we would probably lose \$37,000,000, estimating profits from a possible increase in first-class matter on that account. The department has since made rather an accurate estimate of that matter, and I am in receipt of a communicaion from the department to-day which I will ask the Clerk to read, and I will place it in the RECORD.

The Clerk read as follows:

POST OFFICE DEPARTMENT, THIRD ASSISTANT POSTMASTER GENERAL, Washington, January 17, 1914.

Hon. John A. Moon,

Washington, January II, 1914.

Hon. John A. Moon,

Chairman Committee on the Post Office and Post Roads,

House of Representatives, Washington, D. C.

My Dear Mr. Moon: This department has received a large number of communications urging the adoption of 1-cent letter postage, and it is assumed that similar communications have been received by your committee. In order, therefore, that you may be advised of the probable loss to the postal revenues in the event of the enactment of legislation providing for a reduction in the letter rate from 2 cents an ounce to 1 cent an ounce I may say to you, after consultation with the Postmaster General and the chiefs of the Divisions of Classification and Stamps, that this department estimates that if the letter rate of postage should be reduced as indicated it would result in decreasing the annual revenue derived from first-class matter by approximately \$75,000,000. This conclusion is based on the income of the department from matter mailed at the 2-cent letter-postage rate during the fiscal year ended June 30, 1913.

Yours, very truly,

A. M. Dockery,

Third Assistant Postmaster General.

A. M. DOCKERY, Third Assistant Postmaster General.

Mr. MOON. Mr. Chairman, the estimate made by the chairman of the committee was, of course, exceedingly rough, without the facts in detail being before him. It appeared clearly that we could not go to 1-cent letter postage without the loss which I suggested would occur as a minimum of \$37,000,000.

I am surprised that the amount is so great, but it makes the reason the greater for the committee not yielding to the suggestions of 1-cent postage.

I now yield 10 minutes to the gentleman from Colorado [Mr.

SELDOMRIDGE]

Mr. SELDOMRIDGE. Mr. Chairman, yesterday, in the latitude of debate allowed on this bill, the gentleman from Washington [Mr. HUMPHREY] took the opportunity to engage the attention of the committee in a narration of the facts connected with an apparent decline in the steel and iron industry of the country, and took occasion to attribute this condition to the effect of the legislation of the party in power. We have been regaled with these statements from time to time from Members on the other side, representing various constituencies, and it would seem now that the gentleman from the Northwest has mingled his voice with that of the gentleman from Illinois, and possibly the gentleman from Pennsylvania, in order to create throughout the country a belief that the policies of this administration have been productive of depression and loss in business affairs.

Of course, Mr. Chairman, we expect that those who have been beneficiaries of special privileged legislation in the past, and into whose coffers has flowed the stream of golden profits from the operation of our protective-tariff laws, that they would be the first to find occasion in any apparent loss of business to charge the same to the Democratic Party. Were these representations to go before the country without refutation or denial it might result in a feeling of unrest and dissatisfaction to the

party in power on the part of the people throughout the country.

But we know, Mr. Chairman, that it is not altogether true that this business condition is capable of analysis along the line that these gentlemen have followed, but we do know that if any depression exists that it is due to causes other than those which have been named. In fact, we know that in European countries for the past six months there has been an unusual stringency in money affairs; that the great nations of Germany, France, England, and Italy are to-day seeking by every means in their power to control the supply of gold which they have; that it is difficult for them to finance their great governmental necessities, and naturally they are seeking to realize from the sale of American securities the wherewithal to supply their financial requirements. It is also true that during 16 years of Republican rule the country had been asking for and demanding from that party legislation along the line of relief from currency restriction and from control of credit which has hampered, to a large extent, the development of the industrial and agricultural sections of our country.

It is undoubtedly true that at the present time many large building operations are in process of stagnation and of development, because of the inadequate sources of financial relief, which the projectors of these enterprises desire to secure. But. Mr. Chairman, we should not take the statement made by the gentleman from Washington [Mr. Hump ex] as entirely correct. In fact, we would rather have him quote from business conditions in the district and section of country that he represents, in order that there might be in the statements which he makes some degree of local authority. I hold in my hand a copy of the Trade and Crop Bulletin, issued in December last, the Seattle National Bank, of Seattle, Wash. has resources amounting to \$16,000,000, and we learn from a perusal of this publication that its purpose is to portray the business conditions existing in that particular section of the country, the Pacific Northwest. I would like to call the atten-tion of the committee to some of the statements made in this bulletin, issued by this great bank of Seattle, because I believe that a declaration made by an institution of this character is more worthy of belief and more credible than any statement made by one whose purpose is apparently to alarm and scare the country into the idea that we are hovering upon the border of business and commercial collapse. This bank goes on to state as follows:

We have been in receipt of late of a great many trade reports, covering many sections of the United States, which, while lacking in unanimity, would indicate as a whole fairly satisfactory conditions. With the exception of lumber, reports covering the Pacific Northwest indicate more uniformly satisfactory conditions than those which obtain over the country as a whole. Our grain crops have averaged up to last year and, incidentally, indicate another great grain empire, making rapid strides in Montana.

Lumber is the one unsatisfactory staple important to this section of which we hear complaint, and the complaint in this respect is general. Mills have been curtailing and shutting down, and as a consequence production has decreased, further resulting in a slight betterment in prices. The lumber output this year will aggregate \$50,000,000. Our California market has been only nominal, owing to crop losses there.

Let me state in this connection that I recently interviewed a Member of this House who comes from the same section of the country represented by the distinguished gentleman from Washington [Mr. Humphrey] with reference to this apparent decline in the lumber business in that section, about which so much has been said, and I have been informed-and I do not vouch for this upon my own knowledge, but by the statement made by an honorable Member of this body—that this decline in the lumber business in the Northwest has been due almost entirely to the fact that the market in Australia has been closed to the exportation of California, Oregon, and Washington lumber; that there has developed in the Continent of Australia a colossal lumber trust which has closed the doors to American importation; and as our Republican friends through their 16 years of power have been unable to give to this country a merchant marine, controlled and dominated by American interests, in order that our citizens might avail themselves of American transportation to put their products at the doors of foreign markets, our friends from the Northwest find themselves to-day the victims of this inaction and incompetency. So the conditions there are not of domestic origin, but are those resulting from conditions in the Continent of Australia.

The bank report goes on as follows:

The bank report goes on as follows:

Our fish crop, meaning principally our salmon output, has exceeded the most brilliant expectations, even for the quadrennial or sockeye year, and Puget Sound waters alone are credited with producing \$15,000,000 this year, most of which is marketed through Seattle. Twenty-five million dollars more would about cover the yield from salmon and other fisheries in adjacent waters, a very heavy proportion of this crop being handled through Seattle.

Salmon means ready money, for it moves to market and into cash through an ever-widening market with a quickness not exceeded in any staple line of product.

Our fruit crop has been short of last year's glut, naturally, but prices have been highly satisfactory, and thousands of cars have already been turned into cash.

I desire now, Mr. Chairman, to call the attention of the committee to a statement made by the officers of this bank which is analytical of the business conditions existing throughout the country, and which I believe is to be taken with more assurance of belief and accuracy than the statements made by the gentleman from Washington, who desires to attribute these conditions to Democratic legislation. The bank makes this statement:

Business moves in cycles, and we are now between two cycles. The results of 1997 have waned, but have not disappeared, and the approaching upward movement is not sufficiently perceptible to make us feel that we are out of the woods. One thing is certain, and that is that the scarcity of money is not peculiar to the United States alone. It is world-wide, and while the breadth of the situation saves our pride somewhat, it does not offer in itself a special hope of the solution of this problem. The credit machine is too tightly wound, and the world's investments of late years have not been of a liquid character; armament, automobiles, and extravagances in municipal and in public improvements are examples.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. SELDOMRIDGE. Mr. Chairman, I would like to have 10 minutes more

Mr. MOON. Mr. Chairman, I would be very glad to give it to the gentleman, but I have more time promised than I can afford to give. It is impossible for me to give another minute.

Mr. SELDOMRIDGE. Very well. I will take occasion to conclude my remarks at another time.

Mr. MOON. Mr. Chairman, I yield to the gentleman from New Jersey [Mr. TUTTLE] for 30 minutes. Mr. TUTTLE. Mr. Chairman, the distinguished chairman of the Committee on the Post Office and Post Roads, in his very able and eloquent speech at the opening of this debate, took occasion to make some observations upon the subject of Government-owned railway post-office cars which should receive the careful and serious attention of the Members of this House. A joint committee of the Congress is about to report the results of its investigation of the whole question of compensation to railroads for carrying the mails, and will recommend legislation which should receive consideration before the close of the present

The pending appropriation bill, among its legislative features,

provides in—

SEC. 8. That the Postmaster General is hereby authorized, in his discretion, to contract for the construction of and to purchase steel full railway post-office cars and storage mail cars, and to pay not exceeding \$200,000 for the same out of the appropriation for railway post-office cars; and to contract with railroad companies for hauling them and their contents, including mails, equipment, supplies, officers, employees, and railway postal clerks, and for their maintenance, heating, lighting, cleaning, and repairing, upon such routes and between such points as he may deem advisable, and to pay for the same out of the appropriation for inland transportation by railroad routes: Provided, That for the purpose of readjusting compensation for the transportation of the mails upon the routes over which such cars shall be operated from the date on which such operation begins for the remainder of the contract terms, the Postmaster General is authorized to weigh the mails transported in such railway post-office and storage mail cars, which shall be verified and stated monthly in such manner as he shall direct, from which returns he shall compute the average daily weights of mails carried in

such railway post-office cars and storage mail cars on the routes over which they may be operated, and deduct such average weights per day from the average weights per day upon which the pay for the transportation of the mail on the routes respectively was allowed at the last regular readjustment, and readjust the pay on such routes at not exceeding the statutory rates for the reduced average weights of mails per day: Provided further, That the weights of mails, equipment, supplies, or other matter carried in such cars shall not be included in the weights of mails upon which any readjustment of pay to railroad companies shall be made: Provided further, That the Postmaster General is authorized to return to the mails where practicable empty mail bags, supplies, etc., that have theretofroe been withdrawn from the mails as provided by law and transported by freight or express, and thereafter transport them in the railway post-office cars and storage mail cars herein provided, but the weights thereof transported as herein provided shall not be included with the weights upon which the readjustment of compensation for transportation as provided herein is based.

The question of the compensation for the transportation of

The question of the compensation for the transportation of the mails has been a vexed one ever since the railroads superseded the stagecoaches in 1837. The history of the Railway Mail Service, from its beginning down to the present day, is one of contention between the railroads and the Post Office Department over the adequacy or inadequacy of the rates paid

and the proper basis of payment.

The intricate, complicated, cumbersome, defective in many respects method used in computing the amounts due for railroad service has never been understood by our people, and the common impression has always been that the Government has been imposed upon, and that we have been paying the railroad companies well in excess of what they have earned or deserved for their part in the development of our gigantic and marvelously successful postal system.

When the railroads first came into service in 1837 the compensation was limited not to exceed in any instance "more than 25 per cent over and above what similar transportation would cost in post coaches." In 1839 this compensation was further ceed \$300 per mile per annum. In 1845 the railroads were classified, dependent upon size of mails, speed, and importance of the service, and pay was limited to \$300 per mile per annum for first class, \$100 per mile for second class, and \$50 per mile for third class. These rates held for a period of 20 years, wholly arbitrary and subject to the varying judgment of the department officials. In 1867 the mails were weighed in order to secure a more equitable assignment of reads limited by an act restricting the cost on any route to not exorder to secure a more equitable assignment of roads.

During the late sixties the distribution of mail in transit was begun, and became an important branch of the service; but it was recognized that if the railroads were not only to transport the mail itself, but also to supply, equip, and haul post offices for the distribution of mails, the weight basis was not adequate or just, and in the law of 1873 the classification of mail routes was abandoned. The average weight of mails carried the whole length of the route with due frequency and speed was made the gauge of compensation, and additional allowance was provided for railway post-office cars of length 40, 45, 50, and 60 feet, respectively.

This act fixed the schedule of mail pay, as follows:

This act fixed the schedule of mail pay, as follows:

The pay per mile per annum shall not exceed the following rates, namely: On routes carrying their whole length and average weight of mails per day of 200 pounds, \$50; 500 pounds, \$75; 1,000 pounds, \$100; 1,500 pounds, \$125; 2,000 pounds, \$150; 3,500 pounds, \$175; 5,000 pounds, \$200, and \$25 additional for every additional 2,000 pounds; the average weight to be ascertained in every case by the actual weighing of the mails for such a number of successive working days, not less than 30, at such time after June 30, 1873, and not less frequently than once in four every four years, and the result to be stated and verified in such form and manner as the Postmaster General may direct.

Note.—Act of March 3, 1905, provides that beginning with the adjustment of 1906 the period of the weighing upon which such adjustment is based shall be not less than 90 successive working days.

These rates were reduced 10 per cent by the law of 1876 and were further reduced 5 per cent in 1878. On March 2, 1907, a still further reduction of 5 per cent was made on all weights over 5,000 to 48,000 pounds. On June 7, 1907, the Postmaster General issued an order changing the divisor-from 6 to 7computing the average daily weight of mails, thus resulting in another reduction of about 8 per cent in the pay of railroads for mail transportation.

In addition to the above payments based upon weight there is a further allowance when full railway post-office cars are provided—the Post Office Department deciding when these are necessary. The rates of pay for these cars were fixed originally

as follows:

Length of car and rate per annum per mile of track. 40 feet _____ 45 feet _____ 50 feet ____ 55 to 60 feet ___ feet ______feet _____

In order to obtain these rates a round trip must be made over each mile of road per day.

But the act of 1907 reduced postal-car pay to \$27.50 per annum per mile on 45-foot cars, \$30 on 50-foot cars, and \$40 on 55 to 60 foot cars, a reduction of 83 per cent, 183 per cent, and 20 per cent, respectively.

Land-grant roads receive 80 per cent of compensation provided in these acts.

Since this method of pay has been in effect there has been constant discussion in and out of Congress over the rate and the basis of its ascertainment. Various congressional commissions have been appointed from time to time. In 1878 the Hubbard Commission, in 1883 the Elmer-Thompson-Slater Commission, in 1898 the Wolcott-Loud Commission in turn investigated, made their recommendations, and dissolved without any action being taken by Congress. The Post Office Department has made diligent efforts to ascertain a proper basis of pay which would be fair alike to the Government and the railroads.

In 1909 Postmaster General Hitchcock, under authority of the law of March 3, 1879, obtained a vast amount of statistical data upon railroad operations, particularly those of the passenger-train service, the amount of car space devoted to passenger service proper, express service, the mail service, and the operating expenses and revenues.

The results of this inquiry are contained in a very comprehensive report by the Postmaster General, under date of August 12, 1911 (H. Doc. 105), as to the operation, receipts, and expenditures of railroad companies transporting the mails, with recommendations for legislation.

With this data, and that assembled by former congressional and departmental committees, the Interstate Commerce Commission, the Post Office Department, and the committee from the railroads, the present commission, headed by former Senator Jonathan Bourne, has made an exhaustive investigation of the whole subject, with the expert assistance of Dr. M. O. Lorenz, an associate statistician of the Interstate Commerce Commission. It is expected that a report will be made at an early date, and we hope to lay before Congress a reasonable and acceptable plan for the adjustment of this much-mooted ques-

I desire at this time to discuss only the Government ownership of the railway post-office cars, reminding the committee, however, that this is distinct from the question of whether the railroads are overpaid or underpaid.

One of the first propositions taken up by the present commission was that of the advisability of the Government owning the postal cars. The two rates of pay for the same service, viz, one rate for the weight of mail in the car and another payment for the car itself, have given rise to much confusion. proof of this is seen in the wide currency gained by the statements of Postmaster General Vilas in 1887, to the effect that at least \$1.500,000 annually might be gained for the Government if it should purchase its own post-office cars, and also the surprising assertion the other day by that usually careful and judicious student of postal affairs, Mr. Chairman Moon, that—

if a car costs \$6,000, and the Government pays an annual rental of \$5,000 on it, and the car lives 15 years, there is \$75,000 for the use of a car that the Government could have purchased in the first instance for \$6,000, and the repairs upon it amount to 20 per cent, so it is a dead loss of over \$60,000 in a period of 15 years upon one of those cars, and a corresponding loss upon the all-steel cars.

The fallacy of these conclusions has often been shown. The additional compensation allowed for railway postal cars is not to be regarded as a rental charge; it is supposed to cover the extra cost imposed upon the railroads of hauling in trains the great weight and space due to moving a distributing post office on wheels, with necessary working space for clerks, as compared with transporting the mails merely as weight, in which case far less space would be required, and that in much lighter

In a hearing before the joint commission Second Assistant Postmaster General Stewart said:

The fallacy of the statement of Mr. Vilas, it seems to me, lies in this: That there is no account taken of the cost of operating the cars. The payment that we make to the railroad companies for cars may soon equal their cost, but there is nothing to be argued from that as to the adequacy or inadequacy of that pay, because that leaves out of consideration entirely the cost of operating or hauling the cars.

And, again, to the House Committee on the Post Office and Post Roads, December 4, 1913:

Mr. Stewart. The amount we pay, and which we are now considering as compared with the cost of the cars, is based for services rendered for hauling the cars. It is for their operation. If you take a passenger or any other car and make the same comparison with revenue received per car you will have a similar result. The amount which a railroad company receives is not for the construction of a car, but for the operation of it, for the performance of a service.

In this connection I desire to read from a letter of Postmaster General Hitchcock to Hon. John W. Weeks, the whole text of which will be inserted as a part of my remarks:

OFFICE OF THE POSTMASTER GENERAL, Washington, D. C., March 2, 1910.

which will be inserted as a part of my remarks:

OFFICE OF THE POSTMASUR GENERAL,

Washington, D. C., March 2, 1919.

Hon. John W. Weeks,

Chairman Committee on Post Offices and Post Roads,

House of Representatives.

My Dear Sir: In response to your inquiry made of the Second Assistant Postmaster General in regard to the cost of maintaining and operating rallway post-office cars and its relation, received by railroad companies for the same and your reference to the speech delivered by Senator Vilas on the subject in the United States Senate February 13, 1895. I have the honor to advise you as follows:

The department has not at this time sufficient information upon this point to give from its own records a reliable estimate. As you are aware, we have recently asked railroad companies to submit answers to inquiries with reference to the cost of operating the mail service, and it is believed that when these shall have been received we will be in a position to furnish such information. Inasmuch, however, as it may be of importance to you to have estimates made from time to time by others and such incomplete information as we have at present, I submit the following:

The cost of operating a railway post-office car has been variously estimated, but not officially by the department) as from 15 to 30 cents a car-mile. The average run per day of such a car is about 300 miles. Estimating the cost at 18 cents a car-mile, the total cost of operating such car for one year would be \$19,710.

The specific tems which constitute this total cost are not definitely known to the department. However, as to the cost of lighting, cleaning, repairs, etc., the General Superintendent of Railway Mail Service and such as a superintendent of Railway Mail Service and such as a superintendent of Railway Mail Service and such as a superintendent of Railway Mail Service and such as a superintendent of Railway Mail Service and such as a superintendent of Railway Mail Service and such as a superintendent of Railway Mail Service and such as a s

Such theory is not justified by the facts, as will appear from the following:

A careful perusal of the debates in both Houses of Congress which led to the enactment of the present law fixing the rate of pay for railroad transportation of the mails and for railway post-office cars clearly indicates that the additional compensation for railway post-office cars was intended to cover the additional expense imposed upon the railroad companies for building, maintaining, and hauling such cars. The companies at that time insisted that these cars, which were practically traveling post offices, did not carry a remunerative load, and that, therefore, the amount of pay, based on weight, did not compensate them for their operation. This led to the specific appropriation for railway post-office cars. In this commection it should be borne in mind that the purpose of the railway post-office cars is to furnish ample space and facilities for the handling and distribution of mails ar route. Therefore the space required is much greater than would be required for merely hauling the same weight of mails.

In regard to any proposal for Government ownership of postal cars, other facts as well as the above should be given consideration. Such cars must be overhauled, cleaned, and inspected daily. It would be necessary either to arrange with the railway companies for this service or for the department to employ its own inspectors, repair men, and car cleaners at a large number of places throughout the country, which would probably be more expensive than the cost to the railway companies in that respect at present. It would hardly be feasible to establish a Government repair shop. Therefore the department would be compelled to use the shops of the several railway companies in that respect at present. It would hardly be feasible to establish a Government repair shop. Therefore the department would be compelled to use the shops of the several railway companies in that the railroad work would be given the preference.

Yours, very truly,

FR

FRANK H. HITCHCOCK, Postmaster General.

Mr. Worthington, of the Southern Pacific, testified that the cost of maintenance, \$1,225, with allowance of \$800 for interest on investment and depreciation, together with train-hauling cost of \$15,000, would make an aggregate for direct train haul and

maintenance per annum of \$17,025.

Mr. MAPES. Will the gentleman yield?

Mr. TUTTLE. Certainly.

Mr. MAPES. In reading the testimony of Mr. Stewart before the committee, I find he was asked if he could give the amount which the railroads receive for hauling the privately

owned cars, like the packers' and others, and he was not able to give the committee that information, as I recall it. Can the gentleman tell us what the railroads received for hauling those cars?

Mr. TUTTLE. I am coming to that matter now.

Mr. Worthington also makes the following comparison of rates per mile received by his company for 60-foot railway post-office cars as compared with rates it would receive under its published tariff from Chicago to California for moving empty cars belonging to other railroads:

Railway postal-car pay for 60-foot car, per mile run— Tariff rates for empty sleeping and dining cars, per mile run— Tariff rates for passenger coaches, per mile run— Tariff rates for empty freight cars moving in freight trains, per 8. 3

He calls attention to the fact that the tariff rates mentioned "are for hauling in trains only, and do not include any obligation on the part of the carrying railroad for maintenance or cost of car ownership."

Mr. MAPES. Will the gentleman yield?

Mr. TUTTLE. Certainly.

Mr. MAPES. In order to be sure that I understand the gentleman, is it the statement of these railroad officials that they receive something about four times as much from other railroad companies for hauling the cars of those companies as they receive from the Government?

Mr. TUTTLE. These figures compare the postal-car rates with what is received from other railroad companies for hauling empty sleeping cars, dining cars, passenger coaches, and empty freight cars. It appears they receive approximately three times as much for hauling sleeping, dining, and passenger coaches as they receive for the postal-car pay per mile run.

Mr. MAPES. I suppose that is due somewhat to the fact they do not haul the cars of those other companies regularly;

but they do haul the postal cars every day. Mr. TUTTLE. That is probably a factor. Mr. STAFFORD. Will the gentleman yield?

Mr. TUTTLE. Certainly.

Mr. STAFFORD. The gentleman as a member of the com-mission has given the subject of the cost of carriage of railway post-office cars as full consideration as any Member of the House. I would like to ask him, so as to make clear his exposition, whether the rates, as quoted by Mr. Worthington, of 5.5 per mile run and the rate quoted by the representative of the Pennsylvania Railroad of 4.4 per mile run is the average rate, including their return for the tonnage on the mail car, that is usually carried in those cars, or whether it is merely the rate of pay based upon the prescribed rate-per-mile run of railway post-office cars?

Mr. TUTTLE. I will read Mr. Worthington's statement,

which I think answers the question:

To cover these expenses the railroads receive from the department for railway-post-office-car pay, for 60-foot car, \$40 per mile per annum, or 10.96 cents per day for furnishing a car, maintaining it, and hauling it both ways over a mile of railroad, this being equivalent to 5.46 cents per car-mile run. Assuming an average annual mileage of 100.000, the total railway-post-office-car pay per annum would be \$5,480, or about one-third of the above expenses. In the case of half lines, where no pay is received for return movement, the revenue would be only one-half of this.

Mr. STAFFORD. That statement shows it does not include any pay that the railroads receive for the mail that is included in railway post-office cars.

Mr. TUTTLE. It refers only to the railway-post-office-car

pay and not to the transportation of the mail in the car.

The Pennsylvania lines give 4.4 cents a running mile as the average present pay for their railway post-office cars and 3.4 cents as the cost of repairs, light, heat, and so forth, leaving 1 cent a mile for cost of hauling and return on capital invested.

Mr. Worthington, being reminded by the chairman that his computation was based entirely on his railway post-office revenue, and upon the latter's suggestion that he should have considered in his computation the revenue received from the mail carried in the railway post-office car, stated that if the pay for the 2½ tons were included the total rate for these cars would be about 20 cents, whereas for their passenger cars they received 31.3 cents.

Mr. A. H. Rowan, of the New York Central lines, in his testimony states that in addition to the transportation charge for the weight of mail handled in the car-estimated to be 2 to 3 tons—his lines receive for their railway post-office service pay ranging from 3.4 cents per mile for a 40-foot car to 5.04 cents per mile for a 60-foot car, making the average earnings on a railway post-office car 20 cents per mile as compared with 32 cents per car-mile received from passengers, the average number of passengers carried being 16.

The data in Table 7, House Document No. 105, shows that the operating expenses, excluding taxes, of a passenger train car mile-that is, the cost of running one passenger coach 1 mileare 18.5 cents; but perhaps a better determination of this carmile operating expense is the result of the special reports made to the Interstate Commerce Commission for the year ending June 30, 1912.

June 30, 1912.

Sixty-four railroads reported a complete separation of their operating expenses as between freight and passenger services in a special report required by the Interstate Commerce Commission in 1913. The average operating expense per passenger train car mile for all of these roads taken together for the year ending June 30, 1912, was 19.41, exclusive of interest, dividends, and taxes. This result is probably somewhat lower than it would have been if all roads had been included, because among the omitted roads are those in the New England States and the Pennsylvania Railroad, which have a higher operating expense per car mile than the above average. This is indicated by the fact the average passenger car-mile revenue of 62 roads was 23.9 cents as against 25.4 for the country as a whole.

It thus appears that the average passenger car-mile cost of operation is not far from 20 cents, and if the Government owned its own cars and engaged the railroads to operate them, a much lower rate than this could not be expected; and the authorities agree that the Government can not impose a confiscatory rate upon the carriers.

Gen. Stewart, on the basis of weighings in 1907, estimates that the transportation cost of mails carried in the full cars is \$15,382,443. To this should be added \$4,323,577 paid additionally for the cars, making a total cost of \$19,706,020 for the two items. The car miles made by railway post-office cars in 1913 was 104,588,541. Dividing this in the estimated cost above stated gives a car-mile rate of 18.84 cents. On this basis we would have to have a rate lower than this figure for all cars in order to effect an economy.

Mr. MAPES. Mr. Chairman, I do not want to interrupt the gentleman, but I am very much interested in what he has to say. Do the railroads claim that they are carrying the mails now at less than cost? What is the explanation of the wide difference in the figures that the gentleman has given?

Mr. TUTTLE. The gentleman means the difference between the Post Office figures of 18.84 and the Interstate Commerce

figures of 19.41. Mr. MAPES. I thought what the Government was actually

paying was something like 5.46.

Mr. TUTTLE. The 5.46 cents per car mile run is for railway post-office cars only. The Post Office and Interstate Commerce Commission figures cover the pay for the weight of the mails as well as for the railway post-office car.

Mr. MAPES. Is that ample compensation to the railroads for

the work that they are doing?

Mr. TUTTLE. The question of compensation is one upon which the department and the railroads have widely differed. The commission is about to bring in its conclusions, and the Post Office Department will probably insist that the railroads are receiving adequate pay. The railroad representatives who have appeared before our commission have claimed they are being underpaid by some \$15,000,000. I myself do not care to express an opinion as to the adequacy of the compensation at this time.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. TUTTLE. Yes.

Mr. STAFFORD. If I understand the exposition just presented by the gentleman, it costs, for the operation alone, per train-mile, for a passanger coach, 19.41 cents, whereas all that the Government pays for the use of the railway post-office car and the mail carried in that car is 18.84 cents, so that the Government is receiving a service to-day at 5.7 mills less than the cost of operation of a corresponding passenger car. Is that the deduction of the gentleman?

Mr. TUTTLE. That would be approximately the deduction. Of course, these two computations are made upon different sets of figures. The 19.41 cents rate was compiled by the Interstate Commerce Commission, as of June 30, 1912, while Gen. Stewart's figures are based upon the weighings of 1907, five years Of course, the conditions may have changed in the previous.

interval. Mr. WILLIS. Mr. Chairman, will the gentleman yield just there?

The CHAIRMAN. Does the gentleman yield?

Mr. WILLIS. Would it interrupt the course of the gentle-man's argument if he would discuss the question of rates of postage? Members of the House are receiving communications overy day about the penny-postage proposition. Has the gen-tleman's committee made any investigation on that subject; and if so, what is the conclusion arrived at, and what is the gentle-man's own opinion? The gentleman has studied the matter, and I am anxious to have his opinion,

Mr. TUTTLE. That has not been under consideration by the committee

Mr. WILLIS. I understand; but it is an interesting postal The gentleman does not care to discuss that?

Mr. TUTTLE. No; I do not care to discuss that, because I have only a limited time, and I want to finish with this propo-

The CHAIRMAN. The time of the gentleman from New

Jersey has expired.

Mr. TUTTLE. Mr. Chairman, I ask unanimous consent to

extend these remarks in the RECORD.

The CHAIRMAN. The gentleman from New Jersey [Mr. TUTTLE] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. TUTTLE. It has been suggested that private concerns, owning their own cars, are paid by the railroads three-quarters of a cent or a cent a mile for the privilege of hauling these cars. In reply to this I quote Dr. Lorenz:

cars. In reply to this I quote Dr. Lorenz:

It needs no great acumen to see that if the railroads pay anyone for the privilege of hauling his cars they get back the money, unless there is an illegal rebate, in some other manner. In the case of these special commodity shipments the railroad gets its remuneration by charging a rate for the commodities carried in the car, the mileage charge paid by the railroad company being explained by its being saved the expense of furnishing and keeping in repair the special type of car required. If it be desired that the railways pay the Government something for the privilege of hauling the postal cars, it would be necessary, under any equitable arrangement, at the same time to have the Government pay the railroads for the mail carried in the cars at a sufficiently high rate to compensate them for the service of transporting the car. How would the Government ownership of the car help to determine what the proper transportation rate would be? Private shippers of perishable commodities have a reason for wishing to own their own cars, which would be of no weight in the case of the Post Office Department. That reason is that, irrespective of any direct saving, there is an advantage in having an adequate supply of cars adapted to their special needs. There is no complaint, however, on the part of the Post Office Department that it is not supplied with the special cars which it needs.

Attention has been called to the Pullman cars which are operated by the railroads. In this case it would be difficult to make a comparison, as the rates paid vary with the amount of earn-

This is true also of the express companies, and it would be difficult indeed to compare the compensation paid by the express companies with that paid by the Government for the transportation of the mails.

The railroad company gets a percentage of the express rate, while the Post Office Department pays according to the weight and distance carried. The only figures on a common basis are those for November, 1909, when the car-foot mileage in pasthose for November, 1909, when the car-toot mileage in passenger trains was ascertained separately for passenger, mail, and express services. If the empty space hauled in connection with the mail service is charged to that service, then the comparison is as follows: From the mail, 3.37 mills per car-foot mile; from express, 3.86 mills; and for other passenger-train services, 4.34 mills.

It appears from these computations, therefore, that the express companies in 1909 were not favored beyond the Government, but, of course, conditions have changed and these figures may be unsafe to-day.

There are fortunately certain kinds of private-owned cars which the railroads operate, and the rates charged for their haulage may be considered an indication of what the Interstate Commerce Commission believes to be equitable for the passenger

For example, the railroad tariff for hauling private passenger cars, not occupied, is 25 cents per car-mile; if occupied, 25 passenger fares, or 50 cents per car-mile.

Special baggage cars, loaded but unoccupied, must pay 25 cents per mile for first 500 miles, and 20 cents per mile for longer distances. If accompanied, 30 cents per mile, and if passengers are also carried, 25 fares are exacted.

The Fish Commission has its cars hauled at rates paying from 10 to 20 cents per car-mile, but the acting commissioner states that he thinks that the railroads appreciate the advantage of having the lakes contiguous to their lines stocked with fish and therefore grant extremely low rates. Many lines give free transportation.

A careful study, therefore, of every phase of this question leads me to the conclusion that there is no ground for the contention that an economy would result from the purchase of the railway post-office cars. Mail cars do not move themselves, and the Government would have to pay the railroads for hauling the cars either directly or so many cents per car-mile, or indirectly by paying for the mail in cars at so much per ton-mile. In either case the Government ownership of the cars would not

help in the slightest degree to tell what the proper transportation charge would be.

I submit that the wise course will be to suspend consideration of this section until the report of your committee is before you and the House is fully informed upon one of the most important problems awaiting solution by this practical and business-like

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. KAHN].

The CHAIRMAN. The gentleman from California [Mr. Kahn] is recognized for 10 minutes. Mr. KAHN. Mr. Chairman, on the 10th of last October, when the urgent deficiency bill was before this House, the Democratic majority raped the civil service successfully; and, doubtlessly emboldened by their success on that occasion, they are preparing to commit another outrage in the same direction in the pending

Post Office appropriation measure.

The provisions of section 6 of this bill would take the assistant postmasters of this country out of the civil service. Those employees can be recruited, and are recruited, from the clerks and carriers of the Postal Service. An efficient clerk or an efficient carrier, ambitious to rise in the world, may take a civilservice examination for the position of assistant postmaster, and if he be successful and a vacancy should occur there is a possibility of his appointment to that position under the civilservice law. And yet the Democratic majority of this House under section 6 of the Post Office appropriation bill would deprive the ambitious clerks and carriers of the right to take a civil-service examination in order that they might improve their stations in life.

I am not surprised at the attitude of the gentlemen on the Democratic side of this House. The pressure for place is undoubtedly very great. Your Democratic constituents are demanding their reward. They want the jobs. They insist on their pound of flesh. Not alone are the civil-service positions sought for, but various executive chiefs have demanded the resignation of postmasters, United States marshals, district attorneys, and other Federal employees, even though those officials still had two or three years to serve under their commissions. Happily some of these men have had the backbone and the courage peremptorily to refuse to surrender their commissions and to demand that their official conduct be investigated, to find out why they should be removed from office.

Mr. Chairman, the Democratic national convention which met in Baltimore a year ago last summer adopted this civil-service plank:

The law pertaining to the civil service should be honestly and rightly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather than service rendered to a political party. And we favor a reorganization of the civil service with adequate compensation commensurate with the class of work performed for all officers and employees. We also favor the extension to all classes of civil-service employees of the benefits of the provisions of the employers' liability law. We also recognize the right of direct petition to Congress by the employees for the redress of grievances.

I commend that plank to my friends on the Democratic side of this House

The law pertaining to the civil service should be honestly and rightly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather than service rendered to a political

When that plank was written it was doubtlessly lauded to the skies by every Democratic candidate for Congress. You won an overwhelming victory at the polls. And now you are deliberately trying to revert to the old Jacksonian doctrine, "To the victor belong the spoils."

With my Democratic friends that language and that plank

are now simply an agglomeration of words, words, words.

Mr. DIFENDERFER. Mr. Chairman, will the gentleman

yield?

Mr. KAHN. In order that there might be no mistake about pledging the candidates of the Democratic Party to the planks of the platform, the Democratic national convention first nominated its candidates and then submitted and adopted the platform in order that the candidates might know positively what the tenets of the party would be, and govern themselves accord-

ingly.
Mr. DIFENDERFER. Mr. Chairman, will the gentleman vield?

The CHAIRMAN. Does the gentleman yield?
Mr. KAHN. And the Democratic candidates subsequently accepted the platform and with it, of course, the civil-service plank. And yet, when the urgent deficiency bill was presented to the distinguished leader of the Democratic Party—the present Chief Executive-he finally affixed his signature to the bill, civilservice plank notwithstanding, although I am willing to admit that he did it with a very wry face.

Mr. DIFENDERFER. Will my friend from California permit a question?
Mr. KAHN. Certainly.

Mr. DIFENDERFER. The platform of the Democratic Party a year ago last summer was adopted just prior to the presidential election of that year, was it not?

Mr. KAHN. Yes.

Mr. DIFENDERFER. It had no particular reference to the placing of 51,000 employees under the civil service afterwards

by Executive order, had it?

Mr. KAHN. If the gentleman has followed the history of his country, he must know that practically every President since Grover Cleveland, who began the practice, has issued an Executive order before he retired from office extending the civil service of the United States.

Mr. DIFENDERFER. Except President McKinley.
Mr. KAHN. President McKinley unfortunately became a
martyr to duty. He was not allowed to fill out his term.
Mr. DIFENDERFER. Then do you believe in disregard-

ing the Executive orders of a prior President of the United

Mr. KAHN. Executive orders have been issued frequently, and have generally been respected by the successors of the Presidents who issued them. Thus when President Cleveland extended a blanket order covering many employees of the Government into the classified civil service, the President who

succeeded him did not undertake to reverse that order.

Mr. DIFENDERFER. In the case that I have particular reference to President McKinley did reverse the order of Presi-

dent Cleveland.

Mr. KAHN. I do not recall that.
Mr. DIFENDERFER. He absolutely revoked it.
Mr. KAHN. I do not recall the incident.

Mr. DIFENDERFER. If my friend from California will permit, I do not want it understood that I am opposed in any way to merit service, because I believe that the efficiency of this Government depends largely upon it, but I do insist that we ought to have merit service and not snivel service.

Mr. KAHN. When these orders have been issued heretofore, the employees of the Government who were affected by them have generally had experience extending anywhere from 1 to 20 years or more, and it has been presumed by the executives of the Government, and, I think, rightly so, that the officers cov-ered into the civil service were entitled by their experience to continue in the employ of the Government.

Mr. PAYNE. Will the gentleman allow me?

Mr. KAHN. Yes.

Mr. PAYNE. I think the gentleman ought to limit that. The

Cleveland order extending to railway-mail clerks the protection of the civil service was issued very soon after the fresh clerks came in, and I remember distinctly in my own district the new railway-mail clerks got so balled up that letters were not delivered for a week, and sometimes longer, and papers accumulated for several weeks before they were delivered, because of the freshness of the men who were put into the service. When McKinley came in, in order to relieve the mails, he suspended that order of President Cleveland and put back some of the old experienced clerks who had been removed in order to make place for the Cleveland employees, and after that he extended the order, covering those clerks.

Mr. KAHN. I thank the gentleman.

Mr. FITZGERALD. If the gentleman will yield, perhaps he will explain why President McKinley revoked the order turning into the classified service the employees in the Internal Revenue offices, and later, after the employees had all been changed by the Republican collectors, he then issued another order putting them back into the classified service. Was that because there was a congestion in the mails?

Mr. PAYNE. That is a suggestion, but not very well founded

in fact.

Mr. KAHN. However, the employees who have generally been covered into the civil service by Executive order have been men who have had more or less experience, and in order to retain the services of experienced men they were continued under these orders

I do not desire to detain the committee any longer. I desire to ask unanimous consent to extend my remarks by inserting in the RECORD an article published in the North American Re-

view of December, 1913, written by Col. George Harvey, its editor, being an editorial on "Breaking the Pledge."

The CHAIRMAN. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is there

objection?

There was no objection.

The article referred to is as follows:

BREAKING THE PLEDGE.

And 'tis a kind of good deed to say well;
And yet words are not deeds.

The Democratic Party, acting through its representatives assembled in convention in Baltimore, made the following declaration:

"The law pertaining to the civil service should be honestly and rigidly enforced, to the end that merit and ability shall be the standard of appointment and promotion, rather than service rendered to a political party."

The candidate for President designated simultaneously with the promulgation of this doctrine was a vice president of the National Civil Service Reform League at the time of his nomination and continued to hold that position during the campaign which resulted in his election. In August, 1912, replying to an inquiry addressed by the league to the three leading candidates, he wrote as follows:

"I am a hearty believer in the principles of civil-service reform and shall take pleasure at all times in doing what I can to promote those principles in practice."

One month after he was elected President of the United States, Mr. Wilson declined reelection as vice president of the Civil Service Reform League in a communication to the chairman of the committee on political activity reading as follows:

"Thank you for your thoughtful letter of November 26. Perhaps It would be wise for me not to associate my name with any league or association during my term as President, though I beg you to believe that my interest in and my sympathy with the work of the Civil Service Reform League has not been and can not be abated."

On September 8, 1913, following the precedent, established at President Wilson's instigation, of attaching "riders" to appropriation bills, Representative Barrillari, of Georgia, proposed an amendment to the urgent deficiency bill, reading as follows:

"All Executive orders heretofore made placing the positions of deputy marshals and deputy internal-revenue collectors in the classified service, and all regulations made thereunder, are hereby revoked, and hereafter appointments to said positions

of 1883.

In this form the bill came before the House for final action on October 10, and was adopted by a vote of 110 to 106. All of those voting in the affirmative were Democrats. Of those voting in the negative, 56 were Pemocrats, 44 were Republicans, and 6 were Progressives. Three days later the "rider" passed the Senate by a vote of 31 to 18, 2 Democrats voting in the negative.

Simultaneously with the passage of the bill by the House the National Civil Service Reform League unanimously adopted the following resolutions:

2 Democrats voting in the negative.

Simultaneously with the passage of the bill by the House the National Civil Service Reform League unanimously adopted the following resolutions:

"Resolved, That the National Civil Service Reform League most strongly opposes and condemns congressional action as taken in the new tariff law and as proposed in the urgent deficiency bill involving the exemption of important departments of the civil service from the progress toward the general recognition and enforcement of the merit system in the Federal service but also as a departure from the solemn piedge and definite promise to sustain and promote the merit system contained in the platform of the Democratic Party.

"Resolved, That the league officially condemns the practice of attacking the merit system by riders to revenue and appropriation bills, as such provisions have no proper place in such bills, and such practice prevents the fair and independent consideration of the merits of the propositions contained in such riders."

Upon the passage of the amendment by the Senate, the secretary of the league telegraphed to the President as follows:

"On behalf of the National Civil Service Reform League I earnestly urge that you veto urgent deficiency appropriation bill because of provision exempting from civil-service law subordinates of collectors of internal revenue and marshals. Provision affects not only deputies but all subordinates of collectors and marshals and is a vicious attack on merit system through rider legislation."

On October 22, nine days after receipt of the protest by the league, President Wilson signed the bill and filed the following memorandum:

"I am convinced, after careful examination of the facts, that the offices of deputy collector and deputy marshal were never intended to be included under the ordinary provisions of the civil-service law. The control of the whole method and spirit of the administration of the provision this bill, which concerns the appointment of these officers, is no less entirely

shals. But why? What are the "facts" from which this conclusion is deduced? No such exemption appears in the statute itself and but two official rulings have been rendered on the question. One was by the Attorney General, in 1907, and the other by the Comptroller of the Treasury, in 1910. Both wera to the effect that these appointments do fall within the meaning of the statute and that the President had the undoubted right, which thereupon he exercised, to include them in the classified service. On this statement, which it temperately pronounces "unfortunate," the Civil Service Reform League, of which Mr. Wilson was but recently a vice president, and is still, we assume, : member, "takes issue squarely with the President."

With respect to the army of subordinates and employees withdrawn by the "rider" from the classified service the President maintains a discreet silence. Here apparently could be found no room for even an imagined interpretation of intent.

The President continues:

"The control of the whole method and spirit of the administration of the proviso in this bill, which concerns the appointment of these officers, is no less entirely in my hands now than it was before the bill became a law."

That is, the President might issue an Executive order, as his predecessors had done, requiring collectors and marshals to continue to appoint their subordinates from the civil-service registers. The league begged him to prove his good faith by doing so forthwith. His response appeared in the following order issued by Commissioner Osborn, of the Internal Revenue Bureau, on October 29:

"Collectors of internal revenue:

"Referring to that parties of the appears to the proton of the p

"Collectors of internal revenue:

"Collectors of internal revenue:

"Referring to that portion of the urgent deficiency act, approved October 22, 1913, relating to the appointment of deputy collectors of internal revenue, collectors are advised that the object of this provision of law is efficiency and only efficiency, and that any tendency to use this class of appointments merely for personal reward, or for anything that savors of the spoils system, will be regarded as a very serious disregard of public duty, and that they will be expected to deal with these matters in a spirit which the whole country will approve.

"Hereafter when vacancies in this class of offices occur or changes are contemplated, and before such vacancies are filled or such changes are effected, collectors will forward to this office the names of the persons whom it is desired to appoint, together with a statement of their qualifications and records.

"No appointments in this class of officers shall hereafter be made by collectors without the approval of the department.

"(Signed) W. H. Osborn,

"Commissioner.

"By direction of the President. (Signed) W. G. McAdoo, "Secretary of the Treasury."

"(Signed) W. G. McAdoo,

"Secretary of the Treasury."

"Efficiency and only efficiency" is a most resolute phrase, used first by Andrew Jackson and since by every spoilsman in public office. But the true way to obtain efficiency, according to the league to whose principles Mr. Wilson has so frequently and so recently avowed his allegiance, is through the merit system, which now, so far as it applies to some thousands of employees, by his signature to the bill and by his refusal to renew the Executive order, he has abolished. The Osborn notice contains not a word which President Jackson would have disapproved. It leaves the collectors wholly free to make whatever changes they may see fit, after having set forth the admirable qualifications which assuredly every appointee will possess, for the information and approval of the sympathetic department. "Any tendency to use this class of appointments" for political purposes "will be regarded as a very serious disregard of public duty." Yes, indeed; very serious! Yery solemn would be better; very solemn buncombe.

To say, as Commissioner Osborn says, "by direction of the President." that a change which wholly eliminates restriction upon appointments and reestablishes what Woodrow Wilson so accurately described in The State as "the unfortunate. the demoralizing influences which have been allowed to determine Executive appointments since President Jackson's time," in no way "sayors of the spoils system," evinces a hardihood of presumption that would have surpassed the imagination of Machiavelli.

President Wilson's reference to the country-wide knowledge of his "warm advocacy and support" of civil-service reform calls for no comment. It has long been recognized and served an excellent purpose in winning votes in the recent campaign. The point in issue is one not of profession but of performance.

Why did President Wilson permit this backward step to be taken? That is the question. By a nod of his head he could have beaten it in the House of Representatives, where a chang

Mr. KAHN. I yield back the remainder of my time. Mr. SAMUEL W. SMITH. I yield 10 minutes to the gentle-

man from Ohio [Mr. WILLIS].

The CHAIRMAN. The gentleman from Ohio [Mr. WILLIS]

is recognized for 10 minutes.

Mr. WILLIS. Mr. Chairman, in the course of this debate the attitude of President McKinley has been brought in question with reference to the civil service. Fortunately, I happen to have before me a copy of the Congressional Record of April 24, 1890. I want to read for the benefit of the erring brethren across the aisle just what Mr. McKinley said on that occasion in order that there may be no doubt at all as to the position which that great, heroic soul occupied with reference to this matter. He said:

Mr. McKinley. Mr. Chairman, in the single moment that I have I desire to say that I am opposed to the amendment of the gentleman from Tennessee to strike from this bill the appropriation for the execution of the civil-service law. My only regret is that the Committee on Appropriations did not give to the commission all the appropriation that was asked for for the improvement and extension of the system. If the Republican Party of this country is pledged to any one thing more than another, it is to the maintenance of the civil-service law and its efficient execution; not only that, but to its enlargement and its further application to the public service.

The law that stands upon our statute books to-day was put there by Republican votes. It was a Republican measure. Every national platform of the Republican Party since its enactment has declared not only in favor of its continuance in full vigor but in favor of its enlargement, so as to apply more generally to the public service. And this, Mr. Chairman, is not alone the declaration and purpose of the Republican Party, but it is in accordance with its highest and best sentiments—aye, more, it is sustained by the best sentiment of the whole country, Republican and Democratic alike. And there is not a man on this floor who does not know that no party in this country. Democratic or Republican, will have the courage to wipe it from the statute book or amend it, save in the direction of its improvement.

Look at our situation to-day. When this party of ours has control of all the branches of the Government it is proposed to annul this law by withholding appropriations for its execution, when for feur years under a Democratic administration nobody on this side of the House had the temerity to rise in his place and make a motion similar to the one now pending for the nullification of this law. We thought it was good then, good enough for a Democratic administration; and I say to my Republican associates it is good enough for a Republican administration; it is good and wholesome for the whole country. If the law is not administered in letter and spirit impartially, the President can and will supply the remedy. Mr. Chairman, the Republican Party must take no backward step. The merit system is here and it is here to stay, and we may just as well understand and accept it now and give our attention to correcting the abuses, if any exist, and improving the law wherever it can be done to the advantage of the public service.

William McKinley, speaking on this floor 24 years ago, could not imagine the situation that actually confronts us to-day. wherein we see the party in control of affairs in this House seeking by subterfuge to strike down the civil service. That the Democratic majority of this House is opposed to the merit system is indicated by the fact that when statements have been made here, as they have been made within the last two days, attacking not simply the appointment of assistant postmasters under civil-service rules but attacking the Rural Free Delivery Service and other branches of the civil service-when these statements have been made by gentlemen across the aisle they have been received every time by loud applause on the Democratic side, thus indicating that it is the purpose not of the great man in the White House, I am glad to say, not of the Postmaster General, but it is the purpose, apparently, of a majority of the gentlemen on the Democratic side of this House to strike down and paralyze the civil-service system of the

Now, I want to read again two or three sentences from what

The merit system is here, and it is here to stay, and we may just as well understand and accept it now and give our attention to correcting the abuses, if any exist, and improving the law wherever it can be done to the advantage of the public service.

The civil service is here, and it is here to stay, and it will be sustained by the best sentiment in this country, without regard to political opinion.

Mr. BOOHER. Will the gentleman yield? Mr. WILLIS. I will yield to the gentleman. Mr. BOOHER. As the gentleman has read what Mr. McKin-

ley, as a Member of Congress, said in 1890, will be kindly read

what Mr. McKinley, as President, did in 1897? Mr. WILLIS. I do not have that before me.

[Laughter on the Democratic side.] All I know about that proposition is that President McKinley and the party for which he spoke was the founder, originator, and defender of the civil service, and that they have defended it in the history of this country, and they proposing to continue to defend it against the veiled assaults that are being made upon it by its enemies, the professional job hunters and hungry place hunters. Mr. FINLEY. Will the gentleman yield?

Mr. WILLIS. Yes.

Mr. FINLEY. I understood, perhaps erroneously, that Senator Pendleton, of Ohio, had a great deal to do with the passage of the civil-service law.

Mr. WILLIS. Certainly, most every good thing comes out of

Ohio; the gentleman is correct. [Laughter.]

Mr. FINLEY. How does the gentleman figure that his party

originated the law and was responsible for it?

Mr. WILLIS. Senator Pendleton was a great Democrat, but he had to go outside of his party to get support for the law, and therefore it is a Republican law. It was passed by a Republican Senate and signed by a Republican President.

Mr. BOOHER. Will the gentleman tell us why Charles Sumner, of Massachusetts, a distinguished Republican, denounced it as the "snivel-service" law?

Mr. WILLIS. Oh, I am not responsible for that; what I am talking about is the attack by the Democratic Party on the law now

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. WILLIS. Certainly.
Mr. GARRETT of Tennessee. Does the gentleman from Ohio remember the remarks of another gentleman from Ohio-a late Member of the House-about the civil service? I refer, of course, to Gen. Grosvenor, whom many of us remember very pleasantly?

Mr. WILLIS. I do not recall the remarks of Gen. Grosvenor, but I would be glad to have the gentleman quote them. I know they would be entertaining and instructive. I know, of course, that he was opposed to the civil-service law.

Mr. CARTER. Will the gentleman yield?

Mr. WILLIS. I will.

Mr. CARTER. The gentleman spoke about professional job

Mr. WILLIS. Oh, I did not refer to any Member of the House, but to the gentlemen back home who are writing to Democratic Members of the House, making their lives miserable in demanding appointments,

Mr. CARTER. That is whom I thought the gentleman referred to, but I want to ask him as to the fellow back home who has been taking his part in the community and making the best citizen he could be have the best citizen he could, is he, because he seeks a place in the post office, any more of a professional job hunter than the man who runs for Congress?

Mr. WILLIS. I do not think so—not at all; but the point I make is this: I do not think there is anything disreputable at all in seeking to get a post-office job. If I were a Democrat and in good standing, I have no doubt that I would be a candidate for one now.

Mr. BOOHER rose.

Mr. WILLIS. Oh, let me finish that-one at a time, and it What I say is that it is unwise legislation to will last longer. turn a great business concern—the greatest not only in this country but in the world-over to a lot of mere politicians, whose only recommendation is that they have been able to deliver Squasbville Township or the sixteenth ward

A little while ago the gentleman from Missouri [Mr. Lloyd] delivered a most instructive and remarkable address, in which he traced with great lucidity and eloquence the growth and development of the Post Office Department in the past 13 years. Among other important facts, he pointed out that in that period the annual appropriations for the Rural Free Delivery Service had increased from \$400,000 to more than \$48,000,000, and that the Post Office Department is now handling \$625,000,000 worth of business per annum. This is the greatest business institution, not only in this country but in the whole world, and the fact that this immense amount of business has been transacted practically without scandal and with the greatest degree of efficiency is the highest possible comment upon the work of the civil service. It seems to me extremely bad business judgment to turn a great enterprise of this character over to the management of those who have had no practical experience in handling the problems with which they are to deal. These assistant postmasters throughout the country are trained men, they have had experience in their work, they understand the intricate details of the parcel-post system and the recently established postal-savings bank. It certainly would be an inexcusable business blunder to remove these men, who are holding their position because of merit, and put in their places men who were appointed as a reward for political services. On this point the minority on the Committee on the Post Office and Post Roads say with great force and clearness:

There are about 2,400 assistant postmasters in the United States, practically all of whom have entered the classified service by a civil-service examination. It is proposed to take these tried and faithful public servants out of the classified list and make their tenure of office dependent on the whim of the postmaster appointed under the spoils system as a reward for party service. In many, if not most, cases it would be equivalent to a dismissal from office without cause or excuse. But the injustice of the proposal as affecting these men is not the main objection to it, but that it is an attack on the merit system and civil-service reform generally. It is a backward step, and will be injurious not only in its effect on the Postal Service but to the cause of good government generally. It is one step in the direction of the readoption of the spoils system.

For these reasons, so clearly stated by the gentleman from Minnesota [Mr. Steenerson] and the gentleman from Illinois [Mr. Madden], I am strongly opposed to section 6 of this bill and trust that, in the interest of the purity of our civil service, it may be stricken from the measure.

Mr. BOOHER. Mr. Chairman, will the gentleman yield?

Mr. WILLIS. Certainly.

Mr. BOOHER. I want to ask my friend from Ohio if he is not more concerned now and more agitated over the idea that a good many Republicans are likely to be turned out and Democrats put in their places than he is concerned about the civil

Mr. WILLIS. Oh, the gentleman is tremendously mistaken. I am not very much of a partisan.

Mr. BOOHER. I understand the gentleman is not. just about as much a partisan as I am, but is it not the fact that the gentleman's party is bitterly opposed to this provision of the bill because they are afraid that a great many Republicans will be turned out of office and the Democrats put in?

Mr. WILLIS. Oh, I know my friend from Missouri so well-

Mr. BOOHER. That is why I am urging it, I will be honest

enough to say. [Laughter.]

Mr. WILLIS. I know my friend so well that I know he is perfectly frank and sincere in the position that he takes, and I want to say to him in the greatest sincerity and frankness that that is not the only reason, nor the main reason, why I am in favor of the maintenance of the merit system.

Mr. BOOHER. No; it is not the only reason.
Mr. WILLIS. I believe sincerely, and I think the gentleman believes sincerely, and I think that every friend of the civil-service system in this country believes sincerely, that this is a blow at the civil service, and that is why I am opposed to section 6.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 10 minutes more to the gentleman from Ohio.

Mr. WILLIS. Mr. Chairman, if it be true that the opposition to this is because it is going to take a Republican out of office, how does the gentleman explain the position that is taken by the National Civil Service Reform League? I have before me a document which I shall ask permission to insert in the Record. Who are some of the men whose names appear upon it? The document referred to is as follows:

NATIONAL CIVIL SERVICE REFORM LEAGUE, Offices 79 Wall Street, New York, January 14, 1914.

To the Members of the House of Representatives:
On behalf of the National Civil Service Reform League I respectfully but earnestly urge that the rider in the Post Office appropriation bill now before the House taking assistant postmasters in first and second class offices out of the classified curvil postmasters in first and second class offices out of the classified curvil control of the classified service, they will become political obtained them for the management of the office. If the assistant postmasters are removed from the classified service, they will become political obtained the control of th

ROBT. W. BELCHER, Secretary. Mr. BOOHER. Will the gentleman tell the committee who the Civil Service Reform League is?

Mr. WILLIS. I am going to tell about that. In the first place, if it is a matter that concerns simply Republicans and

Democrats, will not the gentleman explain why the great Postmaster General, whom we all love and respect through our knowledge of his eminent qualifications, is standing up so courageously in the face of a hungry, rioting crowd of office seekers, saying that the civil-service system shall be main-[Applause on the Republican side.]

An article in the Washington Times of January 15 contains the following statements, including Postmaster General Burle-

Backed by President Wilson, Postmaster General Burleson is prepared to make a hard fight to prevent the disintegration of the merit system in the Postal Service.

That the President has considered seriously the veto of the Post Office appropriation bill, if necessary, in order to get rid of the spoils provision concerning the assistant postmasters is very definitely understood. It is not believed he will be compelled to go to such an extreme, because, with a better understanding of his insistent support of the civil-service law it is believed the Senate will remove the obnoxious proviso.

PROBE UNDER WAY.

The Civil Service Commission has been giving attention to various reports of violations of the law in different departments of the Government service. It has found the Postmaster General thoroughly in sympathy with its purposes of preserving the law's integrity; and the commission and the Postmaster General count confidently on the fullest measure of support from the President.

Just at this time the Post Office Department is the center of interest. Mr. Burleson is a determined supporter of the merit system, and has insisted that under no consideration will he permit the department to have its efficiency in anywise impaired by reason of politics and patronage. His ambitions for the department are concerned with making a record of efficiency and development. He has a good deal of sympathy for those Democrats who think the civil-service law has been administered in a way hostile to them in the past; but, when urged to turn the Republicans out by wholesale, he recently said that "two wrongs would not make a right," and that after both parties had mocked the purposes of the law in such fashion, there would be nothing worth while left of it. Therefore he insisted that merit should continue to rule, even if Republicans kept jobs that they didn't originally get strictly on merit.

DEMOCRATS ARE DISPLEASED.

DEMOCRATS ARE DISPLEASED.

DEMOCRATS ARE DISPLEASED.

This attitude has been by no means pleasing to a good many Democrats in active politics, who feel constantly the pressure from patriots at home in need of the jobs, but the Postmaster General has stood pat and is still standing.

Recently, when the rider regarding assistant postmasters was written into the Post Office appropriation bill, he wrote a letter fully setting forth his views on this civil-service subject. It was addressed to Chairman Moon, of the Post Office Committee, and protested against the spoils rider. This letter, to which reference has repeatedly been made, has never till now been made public. Its text indicates the character of the contest that will be likely to follow if there is persistence on the part of Congress in efforts to open up the spoils jack pot.

ATTITUDE OF BURLESON

The letter follows:

The letter follows:

MY DEAR JUDGE MOON: I am somewhat disturbed by a paragraph in this morning's paper to the effect that your committee has voted to put into the Post Office appropriation bill for the next fiscal year a provision removing the position of assistant postmaster from the classified service. I think the enactment of such a provision would be subversive of the best interests of the Postal Service, and certainly it would militate against the effectiveness of the policy outlined in the last annual report of the department.

There are at this time 2,464 post offices of the first and second classes in which the positions of assistant postmaster are classified. All save about 100 of the persons occupying these positions are now within the classified service. In these 160 cases the benefits and rights of classification have been withheld from the incumbents because they have failed to satisfy this department as to their capacity for efficient service.

MERIT SYSTEM NECESSARY.

MERIT SYSTEM NECESSARY.

In the interest of the most efficient and effective Postal Service it is vitally necessary that the positions of assistant postmaster be filled by persons specially qualified to discharge the duties thereof, and I feel that no person should hold the position of assistant postmaster whose capacity and efficiency has not been properly and thoroughly tested. Among the qualifications necessary for this position are practical knowledge of and experience in post-office work, coupled with administrative ability. The present administration has been rigidly enforcing the policy of filling these positions either by the promotion of competent employees already in the office or by the transfer of experienced employees from some other branch of the Postal Service. Only in rare instances are postmasters permitted to fill the position otherwise, and then only by selection from a certification of eligibles resulting from an open competitive civil-service examination.

In connection with this subject I wish to direct your attention to the following excerpts from the last annual report of this department:

"BLOW TO PARTISANSHIP.

"The prime consideration in perfecting the personnel of the Postal

"The prime consideration in perfecting the personnel of the Postal Service should be to recognize efficiency and to eliminate partisanship. It is the earnest hope that ultimately all positions will be covered under the classified civil service and that merit and faithfulness will be the sole consideration in making appointments as well as promotions." (Page 8.)

sole consideration in making appointments as well as promotions."
(Page 8.)

"It is hoped that by thus maintaining a high standard of efficiency for postmasters and keeping paramount the interest of the Postal Service in making appointments that the way will be made clear for the eventual classification of all presidential postmasters." (Page 43.)

"The post-office system is essentially a business institution. It touches every home, comes in contact with every commercial institution and with those engaged in every line of industrial enterprise throughout the country, and in the nature of things it is highly important that only the most efficient employees should be in its service. For this reason the merit system should be adhered to in the Post Office Department above all others in order to secure the very highest standard of efficiency in the conduct of its affairs." (Page 43.)

I have received no official advice as to the accuracy of the newspaper report referred to, and therefore my anxiety and deep interest in the

Postal Service must be the excuse for this letter. I trust, however, that in its wisdom your committee will not see fit to recommend the enactment of the legislation referred to.

ALBERT S. BURLESON.

Why do you not stand with your President? There is no doubt about his attitude. The Postmaster General is standing as a guardian between the Post Office Department and the crowd of office seekers, and I am asking you simply to stand by your leaders. About this Civil Service Reform League

Mr. BOOHER rose.

Mr. WILLIS. Oh, I can not yield now.

Mr. BOOHER. I want to answer what the gentleman has just said.

Mr. WILLIS. But I want to answer him first. Who are some of the men in this National Civil Service Reform League? The gentleman wants to know. Here is one—Mr. Charles J. Bonaparte. Does anybody suppose that the Hon. Mr. Bonaparte is lying awake nights because a Republican is going to lose his office? [Cries of "Oh, yes," on Democratic side.] gentlemen are sadly mistaken in their knowledge of political conditions if they think that. Then there is ex-President Charles W. Eliot.

Mr. BAILEY. He is a Republican. Mr. WILLIS. Oh, no. The gentleman shows his lack of acquaintance with the political situation when he says that. Then there is the Hon. Franklin MacVeagh. Everybody knows he occupied a position as a Cabinet member in the preceding administration, but it is reported he was a Democrat and a free trader, even while he was in the Cabinet. [Laughter on the Democratic side.] Others of the eminent men who are at the head of the National Civil Service Reform League are Hon. Joseph Choate; Hon. George Gray, of Delaware, a Democrat; Hon. Seth Low, Dr. Harry Garfield, and President A. T. Hadley. Now, let us be very frank about this, as my friend from Missouri [Mr. Booher] is. There is no doubt about the position he takes on this matter, because he wants to put Democrats in office, and he does not care a fig about the civil-service system. Let me tell you that if it is supposed that public sentiment is back of this thing a great mistake is made. There are some good things in this bill; I am not complaining about all the work of the committee. This section 7, providing for compensation features, is eminently fair and humanitarian.

This section provides:

That hereafter the Postmaster General shall have authority to employ acting employees in place of all employees or substitutes hereinafter mentioned who are injured while on duty, who shall be granted leave of absence with full pay during the period of disability, but not exceeding one year, then at the rate of 50 per cent of the employee's salary for the period of disability exceeding one year, but not exceeding 12 months additional, and to enable the Postmaster General to pay the sum of \$2,000, which shall be exempt from payment of debts of the deceased, to the legal representatives, for the benefit of those dependent on him for support, of any railway postal clerk, substitute railway postal clerk, supervisory official of the Railway Mail Service, letter carrier in the City Delivery Service, rural letter carrier, post-office clerk, or special-delivery messenger who shall be killed while on duty, or who, being injured while on duty, shall die within one year thereafter as the result of such injury: Provided, That no compensation shall be paid any such employee for any injury occasioned by his own negligence.

These provisions are eminently fair and just and in line with humanitarian legislation. It certainly is proper that the beneficent provisions of the compensation act which now apply to those who are injured in the Railway Mail Service should be applicable to substitute postal clerks, letter carriers, rural carriers, and to post-office clerks and to special-delivery messeugers. These provisions certainly ought to meet with the approval of everyone who is inclined to do the fair thing with reference to those who are employed in the Government service.

Section 8, in regard to the construction of steel railway postoffice cars, is a good provision. It provides, in part, as follows:

That the Postmaster General is hereby authorized in his discretion to contract for the construction of and to purchase steel full railway post-office cars and storage mail cars, and to pay not exceeding \$200,000 for the same out of the appropriation for railway post-office cars.

It would seem that no argument was necessary to show the justice and propriety of legislation of this character. long time the railway postal clerks have been subjected to the awful dangers that must necessarily attach to travel in wooden cars in heavy trains made up of steel passenger cars and heavy sleepers. The amendment which this section seeks to place upon the postal laws is certainly a fair one and meets with my hearty approval. It has been too long delayed. I trust that it will be only a short time until all the railway postal clerks are housed in steel cars.

Section 9, for the enlargement of the payment of certain employees, is proper and right.

Section 9 provides:

That from and after the 1st day of July 1914, the compensation of rural letter carriers for carrying the mail six days each week on stand-

ard routes of 24 miles in length shall be the sum of \$1,150 per annum, to be paid monthly; and on routes exceeding 24 miles in length, the sum of \$22.50 per mile per annum for each mile in excess of 24 miles; and on routes under 24 miles in length, an increase of 10 per mile per annum; on routes carrying the mail three times each week, of the same length as above, the pay shall be one-half the compensation there provided: Provided, That no carrier's pay shall be increased more than \$75 per annum on account of the passage of this act.

This reasonable increase of compensation for the rural letter carriers is surely to be commended. The work of these public servants has been vastly increased because of the establishment and successful operation of the parcel post. It is only fair that their compensation should be somewhat increased to accord with the heavier burden which they are obliged to bear.

But the section that ought to call down upon this bill the absolute condemnation of every patriotic citizen in this country is

section 6. This section is as follows:

That hereafter any assistant postmaster who may be required by law or by authority or direction of the Postmaster General to execute a bond to the Postmaster General to secure faithful performance of official duty may be appointed by said Postmaster General, who may require such bond, without regard to the provisions of an act of Congress entitled "An act to regulate and improve the civil service of the United States," approved January 16, 1883, and amendments thereto, or any rule or regulation made in pursuance thereof, and the Postmaster General shall have power to revoke the appointment of any assistant postmaster and appoint his successor at his discretion without regard to the act, amendments, rules, or regulations aforesaid.

Why, I have before the horse a climbing from one of the best

Why, I have before me here a clipping from one of the best Democratic papers in Ohio

Mr. CARTER. What is it? Mr. WILLIS. The Daily Journal-Herald, of Delaware, Ohio, and my friend and colleague from the fifth district [Mr. Ans-BERRY] knows it perfectly well, knows it about the best of any of the Ohio delegation, and knows that the editor of it is about as good a Democrat as there is in Ohio. He holds an office under the State administration and is a true-blue Democrat-Hon. J. D. Knowles. Here is what he says at the head of the column in big, high letters for the edification of his Democratic brethren in the country. Here is what this Democratic editor says in the Daily Journal-Herald of January 14, 1914:

EFFICIENCY COUNTS.

There is a question of considerable importance that is being carefully considered by persons close to the work of the National House, and that is the propriety or the impropriety of placing assistant postmasters in the civil-service class. The national Democratic platform contains a plank of this flavor, and many prominent men over the country have interested themselves in the perfection of a plan that will work out to this and

Interested themselves in the perfection of a pian that will work out this end.

Efficiency is the end sought and the Post Office Department could equip itself with an army of competent servants if a pian like this were to be adopted. Men skilled in this work should be so valuable that it ought to require much more than now to remove them. Take, for example, our own townsman, Mr. Hosea Spaulding. Who in Delaware would even hint that he is not the man for the place? He has passed through one administration after another and his faultless work goes on just the same with no interruption, and, better still, no discontent to anyone for a mere political reason. The time has come when men who deliver the goods are given such security of position as to make them just continue to deliver the goods. Get competent men to do the work, then help them. That's the way we do in our business.

I have already referred—

I have already referred—— Mr. ANSBERRY. If the gentleman will yield, I do not desire to ask him a question, but only to make a suggestion, and that is this

Mr. WILLIS.

Mr. WILLIS. I shall most certainly appreciate it.
Mr. ANSBERRY. That if the opportunity is given me to select or suggest to the Post Office Department assistant postmasters in my district, I assure the gentleman I will see that that editorial is carried out in that those places will go to men who have delivered the goods, and men in addition to that who will carry out strictly the definition of the Democratic platform that my friend from California has read as to merit and ability. Some of the gentlemen now occupying those positions in my

district I could not indorse on that proposition.

Mr. WILLIS. Well, I thank my friend for the suggestion he has made, and, knowing his sincerity and ability, I know he will make an effort to carry out that proposition; but he is like most of the brethren-not all of them, because there are some remarkable exceptions here; some strong men, such as the gentleman from Missouri [Mr. Borland] and the gentleman from New Jersey [Mr. HAMILL], have stood up and have fought this proposition in the face of hostile opinion on their own sidebut the gentleman, like most of his brethren on his side, takes the common position that our Democratic friends usually take with reference to the civil-service law, and that is that they are in favor of the law always but absolutely opposed to the enforcement and application of it. That is what this amounts to, and I will tell you, gentlemen, speaking in the greatest seriousness, not simply because the National Civil Service Reform League calls attention to this; not because the President is against it, and you know that he is; not because the Postmaster General is against it, and has published a letter in the strongest terms

objecting to such legislation; not simply because of these facts, but because everybody in the country knows that if this bill is passed with section 6 in it you pass it because you are undertaking to do just what you undertook to do when you kept the employees under the income tax out from under the civil service; just what you did when you refused to let the employees provided for in the Federal reserve banks act go under the civil

Mr. BARKLEY. Mr. Chairman, will the gentleman yield? You are undertaking to pay off your political debts, and you violate the rules and spirit of the civil service.

The CHAIRMAN. Does the gentleman yield? Mr. WILLIS. Yes; I will yield to the gentleman.

Mr. BARKLEY. I am satisfied from my knowledge of the gentleman from Ohio that he desires to be fair.

Mr. WILLIS. I am fair, Mr. BARKLEY. Does the gentleman think that it is any more of a blow to the civil-service system for this House to exempt assistant postmasters by law than it was for President McKinley to exempt the internal-revenue collectors and marshals by Executive order, and to suspend the civil-service requirements as to railway mail clerks? Wherein lies the difference as to the blow to the civil service?

Mr. WILLIS. Is my friend through? Mr. BARKLEY. Yes; I am through.

Mr. WILLIS. Now, Mr. Chairman, without admitting at all the implications of the gentleman's statement, the question that my good friend from Kentucky has asked illustrates the same old proposition over and over again, and that is this, that the constant and only excuse that the Democrats in this Congress and in the preceding Congress have brought up when they have undertaken to do something that they are ashamed of, that really is not in harmony with their platform and is contrary to public sentiment, is that they have undertaken to find somewhere, at some time, an instance in which Republicans may have done what they are proposing to do. I want to suggest to the gentleman that I want to go ahead; I want to make progress. It is not a sufficient answer to me to say that any Republican in any preceding administration may have done or said thus and so. I am standing upon the merits of this proposition, and I throw full into your faces the charge that you are now seeking to prostitute and defeat and destroy the civil-service law, no matter what anybody else at any other time may have said or done. [Applause on the Republican side.]

Mr. RUSSELL rose

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. WILLIS. I wish the gentleman from Michigan would give me a minute more, so that I can yield to the gentleman from Missouri [Mr. Russell].

Mr. SAMUEL W. SMITH. I yield to the gentleman one minute more

Mr. WILLIS. Now I yield to the gentleman from Missouri.
Mr. RUSSELL. My friend will agree with me that a postmaster in a first or second class office is not under the civil service, and yet such a postmaster is more responsible to the public for good service than anyone else in that office. Is not

that true as to the postmaster himself?

Mr. WILLIS. Yes; all right.

Mr. RUSSELL. Now, as long as the postmaster himself is not under the civil service, does it not occur to the gentleman and is it not reasonable to contend that the postmaster should himself select at least one man in that office to help him give good service to the public, for which he is more responsible to

the public than anybody else?

Mr. WILLIS. To my mind that is not a reasonable contention, because the same line of reasoning will apply to every em-

ployee in the office.

I want to say to my friend from Missouri that if you want to start upon that career there is no end to it, except the absolute disruption of the whole civil-service system in this country at a time when we most need it, when the parcel post has just begun, practically, and with the postal savings bank just established, and with a proposition now brought up for taking over the telegraphs and telephones of this country, and with a proposition pending in this House for the Government to build and operate a railroad in Alaska. I say that at the very time we are extending the functions of the Government, and when, if ever, there is a need for the stringent application of the civil-service principles, it is now proposed by this section of the pending bill not to go forward, but to turn backward; not to perfect, but to cripple; not to build, but to destroy.

Mr. POST. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. WILLIS. Yes; I yield.

Mr. POST. I understood my colleague from Ohio to say a moment ago that we were opposed to the merit system because we want to prostitute it in politics.

Mr. WILLIS. I do not know whether that is just what I said, but that is well stated. [Laughter on the Republican side.]
Mr. POST. Well, the gentleman did put it that way.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. WILLIST has again expired.

Mr. WILLIS. I am sorry, because I would like to yield more to the gentleman.

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield two minutes more to the gentleman from Ohio.

Mr. WILLIS. The gentleman from Michigan has kindly yielded me more time, and I shall be glad to answer my col-

Mr. POST. I want to give the gentleman a concrete illustration to show that the merit system, as it has been administered heretofore, has been indeed prostituted to politics. In the city of Springfield, Ohio-and the gentleman is familiar with that -we have a post office where there are 107 employees, and of that number only 6 are Democrats. I want to ask the gentleman if in the city of Springfield, in the application of the merit system, that office has not been prostituted to politics?

Mr. WILLIS. Now, my friend, that is altogether unfair to undertake to make me responsible for the fact that the Democrats in Clark County can not pass a civil-service examination. [Laughter on the Republican side.] I am not responsible for that, neither is a Republican administration.

Mr. POST. Let me give the gentleman another concrete illus-

league.

Mr. WILLIS. Very well. Let us have it.
Mr. POST. Right here, under the very nose of the Goddess
of Liberty, right in front of the Capitol here, in the Congressional Library, you have 496 employees under the civil service, and less than 50 of them are Democrats. Have you not prostituted the merit system to politics in that case? Those people are there under a Republican administration.

Mr. WILLIS. I do not know anything of the facts concern-

ing the service in the Library of Congress, except that it is good, nor of the politics of the employees, and I really doubt whether

Mr. FITZGERALD. Mr. Chairman, will the gentleman yield?
Mr. WILLIS. Yes; I will yield to the gentleman from New York.

Mr. FITZGERALD. The gentleman knows that the Postal Savings Bank System has recently been established, and the Parcel Post System has recently been initiated. He knows that we are going to build a railroad in Alaska and that we have just enacted an income-tax law, all of which require expert, experienced, and competent men. In view of all this, does not the gentleman from Ohio think it was a very great misfortune that his party carried only two States in the last election?

Mr. WILLIS. I think it was a great misfortune to the country that the gentleman's party has control of Congress and the Government. I agree with the gentleman on that. What is

the gentleman's question?

Mr. FITZGERALD. But in view of the-

Mr. WILLIS. Will the gentleman state his question? I can

not be interrupted for mere persiflage.

Mr. FITZGERALD. In view of the radical difference of opinion expressed by the vast majority of the country in opposition to the sentiments of the gentleman, does he not think he

is getting unduly excited? Mr. WILLIS. Not at Not at all. I am as calm as a midsummer night's dream, and I am trying to warn gentlemen on that side. I do not want them to go wrong. I do not want the gentleman to desert his Postmaster General and to desert his President. I want him to stand by his colors. Will he do it? [Applause on the Republican side.]

Mr. FITZGERALD. I will stand by my colors; yes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILLIS. I ask unanimous consent to extend my remarks in the RECORD by inserting certain of the documents to which I have referred.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.
Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 40 minutes to the gentleman from Oklahoma [Mr. Morgan].
The CHAIRMAN. The gentleman from Oklahoma [Mr.

Morganl is recognized for 40 minutes.

Mr. MORGAN of Oklahoma. Mr. Chairman, on the 25th of January, 1912, Sixty-second Congress, I introduced H. R. 18711, entitled "A bill to regulate the commerce of certain corporations, and for other purposes." I have reintroduced

this bill. Its new number is H. R. 1890. The bill creates "an interstate corporation commission." The commission is given supervision over our great industrial corporations commonly called trusts. On the 20th day of February, 1912, I delivered a speech in the House in which I advocated the creation of such a commission. So far as I know, H. R. 18711, introduced by me, was the first bill introduced in this House to create such a commission. So far as I have been able to ascertain, I was the first Representative in Congress to advocate such a measure on the floor of the House.

Since I introduced my bill, H. R. 18711, two great political parties have indorsed the proposition. The Republican national

convention in June, 1912, declared that-

In the enforcement and administration of Federal laws governing interstate commerce and enterprises impressed with a public use engaged therein there is much that may be committed to a Federal trade

In September following the Progressive Party in its platform

We urge the establishment of a strong Federal administrative com-mission of high standing which shall maintain permanent active super-vision over industrial corporations engaged in interstate commerce.

During 1912, under Senate resolution 98, Sixty-second Congress, the Senate Committee on Interstate Commerce held an exhaustive hearing on the subject of antitrust legislation. The proceedings of these hearings cover nearly 3,000 printed pages. Over 100 persons were heard. A large majority of those who were interrogated on the subject indorsed the commission plan.

The testimony before the Senate committee shows the National Civic Federation sent letters to 1,006 business men to ascertain their views on the subject; that the inquiries went to bankers, merchants, manufacturers, and business men generally, and that 892 answers were received; 614 of these declared in favor of an interstate trade commission. Finally, after this exhaustive hearing, the majority of the Senate Committee on Interstate Commerce, through Senator CUMMINS, filed with the Senate a carefully prepared report in favor of the creation of a Federal commission with extensive control over our great industrial corporations engaged in interstate and foreign commerce. This brief review demonstrates that wonderful progress has been made in the growth of the sentiment in favor of creating a national trade commission. The plan has been indorsed by Sen-ators and Representatives in Congress, by distinguished political economists, by manufacturers, merchants, bankers, and business men, by the Senate Committee on Interstate Commerce, by the platform declarations of two great political parties, and finally by a majority of the voters of the United States in 1912 by their ballots cast in support of the Republican and Progressive platforms.

ADMINISTRATION SAID TO FAVOR COMMISSION.

According to the newspaper reports, the President of the United States in a few days will present to Congress a message relative to antitrust legislation. These reports say the President will favor the creation of an interstate-trade commission to exercise certain authority over the large industrial corporations. I am anxiously awaiting what the President shall say to us. I shall give what he says very careful and candid consideration, and I shall be pleased if the administration in power shall support a proposition which I was the first to intro-

duce in this House nearly two years ago.

I am myself very much in favor of creating an interstate-trade commission. And right here I will say that one of the reasons why I am in favor of such a commission is because I have concluded that the Attorney General of the United States is now exercising a power over the business and financial interests of this country which, in my judgment, he is authorized to do by the law. My information of what the Attorney General is doing comes from the newspapers. But I assume these

reports are, in substance, correct.

DISSOLUTION OF PHONE TRUST.

In the Washington Star of December 20, 1913, is an account of the dissolution of the so-called Telephone Trust. I wish to make some quotations from this article.

The headlines are as follows:

NO PHONE TRUST UNDER AGREEMENT-SURRENDER TO UNITED STATES WILL AVOID YEARS OF COSTLY BATTLING IN THE COURTS—MAY AVERT MOVE-MENT FOR PUBLIC OWNERSHIP—PRESIDENT WILSON SEIZES OPPORTUNITY TO REASSURE "BIG BUSINESS" AS TO INTENTIONS.

The first paragraph of the article is as follows:

The greatest antitrust victory of President Wilson's administration thus far—the voluntary dissolution of the so-called Telephone Trust—commanded the attention of all administration officials to-day.

ORIGIN OF PLAN.

The origin of the plan is told in this language: The plan originated with the American Telephone & Telegraph Co., and the agreement was the result of negotiations between its vice president, N. C. Kingsbury, and Attorney General McReynolds. Great admiration for the attitude of the corporation is expressed by President Wilson, as well as by the Attorney General.

THE AGREEMENT.

In brief, the agreement provides that the American Telephone & Telegraph Co. will dispose promptly of its holdings in the Western Union Telegraph Co., so that each concern shall be under distinct management, and so that each shall be entirely independent.

PRESIDENT WILSON'S LETTER.

President Wilson's letter, written to the Attorney General, is one of the most interesting documents made public in connection with the settlement. It reads:

settlement. It reads:

MY DEAR MR. ATTORNEY GENERAL: Thank you for letting me see the letter from the American Telephone & Telegraph Co. It is very gratifying that the company should thus volunteer to adjust its business to the conditions of competition.

I gain the impression more and more from week to week that the business men of the country are sincerely desirous of conforming with the law, and it is very gratifying indeed to have occasion, as in this instance, to deal with them in complete frankness and to be able to show them that all we desire is an opportunity to cooperate with them. So long as we are dealt with in this spirit we can help to build up the business of the country upon sound and permanent lines.

Cordially and sincerely, yours,

Woodbrow Wilson.

WOODROW WILSON.

MONTHS OF INVESTIGATION.

The announcement of the agreement for a reorganization comes at the conclusion of several menths of negotiation, in which the Attorney General and Mr. Todd and Mr. Kingsbury, Theodore N. Vail, president of the American Telephone & Telegraph Co., and other parties on both sides conferred. Mr. McReynolds took up the question early in his administration of the Department of Justice, and officials of the telephone company showed a willingness from the first to do anything in reason to satisfy the Government's lawyers.

EFFECT OF AGREEMENT ON STOCKS.

TELEPHONE STOCK GOES UP.

The announcement from Washington that the American Telephone & Telegraph Co, had reached an agreement with the Department of Justice whereby it would relinquish control of the Western Union and avoid a suit under the antitrust law caused an excited advance in the stock of the telephone company at the opening of the stock market

stock of the telephone company
to-day.

The first transaction in the stock was a block of 2,000 shares, one of
the largest blocks of that stock which has been handled on the exchange
for years. Prices ranged from 120\(\frac{1}{2}\) to 124, a maximum gain of 62
points. Subsequently the advance was run up to 7 points. The price
of 124\(\frac{1}{2}\) represented a gain of 14\(\frac{1}{2}\) points since Monday. The price later
reacted 3 points. American Telephone convertible bonds gained 3.

PRESIDENT VAIL EXPRESSES HIS VIEWS.

ANXIOUS TO MEST LAW.

LYNDONVILLE, VT., December 20.

LYNDONVILLE, VT., December 20.

Theodore N. Vail, president of the American Telephone & Telegraph Co., gave out the following statement last night on the proposed reorganization of his company and its separation from the Western Union Telegraph Co.:

"The correspondence published was the result of a protracted and exhaustive discussion between the Attorney General and our company, and speaks for itself. We are complying with the wishes of the Government because we desire that our operations shall continue to be as we have always believed them to be, in strict conformity to law, and for that reason we are now adjusting them to the law as understood and interpreted by the Attorney General.

EX-ATTORNEY GENERAL WICKERSHAM'S OPINION.

NOT A NEW IDEA.

Ex-Attorney General George W. Wickersham, when he heard the

ex-attorney General George W. Wickersham, when he heard the news, said:

"I can't say I am pleased, because I think it will be an economic mistake. I see no reason why telephone and telegraph companies should not be conducted as one concern.

"However, the action of the Wilson administration in bringing about this voluntary dissolution is not a new policy. When I was Attorney General there were a number of such dissolutions brought about by the efforts of Mr. Taft and myself."

M'REYNOLDS WRITES KINGSBURY.

Mr. McReynolds, in accepting the American Telephone & Telegraph as offer, wrote to N. C. Kingsbury, vice president of the company, as

"Permit me to acknowledge, with expressions of appreciation, your letter of December 19 outlining the course of action which the telephone companies composing the Bell system obligate themselves to follow in

the future. "Your frank negotiations in respect of these matters compel the belief that what you propose will be carried out in good faith; and it seems to me clear that such action on your part will establish conditions under which there will be full opportunity throughout the country for competition in the transmission of intelligence by wire.

TELLS OF ADMINISTRATION'S PLANS.

"May I take this occasion to say that the administration earnestly desires to cooperate with and to promote all business conducted in harmony with law; and that, without abating the insistence that the statutes must be obeyed, it will always welcome opportunity to aid in bringing about whatever adjustments are necessary for the reestablishment of lawful conditions without litigation."

NEW YORK, NEW HAVEN & HARTFORD RAILROAD.

In the Washington Star of January 11, 1914, appeared a long article announcing that an agreement had been reached between the Attorney General and the New York, New Haven & Hartford Railroad relative to its dissolution.

The following are quotations from the article:

NEW HAVEN GIVES IN-ÉLLIOTT YIELDS TO M'REYNOLDS'S PLANS FOR DISSOLUTION.

The New York, New Haven & Hartford Railroad and the Department of Justice last night announced a preliminary agreement designed to effect a reorganization of the New Haven, and to prevent a suit for its dissolution under the Sherman law.

In compliance with department demands the New Haven will dispose of its holdings in the Boston & Maine Railroad, cancel its joint agree-ment controlling the Boston & Albany, give up its trolley lines and several of its steamship lines.

TEXT OF CHAIRMAN ELLIOTT'S STATEMENT.

Announcement of the agreement was made in the following statement from Chairman Howard Ellott and President A. T. Hadley, a member of the New Haven board:

"An agreement has been reached between the Department of Justice and the New Haven Rallroad. The New Haven, in addition to the cancellation of the Boston & Albany agreement, which becomes effective February I, will dispose of its holdings in the Boston & Maine Railroad, the various trolley systems, the Merchants & Miners Transportation Co., the Eastern Steamship Corporation, and the Maine Steamship Co under a plan the details of which will be worked out as promptly as possible with representatives of the Department of Justice by Chairman Howard Elliott and Messrs. Moorefield Storey, of Boston, and Walker D. Hines, of New York, special counsel of the board of directors.

Now, Mr. Chairman, so far as I have been able to ascertain, the Attorney General of the United States is not by law clothed with any authority to enter into agreements with individuals or business concerns relative to how they shall transact business or upon what terms or conditions they shall engage in interstate trade and commerce.

According to these newspaper reports, the business interests of the country are going to the Attorney General and entering into agreements with him. Negotiations are being carried on and the Attorney General is fixing the conditions and the terms by which individuals, associations, and corporations shall engage in interstate business.

My purpose in calling attention to this is to emphasize and urge upon Congress the importance of creating additional administrative and executive machinery to enforce the laws of

this Nation.

READJUSTMENT OUTSIDE OF COURT.

We need a commission to aid in the readjustment of business in harmony with the law, through conference, negotiation, and In other words, to do outside of the courts, but by mediation. express authority of the law, what the Attorney General, according to newspaper reports, is now doing without authority of law.

The United States is a Government by law and not by men.

This Republic is founded on the principle that all shall recognize the absolute supremacy of the law.

The highest officer of the Government, as well as the most humble citizen, is subject to the law.

The Attorney General of the United States has no authority, power, or jurisdiction except such as is conferred upon him

I have examined the statutes creating the Department of Justice and the office of Attorney General. I have examined subsequent statutes relating to the authority and duties of the

Nowhere do I find any law conferring upon the Attorney General the authority or imposing upon him the duty, outside of proceedings in court, to direct upon what terms or under what conditions citizens of the United States may engage in inter-

state trade and business.

Attorney General.

If newspaper reports are true, this is what the Attorney General has been doing. Newspapers of the country have contained long articles relating to the negotiations between the Attorney General and the officers of the New York, New Haven & Hartford Railroad Co., and also between the Attorney General and the officers of the American Telephone Co. These newspaper accounts publish what purports to be the final agreement, understanding, or arrangement made by the formal approval or consent or acquiescence of the Attorney General. The newspapers publish what purports to be a letter from the Attorney General relative thereto, and also a letter from the President to the Attorney General, apparently approving what the Attorney General has been doing, not through proceedings in court by indictment and prosecution, nor by proceedings in equity, but by negotiations wholly outside of court.

Where is the authority for this kind of proceedings?

Under the Sherman antitrust law the only authority given to the Attorney General is found in section 4, which provides as follows:

SEC. 4. The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations

It is well settled that the Attorney General is not authorized to furnish legal opinions except to the President, heads of departments, and other high executive officials.

Nearly 100 years ago Attorney General William Wirt held that the Attorney General could not act as an arbitrator. (1 App., 209.) And in refusing to give an opinion, Attorney General Wirt referred to the act creating the office of Attorney General, and said:

This act limits me to questions of law propounded by the President and heads of departments, and to these limits I have made it a rule to confine myself, on the ground that in a government purely of laws no officer should be permitted to stretch his authority and carry the influence of his office beyond the circle which the positive law of the land has drawn around him. (1 App. Atty. Gen., p. 211.)

What I say is not to criticize the Attorney General. His predecessor in office, Attorney General Wickersham, in a recent interview, referring to the work of the present Attorney General in securing the dissolution of certain large corporations outside of court, appeared to boast of the fact that he, when in office, had done the same thing.

The Attorney General, outside of court proceedings, is now exercising a power over the business, financial, and commercial interests of this country far greater than the dispensing power exercised by the Stuart Kings of England, which led to the Revolution of 1688.

If the Attorney General is to exercise this power, if he is to open up negotiations with business concerns and enter into some agreement or understanding as to the terms, conditions, and so forth, under which they may engage in trade and commerce, then Congress should confer this authority upon him, and make this a part of his legal duties. I believe, however, that the wise thing to do is to create a Federal trade commission and confer upon it the authority and power to do what I claim the Attorney General is now doing without authority.

Mr. SLOAN. Will the gentleman yield? Mr. MORGAN of Oklahoma. I will.

Mr. SLOAN. Does the gentleman believe that the New Haven Railroad Co. will not continue to be good, as they have agreed

to be good to the Attorney General? Mr. MORGAN of Oklahoma. I am not so familiar with the officers of the New Haven Railroad Co. as is the Department of Justice and its officials, because I have not been negotiating with them, but so far as I know they will carry out in good faith what the newspapers say is the agreement entered into between the Department of Justice and the railroad.

Mr. THOMPSON of Oklahoma. Will the gentleman yield? Mr. MORGAN of Oklahoma. I will yield to my colleague. Mr. THOMPSON of Oklahoma. Do I understand my col-

league to criticize the present Attorncy General for insisting on the dissolution of the partnership of the New Haven Railroad Co., the trolley lines, and the steamship lines that it has controlled up to this time and approve the conduct of former Attorney General Wickersham in permitting these combinations?

Mr. MORGAN of Oklahoma. I am not, Mr. Chairman, criticizing the Attorney General's good results he has achieved. As I said, I believe, through force of circumstances, through the fact that Congress has failed to give him or some other administrative branch of the Government proper power, he has been forced to some extent to do things never contemplated by law that he should do. If good results are attained, the people are inclined to excuse an officer for exercising powers not authorized by law. I certainly have no criticism to make of the Attorney General in doing what I believe he has tried to do conscientiously; but it is a most dangerous practice to permit high public officials to assume and exercise unauthorized

Mr. THOMPSON of Oklahoma. Let me ask the gentleman if he approves of what Attorney General Bonaparte did in permitting the absorption of the Tennessee Coal & Iron Co. by the United States Steel Co.?

Mr. MORGAN of Oklahoma. In answer to that there is no one act, no one circumstance connected, so far as I know, with the administration of President Roosevelt and his Attorney General that has brought so much criticism as the arrangement, or whatever you may call it, that was entered into by that administration in relation to the absorption of the Tennessee

administration in relation to the absorption of the Teleficase Coal & Iron Co. by the United States Steel Co.

Mr. THOMPSON of Oklahoma. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. THOMPSON of Oklahoma. In what respect did Mr.

Wickersham accomplish one-half or one-hundredth part of what Attorney General McReynolds has accomplished in his term of

Mr. MORGAN of Oklahoma. I am not concerned about that. I would like to see the present Attorney General accomplish a thousand times more than he has already accomplished, if the

people shall be benefited thereby.

Mr. THOMPSON of Oklahoma. I appreciate that, but I want my colleague to answer my question, and that is, If he approves the conduct of ex-Attorney General Bonaparte and President Roosevelt in their permitting the absorption of the Tennessee Coal & Iron Co. by the United States Steel Co?

Mr. MORGAN of Oklahoma. No; I do not approve of it, Mr. BARKLEY. Will the gentleman yield?

Mr. MORGAN of Oklahoma, Yes. Mr. BARKLEY, Do I understand the gentleman from Oklahoma to contend that the present Attorney General is exceeding his authority under the law in construing the antitrust law and permitting corporations to arrange their affairs in accordance with his construction of the law?

Mr. MORGAN of Oklahoma. I understand it is the duty of the Attorney General to enforce the law through proceedings in courts. I do not understand that the Attorney General has any authority to enter into any agreement whereby any individual, association, or corporation shall engage in trade and commerce

in the United States.

Mr. BARKLEY. Does the gentleman mean to say that under the law as it is now the Attorney General has no authority to construe the antitrust law to corporations and say that they may with safety within the meaning of the law do so and so, and thereby obviate the necessity of an expensive and tedious

lawsuit in order to bring about the same result?

Mr. MORGAN of Oklahoma. I will answer that by saying again that I can not find any authority whereby the Attorney General or the President is authorized to negotiate with a business concern and enter into any agreement, contract, or arrangement expressing the conditions under which they shall engage in business. I do not say this to deter the Attorney General from doing what he can within the scope of the law to encourage business concerns to comply with the law; but I am doing it to call the attention of this House to the fact that we are negligent in our duty if we do not by enactment at this session of Congress create laws which will create an executive authority that will be legally empowered to do outside of court what the Attorney General is, in my judgment, doing without authority of law.

Mr. BARKLEY. If I understand the gentleman, then, his position is that whereas under the law now there is no provision that either prevents the Attorney General or any other agency from negotiating with business corporations to bring about an adjustment of their affairs to conform to the law, he desires affirmative law, affirmatively authorizing some agency

to do that which the Attorney General is now undertaking to do.

Mr. MORGAN of Oklahoma. Yes. Mr. Chairman, as I have already said, I introduced in this House nearly two years ago the first bill to create an interstate trade or corporation commission-H. R. 17811. I have reintroduced that bill at this I presented it in an argument before the Committee on the Judiciary a few weeks ago. I believe that such a commission would be a splendid administrative body to do this work that the Attorney General is now doing, as I sincerely believe, without the sanction of law either express or implied.

Now, Mr. Chairman, aside from this phase of the proposition, there are many good reasons for creating a Federal commission to supervise the trusts and I wish to discuss the proposition

generally.

A FEDERAL COMMISSION IS NEEDED.

I wish first, in the very briefest manner, to enumerate some of the purposes for which we need such a commission:

1. To aid the courts in the dissolution, disintegration, and reorganization of unlawful corporations.

To aid in the enforcement of the laws.
 To do the work of investigation, recommendation, and publicity now assigned to the Bureau of Corporations.

4. To aid in the readjustment of business in harmony with the law through conference, negotiation, and mediation. other words, to do outside of the courts, but by express authority of the law, what the Attorney General, according to newspaper reports, is now doing without authority of law.

5. To control the practices and business method: of large

industrial corporations.

6. To reenforce, restore, and maintain competition as a factor in price regulation and, if necessary, exercise direct control over the prices of all monopolistic corporations.

7. To maximize the power of our industrial corporations as agencies for the equitable distribution of wealth and to minimize their power as instruments for the concentration of wealth.

8. To enable us to secure all the benefits of large industrial units and escape the evils and dangers thereof.

9. To relieve doubt and uncertainty in business and to promote trade, encourage business, and contribute to the general prosperity of the country.

10. To secure for labor the largest amount of employment, the highest rate of wages, and the most favorable conditions under which to perform labor.

11. To respond to the imperative public sentiment of the country for antitrust legislation that will adequately protect the people from all monopolistic industrial concerns.

To promote the general welfare, strengthen the fabric of the Republic, and to increase, extend, and magnify its power and influence throughout the world.

AID IN DISSOLUTION OF CORPORATIONS.

We need a commission to aid in the dissolution of unlawful corporations. Our courts are overcrowded with business. are unfitted for the work of supervising the dissolution and re-organization of gigantic business concerns. They have not the executive machinery necessary to dismantle these vast industrial corporations, nor the expert knowledge of business conditions to devise and execute proper plans for their reorganization, nor the time to supervise the readjustment of their complicated business affairs, nor the facilities to exercise the proper degree of scrutiny and watchfulness over the business methods of the new concerns into which they may be divided.

AN ENFORCEMENT AGENCY.

Neither the Sherman antitrust law nor any additional enactments can be made effective without a proper enforcing agency. The courts have no adequate executive machinery to give effect to their own judgments and decrees

A commission would be exceedingly helpful in this work. The Sherman antitrust law has largely failed to meet the expectation of its authors. The fault is not so much in the law as in Congress for failure to create the proper executive machinery to give force, life, and vitality to the law. The Attorney General's Office was not organized and is not now equipped to do the work now devolving upon it. It is folly to enact additional laws until we have created the administrative and executive machinery to insure the thorough and effective enforcement of the law we now have. If the men who conceived and enacted the Sherman antitrust law had placed its execution and administration under an independent commission, with adequate authority and power, the trust question would have been largely settled long ago, our industrial force would have developed along safe, conservative, permanent, and legitimate lines, and the prosperity of the country would not now be endangered by the process of tearing down great business organizations.

It is unwise to multiply our restrictive and prohibitory laws when existing laws are dormant for want of proper enforcement

We are poor architects, indeed, of constructive legislation if our plans and specifications call for statutory material which can not be utilized in our enforcement structure.

We will gain little by enacting laws to prohibit interlocking directorates, or to abolish holding companies, or to provide for Federal incorporation, or to establish a national-license system, or to enact other prohibitory or restrictive legislation unless we shall create adequate executive and administrative machinery to enforce our enactments.

A farmer might as well plant crops without men, means, and machinery for cultivation as for Congress to multiply anti-trust laws without creating adequate executive machinery and equipment for their enforcement. For wise laws not properly enforced will be as unfruitful to the public as good seed not properly cultivated will be unprofitable to the farmer.

Mr. MAPES. Mr. Chairman, will the gentleman yield?
Mr. MORGAN of Oklahoma. I yield to my colleague from

Mr. MAPES. I would like to have the gentleman's opinion on this point: Would he dissolve the great combinations of capital, for instance, like the Steel Trust, combinations made up. as it were, of independent steel companies, and of the great Harvester Trust, made up, as it were, of the Deering Co. and others, or would he place this interstate trade commission over them and let them control the prices and the amount of profits they should make and the issuance of their stocks, bonds, and so forth?

Mr. MORGAN of Oklahoma. I would, of course, let the courts, the proper constitutional authority, decide whether the United States Steel Corporation and other corporations are lawful. If they are unlawful, of course the courts will dissolve them. My conception is that we will continue to have large industrial corporations. My idea is that large corporations are beneficial in some respects. My conception is that the population, the wealth, trade, and commerce of this great Nation will grow, and that along with the growth of our country our business concerns will naturally grow larger.

So long as we have men with great minds who are capable of organizing and directing great business concerns—industrial organizations that will advance the greatness and glory of this country; that will aid in producing and distributing wealth among the people; that will advance our splendid civilization

and the benign principles of this Republic; and that will be instruments to promote the public good—so long I bid Godspeed to the growth and development of our great business concerns. [Applause on the Republican side.] I would not limit their growth so long as they are servants of the people and contribute to their welfare.

Mr. MAPES. If they are allowed to continue, then, is it the gentleman's idea that they should be controlled and supervised

by this commission that he advocates?

Mr. MORGAN of Oklahoma. Yes; that is my idea.

Mr. MAPES. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I yield to my colleague from

Mr. MAPES. I am very much interested in what the gentleman is saying, and in that connection I would like to ask him if he would have this commission have control of the issue of stocks and bonds of corporations engaged in interstate commerce, something after the manner of the recommendations of Mr. Brandeis that are appearing in his articles

Harper's Weekly?
Mr. MORGAN of Oklahoma. In answer to that I will say that I believe the Federal Government should exercise such control over the issuing of stocks and bonds of large business concerns as will properly protect the public.

WORK OF CORPORATION COMMISSION.

The Bureau of Corporations has done good work, but a commission will do better work. It will carry more weight, command higher respect, and inspire greater confidence with the The recommendations made, the reports submitted. statistics gathered, the information furnished, and the conclusions reached by a commission will be accepted more readily than when coming from a single commissioner, however eminent, able, and conscientious he may be.

The report of the Senate Committee on Interstate Commerce

If the Bureau of Corporations were converted into an independent commission composed of trained, skillful men and clothed with adequate authority, there could be gathered more complete and accurate knowledge of the organization, management, and practices of the corporations and associations engaged in national and international commerce than we now have.

TO CONTROL PRACTICES.

We need a commission to act as an administrative board to control the practices and business methods of large industrial corporations.

The primary object of all prohibitory, restrictive, and regulative statutes pertaining to industrial corporations is to control the practices and business methods of such corporations. The object of controlling practices and business methods is to secure reasonable prices and charges and prevent unjust discriminations as to individuals or localities.

Statutes of this kind may be divided into two classes. First, those which prohibit some specific thing, act, or practice; and second, those which promulgate a general rule prohibiting or making unlawful certain kinds or classes of acts or practices. We may wisely specifically prohibit certain well-known practices. of industrial corporations which are notoriously injurious to the public and are under condemnation of the public. But we should also promulgate some general rules of conduct for our big industrial corporations and thereby place all acts or practices of a certain kind or character under the condemnation of the law. This is what Congress did when, 27 years ago, it first assumed the gigantic task of regulating and controlling the acts and practices of common carriers. The first section of the "Act to regulate commerce," approved February 4, 1887, and which created the Interstate Commerce Commission, fixed a general standard by which all charges of common carriers should be measured by declaring that "all charges * * * shall be reasonable and just." Section 2 prohibits and makes unlawful "unjust discrimination." Section 3 makes it unlawful for a Section 3 makes it unlawful for a common carrier "to make or give any undue or unreasonable preference or advantage to any particular person, firm, corporation, or locality."

The act clothes the Interstate Commerce Commission with power and jurisdiction to determine what are "just and reasonable charges," what "device" other than a "special rate, rebate, or drawback" shall be "unjust discrimination," and what act, practice, or method shall constitute "undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality."

These provisions have worked well in controlling the practices and charges of railways and other common carriers, and, I be-lieve, similar provisions would prove equally effective and satisfactory in controlling the charges and practices of industrial corporations.

By sections 4 and 5 of my bill (H. R. 1890) I fix a standard by which the acts and practices of industrial corporations sub ject to the act shall be measured. By a clause in section 9 I have empowered the commission to prohibit by rule, order, or regulation, any act, practice, or method which shall be contrary to the general rules laid down in sections 4 and 5.

Sections 4 and 5 and part of section 9 are as follows:

Sections 4 and 5 and part of section 9 are as follows:

Sec. 4. That every practice, method, means, system, policy, device, scheme, or contrivance used by any corporation subject to the provisions of this act in conducting its business, or in the management, control, regulation, promotion, or extension thereof, shall be just, fair, and reasonable and not contrary to public policy or dangerous to the public welfare, and every corporation subject to the provisions of this act in the conduct of its business is hereby prohibited from engaging in any practice, or from using any means, method, or system, or from pursuing any policy, or from resorting to any device, scheme, or contrivance whatsoever that is unjust, unfair, or unreasonable, or that is contrary to public policy or dangerous to the public welfare, and every act or thing in this section prohibited is hereby declared to be unlawful.

Sec. 5. That every corporation subject to the provisions of this act shall deal justly and fairly with competitors and the public, and it shall be unlawful for any such corporation to grant to any person or persons any special privilege or advantage which shall be unjust and unfair to others, or unjustly and unreasonably discriminatory against others, or to enter into any special contract, agreement, or arrangement with any person or persons which shall be unjustly and unreasonably discriminatory against others, or which shall give to such person or persons an unfair and unjust advantage over others, or that shall give to the people of any locality or section of the country, or that shall be contrary to public policy or dangerous to the public welfare, and any and all the acts or things in this section declared to be unlawful are hereby prohibited.

Paragraph of section 9:

Paragraph of section 9:

The commission is hereby authorized and empowered to make and establish rules and regulations not in conflict with the Constitution and laws of the United States to aid in the administration and enforcement of the provisions of this act, and may, by such rules and regulations, prohibit any particular or specific act or acts, practice, method, system, policy, device, scheme, or contrivance that is contrary to any of the provisions of this act.

The rules of conduct promulgated in these sections if enacted into law would blaze a pathway for the guidance of our business now groping in darkness through a trackless wilderness of doubt and uncertainty. The principles of business honestly enunciated in these sections are in harmony with existing public sentiment and would be approved by the conscience of the

We should crystallize this sentiment and conscience into law. We will thereby aid all legitimate industry, promote peace in the social and industrial world, encourage the growth and expansion of business along lines which are morally sound, and inaugurate a policy that will bring blessings to all our people and higher glory to the Republic.

TO REENFORCE COMPETITION.

We need a commission to reenforce, restore, and maintain competition as a factor in price regulation, and if found necessary exercise under the law direct control over the prices of

Hitherto we have acted upon the principle that competition will serve as a sufficient regulator of prices. We have enacted laws to prevent monopoly and maintain effective competition among the manufacturers and dealers in all articles and products in common use. Unquestionably existing laws have not been adequate to do this. In spite of the Sherman Antitrust Act, in spite of the weapon of publicity as wielded by the Bureau of Corporations, in spite of prosecutions, proceedings, findings, decrees, and judgments rendered in the United States courts, combinations have been formed, concentration of business has continued, industrial corporations have enlarged their capital, increased their output, extended their business, perfected their machinery, equipment, facilities, and organizations, and per-sisted in acquiring those things which added to their arbitrary control and domination of the prices at which they sell their products. Competition has been losing ground. The sphere of its influence has been lessened. The field wherein its power is dominant and supreme has constantly diminished. Competition has fought its great decisive battle, and met its Waterloo.

Mr. SLOAN. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I yield to the gentleman.

Mr. SLOAN. Mr. Chairman, assuming that the majority would have the wisdom to follow the gentleman's suggestion in this particular, would it be the policy of the Government, as suggested by the gentleman, to keep on prosecuting, as it were, for the offense or would you grant immunity under the new system of control for past offenses and shortcomings generally? Mr. MORGAN of Oklahoma. I will say I would not grant

immunity, and that I would continue to enforce the law as we now have it.

TO AID THE DISTRIBUTION OF WEALTH.

We need a commission to maximize the power of our indus-

of wealth and to minimize their power as instruments for the concentration of wealth.

The census of 1910 shows that one-third of our manufacturing establishments employ 90 per cent of the 7,000,000 wage earners in these establishments and produce 95 per cent of all our manufactured products. In round numbers, 10 per cent of our manufacturing establishments employ three-fourths of the labor in such establishments and produce four-fifths of the product.

One per cent of our manufacturing establishments employ one-third of the labor and produce nearly one-half of our

manufactured products.

We have had a revolution in the nature and character of our industrial concerns. Our business methods have changed. The instrumentalities used in commerce and trade have changed. But our laws have not changed. Interstate business ir largely under control of the gigantic business concerns—great corporations-mammoth industrial organizations, wielding incomprehensible power in the business and commercial world. This power may be used for the glory of our country or it may be used for the exploitation of the public and oppression of the

We do not realize to what extent the corporations control the business of this country. We do not comprehend how these corporations now touch every avenue of trade, commerce, and business, receive tribute from every avocation, calling, and profession of life, and draw support and sustenance from every home

and fireside in the land.

The corporations of the country in 1912 made an annual net profit of \$3,213,247,000. Industrial manufacturing corporations alone made an annual net profit of \$1,309,819,000. They employ 7,000,000 persons and their annual products are worth \$21,000,000,000. The corporations of the country, by a conservative estimate, own one-half of the wealth of the Nation. Probably not one-tenth of the people have any interest in these corporations.

The corporations are modern inventions which have contributed largely to the production of the wealth of this country. They have likewise been great engines for the concentration of wealth. The people know this. They will not be satisfied until Congress shall use all its constitutional power, if necessary, to make these corporations instruments for the distribution of wealth, because upon the equitable distribution of the wealth produced depends the very perpetuity of this Republic.

Finally, I plead for a great commission to stand like an armed sentinel to jealously guard the mighty hosts of intervening corporations, plying between the producer and the consumer, and see that these corporations do not exact excessive, exorbitant, or unrighteous charges for the service they render to the public.

I believe that would be a very wise provision.

CONTROL OF PRICES.

Mr. FESS. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I yield to the gentleman from

Mr. FESS. Has the gentleman provided in any part of the bill for any form of control of the prices of articles sold, or would the gentleman go to that extent?

Mr. MORGAN of Oklahoma. I will try to make that plain. I would go this far: If necessary for the public welfare we should authorize the commission to regulate the prices at which large industrial corporations shall dispose of their products.

Section 3 of my bill, H. R. 1890, promulgates a standard for the control of the prices at which industrial corporations subject to the act shall dispose of their products.

It provides as follows:

SEC. 3. That the price or prices at which any corporation subject to the provisions of this act shall sell or dispose of any article of merchandlse, or any product whatsoever, shall be just, fair, and reasonable, and it shall be unlawful for any such corporation to sell or dispose of any article of merchandlse, or any product whatsoever, at a price or at prices that are unjust, unfair, or unreasonable, and every corporation subject to the provisions of this act is hereby prohibited from so doing.

In support of this provision I will say:

1. The Federal Government long ago assumed the right to control the prices of products sold through the instrumentalities of interstate commerce. This it did when the Sherman law was approved, July 2, 1890. Prices may be controlled either directly or indirectly. When by law we declared that certain acts, contracts, agreements, combinations, and conspiracies relating to trade and commerce were unlawful we thereby entered upon the policy of controlling prices indirectly. It can not be denied that the very object of this law was to prevent monopolistic prices. If the Congress may control prices by indirect methods, we certainly have the power to do the same thing by trial corporations as agencies for the equitable distribution direct methods. Otherwise the Sherman antitrust law is a

sham and subterfuge and should be held invalid as against the legal principle that one can not do indirectly what he is forbidden to do directly.

All antitrust laws now in force, or which may hereafter be enacted, which control the practices, methods, or in any way regulate, restrict, or limit the acts of corporations engaged in interstate commerce are primarily for the purpose of controlling

the prices and charges of such corporations.

2. The Federal, State, and municipal governments have long ago entered upon the policy of the direct control of the prices and charges of transportation and communication corporations and of practically all public-service and public-utility corpora-This is done upon the theory that such corporations in their nature have large monopolistic power. If we control the charges of such corporations on the ground that they naturally possess monopolistic power, we are inconsistent unless we control the charges of industrial corporations which have acquired large monopolistic power. In its effect upon the people acquired monopoly is as dangerous as natural If public policy demands the direct control of natural monopolies, it also requires the direct control of acquired

3. At present there is no law which in the least controls the prices at which our great industrial corporations dispose of their products. It matters not how large the corporation may be or what monopolistic power it may have or how avaricious its manager and owners may be, in the matter of prices it is a law unto itself. I believe it would be wise public policy to declare, as I have done in section 3 of House bill 1890, that these great industrial corporations, commonly called trusts, shall dispose of their products at prices which shall be "just, fair, and reasonable." We will be doing just what Congress did and reasonable." We will be doing just what Congress did when it passed the act of February 4, 1887, "to regulate com-

which declared that-

All charges made for any service rendered or to be rendered in the transportation of passengers or property, as aforesaid, or in connection therewith, or for the receiving, delivering, storage, or handling of such property, shall be reasonable and just; and every unjust and unreasonable charge for such service is prohibited and declared to be unlawful.

My conclusion is this: That, so far as is consistent with the public good, we should continue to use only indirect methods to regulate prices; we should rely, so far as possible, upon competition and supply and demand as price regulators; that natural economical forces are the safest for the control of our trade, commerce, and business; and that we should leave to the individual, so far as possible, the freedom of contract, and encourage individual initiative, effort, and ambition in every legitimate line of business endeavor. But there is a limit to the power that can be safely intrusted to an industrial corporation, and we must restrict that power, or exercise governmental control over their charges and prices.

The CHAIRMAN. The time of the gentleman fom Oklahoma

has expired.

Mr. THOMPSON of Oklahoma. Mr. Chairman, I would like to ask the gentleman a question. The CHAIRMAN. The gentleman's time has expired.

Mr. MORGAN of Okiahoma. May I have five minutes more? Mr. SAMUEL W. SMITH. Mr. Chairman, I yield to the gentleman five minutes more.

The CHAIRMAN. The gentleman from Oklahoma [Mr. Morgan] is recognized for five minutes.

Mr. MORGAN of Oklahoma. I will yield to my colleague for

a question

Mr. THOMPSON of Oklahoma. My understanding is that my colleague from Oklahoma is complaining about the present conditions under the Sherman antitrust law. I will ask him, as a follower of President Taft, why it was, after the Supreme Court of the United States rendered its rule of reason decision, that the Republican administration then in power did not remedy that decision, and why the gentleman did not introduce a bill to that effect?

Mr. MORGAN of Oklahoma. Well, Mr. Chairman, in the first place, if I remember correctly, we had a Democratic House at that time, and of course we did not have the control of the legislative department of the Government.

Mr. MONDELL. Will the gentleman yield there for a sug-

Mr. MORGAN of Oklahoma. Certainly.

Mr. MONDELL. Judging by the way the corporations' coons have been coming down from the apple tree without any change in that rule-of-reason decision, would it not seem that the ruleof-reason decision was a very excellent one and was producing very excellent results?

Mr. MORGAN of Oklahoma. It strikes me, Mr. Chairman, that there is very much force in that suggestion.

Mr. THOMPSON of Oklahoma. Then, do I understand from the gentlemen on the other side that they approve of that ruleof-reason decision?

Mr. MORGAN of Oklahoma. I will answer that question. I will say this, that my conception is that it is our duty to uphold the law. I believe that is a cardinal principle of the Republican Party, and I believe the great mass of the Republicans throughout this Nation now and in the past have always stood by the National Government and upheld the supremacy of the law. They have always upheld the law. have always been in favor of supporting and standing by the law as it has been construed by the highest court of our land.

Mr. THOMPSON of Oklahoma. Mr. Chairman, am I to understand, then, that the gentleman approves of the construction of the Supreme Court of the United States, and is not in favor of amending any construction that they have put upon the laws of

Mr. MORGAN of Oklahoma. Oh, no; certainly not. ought to enact laws that we think are right, and if by decisions of the Supreme Court the law has been said to be so and so, if necessary we ought to amend our Constitution in order to rectify that law. But that decision of which my colleague complains was rendered and promulgated by the Chief Justice of the Supreme Court, who, I understand, is a Democrat. I am not here to criticize that decision. I am here to accept it as the law of the land. I am here to try, through legislation, to help all I can. I am here to try, by adding my little mite, to contribute to additional legislation that will make our laws more effective, that will make our laws more helpful to the great masses of the people, that will not disorganize business, destroy commerce, and take earnings and employment from wage earners, but laws that will bring peace and prosperity to the people of the country. And so I believe that proper control over these gigantic business concerns will enable us to appropriate from them all that is good and to destroy all that is bad. I believe that it will enable this Government to go on and achieve even greater things in the future than have been achieved in the past. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman has expired. Mr. MORGAN of Oklahoma. Mr. Chairman, I ask unanimous consent to extend my remarks in the Record.

The CHAIRMAN. The gentleman from Oklahoma asks unani-

mous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MORGAN of Oklahoma. Mr. Chairman-

Mr. THOMPSON of Oklahoma, Mr. Chairman, will the gen-

Mr. MORGAN of Oklahoma. Certainly.

Mr. THOMPSON of Oklahoma. I want to ask my colleague from Oklahoma if he was a follower of the progressive principles as initiated by Col. Roosevelt or a follower of the stand-patter as exemplified by President Taft in the last campaign?

Mr. MORGAN of Oklahoma. Mr. Chairman, the Republican platform of 1912, upon which President Taft ran, declared in favor of a trade commission to exercise administrative power over industrial corporations; and the Republican platform was the first to declare for such a commission. About six weeks thereafter the Progressive Party nominated Theodore Roosevelt and placed in its platform a similar but somewhat stronger declaration in favor of such a commission. In answer to the gentleman's question, I can say that in advocating the creation of this commission I am following both William Howard Taft and Theodore Roosevelt. But it so happens that my bill to create such a commission was introduced about six months before either the Republican or the Progressive Party made platform declarations thereon. I am therefore not following any party or any leader, but have been led by the dictates of my own judgment. I shall be highly pleased if the present Democratic administration will follow the lead I suggested in Congress two years ago.

Mr. THOMPSON of Oklahoma. The gentleman answers still without information as to whom he supported for President in 1912, and I would like to know whom he supported for Presi-

dent at that time, Mr. MORGAN of Oklahoma. I will answer that very frankly by telling what our condition was in Oklahoma.

Mr. THOMPSON of Oklahoma. I am not asking that. Mr. MORGAN of Oklahoma. Mr. Chairman, the only way I

can tell whom I supported is by telling for whom I voted. had 10 presidential electors on the Republican ticket. After the Progressive Party was organized their leaders made some effort to have a full set of electors placed on the ticket. But the laws made by the Democratic Legislature of Oklahoma prevented them from placing their names on the ballot. They

went into court, but failed, and so we had but one set of electors. They were on the Republican ticket. I voted for them. I can not yield any further along that line.

Mr. THOMPSON of Oklahoma. I would like to know for whom the gentleman voted.

The CHAIRMAN. The gentleman from Oklahoma declines to yield.

QUASI PUBLIC CORPORATIONS.

Mr. MORGAN of Oklahoma. Many of our industrial corporations have become impressed with a public use. are public agencies. They are in every legitimate sense of the word quasi public corporations, and we should by law declare them to be such. By statutory enactment they should be placed in a class with our railways, telegraph and telephone companies, and with all other public-service and public-utility corporations. We must in some way make a distinction between the gigantic corporations, possessing large monopolistic power, and controlling the manufacture, sale, and distribution of the necessities of life, and the smaller corporations, which possess little, if any, monopolistic power, and which are in no way in a position to impose any great burden upon the people through excessive prices. Out of nearly 300,000 industrial corporations in the United States perhaps 300 to 500 would cover all the industrial corporations which really possess such monopolistic power as to be able to injure any great part of the public through the possession of monopolistic power. Let us separate the sheep from the goats. The sheep may be permitted to gambol unmolested upon the public industrial commons, but the goats must be placed in a corral under the surveillance of representatives of the Federal Government.

The great corporations largely control the productive forces of our country. The wealth produced naturally accompanies. Measured by their stocks and bonds our corpora-The wealth produced naturally flows into the tions own \$92,000,000,000 of our national wealth. Upon this vast sum they make an annual net profit of nearly 4 per cent. All our farms and farm property are valued at only \$41,000,000,-000. Industrial and manufacturing corporations have stocks and bonds outstanding of about \$37,000,000.000-almost equal to the value of all the property possessed by all our 6,500,000 farmers. THE INTERSTATE COMMERCE COMMISSION A MODEL

The success which has attended the well of this great Interstate Commerce Commission abundantly justifies the Nation in creating a similar commission to supervise, regulate, and con-

trol the gigantic industrial corporations of our country. Twenty-six years ago a great controversy was in progress in The parties engaged in the contest were the people and the railroads. Congress created the Interstate Commerce Commission to aid the people in their struggle. Congress also promulgated a new code of business morality for the guidance of the railroads. The act creating the Interstate Commerce Commission, in substance, declared, first, that the railroads should give to the public reasonable and just rates; second, that they should give to individuals and localities equality of rates; and, third, they should give to all impartial privileges and facilities. Prior thereto the great transportation companies had possessed the power to levy annually upon the people of the United States millions of dollars of unjust tribute. The railway managers were absolute in their power, supreme in their authority. All this has been changed. The people are now supreme. They are free from railway domination. They are masters of the railways, not their subjects.

The people of the United States are now in a second great Their antagonist at this time is our great industrial corporations. These gigantic organizations are strongly intrenched. They have untold wealth. They have unlimited resources. They have able leadership. They have the confidence which comes from many victories already won. They are equipped in every way to make a long, stubborn, and effective The interests of 100,000,000 people are at stake. Congress is in duty bound to aid the people in every conceivable and legitimate way. We should create every constitutional agency to protect the people from monopolistic corporations. should we hesitate to utilize a governmental agency that has achieved such unparalleled results in the regulation of transportation companies?

Let us, therefore, give the people a great commission, clothe it with ample power, and direct it to proceed forthwith to bring these, our gigantic industrial corporations, into subjection.

As a new moral code for the guidance of these great business institutions let us proclaim by legislative enactment that their prices must be reasonable and just; that all must be given like privileges and advantages; and that the National Government will not tolerate practices or methods in business that are unfair, unjust, or unreasonable, or that are against public policy or dangerous to the public welfare.

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 20 minutes to the gentleman from Wyoming [Mr. MONDELL].

The CHAIRMAN. The gentleman from Wyoming [Mr. Mon-

DELL] is recognized for 20 minutes.

Mr. MONDELL. Mr. Chairman, the gentleman from Oklahoma [Mr. Thompson] who just interrogated the other gentleman from Oklahoma his colleague [Mr. Morgan], seems to be hard to please. So far as I have observed, the only hopeful sign and symptom under this Democratic administration has been the disposition of great corporations to realize the efficacy of the Sherman antitrust law as interpreted by the Supreme Court. The administration is not entitled to any credit at all for this most helpful and desirable manifestation.

It is the natural outcome and consequence of the vigorous, forceful, and successful prosecutions under the Sherman antitrust law during the administration of William Howard Taft. The gentleman has complained of the "rule-of-reason" interpretation of the Sherman law. I realize that some gentlemen on that side find it difficult to understand anything that has to do with reason or any rule of reason. In their philosophy a statute must be so interpreted as to make it impossible of execution or entirely destroy its usefulness. That, as I understand it, is the position of some gentlemen on the other side.

Mr. SLOAN. Will the gentleman yield? Mr. MONDELL. Yes; I will,

Mr. SLOAN. Does the gentleman understand that the majority know just where they do stand on the rule of reason, or will they know until the next message is delivered from that

desk by the President of the United States?

Mr. MONDELL. I was about to remark that just at this critical moment there seems to be a question as to whether the administration proposes to strike its colors to the freebooters of monopoly or raise the black flag of piracy against all suecessful enterprise, and we shall not know which horn of the dilemma they expect to take or will take until they hear further from the source the gentleman from Nebraska has suggested.

But I rose not to speak of these things, but to refer briefly to a section in this otherwise very excellent measure, section 6, which provides for another onslaught by the place hunters upon

the civil service of the Government.

Mr. BUCHANAN of Illinois. Will the gentleman yield just for a moment?

Mr. MONDELL.

Mr. BUCHANAN of Illinois. What does the gentleman think about the rule of reason, as applied to the Standard Oil Trust and the Tobacco Trust by the Supreme Court, and as applied to the Hatters' Union? They do not compare very well, do they?

Mr. MONDELL. I do not know so much about the effect of

the tobacco decision, but-

Mr. BUCHANAN of Illinois. Affirming damages of \$250,000 against the hatters, and allowing the Standard Oil to continue, and the Tobacco Trust to continue to rob the people under the

Mr. MONDELL. As I have said, I do not know so much about the effect of the decision in the tobacco case, but I am somewhat familiar with the effect of the decision in the Standard Oil case, for I live in a region containing, we hope and believe, great oil deposits. For years we had great difficulty in securing the development of those deposits. I charge those difficulties to no one in particular, but I do know, and all my people know, that since the Standard Oil decision was rendered there is an entirely different condition in our country. Now there is no difficulty whatever in securing capital and agement for the development of oil property, and no difficulty, unhampered of anyone, to find a market for the product when produced. An ounce of fact is worth a ton of speculation in this as in every other matter.

Mr. BUCHANAN of Illinois. Mr. Chairman, the fact is that oil has increased in price to the consumer and the Standard

Oil Trust stock, I believe, has gone up.

Mr. MONDELL. I am not informed how much oil may have advanced in price, take the country as a whole. I do not keep advised on oil stocks. No one who was familiar with the operations of the Standard Oil Co. is necessarily greatly surprised, if it is a fact, that the dissolution of the company has not cheapened oil. The complaint of intelligent men against the cheapened oil. Standard Oil Co. has never been wholly or principally that it raised the price of oil unreasonably. In fact, in defense of that company it was constantly urged that the price of oil under its management was not abnormally or unreasonably high. Possibly that great corporation exerted to a certain extent a steadying influence that had something to do with the maintenance in most of the country of a reasonable price for oil. The charge and complaint against the Standard Oil Co. was as to its

methods, under which it drove out its competitors; methods under which it ruined them; methods under which it assumed to itself the sovereign right of saying whether men should develop enterprises and have a free opportunity in the world. was not altogether, or in the main, a question of the cost or price It was a question of industrial liberty, and industrial liberty is largely established; at least it is advancing under Supreme Court decisions rendered in prosecutions by Republican administrations under the Republican Sherman antitrust law. If you gentlemen do not gum the cards, the better conditions in connection with our control over great corporations will advance,

Mr. BUCHANAN of Illinois. Let me ask the gentleman-I

think the gentleman wants to be fair-

Mr. MONDELL. I should like to carry on a discussion with the gentleman at any length, and if the gentleman from Michigan [Mr. Samuel W. Smith] will give me more time, I will be very glad to do it; but I rose to discuss an entirely different

Mr. SAMUEL W. SMITH. I want to say right here that I regret I will not be able to give the gentleman any more time.

Mr. BUCHANAN of Illinois. Just one moment.

Mr. MONDELL. I can not yield any further. Mr. Chairman, gentlemen on the other side have complained at various times when I have expressed surprise and even amazement at some of the things they have done. After reading section 6 of this bill I promise never again to allow surprise or astonishment to affect me sufficiently to give expression to

After what is proposed in this section, nothing you gentlemen can do should cause astonishment or surprise to any reasonable person. The President's attitude in the matter is a peculiar one, if we may judge from the newspaper reports. It is said, and I hope the President is not incorrectly quoted, else I should not want to mention the matter at all-the statement in the newspapers is that the President felt entirely comfortable about the onslaught of the spoilsmen on the civil service of the Government so long as the President had the appointments to make. But this proposition to have the Postmaster General make the appointments, we understand, occurs to the President as not being altogether proper. It is not the spoils system so long as the President is to make the appointments, but it is the spoils system in all its iniquity if the Postmaster General has to do it.

Mr. THOMPSON of Oklahoma. Will the gentleman yield?

Mr. MONDELL. Yes; for a question.
Mr. THOMPSON of Oklahoma. I would like to ask the gentleman if he is referring to his speech he made during the Republican administration, making an onslaught on the civil-

Mr. MONDELL. I never delivered a speech containing an onslaught on the civil-service system. I believe in the civil service. I am also a partisan, and I believe in having political appointments made by the party in power from among its supporters. This great Government, so far as the ordinary machinery of administration is concerned, so far as its scientific and business activities are concerned, will never be wisely or economically administered except under a civil-service system. Further than that, after having had some 18 years' experience with nominations for public office, I suggest to my friends on the other side that theirs may not be altogether a bed of roses when they have to hand out a few more slices of pie and have not enough to go around among the hungry hordes that, so long held back from the pie counter, are now clamoring for a place at the board.

Mr. CARTER. Will the gentleman yield?

Mr. MONDELL. For a question. Mr. CARTER. The gentleman speaks of the hungry horde at the pie counter. Does he think that the fellow down at the fourth-class post office, say, who has applied for a position, is any more of a hungry applicant at the pie counter than the man who has run eight or ten times and served 15 or 20 years in

Mr. MONDELL. That is not the sort of a man that this item I am speaking of has to do with. It has to do with the men the majority of whom fill places secured either by advancement or direct examination, and, whether they so won them or not, are men who have by reason of experience in office qualified themselves to perform their duties infinitely better than the majority of the men who would be selected to take their places even by so conscientious a gentleman as my friend from Oklahoma from among his constituents who will be clamoring for these jobs.

Now, Mr. Chairman, what I rose to say was that I fear the Postmaster General in his entirely laudable attempt to enlarge

to the conditions that exist, at least, in some parts of the country.

This is the situation in my mountain State. It is a situation that I know of no remedy for except in the modification of the order in regard to the 50-pound limit and rate. Under the 50-pound limit the rate in the first and second zones is \$1.08 a hundred pounds or 54 cents for 50 pounds. Now, in our country a post office on a star route within the first and second zone from the supply office may be 100 or more miles from the supply office. The ordinary freight rate on an average to good road is about \$1 a hundred per 100 miles or 20 cents a ton a mile, as the freighter puts it. It may in very exceptional cases be a little lower on goods that can be compactly stored and are not liable to damage over very good roads, and it increases rapidly, even under the keenest competition, when the roads are difficult or when the goods to be carried are bulky or liable to

As the distances from a post office of supply-generally on a railroad-over a star route to office of supply within the first and second zones may be anywhere from 50 to 150 miles, it will be readily seen that the parcel-post rate may in many cases be less than the ordinary freight rate by team. For instance, on one star route in my State there is a large creamery in a mountain valley and that creamery, I think, has already started to ship all its product by parcel post to the nearest railroad point. The parcel rate being, as I understand it, some 25 or 30 cents a hundred less than any freighter, under the keen competition that exists, can afford to haul it.

Another star-route carrier in my State, who drives a twowheel cart with a pair of horses over a mountain road, found confronting him the other morning 2,400 pounds of flour and nearly the same amount of sugar, and a large consignment of

Another star-route carrier, who a part of the time when the weather is very bad carries the mail on horseback, was overjoyed in the midst of a winter squall the other day to find awaiting dispatch the first half-ton installment of 5 tons of

navy beans.

Another star-route carrier, desiring to bid for the coming contract term, calls attention to the fact that there are three settlements of quite considerable importance having country stores on his route, with a population to be supplied aggregating, I should say, 2,500 people, to which the wagon-haul freight rate is \$1.30, \$1.60, \$2.10, respectively. They are all within the second zone rate of \$1.08 a hundred, or 54 cents for 50 pounds. The problem here is not one as to what extent the farmers shall utilize the parcel post to ship out their products, nor is it a question as to what extent the individual farmer or ranchman will avail himself of the parcel post to obtain his groceries and supplies from town. The real serious problem is how to provide for such services as that without at the same time taking over the general overland freighting business of the country-the transportation of the goods of country merchants and the products of considerable industries to the points of distribution.

As matters now stand the parcel-post carrier will be required to carry all the canned goods, flour, sugar, in fact, a very large proportion of all the goods, particularly groceries, required by very considerable populations of stockmen and farmers living in the mountain valleys on star routes, and this Government haul will largely be for small merchants. I realize that the Postmaster General believed he was doing entirely the proper thing in his recent order relative to the 50-pound limit and rates, but the officials of the department evidently failed to acquaint him with the conditions to which I have referred with which they should have been entirely familiar. I am frank to say that I do not see how we are going to meet it. Already practically every star-route carrier in my State has appealed to me for relief from the burdens that were placed upon them, first, by the inauguration of the parcel post; second, by the increase to 20 pounds; and, third, by the increase to 50 pounds.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. I will ask the gentleman from Michigan

to grant me five minutes more.
Mr. SAMUEL W. SMITH. Mr. Chairman, I would like to do

so, but I am so hard pressed for time that I can not.
Mr. MONDELL. Then I will ask the gentleman to give me two minutes more.

Mr. SAMUEL W. SMITH. I will grant the gentleman two minutes.

Mr. MONDELL. Mr. Chairman, the Government, of course, ought not to enter into the freight-hauling business. Wagon-haul freight ever intended that under the parcel post. and extend the parcel post has not given sufficient consideration | rates are generally as low as they can well be under the conditions, because there is ordinarily competition. No one expects the Government to embark in the business of hauling freight, and in some way the situation to which I have referred must In the meantime the present star-route carrier is having a hard time of it under a contract which did not cover parcel carrying, much less freight hauling. Prospective bidders hesitate to submit bids for carrying the mail for a new contract term, because while they may be entirely familiar with the conditions of mail carrying, they can not form an intelligent opinion as to how much freight there may be to haul under the conditions which now exist. The Post Office Department is doing its best to afford relief to the men now under contract, although, like all Government bureaus under like circumstances, it seems to feel that Uncle Sam is rather hard up and therefore they must be exceedingly careful about the allowances which they The allowances are, I think, fairer under the second than they were under the first readjustment. I trust they will be more liberal under the readjustment based on the increase to

50 pounds, for that hit the star-route carriers hard.

The CHAIRMAN. The time of the gentleman from Wyoming

has again expired.

Mr. MOON. Mr. Chairman, I yield to the gentleman from Kentucky [Mr. Rouse].

Mr. ROUSE. Mr. Chairman, I offered this amendment to the Post Office appropriation bill, which seeks to take out of the civil service the assistant postmasters in first and second class cities, and am firmly convinced that it should be adopted, not because there are no men employed in the first and second class post offices who will make competent assistant postmasters, but because I believe, in the first instance, that the postmasters should be allowed to select their confidential men, the man whom the postmaster is constantly associated with and who is really an assistant, the man who takes the place and supervises the office during the postmaster's absence. The actions of the assistant are considered as the actions of the postmaster. Is it just that any man should be held responsible for the acts of another when he did not choose that man to act for him and one in whom he has never placed implicit confidence and trust?

Mr. Chairman, there are two first-class post offices-Covington and Newport-in my district, and I am personally acquainted with nearly every man in these post offices. I will venture the opinion that there are enough men connected with these two offices to ably administer the duties of as many first-class post offices as there are men connected with these two offices. The postal men of my district are able, intelligent, and faithful to their trust, and no two offices in the United States can boast of better averages than is yearly made by the men con-nected with the Covington and Newport post offices. I am proud of these men, my constituents and my friends. The question of qualification only does not enter into this amendment. I believe when an administration changes men should be appointed to office who believe with the administration and are in accord with its policies. You can not have first-class service when the principal and assistant entertain different views and do not work in harmony and for the interest of the party which is in power. To force upon a postmaster an assistant whose views are not in harmony with his puts that postmaster at a distinct disadvantage; it subjects him to a handicap which would not be tolerated in any other line of The injustice is obvious, and as a result works to the detriment of the service. It is a gross violation of the letter, the spirit, and every rule of good business. It is an undisputed fact that for business to succeed the work of its employees must conform and dovetail with each other. When the assistant has not the trust and confidence of his principal. and when the work of the assistant does not conform with that of the postmaster, instead of being an assistant he is a detriment to the service and a load to be carried.

Can you picture in your mind any business being a success when the heads thereof have different views as to the manner in which the business should be conducted? Not only should the postmaster be allowed to select his assistant and be regularly associated with some person of his choice, but the head of every business should have this power, and it is exercised in all business except certain branches of the Government serv-The United States marshals select their deputies, the collectors of internal revenue select their deputies and assistants, and why not give the postmasters the same privilege?

The report of the minority on this amendment terms it "as vicious legislation, a step backward, and an attack on the merit system and civil-service reform generally." Do we expect any other report from the Republicans of the House? Do you gentlemen know that the assistant postmasters were placed under the civil service by an Executive order of President Taft on the 30th day of September, 1910, and that of the twenty-four the increase of the salary of the rural carrier 10 per cent.

hundred and more assistant postmasters in the United States not 50 of this number were Democrats? These assistants were placed under the civil-service blanket with one stroke of the pen, to be there for life, and only a very small per cent of the twenty-four hundred men ever passed the civil-service examina-tion. Do you consider this "vile legislation"? Did you con-sider it "vile legislation" when President Taft placed over 40,000 fourth-class postmasters under the civil service without an examination? We all know this action was done for political purposes only. I do not wonder at you taking the stand that this is "vile legislation." Whenever we propose an amendment which might provide a place for a Democrat now held by a Republican you term it "vile legislation and a step back-We have thousands of good Democrats who can fill these places and who want to fill these places, and let us re-move the political civil-service blanket and let some good Democrats occupy these positions, and they will fill the offices with honor to themselves and credit to the Government.

Gentlemen of the majority, I appeal for justice in the interest of the service and the party, and if the conditions that exist at the present time should continue, the penalty of injustice to the

faithful at home will be paid by the Democratic Party.

Mr. Chairman, this bill carries the largest amount of appropriation of any bill that has ever passed Congress-over \$300,-000,000—yet this money is not taken out of the pockets of our people with no return. The person who makes the greatest use of the stamp contributes in proportion the largest amount of this appropriation. The Post Office Department is the greatest branch of the Government; it serves all the people, rich or poor salte with no fevers and is now self successing under poor, alike, with no favors, and is now self-sustaining under the able management and direction of the greatest Postmaster General this country has ever known and his corps of untiring and competent assistants, with a surplus at the end of the last fiscal year of more than four and one-half million dollars.

There are several amendments added to this bill which should pass at the earliest date and become permanent law; the amendment regarding the limit of funds to be deposited with postal savings banks should be adopted. By this provision the amount deposited is unlimited and the amount on which interest is paid the depositor is raised from \$100 to \$1,000. The Government pays 2 per cent interest to the depositor and immediately deposits the money with the banks on which 21 per cent is paid to the Government. On December 1, 1913, the Postal Savings System had been in operation for 30 months and there was over \$33,000,000 deposited in the banks belonging to the people who deposit their money with this system. It is estimated that with the limit provision repealed and the amount on which interest is paid raised to \$1,000 that this amount will be doubled within a year, and that the Postal Savings System will be self-sustaining. This amendment will not injure any bank in the country, because the money that is deposited with the Postal Savings System comes either from foreigners or from that class of our citizens who never do business with the banks. The people are benefited, the banks benefited, the Government is putting into circulation money that is idle or money that will be sent to foreign countries never to return, and no person is injured.

The amendment dispensing with surety bonds now required of officers and employees accountable for funds or property and to substitute therefor a guaranty fund established by assessment levied against officers and employees will be much cheaper to the officials and at the same time provide for a safer guaranty and should be adopted.

Our able Postmaster General, who is at all times thinking and working for the interest of the great department of the Government of which he is the head, has made wonderful strides during the past six months in pushing the parcel post. He has raised the weight limit upon which articles can be mailed, and every person residing in the city or country is benefited by this order, and I predict that before many months other orders will be issued which will further benefit the people by this service. The express companies were charging exorbitantly and have been forced to cut their rates nearly half in order to meet the rates offered by the parcel post. Many of us live in small towns, miles from the railroads and express offices, and could not have access to the express. The parcel post takes care of us rural people like the express companies do to the city people and with less expense.

The parcel post benefits the merchant in the city and in the country the farmer, the city man, and, in fact, all classes of I admit the parcel post has added additional burdens to the rural carrier, and to these faithful officials Congress should take notice and increase their salary in accordance with The salaries proposed in my bill would pay to the carriers for routes between 6 and 8 miles in length \$532. For routes from 8 to 10 miles, \$580; for routes from 10 to 12 miles, \$629; for routes from 12 to 14 miles, \$677; for routes from 14 to 16 miles, \$726; for routes from 16 to 18 miles. \$847; for routes from 18 to 20 miles, \$968; for routes from 20 to 22 miles, \$1,089; for routes from 22 to 24 miles, \$1,161; for routes of 24 miles and over, \$1,210. The carriers on star routes are paid an amount in addition to their contract price, when it appears that the weight of mail has been materially increased on account of the extension of the parcel post.

Mr. Chairman, we have offered an amendment to the present law providing that the Postmaster General shall have authority to grant leave of absence with full pay for one year to the railway mail clerk and substitute, the letter carrier, the rural carrier, the post-office clerk, and the special delivery messenger when injured while on duty, and also for 50 per cent of salary for the succeeding year, and also to enable the Postmaster General to pay the sum of \$2,000, which shall be exempt from payment of debts of the deceased, to those dependent upon these officials in case of death.

The Postmaster General has recommended that leave of absence with pay not to exceed 20 days in any fiscal year may be allowed to any railway postal clerk on account of personal illness, and that the substitute clerk in such a case shall be paid by the Government and not by the regular clerk. This amendment is not included in the bill at this time, but is a good recommendation; it is right, just, and should be adopted, and I trust that it will be included in the bill before it becomes a law.

Mr. Chairman, I offered the amendment to the bill providing that all railway companies carrying mail shall furnish free transportation on the lines of their respective roads to railway mail clerks, including transfer clerks, terminal railway postoffice clerks and clerks detailed to division superintendent and chief clerks' offices. This is not entirely new; the railway mail clerks are granted this concession and it should be granted to all the clerks in the service.

We have considered and offered amendments to this bill as recommended and asked for by the clerks and carriers in first and second class offices, by the railway mail clerks, by the rural and star carriers, and I think this is one of the best bills ever reported by the Post Office Committee. [Applause.]

Mr. MOON. Mr. Chairman, I yield to the gentleman from

Michigan [Mr. BEAKES].

Mr. BEAKES. Mr. Chairman, I should feel very sorry, indeed, for the star-route carriers in Wyoming if I felt sure that the gentleman from Wyoming [Mr. MONDELL.] in no way exaggerated their condition, but the gentleman from Wyoming has spoken of the assistant postmasters, who, he said, owed their positions to examinations and promotions. Is not this a slight exaggeration? All the examination that the majority of assistant postmasters that I know of ever took was an examination into what they had done for the Republican Party, and all promotions that I know of are promotions from a ward worker to an assistant postmaster. The gentleman must remember that nearly all of these men were covered into the civil service. I, for one, am a believer in the civil service, and I believe that the assistant postmasters should be under the civil service, but they should come in by examination or promotion of the genuine

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. BEAKES. I yield.
Mr. MONDELL. The gentleman would be in favor of it, then, if all these offices were filled with Democrats and then

covered into the civil service?

Mr. BEAKES. Mr. Chairman, if I had my way, I would fill these offices by examination now, and I would make the present incumbents eligible to examination. Some of the present incumbents whom I know I would be glad to see retained, but for the future I would make the office of assistant postmaster one to be filled by promotion from the ranks of post-office employees. I would hold this office as a reward for faithful service on the part of the clerks or carriers-something ahead to spur them on to make a study of their life business and perfect themselves in all the details of a great business, which comes so close to all the American people. The fault with the civil-service system, as I view it, is that when a man gets in, after a few slight and immaterial promotions, there is nothing ahead. In business circles, outside the Government service, a man begins down in the ranks and he is spurred on by the knowledge that if he shows unusual knowledge, skill, efficiency, or capacity, there is almost no limit as to how far up the ladder he may climb. There is always something ahead for him. But in the civil service, after one or two rungs of the ladder, there is a blank wall and nothing ahead. And the Post Office Depart-

ment is conducting a great business, one of the greatest in the country, which goes into every home throughout the land, and presents all the great problems found in other classes of business. It is made up of details, all of which must be coordinated. The maximum of efficiency is required at the minimum of cost. When you consider how much less is the cost to the people of matter handled through the Post Office Department than that handled by private parties, you can readily see why there must be the maximum of efficiency at the minimum of cost in order to make both ends meet. That such an enormous business is carried on with such a multiplicity of detail at such a small cost for each transaction, without loss to the Government—that both ends do meet—is a high tribute to the men in the Post Office Service.

While this appropriation bill, totaling \$305,247,767, is the largest appropriation bill coming before Congress and constitutes much more than a quarter of all the expenses of the Government, it is for the only department which pays its own way, and the committee believes that the expenditures will be fully met by the sale of stamps. The bill was thrashed out in committee item by item, and I wish to bear witness to the careful consideration given each item by my colleagues on the committee. The appropriations as reported are as low, I believe, as they could be made without injury to the service. In fact, I think the committee is practically a unit now on each item in the appropriation bill, differing only on the one question of the propriety of taking the assistant postmasters out of the civil service. But this unanimity in support of the appropriation did not come until after warm and animated discussions, look-

ing at each item from every angle. There is one item in the appropriations on which I wish to dwell a moment, and that is the appropriation of \$200,000 for village free delivery. This appropriation was not recommended by the department. In fact, at first it was not favored by a majority of the committee, but after free discussion it received an overwhelming majority in the committee. The Post Office Department, in fact, recognized the justness of the claims of these villages for free delivery by stating that they were working on plans for free delivery in all villages by rural carriers. They did not have these plans perfected and asked for no appropriation by which they could be carried out, so that if this appropriation were dropped from the bill free delivery in 114 villages which now have it would be dropped. The citizens of these villages are very proud of having their mail delivered, and to take away from them this accommodation would be a distinct step backward. They have had this delivery long enough to look upon it as a right, and there is no reason why the continuance of it should be denied them. I hope that a plan will be worked out to give all villages free delivery of mail. The cities have it, the farmers have it. Why should the villages, The cities have it, the farmers have it. Why should the vinages, alone of our population, be discriminated against? Many of these villages are practically one-street villages, and it is certainly an anomaly that a village resident a mile from the post office can not have his mail delivered while a farmer a quarter

of a mile from the post office may have his mail delivered.

The main reason given for a discontinuance of the village free delivery is that the postal revenues in these villages have not increased in as great a proportion as had been expected. Having served as postmaster myself, and having given as postmaster some study to the increase of revenue, I would say that the increase of revenue in these villages is small because proper facilities are not afforded for mailing letters without going to the post office. No street boxes for mailing letters have been provided. If this were done, I venture the prediction that the desired increase in revenues would follow. You have made it easier for these village residents to get mail, but you have not made it easier for them to send out mail, and it is on the mail

sent out that you get your revenues.

It costs the Government \$97,000 to deliver mail to 114 villages scattered in 41 States of the Union. These villages have a total population of 252,720. In other words, it costs less than 38 cents to deliver mail for an entire year to each unit of population. According to the report of Gen. Roper, it takes but 11.86 per cent of the revenues of these offices to pay for village carriers, and these carriers are employed to do extra work in the offices. The expense of the City Delivery Service is \$36,000,000 for 46,000,000 people, or 78 cents per unit of population, and the 42,000 rural delivery routes, supplying 20,000,000 people, costs \$45,000,000 a year, or \$2.25 a year per unit of population. Judging the subject in the light of the cost, one can not blame the villages if they should bitterly resent the taking away of this privilege which has been accorded them and to the enjoyment of which they have become accustomed.

Mr. Chairman, I lift my voice in behalf of the residents of Morenci, a thriving village in my district, close to the Ohio line. They have been highly appreciative of having their mail deliv-

ered. They would bitterly but justly resent it if their Representative on the floor of this Congress should allow this privilege to be taken away from them without doing his utmost to prevent it. There are other villages in my district that are asking for this right. They are getting an inkling as to how much it is appreciated in Morenci, and, Mr. Chairman, I am going to devote myself to an effort to get it for them. see no just reason why this Government should discriminate against the villages, and I predict, also, that in time the added expense would be fully met by increased revenues. bill does not attempt to bring about full village delivery; it merely provides for a continuance of the service in villages which now have it and for the starting of it in a like number of villages which do not now have it. The extension of the service to all villages, I think, ought to be provided for in the appropriation bill next year. We must take no step backward, however, and, once having conferred a privilege so highly ap-

preciated, we should not take it away.

The main increases in the Post Office appropriations are caused by the increased cost due to the rapid growth of the parcel post. This service is growing by leaps and bounds, and it is doubtful, indeed, if all the items of appropriation are as large as the tremendous increase in parcel post will demand. While we get this money back in postage on parcel-post packages, we must provide in advance for all the expenses of the parcel post from July 1, 1914, to July 1, 1915. An attempt has been made to do this in this bill. The people are just beginning to learn the use of the parcel post, and they are very highly appreciative of it. But not all the benefit has come to those who make use of it. Already it has forced the express com-panies to make a very material reduction in their rates, in many cases compelling them to cut their rates into halves. caused a great saving to consumers, running into the millions of dollars. But this taking over by the Government of a large proportion of the express business of the country by the Post Office Department gives rise to many new and perplexing prob-The method of carrying mail other than the letter mail in cloth sacks in use so many years is not fitted for the safe carrying of parcel post without breakage, and the recent in-crease in weight will cause an increase in the necessity of devising a different method of handling packages. A small 20-pound package of iron placed in a sack with fragile packages and handled the way these sacks are handled would have a tendency to do much damage. While this has nothing to do tendency to do much damage. While this has nothing to do with this appropriation bill, I hope I will be excused for referring to it only as illustrating one of the many problems to which your committee, together with the department, must give its attention.

The parcel post is only in its infancy, and the volume of it will increase manyfold. It will greatly increase the revenues of the Post Office Department, but it must also correspondingly increase the expenses, and that in every branch of the service. Not only the cost of transportation, the number of employees in the service, the expense of the rural carrier, the cost of city delivery, the cost inside the post offices and the railway mail car, the cost of the screen-wagon service, the amount of the star-route contracts, but in many other ways. It will also compel the building of additions to a number of post offices, and an increase in the size of offices to be hereafter built. It is a big business that the Post Office Department has added to its already large business, and it is a great testimonial to the efficiency of the department that this big business has been successfully carried on with so little preparation for it. We have taken this great step in advance, and we must devote ourselves to improving the service and making it of still more

value to the people.

This bill provides for an increase of \$50 a year each in the salaries of approximately 42,000 rural mail carriers. this is a small enough increase when the extra work imposed

upon them by the parcel post is considered.

The bill provides for 30 additional post-office inspectors, which will be a welcome addition to a greatly overworked but highly efficient force of men. The business of the post office has become so extensive, its employees so numerous, its activities so varied, that money spent for inspection is money well spent and is returned manyfold in increased efficiency of the work

The principal increases in appropriations in this bill are \$600,000 for the screen-wagon service, caused by the parcel post; \$1,570,000 for the star-route service, expense caused by the parcel post, and which I hope will in some measure at least alleviate the distress of the star-route carriers who so feelingly appeal to the gentleman from Wyoming [Mr. Mondell] when confronted with the task of carrying out 5 tons of beans on one trip; \$750,000 for temporary and auxiliary clerk hire caused by the shifting demands of a new service such as the parcel

post is; \$3,688,000 for railroad transportation, caused by the increased weight of the mails; \$1,647,900 compensation to clerks and employees; \$400,000 for rent, light, and fuel in post-office buildings; \$2,340,000 for pay of letter carriers; \$690,000 for substitutes for letter carriers; \$470,000 for horse-hire allowance; \$2,197,840 for pay of employees in the Railway Mail Service; \$410,000 for the expenses of operating railway mail terminals, which, besides shortening the time, it is estimated, are effecting a saving of \$1,500,000 in expenses a year; and \$1,150,000 for the rural mail carriers.

It will be noticed that a very large part of this increase is demanded by the rapidly increasing volume of parcel post, which is adding greatly to the work of all departments of the As to the appropriation for rural mail carriers, the service. increase is needed for increase and extension of the service, and if the House should agree to the proposed legislation in-creasing the compensation of the rural carriers \$50 each it will be necessary to add approximately \$2,000,000 to this appropria-

The bill, as has long been customary in a Post Office appropriation bill, carries some new legislation. That referring to the assistant postmasters has already been referred to, and this is really less material than some of the other legislation that the bill contains, although, of course, more productive of partisan debate. Unlike many preceding bills, however, this new legislation has all been eliminated from the appropriation part of the bill and put at the end of the bill in added sections, numbered from section 2 to section 18, inclusive. The propriety or necessity of most of this new legislation is so apparent that I need take no time to refer to it, and there are only two points that I wish to take up.

The first is an appropriation of \$200,000 for the purchase by the Government of steel railway post-office cars. This appropriation is for the purpose of determining what the saving will be if the Government should own its own railway mail cars instead of continuing to rent them from the railroads. The Government is paying the railroads now a rental of \$5,000 a year for each of these cars and paying also for the mail carried in them by The rental cost for these cars is considerably over \$5,000,000 a year. Approximately two years' rental will build one of these cars. Many private corporations own their cars and pay the railroads for hauling them over their roads. If it pays the private corporations to own their cars, why should it not pay the Government, especially when the Government can buy these cars at a cost of two years' rental? A peculiar fact is that where the Government occupies a compartment car for its mail—that is, one half of the car being used for a rallway-mail post office and the other half for baggage or express—the Government pays no rental at all; just simply pays for transporting the mail by its weight. If the Government can use half a car without rental, why should it be compelled to pay as large a sum as \$5,000 a year for the rental of a whole car?

The other point I wish to refer to is the extension of the law

granting full pay to railway mail clerks granted leave of absence on account of injuries received while on duty, and giving the family of a railway mail clerk \$2,000 if he is killed while on duty, so that it will apply to letter carriers, rural carriers, post-office clerks, or special-delivery messengers. There is no reason why the Government should not be subject to a workmen's compensation law as well as an individual or corporation. If this law is just as to railway mail clerks, and I believe it is eminently just, it is as just to the other postal employees, who are liable to be run down by automobiles, bitten by vicious dogs, or injured in many ways through no fault of their own. I feel sure that Congress will feel the propriety of the Government providing for its employees injured in the line

There is nothing in this bill about superannuated employees, but with the avenues of promotion practically closed, and civilservice employees growing older with their wages only sufficient in most cases for their daily living, the question must eventually be taken up and settled in a spirit of mercy. Superannuated employees can not render efficient service; neither can a merciful Government turn them out helpless on a cold world absolutely incapacitated from earning their living in other employment, and the civil-service law will shortly make this a burning question.

Mr. Chairman, your committee worked many days on this bill. They had before them the careful estimates of the Post Office Department. They wanted to cut the appropriation to as low a figure as was consistent with the good of the service. We grant that the total asked for in the bill is large, but it is not so large that the estimated revenues of the Post Office Department will not care for it. It is not true economy to be parsimonious. We must serve the people well. It is a big business, employing 295,469 people, and is growing so rapidly that the number of employees must largely increase. It is well handled and it comes close to the people. It has done much, and it will do more. It has had a wonderful development. But I believe the development of the next five years will far exceed the development of any five years of its history.

Mr. MOON. Mr. Chairman, I yield 10 minutes to the gentle-

man from Illinois [Mr. GORMAN].

Mr. GORMAN. Mr. Chairman, there has been so much said here this afternoon by gentlemen on the Republican side of the House concerning their love for the civil-service law that one would get the impression that the Republicans alone are in favor of its enforcement. I wish to take advantage of this opportunity to publicly declare that I am in favor of an honest and conscientious application and enforcement of the civil-service law. I believe that all appointments to positions in the civil service should be governed in the first instance by the qualifications of the man or woman appointed to the position, and that retention in the civil service should continue as long as the employee renders conscientious and efficient service to the Government.

I listened with a great deal of interest to gentlemen on the other side of the House reading to us from ancient volumes what some Republicans said in times past concerning civil service, and if they are going to read all that Republicans have said in favor of civil service they will keep us here an out-rageously long time, because Republicans have said a great many things in favor of civil service. But if some one of the distinguished and scholarly gentlemen on the other side of the House will take upon himself the insignificant task of writing down what Republican administrations and Republican leaders have done in favor of an honest, conscientious application of the civil-service laws, he can write it in capital letters on the back of a postage stamp and have room to spare. [Applause

on the Democratic side.1

Mr. Chairman, the question of civil service that is here involved, as I view it, is not whether we shall have civil service, but as to whether the administration charged with its application will do it in an honest and conscientious manner. knowledge which I have gained from conditions obtaining here in Washington in the Government service, and in view of the statements that have been repeatedly made here upon the floor of the House by gentlemen whom I believe to be in a position to know, that 95 per cent of the Government employees now under civil service are Republicans, leads me to believe that there has been a gross violation of the civil-service law and partisan favoritism carried on under that law and in violation of it by the Republicans during their years of power.

The last Republican President, Mr. Taft, has been lauded here by the Republicans because of his issuing an Executive order extending the civil service. But if President Taft had issued that order before his defeat for the Presidency it would, in my judgment, have shown better faith on the part of Presi-It was stated on the floor of the House a few days ago that President Taft's order extending the scope of the civil-service law was made before his defeat, but everyone who was at all familiar with the conditions knows that President Taft was defeated by the bosses of his own party at Chicago in June, and what happened in November was only anticipated by the issuing of his Executive order in October extending the

scope of the civil-service law.

Mr. Chairman, while the Republicans have done little for civil service it might be observed in this connection that they have done a great deal to civil service. If I were to go into details and cite specific instances, it would extend beyond the limit of time allotted to me; but to sum it up in a word, Republican administrations have time and again done the same thing to the spirit of civil service that the bosses of the Republican Party did to the delegates elected to the Republican convention at Chicago in June, 1912. The bosses used the steam roller on Republican delegates who were not friendly to Mr. Taft and Republican administrations used the steam roller on the civil-service law when it stood between them and the friends whom they wanted to reward.

Mr. Chairman, one of the gentlemen on the Republican side this afternoon quoted the plank in the Democratic platform making reference to civil service. There is another plank in the Democratic platform adopted at Baltimore which I hope my Democratic associates will do something to carry out during the life of the present Congress, and that is the plank which commits the Democratic Party to a policy of economy by the wiping out of unnecessary and useless offices, the salaries for which are consuming the taxes of the people.

positions were created by the Republicans and appointments made to these positions as a reward for services rendered to the Republican Party. Some of the men so appointed had developed humps on their backs from carrying their election precincts or districts, but none of them was appointed by virtue of any civil-service test to determine their qualifications for the office, and after the creation of these places and the appointments had been made, Executive orders extending the civil service were issued from time to time to retain these men in power. I am one of the new men in the present Congress, and I have been amazed, Mr. Chairman, in going through the various departments here in Washington, at the number of big, able-bodied men whom I have seen sitting around the corridors in the various public buildings performing no useful function, doing absolutely nothing but drawing the salary that is paid them, and on inquiry as to how long these men have been in the Government service I have been informed that they have been here, some of them, 15, 20, and 25 years, and now they are all civil-service employees.

The only thing I have ever seen some of these men do in the way of work is to open a door leading into the office of a Government official as a visitor approaches it or close the door after a visitor has departed. Will some gentleman on the other side of the House be kind enough to inform us as to the kind of civil-service test one should be subjected to to determine a man's qualifications to fill so absolutely useless a posi-

Mr. Chairman, among the other employees of the Government whom I have had the good fortune to see at their work are the Government clerks, and there are many thousands of these. They report for duty about 9 o'clock in the morning and quit at 4.30 in the afternoon. The first hour of their day is usually devoted to making preparations for beginning work, and the last hour is devoted to prayerful contemplation to the approach of quitting time. The mechanics employed at the Government Printing Office, the Bureau of Engraving and Printing, and in the navy yard are as hard working an army of men as I have ever seen employed anywhere; but the Government clerk, protected by civil service, after appointment by Republicans as a reward for services rendered to the party and after long years in the Government service, develops an impression that he is molded of superior clay and comes to regard himself as absolutely secure in his position. And in view of the fact that many of them were appointed with a view to doing nothing but drawing salary, they can not be successfully accused of neglecting their duty or being incompetent, and my observation of them has led me to the conclusion that they are eminently qualified to do nothing, and they live up religiously to that qualification.

Mr. Chairman, I am one of those who had the good fortune to sit here yesterday and listen to the eloquent, forceful, powerful, logical speech of the distinguished chairman of the Com-mittee on the Post Office and Post Roads when he told the House that in his judgment the Diplomatic Corps should be entirely abolished as a useless appendage to this Republic. I believe, Mr. Chairman, with the distinguished chairman of the committee, that the Diplomatic Corps maintained by our Government at a great expense is absolutely worthless to us. created at a time when the Republic was young and a stranger among the nations, and there may have been some occasion in those days for the creation of such a corps on the theory that it would help our Government to be represented abroad.

Mr. WILLIS. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Ohio?

Mr. GORMAN. I must decline to yield now. I do not wish to be discourteous, but my time is very brief.

Mr. Chairman, from my reading of the functions performed by the gentlemen who occupy these high-salaried positions of ministers to European courts, the most useful thing they do is that of serving as matrimonial agents in bringing about the introductions of rich Americans with daughters of marriageable age to dissolute dukes or puny princes with matrimonial inclinations. In the days before we had the telephone, the telegraph, wireless telegraphy, and a well-developed Postal Service there may have been some occasion for a representative stationed abroad, but in these years of our modern progress, in view of the speed with which we can do things, aided as we are by modern scientific inventions, it seems to me that if the Government of the United States wants to transmit a communication to a foreign Government it can very properly, safely, and with due dignity transmit it by mail or by cable or with the aid of our wireless telegraphy; but I believe it is beneath During the many years of Republican administration, and while the civil-service law was on the statute books, numerous any foreign court, garbed in the livery that royalty may dicthe dignity of any American citizen to require him to sit around

tate, in order that he may be on hand to carry a message from

this Republic, flunky like, to any king.

Mr. Chairman, in carrying out the party's pledge to the people—of economy in the public expenditures by abolishing useless offices—the Democratic Party could render no better service with the money thus saved than to apply it to the increase in salaries of the men in the Postal Service, who render real service to the country. In the large cities throughout the land, where the cost of living has increased out of all proportion to the income of men who work for moderate fixed salaries, there are a great number of letter carriers and clerks in the Postal Service who, in my judgment, are underpaid. There has been a good deal of agitation in recent years for the establishment of a minimum-wage principle, and some of the private concerns throughout the country have voluntarily, without legislative enactments requiring it, adopted such a principle. I believe the principle to be economically sound and that the Government should not require the clerks and carriers in the first and second class offces who are married and raising families to work for less than \$1,200 a year.

With a view to bringing about economy in the public service, I would suggest, Mr. Chairman, that the President be authorized to appoint a commission of five, to be known as the commission on efficiency and economy in the public service, and that this commission be authorized to examine into and determine what places or positions in the Government can be dispensed with without interfering with in any manner or impairing the efficiency of the service, and that the compensation of such commission be fixed at one-half of whatever sum is saved to the Government in salaries during the first year after the recommendations of such commission have been put into effect.

I desire also to direct the attention of the committee to a

feature of this bill which, in my judgment, should limit or define the duties of the men referred to. I have in mind that section of the bill which provides for the appointment and compensation of inspectors. I know, of course, that inspectors are necessary to the service and that the work of the department could not be efficiently carried on without the aid and assistance of inspectors, but there has been a great deal of complaint among the post-office employees of the undue activity of these inspectors. Some nen, on being appointed inspectors, seem to develop the idea that a proper discharge of their duty as inspectors requires them also to be "spies." I have known of instances where inspectors trailed letter carries days at a time with a view to determining how fast their work was done on certain days and comparing it with the time consumed on the same trips other days. Instances have been cited to me where inspectors have watched the clerks at their work in the post offices day after day with a view to finding out whether or not the persons watched were opening mail. Now, I realize, of course, that some men will go wrong and do things that they should not do, but it seems to me that an inspector who takes it upon himself to dog the footsteps of a man or spy upon a clerk without some basis for suspicion that the person followed or watched requires such following or watching is insulting to the dignity of a respectable man, and the men in the Postal Service, from my knowledge of and observation of them, will compare favorably in character, dignity, and worth with an equal number of men in any other line of employment, and if inspectors, without direction from their superiors and in the wrongful exercise of authority vested in them, do such things, they ought to be called to account for it. If it is done by order of the inspector's superior, there ought to be some basis for the insinuation against the person watched or followed which such conduct If there are inspectors in the service whose work consists exclusively of dogging the footsteps of men or watching them in the offices, the money so expended by the Government could be put to better use. No private concern would subject its employees, under ordinary circumstances, to such humiliation, and the Government of the United States should treat the hard-working, conscientious men of the Postal Service with that same measure of dignity that every honest, law-abiding, industrious man has a right to expect from his employer

Mr. MOON. Mr. Chairman, is the gentleman from Oklahoma, Mr. Murray, on the floor? The gentleman from South Caro-

hira, Muray, on the hoor? The gentleman from South Carolina, Mr. Johnson, seems to be absent, too. Is the gentleman from Kentucky, Mr. Barkley, present? He desires to speak.

They all seem to be absent, Mr. Chairman. Will the gentleman from Michigan [Mr. Samuel W. Smith] occupy some time?

Mr. Samuel W. Smith. I desire to say to the chairman of the committee that I expect some Members are on the way over from the House Office Building, and they will be here in moment

Mr. JOHNSON of Washington. Mr. Chairman, if the gentleman from Michigan [Mr. Samuel W. Smith] will permit, I

desire to place in the RECORD a number of protests from the State of Washington in regard to the destruction of the civil service as planned in this bill. The post offices there are few and far between, but they have reached a high state of excellence through the zealous service of assistant postmasters. ask that they be placed in the RECORD.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to place certain documents mentioned in the

RECORD. Is there objection?

There was no objection.

Mr. JOHNSON of Washington. Mr. Chairman, the hardest worked men among all of the Federal employees in the State of Washington are the assistant postmasters. In a State where the population grows by leaps and bounds every one of them works to the limit. They have little rest; they have few hours of leisure. No Democrats in my great State are clamoring for this additional patronage, so far as I know. They want the civil service improved, not broken down.

I submit an article from the Centralia (Wash.) Daily Chronicle-Examiner, from the pen of Thomas H. Dunckley, which I commend to those who have the real advancement of the Postal

Service at heart:

A BLOW AT THE CIVIL SERVICE.

A second attempt has been made in the House of Representatives to annul civil-service status of assistant postmasters by an amendment added to the Post Office appropriation bill on December 17, 1913, and as a State organization and individual members they should fight and protest against the passage of this amendment. The deputy collectors had no organization and lost only by a small margin, while the assistant postmasters have both State and National associations. The United National Association of Post Office Clerks at its last annual meeting passed resolutions indorsing the Executive orders extending the classification of assistants.

Assistant postmasters in first and second class offices are classified civil-service employees. They are the first set of Government employees whose inclusion by Executive order was qualified and restricted by a requirement that before receiving the benefit of a classified status each one should be subjected to a test to demonstrate to the Postmaster General his efficiency in the position; this applied to all who had not taken a civil-service examination. This order was issued September 30, 1910, and became effective December 1, 1910. This order, therefore, has been in effect a little over three years. The platform adopted at Baltimore contained this:

"The law pertaining to the civil service should be honestly and rigidly enforced to the end that merit and ability shall be the standard of appointment and promotion rather than service rendered to a political party."

Assistant postmasters in first and second class post offices are classified employees of the Post Office Denartment

Assistant postmasters in first and second class post offices are classified employees of the Post Office Department.

It is believed to be conducive to the best interests of the Postal Service that they shall continue to have the same status and the same tenure as all other supervisory employees in first and second class post offices.

same tenure as all other supervisory employees in first and second class post offices.

There are very good reasons why the assistant postmasters in first and second class offices (about 2,400 in all) should be retained. They are experienced; most of them have performed the duties of assistant postmaster for the past 10 or 15 years—some of them longer than that—and it would necessarily take a political appointee, without experience, a long time to become as proficient as the man who has 10 or 15 years' experience behind him.

The new appointee must begin to learn the multitudinous daties of the position exactly where the present one began 10 or 15 years ago. Meantime the service to the public is deficient in the same degree as the relative importance which attaches to the duties of assistant postmaster in any post office.

The present system contemplates promotion of experienced supervisory post-office employees to all vacancies in the position of assistant postmaster, so that the service under such conditions is maintained at a high standard.

The order by which these positions of assistant postmaster were classified was different from all previous orders of this character, in that it provided before any incumbent then in office who had not passed a civil-service examination should become classified he must prove to the satisfaction of the Post Office Department that he was capable of performing the duties of the office in an efficient and satisfactory manner.

prove to the satisfaction of the Post Office Department that he was capable of performing the duties of the office in an efficient and satisfactory manner.

This was a test never before applied to a class of employees covered into the classified service by an Executive order. The result has been that only those who could and did successfully meet the test have been retained and classified.

All the positions in first and second class post offices are now classified, except that of postmaster.

The present incumbents did not all reach their present position without examination and years of practical post-office service; many of them have been promoted from the initial and intervening grades of clerkship and supervisory positions, and are fully conversant with the duties of every position in the office. Those who are classified have long since ceased to be active in politics and are complying strictly with the departmental mandate against political activity or offensive partisanship. Their time is exclusively devoted to post-office service and no part of it is given to political management or committee work. If these positions were thrown open to political preference, the appointees would be compelled to immediately cease their political activity, as required by postal regulations and Executive order.

Mr. Chairman, I desire also to call attention to the following

Mr. Chairman, I desire also to call attention to the following editorial from the Tacoma Daily Ledger:

ASSISTANT POSIMASTERS ARE IMPERILED BY A RIDER,

Democratic hunger for office is far from appeased. One after another, obstructions presented by civil service are being removed to open the way to the pay roll. The most recent effort in that direction is the insertion of a rider on a Post Office appropriation bill, providing that assistant postmasters in first and second class offices shall be taken out of the classified list. That has been done in committee. What Congress as a body will do with the rider remains to be seen, though from

what has already been accomplished one may fairly infer that the heads of assistant postmasters who happen to be Republicans will fall in the basket before long.

When Mr. Taft was President he issued an Executive order placing assistant postmasters under the civil service. We suppose the backers of this order will say that the order had the effect of putting a lot of men in the classified list without requiring them to undergo a civil-service examination. There are said to be about 3,000 positions affected by the Democratic rider.

It was Mr. Taft's idea that assistant postmasters should continue in office, without regard to changes in administration, in order to make sure that there was always an official in a post office familiar with its affairs. In many offices the assistant postmaster is the active executive head. It does not matter much whether the postmaster is on hand or not. Business goes on efficiently anyhow.

If any change is made, instead of overthrowing Mr. Taft's order, it should be so extended as to inleude postmasters, for the postmaster really has no duties of a confidential nature affecting national administration polic'es.

really has no duties of a confidential nature altecting national administration policies.

The growing practice of rider legislation is to be deplored. Instead of attaching such a measure to the Post Office appropriation bill it should be considered separately and on its merits. The Democrats have found the rider a convenient means of hampering the civil service and making places for the faithful. They employed it in the income-tax provision of the tariff bill, in the urgent deficiency bill, and in the banking and currency bill. Now, in their hunger for more spoils, they are proposing to use it to oust assistant postmasters that were covered in the civil-service Executive order in 1910.

Mr. PAYNE. Mr. Chairman, I want to suggest to the gentleman from Tennessee [Mr. Moon] that possibly these gentlemen he is waiting for are taking a Saturday half holiday. I think it would be a good example to follow. The gentleman from

Tennessee is not to blame that they are not here.

Mr. MOON. No; by no means, I take it. Does the gentleman from Michigan [Mr. Samuel W. Smith] desire to have anyone else address the House?

Mr. SAMUEL W. SMITH. As I said, Mr. Chairman, I understand two or three gentlemen are now on their way hither from the House Office Building.

Mr. MOON. Mr. Chairman, I will ask how much time is unexpired?

The CHAIRMAN. The gentleman from Tennessee has occupied 8 hours and 22 minutes, and the gentleman from Michigan

7 hours and 47 minutes.

Mr. MOON. How much time have I left?

The CHAIRMAN. The Chair does not know how much time the gentleman has left. The gentleman has consumed 8 hours and 22 minutes.

Then, I would have an hour and 38 minutes Mr. MOON. left. How much has the gentleman from Michigan?

Mr. SAMUEL W. SMITH. Both of these gentlemen that I referred to are on their way here.

The CHAIRMAN. The gentleman from Michigan has 2 hours

and 13 minutes left. Mr. MOON. Well, the gentleman from Michigan had better

occupy some of the time, then. Mr. SAMUEL W. SMITH. I hope not to detain the com-

mittee but a moment or two. These gentlemen are on their way here.

Mr. MOON. Will the gentleman from Michigan favor us with a speech?

Mr. SAMUEL W. SMITH. I yield five minutes to the gentle-

man from Nebraska [Mr. Barton].

The CHAIRMAN. The gentleman from Nebraska [Mr. Barton] is recognized for five minutes.

Mr. SAMUEL W. SMITH. Or will the gentleman from Tennessee care to have the gentleman from South Carolina [Mr. Johnson] occupy some time now?

Mr. MOON. No.

Mr. SAMUEL W. SMITH. Mr. Chairman, then I yield to the gentleman from Nebraska [Mr. Barron] 10 minutes.

The CHAIRMAN. The gentleman from Nebraska [Mr. BAR-TON] is recognized for 10 minutes.

Mr. BARTON. Mr. Chairman, on October 27 I introduced House resolution No. 295, asking the Secretary of the Treasury for information as to the ownership of certain railroad property in Kansas formerly belonging to the central branch of the Union Pacific. This resolution reads as follows:

House resolution 295.

House resolution 295.

Resolved, That the Secretary of the Treasury be directed to send to the House of Representatives the following information, so far as this information is now contained in the files of the Treasury Department:

First, What corporation now holds title to the 100 miles of railroad extending from Atchison to Waterville, Kans., formerly owned by the Central Branch of the Union Pacific?

Second. Did the United States issue subsidy bonds to this railroad company to the amount of \$1,600,000?

Third. If so, has the principal and interest been paid? If not, state the amount still due.

Fourth. Has the United States made demands upon the present owners of the said railroad for reports of its business?

Fifth. Has the United States commenced action to recover the amount of principal and interest due from said railroad? If so, state action taken by your department.

The resolution was referred to the Ways and Means Committee, and, with many other matters referred to them, is now enjoying quiet repose. Having grave fears that this condition will grow worse and this resolution with its comrades may under the hypnotic influence of this committee sink into its everlasting sleep, I desire now to call the attention of the Members to this resolution.

On the 1st of January of each year it is a common custom of business concerns to collect deferred debts, but our Government does not seem to adhere to this established and good business principle

During the years 1886, 1887, 1888, \$1,600,000 United States subsidiary bonds were delivered to this company. These bonds matured 30 years after date and were dated when issued. They hattreed 30 years after date and were dated when issued. They bore interest at 6 per cent per annum, payable semiannually, on the 1st of July and January of each year. The interest and principal was paid from time to time by the United States as they matured, amounting in the 30 years to \$3,880,000. If to this sum there be added 6 per cent simple interest on the principal was paid to be a sum of the content of the sum of the cipal sums since paid, we have about \$5,250,000, less the amount paid or credited thereon on account of 5 per cent of the net earnings received and one-half transportation charges for carrying Government property, amounting in all to about \$804,000, leaving about \$4,500,000 yet due. In addition to this loan the company received patents to 223,080.50 acres of land.

The Hon, Franklin MacVeagh, then Secretary of the Treas-The front. Frankin Macveagh, then secretary of the Treasury, requested the Hon. W. T. Thompson, then Solicitor of the Treasury, to examine into the condition of this claim and report to him the possibilities of collection. On July 27, 1913, Mr. Thompson, in a well-considered 44-page brief, which I hold in my hand, but which I will not print in the RECORD on account of its length—it is open to the inspection of any Member who is interested in this business—made a careful analysis of the case, and made recommendations as follows:

the case, and made recommendations as follows:

1. That so much of Treasury Department Circular No. 79, dated April 19, 1895, or any other Treasury order which in effect directs the payment of one-half of the transportation charges over this road be paid to the company earning the same, should be revoked, and all such charges should be retained by the Treasury Department and applied to reimburse the Government for interest paid on said subsidy bonds.

2. That the Secretary of the Interior should forthwith make demand upon the present owner of said railroad for reports of said road which it is now in default of to that officer.

3. That demand should be made upon the present owner of the road to pay or reimburse the Government for principal and interest paid on account of the subsidy bonds issued and paid by the Government in aid of the construction of this road.

4. That in the event of the failure on the part of the present owner of the road to reimburse the Government as aforesaid, that an action be directed to be brought to foreclose the Government's subsidy bond lien and for a sale of said road and telegraph line, for an accounting of its net earnings, and for a personal judgment against the present owner of the road for any deficiency which remains unpaid upon said lien and judgment after proper application of the proceeds of said sale.

5. That if it becomes necessary to protect its interest and to secure reimbursement for the moneys expended on account of the subsidy bonds, the United States bid in at the foreclosure sale and take over said road and telegraph properties, and should it be determined that the act of March 3, 1887, did not amount to an appropriation for that purpose, Congress be asked to appropriate a sum sufficient therefor. It is my candid conviction that if these steps are taken with that vigor and determination which the magnitude and importance of the claim demand, the United States will ultimately receive satisfaction of at least the principal of this claim.

Respectfully submitted.

W. T. THOMPSON, Solicitor, Treasury.

To date, so far as I can learn, this amount is still due the Government. The purpose of my resolution was to show the true condition, so that the Members of this body might be fully advised. My reason now for calling this matter to your attention is not only to attract the attention of the Members of this body to the existing condition, but also to attract the attention of the Attorney General.

I prophesy the Democrats will say that a Republican administration did not attempt collection as an excuse for their not taking action. This faulty argument was advanced in defending caucus action and outrages upon the classified civil service, but that kind of argument will not be convincing to the American people. The question as presented to them as to our actions here will not be directed to partisanship, but whether the subject matter treated is right or wrong. If it is right that we proceed to make this collection, and I can not think of one legitimate argument against so doing, then the responsibility of action rests with the Attorney General. If he refuses to accept this responsibility and permits this corporation to keep the sum of \$4,500,000 that belongs to the people of this country, then it is our duty as their representatives to demand that action be taken. I sincerely trust that the Attorney General will do his duty and make this collection; if not, I am going to ask you, the representatives of the people, to assist me in forcing action.

It can not be denied that the Government delivered the bonds; that the company defaulted the principal and some of the interest; that the property is in existence that guaranteed the loan. What would you do if this was your private business? Would

you not enforce collection?

Mr. Chairman, I favor the proposition of building a railroad in Alaska, but when we speak of that some gentlemen have viewed with consternation the proposition that the Government should attempt to put its money into a railroad. Here we have a case where the Government made a loan, and the company still owes the Government, after nearly 35 years, \$4,500,000, and no effort is made to collect the debt, while the Alaska proposition offers to repay the money as the land is sold. [Applause.]

yield back my remaining time.

The CHAIRMAN. The gentleman has one minute remaining. Mr. SAMUEL W. SMITH. I yield one minute to the gentleman from Ohio [Mr. WILLIS].

Mr. WILLIS. Mr. Chairman, I simply want to refer to an interesting state of facts, to which I wished to call the attention of the gentleman from Illinois [Mr. GORMAN] a few moments ago when he declined to yield to me. The gentleman is opposing the Diplomatic Corps and saying that it ought to be abolished. I note that when, on December 3, the vote was had on a bill to establish a perfectly useless ministership to Paraguay the gentleman from Illinois [Mr. Gorman] was not present to vote, but the gentleman from Tennessee [Mr. Moon], whose animadversions upon the Diplomatic Corps have been so generally quoted through the country, was here and voted for the bill to establish an additional office in Paraguay.

Mr. MOON. That was my prerogative. The gentleman would probably vote against all of them if he had the chance. Mr. DONOVAN. I should like to inquire of the gentleman

from Ohio how he voted on that proposition?

Mr. WILLIS. I voted against the bill. Mr. MOON. I yield 20 minutes to the gentleman from South Carolina [Mr. Johnson].

Mr. JOHNSON of South Carolina. Mr. Chairman, I have introduced into the House and had referred to the Committee on the Post Office and Post Roads a bill to do justice to the rural letter carriers. In the first place, it increases their pay from \$1,100 to \$1,200 a year. In the second place, it provides that for all mileage in excess of 24 miles they shall be paid at the rate of \$50 per mile per annum. In the third place, it provides that where a rural carrier is required to carry into the interior and supply a post office with a mail pouch he shall be paid \$10 per

mouth for that service.

Since the passage of the parcel-post law the work of the rural carriers has been very largely increased. I believe that as the parcel post is improved and the people more generally take the benefit of it, the rural letter carriers instead of going out as they now do with their one-horse vehicles will be called upon

to use two horses.

During the Christmas holidays, when I was in my district, I saw some of the carriers as they started out on their morning Packages and parcels were piled up until the men

could just barely look over them.

The Parcel Post Service has provided an especially low rate for packages that are mailed in the country to be carried into the town by the rural carriers. It has provided an especially low rate for parcels that are mailed at the office from which the rural route starts, where there is no railway transportation and nobody handles the package except the office from which the route emanates and the rural carrier from that office. The result of that is that the merchants in the towns and villages are taking advantage of the rural service to send out into the country all sorts of merchandise.

It might surprise some of you gentlemen to know that I saw a sack of flour being carried out by a rural carrier. All manner of merchandise is being sent out by merchants over rural routes, and these carriers are burdened with it. There is no expense to the Government because the packages are mailed at the office from which they travel. It does not involve the matter of railway transportation and the great handling of the matter by the clerks, so that whatever revenues come to the Government by reason of the parcel post in this respect is largely clear profit.

These carriers are not only carrying merchandise to the people in the country, but the people in the country are beginning to learn the advantage of sending their products to towns. And here incidentally I may remark that I have been all the while an ardent advocate of the Parcel Post System. I never did look at it as a means of helping the great mail-order houses to get their merchandise over the country, but I look upon it of State.

as a means to help the people of the country to get their products to town.

Have you ever thought, gentlemen, that if any manufacturing concern had to allow a large part of its products to go to waste that it would either have to charge a very high price for what it did sell or the manufacturer would never pay a dividend? Every up-to-date factory should have a market for all of its products and all of its by-products. We have in this country people out on the farms producing thousands of things like tomatoes, beans, and cabbage that are good to eat but which are going to waste. They absolutely rot, while not far away hun-

dreds of thousands of people are suffering for those very things. Now, there is a wasted energy; there is an economic waste that ought not to be permitted. It has gone on because under our system of transportation there was a missing link, and we have not enabled the farmer to take all that he made to the market. It is just as important for the people and the civilization of this country that all that is produced and is needed should find its way to the markets from the farm as that all that is produced in the factory should find its way to the

That brings me back to these carriers. I believe that the par-cel post is going to be developed, that it is going to be utilized by the people of the country for the purpose of getting their products to the towns. It is going to be used by the merchants in the towns to get their merchandise to the country, and the burden of carrying into effect these beneficial reforms will fall upon the shoulders of these carriers. I think I can safely say that I understand the duties of a rural letter carrier as well as any other Member of Congress. I spent several months in going over the rural routes. I know that they must travel through the heat and dust of summer, that they must travel through the cold of winter. They are subjected to all of the vicissitudes of the weather. While the expense of living has been going up by leaps and bounds these carriers have not escaped. They must not only live, but they must maintain a horse or horses and other outfit.

The CHAIRMAN. The time of the gentleman from South

Carolina has expired.

Mr. Chairman, I yield five min-Mr. SAMUEL W. SMITH.

utes to the gentleman from Michigan [Mr. Hamilton].

Mr. HAMILTON of Michigan, Mr. Chairman, I want to condense into a few words my objection to section 6 of this bill, whereby it is proposed to remove assistant postmasters from the classified service.

The postal system is a business system which touches every home and is part of the working machinery of every business enterprise in the United States. It is important, therefore, that every employee in this vast system should be efficient, and we should be seeking ways to promote this efficiency rather than ways of impairing it.

The essential qualifications of an assistant postmaster are practical knowledge, experience, and administrative ability, and the men who hold these places now are men whose capacity

and efficiency have been tried, tested, and approved.

To take them out of the classified service and fill their places by political appointment is obviously detrimental to the Postal Service and is contrary to the platform declaration of the Democratic Party that-

merit and ability shall be the standard of appointment and promotion rather than service rendered to a politica! party.

This standard has governed these appointments heretofore, and the platform on which a majority of this House was elected condemns the purpose of this provision and puts its advocates in the attitude of repudiating their party pledge for the purpose of injuring the public service.

Mr. SAMUEL W. SMITH. Mr. Chairman, I yield 30 minutes

to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE. Mr. Chairman, at this late hour, Saturday afternoon, I do not intend to take up the question of the Government ownership of railroads in Alaska, as I had hoped to do, but shall confine myself to a subject that will take less time. Perhaps I should begin with a story which may or may not pertain to some of our great Chautauqua lecturers, even to those who find themselves unable to live upon the salaries paid them by the Government. I have no particular one in mind. but my lecturer was visiting an up-State town, where he held forth to the audience, which gradually disappeared. When he had about three-quarters finished the audience had reduced itself to one.

Mr. BRYAN. Will the gentleman yield? Mr. MOORE. I hope the gentleman will not interrupt the story.

Mr. BRYAN. That evidently was not the present Secretary

Mr. MOORE. I said that in the beginning. The gentleman evidently is mistaking himself by reason of the similarity of names. He has mixed himself up with the Secretary of State,

which I much regret.

The lecturer was holding forth and the audience had diminished to one. At the close he said, "I feel that something is due to the audience and I want to thank him for his kindness and patience in remaining until I have concluded my perora-Whereupon the audience promptly arose and said, "You owe me nothing, sir; nothing at all; I am the next speaker on the program." [Laughter.] So I am grateful to the distin-guished gentleman from New York [Mr. PAYNE], who used to make the motion to adjourn, for having held here until this time, and I am grateful to the chairman of the committee [Mr. Moon] for his patience, and to my friend the distinguished minority leader of the Post Office and Post Roads Committee, the gentleman from Michigan [Mr. SMITH], for having yielded me some of his time.

Mr. PAYNE. But none of us are on the program. [Laugh-

Mr. MOORE. I thank you just the same for having remained until these remarks are started, and I hope you will

stay until I have delivered my peroration.

We are discussing the state of the Union, as I understand it, and the state of the Union is such that we may commend the leaders of the House for permitting a general discussion of public questions in the time allowed for the consideration of the Post Office bill. It is evident from what has been said that there is much valuable information concerning the country's welfare which the people have not acquired through the newspapers and which they will not acquire until they subscribe to the Congressional Record and peruse it diligently.

From the Republican point of view, as described by the gentleman from Washington [Mr. HUMPHREY], more men are out tleman from Washington [Mr. HUMPHEY], more men are out of employment, due to the Democratic tariff, than the newspapers generally care to acknowledge, and as the gentleman from Georgia [Mr. HARDWICK] sees it, the Democratic tariff has brought unbounded prosperity, which has made "the country smile and blossom as a rose." No one in particular on the Democratic side refers to any reduction in the high cost of living. I observed that the gentleman from South Carolina [Mr. Johnson], in his eloquent speech on the parcel post a few moments ago, said forcefully and truthfully that the cost of few moments ago, said forcefully and truthfully that the cost of living had been getting higher and higher and higher. He fixed no limitation to the height to which the cost of living has risen, though we have been governed by the Democratic Party for nearly three years in this Congress and for one year from the White House.

But the gentleman from Alabama [Mr. Underwood] blandly quotes the New Year's speech of the Hon. John Wanamaker, delivered before the directors of the Union League of Philadelphia, to show that notwithstanding the uncertainty that besets us in the industrial and mercantile world we ought to cheer up and be hopeful. When he brought Mr. Wanamaker into court as his best witness, the gentleman from Alabama evidently did not know that on the day after Christmas this greatest of American merchants, with his large department stores in Philadelphia and New York, was advertising his readiness to take "the overstocks of manufacturers and jobbers," and that in his advertisements he was telling of the difficulties that confronted the

manufacturers.

In the Philadelphia Record, a Democratic newspaper, a portion of which I have in my hand, in a signed advertisement on the day after Christmas, less than a week before he delivered the address quoted by the gentleman from Alabama, Mr. Wanamaker said:

A station clock needs to be only a minute wrong to make thousands of people miss their trains, and if the pendulum of the clock of business loses a single beat it starts a halting and trembling and worriment from one end of the country to the other.

I do not know whether in writing this paragraph Mr. Wanamaker had in mind the effect upon the country of a change from the system of progress and revenue raising created by the Payne tariff bill or not, but in the next paragraph he says:

There was some such little worry started in Manhattan as long ago as Thanksgiving. Some business brains that were usually as regular as chromometers began to lose minutes. People got to thinking about hard times, and so got to losing time.

Whether Mr. Wanamaker had in mind the passage of the Underwood tariff bill, which was making the people in the factories and foundries mark time, or not, I do not know. In the next paragraph he said:

Men and firms usually very reliable began to do unusual things.

And why? We were changing. We were in a transition period. The textile, the industrial, and the mercantile worlds were wondering what the change would bring about, because

we were to pass from a Republican tariff bill to an uncertain Democratic tariff bill; but he went on in that advertisement the day after Christmas to say:

There was a check and a halt and a wait and a worry in business. Old-time conservative firms stopped buying new stocks and began almost frantically to advertise special sales. Firms even that scarcely ever used the newspapers began to advertise. Manufacturers saw their winter stocks pilling high and joined in the worrying, and all the time people went on about their Christmas merrying and let business worry itself along. And the result is that now—

The day after Christmas, mind you, when ordinarily the stocks would be cleaned out and the bargains would have been taken by people who sought them, no matter what the wages paid to those who made them—the day after Christmas, said Mr. Wanamaker-

there is a congestion of merchandise, and millions of dollars are tied up in winter clothing that people have not found it necessary to buy.

Did they have the money? But we will read further from what Mr. Wanamaker said the day after Christmas:

Most manufacturers and a great many stores are heavily overstocked with these winter goods. The overstocked manufacturers and whole-salers are bound to lose money—

Bound to lose money, he says-

if the owners hold the surplus goods over to the next winter.

Then Mr. Wanamaker said that he had room in his great store to take these surplus stocks, and added:

And we stand ready to take them. We will take the overstocks on hand of manufacturers and jobbers, no matter how large. * * * This means a fine opportunity for the people.

And then he says:

It gives the mill people and ourselves employment when some manufacturers need money. It means, too, in some instances that one dollar will buy as much as two did some months ago.

Mr. BEAKES. Will the gentleman yield?
Mr. MOORE. Yes.
Mr. BEAKES. Does not the gentleman from Pennsylvania think that that was written by some advertising writer like a fire sale?

Mr. MOORE. Mr. Wanamaker's facsimile signature is attached to this and here it is. I know it very well, and I would swear to it in court.

Mr. BEAKES. Does not the gentleman know that the habit of attaching John Wanamaker's signature to advertising-

Mr. MOORE. I venture to say Mr. John Wanamaker would dismiss any man who intimated that was not written by himself and that he was not himself thoroughly qualified to write it. He is proud that he is able to write his own advertisments, and that startling statement comes from him.

Mr. KENNEDY of Connecticut. Will the gentleman permit a

question?

Mr. MOORE. Yes, sir.
Mr. KENNEDY of Connecticut. Is not that the usual advertisement issued by Mr. Wanamaker in all the New York and Philadelphia papers on the day after Christmas?

Mr. MOORE. It may be.

Mr. KENNEDY of Connecticut. Yes, sir.

Mr. MOORE. It may have been in other papers besides Philadelphia, but it has not been customary on the day after Christmas, during the existence of a Republican tariff, that that kind of an advertisement would appear. That advertisement said that manufacturers were overstocked and could not sell their goods; and, in effect, that the people were working half time and at half price in order that shoppers might secure

bargain sales. That is not customary in Republican times.

Mr. KENNEDY of Connecticut. Will the gentleman permit

another question?

Mr. MOORE. Certainly.

Mr. KENNEDY of Connecticut. Does not Mr. Wanamaker issue an advertisement every three months to take over all the surplus stocks of manufacturing concerns?

Mr. MOORE. I am not aware of it if he does. Now, at the time this advertisement appeared, on the day after Christ-

Mr. ASHBROOK. Will the gentleman yield?

Mr. MOORE. Yes; for a question. Mr. ASHBROOK. I saw an editorial in an Ohio paper along about Christmas time in which the statement was alleged to have been made by my good friend Moore of Pennsylvania, and I would like to ask him whether it is a correct statement. Speaking about getting a regional bank for Philadelphia, the gentleman is alleged to have said: "If you can convince President Wilson that it would help the Democratic Party it would come here." Did the gentleman say that?

Mr. MOORE. I guess I did say it; perhaps not literally, but that was the substance of it.

Mr. ASHBROOK. Well, the gentleman is more of a partisan than I assumed he was.

Mr. MOORE. I am a partisan; there is no question about that. I am a Republican and a protectionist.

Mr. ASHBROOK. I will ask the gentleman if he can point to any instance where President Wilson has been guilty of any

such partisanship as he has charged here?

Mr. MOORE. I am glad to do it. The currency bill itself is the finest evidence of partisanship this country has ever seen. The currency bill, passed by a Democratic Congress at the dictation of the President of the United States, gives him, the Democratic President, absolute power to appoint the organization committee and a Federal reserve board of his own party, which Federal reserve board will have authority and jurisdiction over the local reserve boards. Such an evidence of partisanship has not been seen in recent times.

Mr. ASHBROOK. Well, will the gentleman then explain why so many Members on his side of the House voted for that bill? I understand 48 Republicans voted for it.

Mr. MOORE. They may have had reasons of their own for voting for it; but so far as the gentleman from Pennsylvania is concerned, he spoke against the bill and voted against it. thank the gentleman from Ohio for asking me that question,

Mr. FESS. Mr. Chairman, will the gentleman yield? Mr. MOORE. Certainly.

Mr. FESS. Do you know of any administration, from the time of Washington down to the present, where more partisan-

ship has been shown than has been shown by this one?

Mr. MOORE. I am not as good a historian as my friend from Ohio, but during my whole lifetime I have not seen such an exhibition of partisanship as has been displayed by this an exhibition of partisanship as has been displayed by the present administration. I challenge anyone to point to the appointment to public office of anyone who is not a partisan of the present President of the United States. On the other hand, I can point to dozens of appointments made by the President's the Han William Howard Taff from the party predecessor, the Hon. William Howard Taft, from the party of the opposition—dozens of them. Some of the most noted men in this country were so honored by President Taft, although they did not belong to his party. But up to this time I have not heard of a single individual having been appointed by the present President of the United States who is not a full-fledged Democrat. And moreover, whereas the former President of the United States, Mr. Taft, did provide that the assistant postmasters should be treated as of and in the civil service, under the present administration they are to be taken out, and the very bill that we now have under discussion proposes ruthlessly to destroy the vital principles of the Civil Service Reform Association, of which the present President of the United States was an honored vice president.

Mr. BRYAN. Mr. Chairman, will the gentleman yield for a

moment?

The CHAIRMAN. Does the gentleman yield?

Mr. MOORE. Yes.

Mr. BRYAN. In reference to the gentleman's statement about appointments, I feel compelled to make one correction. Mr. Herman W. Craven, of Seattle, Wash., is a member of the Civil Service Commission. He was a Republican until last year, and then he became a member of the Progressive Party

Mr. MOORE. I am sorry my information as to individuals does not go so far as Seattle, but I assume the gentleman's

friend was a Progressive.

Mr. PAYNE. Does not the civil-service law provide in terms that no more than two members of the commission shall be of

the same political party?

Mr. MOORE. Yes; I think the gentleman from New York is correct, and therefore the appointment of the gentleman named by the Member from Washington was in accordance with law and in spite of politics. No doubt if there had been no law, there would have been no deviation in that case from the general rule that has prevailed under this administration, of appointing Democrats only to office.

Mr. FESS. Has it not been necessary, if a man on this side of the House wanted to vote for a measure that came up, that he had to vote for a partisan measure in order to vote for it? Has not every measure been a partisan measure, pushed in a partisan spirit, as the currency bill was, which should not have been a partisan measure, for which I voted?

Mr. MOORE. I do not think there has been a time in our history when so many obnoxious riders, involving important legislation to the country, have been incorporated in appropriation bills, and Members on this side have been compelled either to vote them up or vote them down as a whole,

Mr. FESS. Will the gentleman yield to another question?

Mr. MOORE. Yes. Mr. FESS. Is it not true that in the President's writings, with which the gentleman is familiar, the President is a strict

partisan, and is carrying out his plans now as a partisan administration?

Mr. MOORE. There is no doubt about that whatever.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Pennsylvaria vield?

I do.

Mr. ASHBROOK. How, then, does the gentleman explain the reported attitude of the President as to the rider on the present appropriation bill, which seeks to take the assistant

postmasters out of the civil service?

Mr. MOORE. In very much the same way as we interpret his message, written when he signed the bill which President Taft vetoed because of the rider exempting labor unions and agricultural unions from the operation of the Federal law. The President then said, in substance, that while the rider was not wholly in accordance with his views he would permit it to stand, believing that his party adherents would respect his well-known wishes in the matter, which left a nice, big, broad field for his party leaders to work upon when they want to bring down the ax upon some poor Republican who has a job.

Mr. ASHBROOK. The gentleman has information, then, that I do not have as to the position that the majority will take on that matter that I have mentioned. The chairman of the Committee on the Post Office and Post Roads advocates that the rider be retained in the bill, and I am convinced that a considerable number on the majority side are in favor of it. But I am not sure that the bill will contain that rider when it is

finally enacted into law.

Mr. MOORE. I have a high regard for the courage of the gentleman from Tennessee [Mr. Moon], the chairman of the Committee on the Post Office and Post Roads. He has spoken out boldly and openly here, and said that notwithstanding the declaration of the President he stood for this proposition of

taking over the offices.

Do not misunderstand me. I do not object to Democratic leaders taking over the offices. They won them. They won them by a fluke, it is true, but they won them nevertheless, and they are entitled to them. As a Republican, I am not asking any special favors on that line. But when the President of the United States leaves the question up to Congress you can de-pend upon the distinguished gentleman from Tennessee [Mr. Moon] or the distinguished gentleman from Alabama [Mr. Underwood] or on any other practical Democrat to see to it that you get all the offices just the same, notwithstanding the President's well-known principles.

Mr. FESS. Mr. Chairman, will the gentleman again yield

to me? The CHAIRMAN. Will the gentleman yield?

Mr. MOORE. I do.

Mr. FESS. In the case of this appropriation bill, for which we want to vote because we want to see the Postal Service car-ried on through the instrumentality of this bill, which carries a \$205,000,000 appropriation, is it not absolutely necessary, if we vote for the bill, to vote for a principle that we condemn, namely, section 6, which is placed in the bill? Is that fair?

Mr. MOORE. That is absolutely true.

Mr. FESS. Is that fair?

Mr. MOORE. No; it is not fair. It is not only unfair but it is cruel to the man who has convictions of his own. In other words, if you want to see the letter carriers paid their salaries, if you want to pay what they justly earn to the rural free-delivery carriers, if you want the boys in the post offices to obtain their pay checks, you have got to swallow the anti-civil-service provision in this bill. If you vote against the bill you vote against paying the ordinary expenses of the Government; you vote against paying the wages of the men who work for the Government, or to do this you are forced into the position of violating your principles upon the civil service. There never was a more vicious legislative proposition.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. MOORE. Yes.

Mr. GARRETT of Tennessee. The gentleman has referred to the appointments of the President of the United States as partisan appointments. He has said that a former President made some appointments from another party than his own. I take it that the gentleman from Pennsylvania [Mr. Moore] has followed the custom of Congressmen generally, and that during the time when his party was in power he made recommenda-tions for appointments. Did the gentleman, at any time, ever recommend a Democrat for appointment for any office?

Mr. MOORE. I have said nice, kind words about straight

Democrats

Mr. GARRETT of Tennessee. The precise question which I asked the gentleman was: During the time that his party was in power and while he, following the custom that Representatives have followed for a long, long time, was making recommendations to the appointing authorities, whether he ever recommended any Democrat for appointment?
Mr. MOORE. To a Republican President?

Mr. GARRETT of Tennessee. Yes.

Mr. MOORE. I question whether I have; but that does not interfere with my feeling that if the President of the United States wants to appoint a Democrat or a Republican because he is competent he may be getting a good man for the place.

A moment ago when these interruptions came I was speaking about Mr. Wanamaker's advertisement, indicating that manufacturers were hard put to dispose of their overplus stock on the day after Christmas. The Christmas shopping had been The people had spent their Christmas money, and there was an overplus of stock. Mr. Wanamaker was willing to buy it so that it might be sold at 50 cents on the dollar. I do not know whether it is fair to ask the question now, but who obtains the most advantage out of a situation like that, the woman who rushes to the bargain-counter sale to obtain goods at 50 per cent of the usual price, or the woman who is turned out of the mill when the manufacturer closes down because of his overplus of stock? Which is best for the country, which is best for the people-cheap goods, or cheap wages, or no wages

When this "day after Christmas" advertisement appeared it was publicly said by men who knew what they were talking about that there were from 25,000 to 30,000 mill hands idle in the district of Kensington alone because of overplus of stockgoods made up for Christmas, and so forth. The department stores had been advertising an avalanche of foreign goods that could be had cheap, and it was said the price of American goods had come down. Many men in the manufacturing business in Philadelphia therefore could not dispose of their stock, and on "the day after Christmas" the opportunity was offered to them to dispose of what they had at 50 cents on the dollar. At that time it was reported in the Public Ledger that from 25,000 to 30,000 men and women were idle in the mill district of Kensington. These were American laborers out of work.

What Mr. Wanamaker had to say on "the day after Christ-mas" attracted great attention in the city of Philadelphia. Men commented upon it. It was regarded first as a business move, the move of a great business man attracting trade to himself and to his large enterprises; commendable from the merchant's viewpoint and most up-to-date; but men marveled at it and wondered why it was that there had been such an overplus of stock in the warehouses of the manufacturers and why they could not have been sold before Christmas and were still piled up mountain high on the day after Christmas.

So the question was brought up to Mr. Wanamaker, and on

the 3d of January he inserted in the newspapers another advertisement, which I shall read.

Mr. Wanamaker knows how to catch the public eye, and he does it marvelously well. His record is one of great success in the mercantile world. Here is what he said three days after the speech that was quoted by the gentleman from Alabama:

A CITIZEN'S QUESTION TO MR. WANAMAKER.

If Mr. Wanamaker is so optimistic, why does he advertise that he will take stocks of merchandise out of the hands of manufacturers and jobbers?

will take stocks of merchandise out of the hands of manufacturers and jobbers?

Does not this denote that he realizes that there are bad times upon us? Nobody can answer this better than the writer himself. And this is the answer:

Nothing is so deadening to business as stagnant merchandise, cased up in boxes in the lofts of the mill or on storage in commission houses eating up interest, which is a terrific incubus upon the manufacturer and jobber. Such situations are common every year, and particularly this year, when everybody has been looking at the new tariff and some of them saying, "We can't tell which way the cat will jump."

There are times in business when the banks draw in their funds and curtail their discounts; at such times the manufacturer has nothing to finance with except his manufactured product.
